Rule 12d3–1 under the 1940 Act (17 CFR 270.12d3–1) provides exemptive relief to permit investment companies to purchase or otherwise acquire securities issued by persons engaged in securities related activities, subject to certain limitations. Under rule 12d3–1, an investment company, including any money market fund, may acquire puts issued by persons engaged in securities related activities, provided that the company complies with the diversification requirements in rule 2a–7.[207] Rule 2a41–1 (17 CFR 270.2a41–1) under the 1940 Act allows investment companies to assign a fair value of zero to standby commitments under certain conditions.[208] The Commission is proposing to amend rule 12d3–1 to reflect the proposed diversification limitations,[209] and to amend rule 2a41–1 to revise the reference therein to rule 2a–7.

[197] Recent money market fund inspections suggest that approximately seventy percent of national fund and sixty-one percent of single state fund assets are subject to unconditional credit enhancements.

[198] Financial statements are included in a fund's Statement of Additional Information that is part of the fund's registration statement under the Securities Act of 1933 and must be delivered on request to prospective investors. See Items 1 and 23 of Form N–1A (17 CFR 230.15A and 274.11A). They are also included in fund semi-annual and annual reports to shareholders. See rule 30d–1 under the 1940 Act (17 CFR 270.30d–1).

[199] See section 210.12–12 of Regulation S–X.

[200] 17 CFR 210.12–12 as proposed to be amended. Funds would also be required to maintain a written record of the liquidity and credit enhancements associated with each portfolio security under the proposed amendment to rule 31a–1. See supra Section II.D.7.

[201] Paragraph (a)(7) of rule 482 (17 CFR 230.482(a)(7)) and introductory paragraph of rule 34b–1 (17 CFR 270.34b–1).

[202] See supra notes 12 and 28 and accompanying text.

[203] The definition of "affiliated person" is contained in section 2(a)(3) of the 1940 Act (15 U.S.C. 80a–2(a)(3)).

[204] Paragraph (c)(5)(ii) of rule 2a–7 requires funds holding a defaulted security to dispose of the security as soon as practicable consistent with achieving an orderly disposition of the security, unless the fund board concludes that disposal would not be in the best interests of the fund.

[205] Paragraph (c)(5)(iii) of rule 2a–7.

[206] As in the case of a default and a security no longer being an eligible security, in this instance the rule requires the fund to dispose of the security as soon as practicable. See paragraph (c)(5)(ii) of rule 2a–7.

[207] See Release 14983, supra note 64. These diversification requirements were not changed by the 1991 Amendments except to make them applicable to taxable funds with respect to 100 percent of these funds' assets.

[208] Id.

[209] See supra Section II.C.2.a.

VI. Transition Period

If the proposed rule and form amendments are adopted, the Commission would expect to make the amendments effective ninety days after publication in the Federal Register to provide registrants, issuers, and other participants in the money markets with an appropriate period of time to make any changes required by the rule. Comment is requested on whether ninety days would be sufficient or whether a shorter or longer period would be appropriate.

VII. General Request for Comments

Any interested persons wishing to (1) submit written comments on the proposed rule and form changes that are the subject of this Release; (2) suggest additional changes (including changes to provisions of rule 2a–7 that the Commission is not proposing to amend); or (3) submit comments on other matters that might have an effect on these proposals, are requested to do so. Commenters suggesting alternative approaches are encouraged to submit proposed rule text.

VIII. Cost/Benefit of the Proposal

The Commission believes that the proposals discussed above will not substantially increase costs for money market funds. Whatever increased costs are incurred should be outweighed by the benefits of increased money market fund safety. Most national funds already comply with the Five Percent Diversification test, and those national funds not in compliance should be able to adapt to the proposed limit without great expense. Because most single state fund assets consist of first tier securities, these funds are not likely to incur significant additional costs if the proposal to limit their investments to first tier securities is adopted.

The Commission believes that although most funds meet the proposed quality and diversification requirements for put providers, a significant minority of funds may not. The Commission requests comments on the extent to which finding alternative put providers will increase fund costs. The conditions proposed with respect to ABSs may impose some additional costs on funds, but it is not expected that these costs will be significant and they should be outweighed by the benefits of clarifying the conditions under which funds may invest in these instruments, which may facilitate development of the ABSs markets. The proposed rescission of the requirement that boards of directors of taxable funds approve or ratify unrated and single-rated securities should reduce fund costs to a limited extent. Most funds currently meet the proposed recordkeeping requirements, and these should impose only modest costs on funds. The proposed disclosure requirements would not impose any expense for funds, since it is anticipated that additional disclosure will be permitted to be added when the funds make their annual updates. These costs should be outweighed by the benefits of additional disclosure. The proposed exemptive rule governing purchases of certain portfolio securities from funds by fund affiliates should produce savings in administrative expenses for those funds that hold securities that are no longer eligible for fund investment and whose advisers wish to repurchase the security as permitted by the rule.

The Commission requests specific comment on its assessment of the costs and benefits associated with the proposal, including specific estimates of costs and benefits.

IX. Summary of Initial Regulatory Flexibility Analysis

An Initial Regulatory Flexibility Analysis has been prepared in accordance with 5 U.S.C. 603 concerning the proposed amendments. The analysis explains that in February 1991 the Commission adopted amendments to rule 2a–7 to tighten the risk-limiting conditions of the rule. These amendments were applicable primarily to taxable money market funds. Thereafter, the Commission examined the characteristics of tax exempt funds and the markets in which they trade to determine whether the same or similar amendments should apply to tax exempt funds. This examination has revealed certain areas of concern that have led the Commission to propose further amendments to rule 2a–7 applicable primarily to tax exempt funds. The analysis describes the characteristics of tax exempt funds and explains that the safety of these funds would be increased by application of certain risk-limiting conditions tailored specifically to their characteristics.

The analysis summarizes the proposed amendments to rule 2a–7 and related rules and forms and a new proposed rule. The amendments to rule 2a–7 would tighten the conditions of the rule relating to the quality and diversity of tax exempt fund investments, including puts. The amendments would require funds to reevaluate at least annually the credit risks of certain long-term portfolio investments, and limit investments in such securities to those whose issuers supply periodic financial and other information. The amendments to related rules and forms would require ongoing credit reviews and certain other procedures with respect to fund investments in securities subject to puts. A new exemptive rule would permit funds to sell securities that are no longer eligible securities to advisers and other affiliated persons without obtaining exemptive relief.

The analysis states that the objectives of the proposals are to (1) tighten the quality standards in the rule; (2) reduce the exposure of tax exempt funds to the credit risks posed by investment in a single issuer; (3) limit risks associated with investing in securities subject to puts, including ABSs; (4) provide for continuing determinations with respect to the credit quality of issuers of certain long-term securities; (5) rationalize the provisions of the rule relating to the determination of maturity of certain instruments; (6) allow fund boards of directors to delegate certain portfolio management responsibilities, subject to oversight; (7) improve fund recordkeeping; and (8) limit the risks associated with investing in repurchase agreements. The objectives of the amendments to related rules and forms are intended to improve money market fund disclosure relating to (1) fund investments in securities subject to puts; and (2) lack of diversification of certain single state funds. The objective of proposing a new exemptive rule under section 17(a) is to facilitate certain transactions between funds and their affiliates that benefit shareholders.

The analysis states that as of September 29, 1993, 211 money market funds are small entities for purposes of rule 0–10 of the 1940 Act (17 CFR 270.0–10). Of these 211 funds, ninety-three were tax exempt funds. The proposed amendments would primarily affect tax exempt funds.

The analysis states that the reporting, recordkeeping and other compliance requirements of the proposed amendments should not be significantly greater than those currently imposed by rule 2a–7, and that the additional costs, if any, should not be any greater for small money market funds than for other money market funds. The analysis further states that the Commission believes that there are no duplicative, overlapping or conflicting rules.

The analysis discusses the significant alternatives to the proposed amendments that would accomplish their objectives while minimizing any significant economic effect of the proposals on small funds. For example, the analysis states that the Commission considered the establishment of different compliance or reporting requirements or timetables that would take into account the resources available to small money market funds, and the simplification of compliance and reporting requirements under rule 2a–7 for small money market funds. The use of performance rather than design standards was considered. Lastly, the Commission considered the alternative of exempting small money market funds from one or more of the conditions of the rule. The analysis concludes that these alternatives would not accomplish the objectives of the rule, nor would the alternatives be consistent with the statutory mandate of the Commission under the 1940 Act. A copy of the analysis may be obtained by contacting Martha H. Platt, Office of Disclosure and Adviser Regulation, Division of Investment Management, U.S. Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

X. Statutory Authority

The Commission is proposing to amend rule 2a–7 under the exemptive authority set forth in sections 6(c) (15 U.S.C. 80a–6(c)), 22(c) (15 U.S.C. 80a–22(c)), 34(b) (15 U.S.C. 80a–33(b)), and 38(a) (15 U.S.C. 80a–37(a)) of the Investment Company Act of 1940. The authority citations for the amendments to the rules and forms precede the text of the amendments.

XI. Appendices

Appendix A

The following table sets forth the terminology used by the NRSROs to characterize their highest ratings for taxable short-term debt:

Moody's (P–1)	S&P (A–1)	Fitch (F–1)	D&P (Duff–1)	IBCA (A1+)	TBW (TBW–1)
Superior	Strong	Very strong	Very high certainty of timely repayment	Very highest quality	Very strong

APPENDIX B

The following table sets forth the ratings categories of the principal NRSROs that rate tax-exempt notes and the meaning that the NRSROs ascribe to the rating:

	Moody's	S&P	Fitch
MIG–1	Best quality		
SP–1		Very strong or strong	
F–1			Very strong
MIG–2	High quality		
SP–2		Satisfactory	
F–2			Good
MIG–3	Favorable quality		
SP–3		Speculative	
F–3			Fair
MIG–4	Adequate quality		
F–S			Weak
SG	Speculative quality		
D			Actual or imminent default

XII. Text of Proposed Rule and Form Amendments

List of Subjects in 17 CFR Parts 210, 230, 239, 270 and 274

Investment companies, Reporting and recordkeeping requirements, Securities.

For the reasons set out in the preamble, the Commission is proposing to amend chapter II, title 17 of the Code of Federal Regulations as follows:

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. The authority citation for part 210 continues to read as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 77aa(25), 77aa(26), 78*l*, 78m, 78n, 78o(d), 78w(a), 78*ll*(d), 79e(b), 79j(a), 79n, 79t(a), 80a–8, 80a–20, 80a–29, 80a–30, 80a–37a, unless otherwise noted.

2. Section 210.12–12 is amended by adding the following as the second sentence in footnote two:

§ 210.12–12 Investment in securities of unaffiliated issuers

* * * * *

2 * * * In the case of a money market fund, also identify any institution providing a put (as defined in rule 2a–7 under the Investment Company Act of 1940 [§ 270.2a–7 of this chapter]) or guarantee with respect to a portfolio security and give a brief description of the nature of the put (e.g., unconditional demand feature, conditional demand feature, guarantee, letter of credit, or bond insurance). * * *

* * * * *

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

3. The authority citation for Part 230 continues to read in part as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78l, 78m, 78n, 78o, 78w, 79*ll*(d), 79t, 80a–8, 80a–29, 80a–30, and 80a–37, unless otherwise noted.

* * * * *

4. Section 230.134 is amended by adding paragraph (e) to read as follows:

§ 230.134 Communications not deemed a prospectus.

* * * * *

(e) In the case of an investment company registered under the Investment Company Act of 1940 that holds itself out as a "money market fund," a communication used under this section shall contain the disclosure required by § 230.482(a)(7).

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

5. The authority citation for part 270 is amended by removing the third paragraph in the sub-authority to read as follows:

Authority: 15 U.S.C. 80a–1 et seq., 80a–37, 80a–39 unless otherwise noted;

* * * * *

6. Section 270.2a–7 is revised to read as follows:

§ 270.2a–7 Money market funds.

(a) *Definitions.*

(1) *Amortized Cost Method* of valuation shall mean the method of calculating an investment company's net asset value whereby portfolio securities are valued at the fund's acquisition cost as adjusted for amortization of premium or accretion of discount rather than at their value based on current market factors.

(2) *Asset Backed Security* shall mean a fixed income security issued by a Special Purpose Entity (as hereinafter defined), substantially all of the assets of which consist of Qualifying Assets (as hereinafter defined). *Special Purpose Entity* shall mean a trust, corporation, partnership or other entity organized for the sole purpose of issuing fixed income securities which entitle their holders to receive payments that depend primarily on the cash flow from Qualifying Assets, but does not include a registered investment company. *Qualifying Assets* shall mean financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period, plus any rights or other assets designed to assure the servicing or timely distribution of proceeds to security holders.

(3) *Business day* shall mean any day, other than Saturday, Sunday, or any customary business holiday.

(4) *Collateralized Fully* in the case of a repurchase agreement shall mean that:

(i) The value of the securities collateralizing the repurchase agreement (reduced by the transaction costs (including loss of interest) that the money market fund reasonably could expect to incur if the seller defaults) is, and during the entire term of the repurchase agreement remains, at least equal to the Resale Price (as defined hereinafter) provided in the agreement; and

(ii) The money market fund or its custodian either has actual physical possession of the collateral or, in the case of an instrument registered on a book entry system, the book entry is maintained in the name of the money market fund or its custodian; and

(iii) The money market fund retains an unqualified right to possess and sell the collateral in the event of a default by the seller; and

(iv) The collateral consists entirely of securities that are direct obligations of, or that are fully guaranteed as to principal and interest by, the United States or any agency thereof, and/or certificates of deposit, bankers' acceptances which are eligible for acceptance by a Federal Reserve Bank, and, if the seller is a depositary institution as defined in 12 U.S.C. 1813(c), mortgage related securities (as such term is defined in section 3(a)(41) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(41)) that, at the time the repurchase agreement is entered into, are rated in the highest rating category by the Requisite NRSROs; and

(v) *Resale Price* shall mean the purchase price paid to the seller of the securities plus the accrued resale premium on such purchase price. The accrued resale premium shall be the amount specified in the repurchase agreement or the daily amortization of the difference between the purchase price and the resale price specified in the repurchase agreement.

(5) A *Conditional Demand Feature* shall mean a Conditional Put that is also a Demand Feature.

(6) A *Conditional Put* shall mean a Put that is not an Unconditional Put, provided that its exercise is subject only to one or more of the following conditions:

(i) A default in the payment of principal of or interest on the underlying security;

(ii) An Event of Insolvency with respect to the issuer of the underlying security or guarantor of the underlying security;

(iii) The downgrading of the underlying security or a guarantor of the underlying security by more than two full rating categories by an NRSRO; and

(iv) In the case of a security the interest payments on which purport to be exempt from federal income tax, a determination of taxability by the Internal Revenue Service.

(7) *Conduit Security* shall mean a security issued by a state or territory of the United States (including the District of Columbia), or any political subdivision or public instrumentality thereof, which is not:

(i) Payable from the revenues of such governmental unit;

(ii) Unconditionally guaranteed by such governmental unit;

(iii) Related to a project or facility owned and operated by such governmental unit; or

(iv) Related to a facility leased to and under the control of an industrial or commercial enterprise that is part of a public project which, as a whole, is owned by and under the control of such governmental unit.

(8) *Demand Feature* shall mean a Put that may be exercised either:

(i) At any time on no more than 30 days' notice; or

(ii) At specified intervals not exceeding 397 calendar days and upon no more than 30 days' notice;

Provided, however, that in the case of an Asset Backed Security, a feature permitting the holder of the Asset Backed Security to receive principal and interest within thirteen months of making demand shall be deemed a Demand Feature.

(9) *Eligible Security* shall mean:

(i) A security with a remaining maturity of 397 days or less that is rated (or that has been issued by an issuer that is rated with respect to a class of Short-term debt obligations, or any debt obligation within that class, that is comparable in priority and security with the security) by the Requisite NRSROs in one of the two highest rating categories for Short-term debt obligations (within which there may be sub-categories or gradations indicating relative standing); or

(ii) A security:

(A) That at the time of issuance was a Long-term debt obligation but that has a remaining maturity of 397 calendar days or less, and

(B) Whose issuer has received from the Requisite NRSROs a rating, with respect to a class of Short-term debt obligations (or any debt obligation within that class) that is now comparable in priority and security with the security, in one of the two highest rating categories for Short-term debt obligations (within which there may be sub-categories or gradations indicating relative standing); or

(iii) An Unrated Security (other than a security subject to a Demand Feature or an Asset Backed Security) that is of comparable quality to a security meeting the requirements of paragraphs (a)(9) (i) or (ii) of this section, as determined by the money market fund's board of directors; *Provided, however,* that:

(A) The board of directors may base its determination that a Standby Commitment that is not a Demand Feature is an Eligible Security upon a finding that the issuer of the commitment presents a minimal risk of default;

(B) A security that at the time of issuance was a Long-term debt obligation but that has a remaining maturity of 397 calendar days or less and that is an Unrated Security is not an Eligible Security if the security has a Long-term rating from any NRSRO that is not within the NRSRO's two highest categories (within which there may be sub-categories or gradations indicating relative standing);

(C) An Asset Backed Security shall not be an Eligible Security unless:

(*1*) It has short-term debt rating from an NRSRO and,

(*2*) In the case of an Asset Backed Security that has a final maturity of greater than 397 days that is subject to a Conditional Demand Feature and the Qualifying Assets of which do not consist of securities that have a long-term debt rating from an NRSRO; and

(D) A security that is subject to a Demand Feature shall not be an Eligible Security unless the Demand Feature has received a rating from an NRSRO (or the issuer of the Demand Feature has received from an NRSRO a rating with respect to a class of short-term debt obligations or any debt obligation within that class that is comparable in priority and security to the Demand Feature).

(10) *Event of Insolvency* shall mean, with respect to an issuer or guarantor, an admission of insolvency, the application by the issuer or guarantor for the appointment of a trustee, receiver, rehabilitator, or similar officer for all or substantially all of its assets, a general assignment for the benefit of creditors, the filing by the issuer of a voluntary petition in bankruptcy or application for reorganization or an arrangement with creditors, or the institution of similar proceedings by another person (other than a governmental agency responsible for regulating the activities of the issuer or guarantor) which is not contested by the issuer or guarantor.

(11) *First Tier Security* shall mean any Eligible Security that:

(i) Is rated (or that has been issued by an issuer that is rated with respect to a class of Short-term debt obligations, or any debt obligation within that class, that is comparable in priority and security with the security) by the Requisite NRSROs in the highest rating category for Short-term debt obligations (within which there may be sub-categories or gradations indicating relative standing); or

(ii) Is a security described in paragraph (a)(9)(ii) of this section whose issuer has received from the Requisite NRSROs a rating, with respect to a class of Short-term debt obligations (or any debt obligation within that class) that now is comparable in priority and security with the security, in the highest rating category for Short-term debt obligations (within which there may be sub-categories or gradations indicating relative standing); or

(iii) Is an Unrated Security that is of comparable quality to a security meeting the requirements of paragraphs (a)(11)(i) and (ii) of this section, as determined by the fund's board of directors; or

(iv) Is a security issued by a registered investment company that is a money market fund.

(12) *Floating Rate Security* shall mean a security the terms of which provide for the adjustment of its interest rate whenever a specified interest rate (such as a bank's designated prime lending rate) changes and which, at any time until the final maturity of the instrument or the period remaining until the principal amount can be recovered through demand, can reasonably be expected to have a market value that approximates its par value.

(13) *Government Security* shall mean any Government security as defined in section 2(a)(16) of the Act.

(14) *Long-term* shall mean having a remaining maturity greater than 366 days.

(15) *NRSRO* shall mean any nationally recognized statistical rating organization, as that term is used in paragraphs (c)(2)(vi) (E), (F) and (H) of § 240.15c3–1 of this chapter that is not an affiliated person, as defined in section 2(a)(3)(c) of the Act (15 U.S.C. 80a–2(a)(3)(c)), of the issuer of, or any insurer, guarantor or provider of credit support for, the security.

(16) *Penny-Rounding Method* of pricing shall mean the method of computing an investment company's price per share for purposes of distribution, redemption and repurchase whereby the current net asset value per share is rounded to the nearest one percent.

(17) A *Put* shall mean a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred or assigned only with the underlying security or securities.

(18) *Refunded Security* shall mean a debt security the principal and interest payments of which are to be paid by Government Securities ("deposited securities") that have been irrevocably placed in an escrow account pursuant to agreement between the issuer of the debt security and an escrow agent that is not an affiliated person, as defined in section 2(a)(3)(c) of the Act (15 U.S.C. 80a–2(a)(3)(c)), of the issuer of the debt security, and, in accordance with such escrow agreement, are pledged only to the payment of the debt security and, to the extent that excess proceeds are available after all payments of principal, interest, and applicable premiums on the Refunded Securities, the expenses of the escrow agent; *provided* that:

(i) The deposited securities shall not be redeemable prior to their final maturity;

(ii) At the time the deposited securities are placed in the escrow account, an independent certified public accountant or an NRSRO shall have certified to the escrow agent that the deposited securities will satisfy all scheduled payments of principal, interest and applicable premiums on the Refunded Securities; and

(iii) The escrow agreement shall prohibit the substitution of the deposited securities unless the substituted securities are Government Securities and, at the time of such substitution, the escrow agent shall have received a certification substantially the same as that required by paragraph (a)(18)(ii) of this section which certification shall give effect to the substitution.

(19) *Requisite NRSROs* shall mean:

(i) Any two NRSROs that have issued a rating with respect to a security or class of debt obligations of an issuer, or

(ii) If only one NRSRO has issued a rating with respect to such security or class of debt obligations of an issuer at the time the fund purchases or rolls over the security, that NRSRO.

(20) *Second Tier Security* shall mean any Eligible Security that is not a First Tier Security.

(21) *Short-term* shall mean having a remaining maturity of 366 days or less.

(22) *Single State Fund* shall mean a Tax Exempt Fund that holds itself out as primarily distributing income exempt from the income taxes of a specified state or locality.

(23) *Standby Commitment* shall mean a Put that entitles the holder to achieve same day settlement and to receive an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise.

(24) *Tax Exempt Fund* shall mean any money market fund that holds itself out as distributing income exempt from regular federal income tax.

(25) *Total Assets* shall mean, with respect to a money market fund using the Amortized Cost Method, the total amortized cost of its assets and, with respect to any other money market fund, the total market-based value of its assets.

(26) An *Unconditional Demand Feature* shall mean an Unconditional Put that is also a Demand Feature.

(27) An *Unconditional Put* shall mean a Put, any guarantee, or letter of credit or similar unconditional credit enhancement that by its terms would be readily exercisable in the event of a default in payment of principal or

interest on the underlying security or securities.

(28) *United States Dollar-Denominated* shall mean, with reference to a security, that all principal and interest payments on such security are payable to security holders in United States dollars under all circumstances and that the interest rate of, the principal amount to be repaid, and the timing of payments related to such security do not vary or float with the value of a foreign currency, the rate of interest payable on foreign currency borrowings, or with any other interest rate or index expressed in a currency other than United States dollars.

(29) An *Unrated Security* shall mean:

(i) A security with a remaining maturity of 397 days or less issued by an issuer that did not, at the time it was acquired or rolled over by the fund, have a current short-term rating assigned by any NRSRO:

(A) To the security, or

(B) To the issuer of the security with respect to a class of Short-term debt obligations (or any debt obligation within that class) that is comparable in priority and security with the security, or a Demand Feature with respect to the security; and

(ii) A security:

(A) That at the time of issuance was a Long-term debt obligation but that has a remaining maturity of 397 calendar days or less, and

(B) Whose issuer had not at the time it was acquired or rolled over by the fund received from any NRSRO a rating with respect to a class of Short-term debt obligations (or any debt obligation within that class) that now is comparable in priority and security with the security; and

(iii) A security that is a rated security and is the subject of an external credit support agreement (including an arrangement by which the security has become a Refunded Security) that was not in effect when the security (or the issuer) was assigned its rating unless the security has a rating from an NRSRO reflecting the existence of the credit support agreement.

(iv) A security is not an Unrated Security if any Short-term debt obligation ("reference security") that is issued by the same issuer and is comparable in priority and security with that security is rated by an NRSRO. The status of such security as an Eligible Security or First Tier Security shall be the same as that of the reference security.

(30) A *Variable Rate Security* shall mean a security the terms of which provide for the adjustment of its interest rate on set dates (such as the last day of a month or calendar quarter) and which, upon each adjustment until the final maturity of the instrument or the period remaining until the principal amount can be recovered through demand, can reasonably be expected to have a market value that approximates its par value.

(b) *Holding Out.* It shall be an untrue statement of material fact within the meaning of section 34(b) of the Act (15 U.S.C. 80a–33(b)) for a registered investment company, in any registration statement, application, report, account, record, or other document filed or transmitted pursuant to the Act, including any advertisement, pamphlet, circular, form letter, or other sales literature addressed to or intended for distribution to prospective investors that is required to be filed with the Commission by section 24(b) of the Act (15 U.S.C. 80a–24(b)) to:

(1) Adopt the term *money market* as part of its name or title or the name or title of any redeemable securities of which it is the issuer, or

(2) Hold itself out to investors as, or adopt a name which suggests that it is, a money market fund or the equivalent of a money market fund, unless such registered investment company meets the conditions of paragraphs (c)(2), (c)(3), and (c)(4) of this section. For purposes of this paragraph, a name which suggests that a registered investment company is a money market fund or the equivalent thereof shall include one which uses such terms as "cash," "liquid," "money," "ready assets" or similar terms.

(c) *Share Price Calculations.* The current price per share, for purposes of distribution, redemption and repurchase, of any redeemable security issued by any registered investment company ("money market fund"), notwithstanding the requirements of section 2(a)(41) of the Act (15 U.S.C. 80a–2(a)(41)) and of §§ 270.2a–4 and 270.22c–1 thereunder, may be computed by use of the Amortized Cost Method or the Penny-Rounding Method; *Provided, however,* that:

(1) *Board Findings.* The board of directors of the money market fund shall determine, in good faith, that it is in the best interests of the fund and its shareholders to maintain a stable net asset value per share or stable price per share, by virtue of either the Amortized Cost Method or the Penny-Rounding Method, and that the money market fund will continue to use such method only so long as the board of directors believes that it fairly reflects the market-based net asset value per share.

(2) *Portfolio Maturity.* The money market fund shall maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share or price per share; *Provided, however,* that the money market fund will not:

(i) Except as provided in paragraph (c)(2)(ii) of this section, purchase any instrument with a remaining maturity of greater than 397 calendar days, or

(ii) In the case of a money market fund not using the Amortized Cost Method, purchase a Government Security with a remaining maturity of greater than 762 calendar days; or

(iii) Maintain a dollar-weighted average portfolio maturity that exceeds ninety days.

(3) *Portfolio Quality.* The money market fund shall limit its portfolio investments, including Puts and repurchase agreements, to those United States Dollar-Denominated securities that its board of directors determines present minimal credit risks (which determination must be based on factors pertaining to credit quality in addition to the rating assigned to such securities by an NRSRO) and which are at the time of acquisition Eligible Securities and, in the case of a Single State Fund, First Tier Securities. For purposes of this section:

(i) A security that is subject to an Unconditional Demand Feature may be determined to be an Eligible Security or a First Tier Security based solely on whether the Unconditional Demand Feature is an Eligible Security or First Tier Security, as the case may be; and

(ii) A security that is subject to a Conditional Demand Feature may be determined to be an Eligible Security or a First Tier Security only if:

(A) The Conditional Demand Feature is an Eligible Security or First Tier Security, as the case may be, and,

(B) The security (or the Long-term debt securities of the issuer of the security subject to the Conditional Demand Feature) has been rated by the Requisite NRSROs in one of the two highest rating categories for Long-term debt obligations (within which there may be sub-categories or gradations indicating relative standing), or, if unrated, are determined to be of comparable quality by the money market fund's board of directors.

(4)(i) *Portfolio Diversification: Taxable Funds.* (A) Immediately after the acquisition of any security (other than a Government Security), a money market fund that is not a Tax Exempt Fund shall not have invested more than five percent of its Total Assets in securities issued by the issuer of the security; *Provided, however,* that a fund may invest more than five percent of its Total Assets in the First Tier Securities of a single issuer for a period of up to three Business days after the purchase thereof; *Provided, further,* that such investments made by the money market fund in accordance with the foregoing proviso at any time may not exceed twenty-five percent of the money market fund's Total Assets; and

(B) In the event that such security is a Second Tier Security, the money market fund shall not have invested more than:

(*1*) The greater of one percent of its Total Assets or one million dollars in securities issued by that issuer which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Securities, and

(*2*) Five percent of its Total Assets in securities which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Securities.

(ii) *Portfolio Diversification: National Funds.* (A) Immediately after the acquisition of any security (other than a Government Security), a Tax Exempt Fund that is not a Single State Fund shall not have invested more than five percent of its Total Assets in securities issued by the issuer of the security, *Provided, however,* that a fund may invest more than five percent of its Total Assets in the First Tier Securities of a single issuer for a period of up to three Business days after the purchase thereof; *Provided, further,* that such investments made by the money market fund in accordance with the foregoing proviso at any time may not exceed twenty-five percent of the fund's Total Assets;

(B) In the event that such security is a Second Tier Security that is a Conduit Security, the money market fund shall not have invested more than:

(*1*) The greater of one percent of its Total Assets or one million dollars in securities issued by that issuer which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Securities, and

(*2*) Five percent of its Total Assets in securities which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Securities that are Conduit Securities.

(iii) *Portfolio Diversification: Puts.* Immediately after the acquisition of any Put or security subject to a Put, no more than ten percent of the money market fund's Total Assets may be invested in securities issued by or subject to Puts from the institution that issued such Put. In addition, if at the time of its acquisition, such Put (or the security, after giving effect to the Put) was a Second Tier Security, the fund shall not, after giving effect to the acquisition of such Put, have invested more than five percent of its Total Assets in securities issued by or subject to Puts from the institution that issued such Put.

(iv) *Portfolio Diversification: Certain Calculations.* For purposes of making calculations under this paragraph (c)(4):

(A) The acquisition of a repurchase agreement which provides for the repurchase of underlying securities at a date certain not later than one year after the purchase of the underlying securities may be deemed to be an acquisition of the underlying securities, provided that the obligation of the seller to repurchase the securities from the money market fund is Collateralized Fully;

(B) The acquisition of a Refunded Security shall be deemed to be an acquisition of a Government Security, provided that the fund has not invested more than twenty-five percent of its assets in the Refunded Securities of a single issuer;

(C) A Conduit Security shall be deemed to be issued by the person ultimately responsible for payments of interest and principal on the security;

(D) If a security is subject to Puts from more than one institution, the diversification requirements of paragraph (c)(4)(iii) of this section shall be satisfied as to each institution and each institution shall be deemed to have guaranteed the entire principal amount of the security unless the obligation of the institution is otherwise limited (except as provided in paragraph (c)(4)(iv)(F) of this section);

(E) The acquisition of an Asset Backed Security shall be deemed to be an acquisition of the securities comprising the Qualifying Assets unless the Qualifying Assets consist of securities issued by more than ten issuers, in which case it shall be deemed to be an acquisition of a security issued by the institution that deposited the assets in the Special Purpose Entity that issued the Asset Backed Security; and

(F) Each institution providing a credit enhancement with respect to an Asset Backed Security (whether the enhancement consists of a Put, a line of credit or an obligation to maintain specified levels of collateral) shall be deemed to be the issuer of a Put with respect to the entire principal amount of the Asset Backed Security.

(v) A money market fund substantially all of the assets of which consist of shares of another money market fund acquired in reliance on section 12(d)(1)(E) of the Act (15 U.S.C. 80a–12(d)(1)(E)) shall be deemed to be in compliance with this section if the board of directors reasonably believes that the money market fund in which it has invested is in compliance therewith.

(vi) A money market fund that satisfies the applicable diversification requirements of paragraph (c)(4) of this section shall be deemed to have satisfied the diversification requirements of section 5(b)(1) of the Act (15 U.S.C. 80a–5(b)(1)) and the rules promulgated thereunder.

(5)(i) *Downgrades.* (A) In the event that:

(*1*) A portfolio security of a money market fund (other than a Single State Fund) ceases to be a First Tier Security (either because it no longer has the highest rating from the Requisite NRSROs or, in the case of an Unrated Security, the board of directors of the money market fund determines that it is no longer of comparable quality to a First Tier Security), or

(*2*) The money market fund's investment adviser (or any person to whom the money market fund's board of directors has delegated portfolio management responsibilities) becomes aware that any Unrated Security or Second Tier Security held by the money market fund has, since the security was acquired by the fund, been given a rating by any NRSRO below the NRSRO's second highest rating category, the board of directors of the money market fund shall reassess promptly whether such security presents minimal credit risks and shall cause the money market fund to take such action as the board of directors determines is in the best interests of the money market fund and its shareholders.

(B) The reassessments required by paragraph (c)(5)(i)(A) of this section shall not be required if, in accordance with the procedures adopted by the board of directors, the security is disposed of (or matures) within five business days of the specified event and, in the case of events specified in paragraph (c)(5)(i)(A)(*2*) of this section, the board is subsequently notified of the adviser's actions.

(C) In the event that after giving effect to a rating downgrade, more than five percent of the fund's Total Assets are invested in securities issued by or subject to Demand Features from a single institution that are Second Tier Securities, the board of directors shall cause the fund to reduce its investment in securities issued by or subject to Demand Features from that institution to five percent of its Total Assets by exercising the Demand Features at the next succeeding exercise date(s).

(ii) *Defaults and other events.* In the event:

(A) Of a default with respect to a portfolio security (other than an immaterial default unrelated to the financial condition of the issuer);

(B) A portfolio security of a money market fund ceases to be an Eligible Security or, in the case of a Single State Fund, a First Tier Security;

(C) It has been determined that a portfolio security no longer presents minimal credit risks;

(D) Of an Event of Insolvency with respect to the issuer of or the provider of any Put with respect to a portfolio security; or

(E) The fund is unable to obtain the information specified by paragraphs (c)(6)(ii)(E) or (c)(7)(ii)(B) of this section concerning the issuer of a security subject to an Unconditional Demand Feature prior to the last time that the Unconditional Demand Feature can be exercised or upon the occurrence of a significant adverse change in the credit quality of the issuer of the Unconditional Demand Feature; absent a finding by the board of directors that disposal of the portfolio security would not be in the best interests of the money market fund (which determination may take into account, among other factors, market conditions that could affect the orderly disposition of the portfolio security), the money market fund shall dispose of such security as soon as practicable consistent with achieving an orderly disposition of the security, by sale, exercise of any Demand Feature or otherwise.

(iii) *Notice to the Commission.* In the event of a default with respect to one or more portfolio securities (other than an immaterial default unrelated to the financial condition of the issuer) or an Event of Insolvency with respect to the issuer of the security or any Put to which it is subject, where immediately before default the securities (or the securities subject to the Put) accounted for 1/2 of 1 percent or more of a money market fund's Total Assets, the money market fund shall promptly notify the Commission of such fact and the actions the money market fund intends to take in response to such situation. Notification under this paragraph shall be made telephonically or by means of a facsimile transmission, followed by letter sent by first class mail, directed to the attention of the Director of the Division of Investment Management.

(iv) *Defaults for Purposes of Paragraphs (c)(5) (ii) and (iii).* For purposes of paragraphs (c)(5) (ii) and (iii) of this section, an instrument subject to a Demand Feature or unconditional credit enhancement shall not be deemed to be in default (and an Event of Insolvency with respect to the security shall not be deemed to have occurred) if:

(A) In the case of an instrument subject to a Demand Feature, the Demand Feature has been exercised and the fund has recovered either the principal amount or the amortized cost of the instrument, plus accrued interest, or

(B) The provider of the credit enhancement is continuing to make payments as due on the instrument without protest.

(6) *Required Procedures: Amortized Cost Method.* In the case of a money market fund using the Amortized Cost Method:

(i) In supervising the money market fund's operations and delegating special responsibilities involving portfolio management to the money market fund's investment adviser, the money market fund's board of directors, as a particular responsibility within the overall duty of care owed to its shareholders, shall establish written procedures reasonably designed, taking into account current market conditions and the money market fund's investment objectives, to stabilize the money market fund's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at a single value.

(ii) Included within the procedures adopted by the board of directors shall be the following:

(A) Written procedures providing that the extent of deviation, if any, of the current net asset value per share calculated using available market quotations (or an appropriate substitute which reflects current market conditions) from the money market fund's amortized cost price per share, shall be calculated at such intervals as the board of directors determines appropriate and reasonable in light of current market conditions; periodic review by the board of directors of the amount of the deviation as well as the methods used to calculate the deviation; and maintenance of records of the determination of deviation and the board's review thereof; and

(B) In the event such deviation from the money market fund's amortized cost price per share exceeds 1/2 of 1 percent, a requirement that the board of directors shall promptly consider what action, if any, should be initiated by the board of directors; and

(C) Where the board of directors believes the extent of any deviation from the money market fund's amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall cause the fund to take such action as it deems appropriate to eliminate or reduce to the extent reasonably practicable such dilution or unfair results; and

(D) In the case of a security for which maturity is determined by reference to a Demand Feature, written procedures requiring ongoing review of the security's continued minimal credit risks, which review must be based on, among other things, financial data for the most recent fiscal year of the issuers of the Demand Feature and, in the case of a security subject to a Conditional Demand Feature, the security, whether publicly available or provided under the terms of the security's governing documentation; and

(E) In the case of a security subject to an Unconditional Demand Feature, written procedures designed to assure that the fund has access to sufficient financial and other information concerning the issuer of the security subject to the Demand Feature to permit the fund to perform a credit analysis of the issuer:

(*1*) In the event of a significant adverse change in the credit quality of the issuer of the Unconditional Demand Feature; and

(*2*) Prior to the last time that the Demand Feature can be exercised or the expiration of any letter of credit or other credit enhancement securing the Demand Feature, unless the credit enhancement will be timely substituted for or renewed in a manner that preserves the security's eligibility for purposes of this section; and

(F) In the case of a Variable Rate or Floating Rate Security that does not have a Demand Feature and for which maturity is determined pursuant to paragraphs (d)(1) or (d)(2) of this section, written procedures requiring periodic review of whether the security, upon readjustment of its interest rate, can reasonably be expected to have a market value that approximates its par value.

(7) *Required Procedures: Penny-Rounding Method.* (i) In the case of a money market fund using the Penny-Rounding Method, in supervising the money market fund's operations and delegating special responsibilities involving portfolio management to the money market fund's investment adviser, the money market fund's board of directors undertakes, as a particular responsibility within the overall duty of care owed to its shareholders, to assure to the extent reasonably practicable, taking into account current market conditions affecting the money market fund's investment objectives, that the money market fund's price per share as computed for the purpose of distribution, redemption and repurchase, rounded to the nearest one percent, will not deviate from the single price established by the board of directors.

(ii) The board of directors shall also:

(A) In the case of a security for which maturity is determined by reference to a Demand Feature, adopt written procedures requiring ongoing review of the security's continued minimal credit risks, which review must be based on, among other things, financial data for the most recent fiscal year of the issuers of the Demand Feature and, in the case of a security subject to a Conditional Demand Feature, the security, whether publicly available or provided under the terms of the security's governing documentation;

(B) In the case of a security subject to an Unconditional Demand Feature, adopt written procedures designed to assure that the fund has access to sufficient financial and other information concerning the issuer of the security subject to the Demand Feature to permit the fund to perform a credit analysis of the issuer:

(*1*) In the event of a significant adverse change in the credit quality of the issuer of the Unconditional Demand Feature; and

(*2*) Prior to the last time that the Demand Feature can be exercised or the expiration of any letter of credit or other credit enhancement securing the Demand Feature, unless the credit enhancement will be timely substituted for or renewed in a manner that preserves the security's eligibility for purposes of this section; and

(C) In the case of a Variable Rate or Floating Rate Security that does not have a Demand Feature and for which maturity is determined pursuant to paragraphs (d)(1) or (d)(2) of this section, adopt written procedures requiring periodic review of whether the security, upon readjustment of its interest rate, can reasonably be expected to have a market value that approximates its par value.

(8) *Record Keeping and Reporting.* (i) The money market fund will record, maintain, and preserve:

(A) For a period of not less than six years following the replacement of such procedures with new procedures (the first two years in an easily accessible place), a written copy of the procedures (and any modifications thereto) described in paragraphs (c)(5), (c)(6), (c)(7) and (e) of this section;

(B) For a period of not less than six years (the first two years in an easily accessible place) a written record of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of directors' meetings;

(C) For a period of not less than three years from the date of the acquisition of a portfolio security (or the date that the credit risks of a portfolio security were most recently reviewed in accordance with paragraph (c)(6)(ii)(D) or (c)(7)(ii)(A) of this section), in an easily accessible place, a written record of the determination that a portfolio security presents minimal credit risks and the NRSRO ratings (if any) used to determine the status of the security as an Eligible Security, First Tier Security or Second Tier Security;

(D) For a period of not less than three years from the date of the acquisition of a portfolio security, in an easily accessible place, a written record of the determination required by paragraphs (c)(6)(ii)(F) or (c)(7)(ii)(C) of this section that a Variable Rate or Floating Rate Security that does not have a Demand Feature and for which maturity is determined pursuant to paragraphs (d)(1) or (d)(2) of this section can reasonably be expected, upon readjustment of its interest rate at all times during the life of the instrument, to have a market value that approximates its par value;

(E) For a period of not less than three years from the date of the acquisition of an Asset Backed Security the Qualifying Assets of which are comprised of the securities of ten or fewer issuers, in an easily accessible place, a written record of the identities of the issuers of the Qualifying Assets and the percentage of the Qualifying Assets constituted by the securities of each such issuer and the percentage of the fund's Total Assets that are invested in securities of each issuer of Qualifying Assets.

(ii) The documents preserved pursuant to this paragraph (c)(8) shall be subject to inspection by the Commission in accordance with section 31(b) of the Act (15 U.S.C. 80a–30(b)) as if such documents were records required to be maintained pursuant to rules adopted under section 31(a) of the Act (15 U.S.C. 80a–30(a)). If any action was taken under paragraphs (c)(5)(ii) (with respect to defaulted securities) or (c)(6)(ii)(B) of this section, the money market fund will attach an exhibit to the Form N–SAR (17 CFR 274.101) filed for the period in which the action was taken describing with specificity the nature and circumstances of such action. The money market fund will report in an exhibit to such Form any securities it holds on the final day of the reporting period that are not Eligible Securities.

(d) *Maturity of portfolio securities.* For the purposes of this section, the maturity of a portfolio security shall be deemed to be the period remaining (calculated from the trade date or such other date on which the fund's interest in the security is subject to market action) until the date on which, in accordance with the terms of the security, the principal amount must unconditionally be paid, or in the case of a security called for redemption, the date on which the redemption payment must be made, except that:

(1) A Government Security which is a Variable Rate Security where the variable rate of interest is readjusted no less frequently than every 762 days shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. A Government Security which is a Floating Rate Security shall be deemed to have a remaining maturity of one day.

(2) A Variable Rate Security, the principal amount of which, in accordance with the terms of the security, must unconditionally be paid in 397 calendar days or less shall be deemed to have a maturity equal to the earlier of the period remaining until the next readjustment of the interest rate or the period remaining until the principal amount can be recovered through demand.

(3) A Variable Rate Security, the principal amount of which is scheduled to be paid in more than 397 days, that is subject to a Demand Feature shall be deemed to have a maturity equal to longer of the period remaining until the next readjustment of the interest rate or the period remaining until the principal amount can be recovered through demand.

(4) A Floating Rate Security, the principal amount of which, in accordance with the terms of the security, must unconditionally be paid in 397 calendar days or less shall be deemed to have a maturity of one day.

(5) A Floating Rate Security, the principal amount of which is scheduled to be paid in more than 397 days, that is subject to a Demand Feature shall be deemed to have a maturity equal to the period remaining until the principal amount can be recovered through demand.

(6) A repurchase agreement shall be deemed to have a maturity equal to the period remaining until the date on which the repurchase of the underlying securities is scheduled to occur, or, where no date is specified, but the agreement is subject to a demand, the

notice period applicable to a demand for the repurchase of the securities.

(7) A portfolio lending agreement shall be treated as having a maturity equal to the period remaining until the date on which the loaned securities are scheduled to be returned, or where no date is specified, but the agreement is subject to demand, the notice period applicable to a demand for the return of the loaned securities.

(8) An investment in a money market fund shall be treated as having a maturity equal to the period of time within which the acquired money market fund is required to make payment upon redemption, unless the acquired money market fund has agreed in writing to provide redemption proceeds to the investing money market fund within a shorter time period, in which case the maturity of such investment shall be deemed to be the shorter period.

(e) *Delegation.* The money market fund's board of directors may delegate to the fund's investment adviser or officers the responsibility to make any determination required to be made by the board of directors under this section (other than the determinations required by paragraphs (c)(1), (c)(5)(i)(A)(*2*), (c)(5)(ii), (c)(6)(i), (c)(6)(ii) (A), (B), and (C), and (c)(7)(i) of this section) provided that the board:

(1) Establishes and periodically reviews written guidelines (including guidelines for determining whether securities present minimal credit risks as required in paragraph (c)(3) of this section) and procedures under which the delegate makes such determinations; and

(2) Exercises adequate oversight (through periodic reviews of fund investments and the delegate's procedures in connection with investment decisions and prompt review of the adviser's actions in the event of the default of a security that requires notification of the Commission under paragraph (c)(5)(iii) of this section) to assure that the guidelines and procedures are being followed.

7. Section 270.2a41–1 is amended by revising paragraph (a), introductory text, to read as follows:

§ 270.2a41–1 Valuation of standby commitments by registered investment companies.

(a) A standby commitment as defined in § 270.2a–7(a)(23) may be assigned a fair value of zero, Provided, that:

* * * * *

8. Section 270.12d3–1 is amended by revising paragraph (d)(7)(v) to read as follows:

§ 270.12d3–1 Exemption of acquisitions of securities issued by persons engaged in securities related businesses.

* * * * *

(d) * * *

(7) * * *

(v) Acquisition of Puts, as defined in § 270.2a–7(a)(17), provided that, immediately after the acquisition of any Put:

(A) In the case of a company (other than a money market fund), the company will not, with respect to 75 percent of the total value of its assets, have invested more than ten percent of the total value of its assets in securities underlying Puts from the same institution; and

(B) In the case of a money market fund, no more than ten percent of the total value of its assets may be invested in securities issued by or subject to Puts from the same institution.

For the purposes of this section, a Put will be considered to be from the party to whom the company will look for payment of the exercise price.

* * * * *

9. Section 270.17a–9 is added to read as follows:

§ 270.17a–9 Purchase of certain securities from a money market fund by an affiliate, or an affiliate of an affiliate.

The purchase of a security that is no longer an Eligible Security (as defined in paragraph (a)(9) of § 270.2a–7) from an open-end investment company holding itself out as a "money market" fund by an affiliated person of the company, or any affiliated person of such a person, shall be exempt from section 17(a) of the Act (15 U.S.C. 80a–17(a)), provided that:

(a) The purchase price is paid in cash; and

(b) The purchase price is equal to the greater of the amortized cost of the security or its market price (in each case, including accrued interest).

10. Section 270.31a–1 is amended by adding a sentence to the end of paragraph (b)(1) to read as follows:

§ 270.31a–1 Records to be maintained by registered investment companies, certain majority-owned subsidiaries thereof, and other persons having transactions with registered investment companies.

* * * * *

(b) * * *

(1) * * * In the case of a money market fund, also identify the provider of any put (as defined in § 270.2a–7(a)(17)) or guarantee with respect to a portfolio security and give a brief description of the nature of the put (e.g., unconditional demand feature, conditional demand feature, guarantee, letter of credit, or bond insurance) and, in a subsidiary portfolio investment record, provide the complete legal name and accounting and other information (including sufficient information to calculate coupons, accruals, maturities, puts, and calls) necessary to identify, value, and account for each investment.

* * * * *

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

11. The authority citation for part 239 continues to read, in part, as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78*l*, 78m, 78n, 78o(d), 78w(a), 78ll(d), 79e, 79f, 79g, 79j, 79*l*, 79m, 79n, 79q, 79t, 80a–8, 80a–29, 80a–30 and 80a–37, unless otherwise noted.

* * * * *

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

12. The authority citation for part 274 continues to read as follows:

Authority: 15 U.S.C. 80a–1, et seq., unless otherwise noted.

Note: The following Forms and Guides do not and the amendments will not appear in the Code of Federal Regulations.

§§ 239.15A and 274.11A [Amended]

13. Form N–1A (§ 239.15A and § 274.11A) is amended by adding a sentence and an Instruction to the end of paragraph (c) of Part A, Item 4 to read as follows:

FORM N–1A

* * * * *

PART A INFORMATION REQUIRED IN A PROSPECTUS

* * * * *

Item 4. General Description of Registrant

* * * * *

(c) * * * In the case of a Registrant that holds itself out as a money market fund primarily distributing income exempt from the income taxes of a specified state or locality ("single state fund"), a prominent statement that (1) the registrant is concentrated in securities issued by the state or entities within the state and (2) the registrant may invest a significant percentage of its assets in a single issuer, and that therefore investment in the Registrant may be riskier than an investment in other types of money market funds.

Instruction. The disclosure required for money market funds by Item 4(c) may be modified if the registrant limits investment in a single issuer to five percent of fund assets as to 100 percent of assets.

* * * * *

§§ 239.17a and 274.11b [Amended]

14. Form N–3 (17 CFR 239.17a and 274.11b) is amended by adding Instruction 11.e. to Part A, paragraph (a) of Item 4 to read as follows:

FORM N–3

* * * * *

PART A INFORMATION REQUIRED IN A PROSPECTUS

* * * * *

Item 4. Condensed Financial Information

(a) * * *

Instructions

11. The portfolio turnover rate to be shown at caption 10 shall be calculated as follows:

* * * * *

e. A registrant that holds itself out as a money market fund is not required to provide a portfolio turnover rate in response to this Item.

* * * * *

§ 274.101 [Amended]

15. Form N–SAR (17 CFR 274.101) is amended by revising the definition of "Money Market Fund" in General Instruction G to read as follows:

FORM N–SAR

* * * * *

GENERAL INSTRUCTIONS

* * * * *

G. Definitions

* * * * *

Money Market Fund: The term "money market fund" means any open-end investment company that maintains a stable price per share and holds itself out as a "money market fund."

* * * * *

16. Form N–SAR (17 CFR 274.101) is amended by revising the last sentence of the Instruction to Item 63 to read as follows:

FORM N–SAR

* * * * *

Instructions to Specific Items

* * * * *

ITEM 63: Dollar Weighted Average Maturity

* * * A money market fund shall make this calculation in the same manner as it would in monitoring compliance with the average portfolio maturity provisions of Rule 2a–7 under the Act.

17. Form N–SAR (17 CFR 274.101) is amended by adding a sentence at the end of the first paragraph of the Instruction to Item 71 to read as follows:

FORM N–SAR

* * * * *

Instructions to Specific Items

* * * * *

ITEM 71: Portfolio Turnover Rate

* * * A money market fund should enter a portfolio turnover rate of "0" even if it owns securities that have maturities in excess of one year.

* * * * *

§§ 239.15A and 274.11A [Amended]

18. Guide 21 (Disclosure of Risk Factors) to Form N–1A (§§ 239.15A and 274.11A) is amended by adding a paragraph to the end of the Guide to read as follows:

Guide 21. Disclosure of Risk Factors

* * * * *

In many cases, a substantial portion of the portfolio securities held by tax exempt money market funds is supported by credit and liquidity enhancements from third parties, generally letters of credit from foreign or domestic banks. These securities include variable rate demand notes, tender or "put" bonds and similar securities. Where more than forty percent of a money market fund registrant's portfolio consists, or is likely to consist, of securities subject to these features, the registrant should, in response to Item 4, state that the credit quality of the securities in its portfolio is largely based on letters of credit and other arrangements with foreign and domestic banks and other financial institutions, that these arrangements are not necessarily subject to federal deposit insurance, and that adverse developments in the banking industry could have a significant negative effect on the credit quality of the registrant's portfolio securities and the registrant's ability to maintain a stable net asset value and share price.

19. Guide 34 is added to Form N–1A (17 CFR 239.15A and 274.11A) to read as follows:

Guide 34. Money Market Fund Investments in Other Money Market Funds

Money market funds are permitted to invest in the securities of other money market funds in accordance with the provisions of rule 2a–7 and section 12(d)(1) of the 1940 Act. Except when a fund has invested substantially all of its assets in the other money market fund, the investing fund does not need to "look through" the shares of the fund(s) in which it is investing in order to determine compliance with the diversification or Second Tier Security limitations of rule 2a–7.[43] However, the investment objectives and policies of the money market fund making the investment and the money market fund(s) in which it is investing should not be inconsistent. Paragraph (c)(4)(v) of rule 2a–7 describes the obligations of a fund that invests substantially all of its assets in another money market fund.

20. Guide 38 is added to Form N–3 to read as follows:

Guide 38. Money Market Fund Investments in Other Money Market Funds

Money market funds are permitted to invest in the securities of other money market funds in accordance with the provisions of rule 2a–7 and section 12(d)(1) of the 1940 Act. Except when a fund has invested substantially all of its assets in the other money market fund, the investing fund does not need to "look through" the shares of the fund(s) in which it is investing in order to determine compliance with the diversification or Second Tier Security limitations of rule 2a–7.[43] However, the investment objectives and policies of the money market fund making the investment and the money market fund(s) in which it is investing should not be inconsistent. Paragraph (c)(4)(v) of rule 2a–7 describes the obligations of a fund that invests substantially all of its assets in another money market fund.

By the Commission.

Dated: December 17, 1993.

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. R–93–1697; FR–3588–P–01]

RIN 2502–AG17

Section 8 Housing Assistance Payments Program: Contract Rent Annual Adjustment Factors—Revision to "Rounding" Factor

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the method for "rounding" contract rents. Existing regulations provide for adjustment to be made to the contract rent of a dwelling unit by rounding the computed monthly contract rent which contains a fractional dollar amount to the next higher whole dollar amount. (The monthly contract rent is rounded to the next higher whole dollar amount even when the dollar fraction is as low as .01.) HUD would revise the adjustment by providing for contract rents which contain fractional dollar amounts of .01 to .50 to be rounded to the next lower dollar amount, and for contract rents which contain fractional dollar amounts of .51 to .99 to be rounded to the next higher

dollar amount. This revision to the "rounding" factor would more accurately reflect the actual rent adjustments, and would result in significant savings of section 8 subsidies which HUD can use to help other low-income families who need housing assistance.

DATES: Comment due date: February 28, 1994.

ADDRESSES: Interested persons are invited to submit comments regarding this proposed rule to the Office of General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying on weekdays between 7:30 a.m. and 5:30 p.m. at the above address.

FOR FURTHER INFORMATION CONTACT: James J. Tahash, Director, Planning and Procedures Division, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., room 6160, Washington, DC 20410. Telephone (202) 708–3944 (voice) or (202) 708–4594 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Section 888.203(b) of HUD's regulations in 24 CFR part 888 provides as follows:

> The adjusted monthly amount of the Contract Rent of a dwelling unit shall be determined by multiplying the Contract Rent in Effect on the anniversary date of the contract by the applicable Automatic Annual Adjustment Factor (see paragraph (a) of this section) and rounding the result to the next higher whole dollar amount.

The rounding procedure in § 888.203(b) provides for all contract rents which contain fractional dollar amounts to be rounded to the next higher whole, regardless if the dollar fraction is as low as .01. HUD has determined that there are approximately two million dwelling units receiving section 8 assistance. The rounding procedure provided by § 888.203(b) costs about $24 million in annual section 8 subsidies (2,000,000 units×$1 per unit×12 months=$24,000,000), and provides many housing authorities and project owners with section 8 subsidies substantially beyond their section 8 assistance needs.

Through this rule, HUD proposes to revise the rounding procedure to make this procedure consistent with generally accepted mathematical and statistical principles, and to bring disbursement of section 8 subsidies more in line with a housing authority's or project owner's actual section 8 subsidy needs. HUD proposes to revise § 888.203(b) to read as follows:

> The adjusted monthly amount of the Contract Rent of a dwelling unit shall be determined by multiplying the Contract Rent in Effect on the anniversary date of the contract by the applicable Automatic Annual Adjustment Factor (see paragraph (a) of this section) and rounding the result as follows:
>
> (1) If the result contains a fractional dollar amount ranging from $0.01 to $0.50, round to the next lower whole dollar amount;
>
> (2) If the result contains a fractional dollar amount ranging from $0.51 to $0.99, round to the next higher whole dollar amount.

The proposed revision to § 888.203(b) would adjust section 8 contract rents by an average of fifty cents per unit per month less than contract rents are now adjusted using the current rounding procedure. HUD estimates that it would save approximately $12 million annually in section 8 subsidies—subsidies that are urgently needed to provide housing assistance to other low-income families.

HUD acknowledges that the revised rounding procedure will result in less section 8 subsidies for a considerable number of housing authorities and project owners. However, the reduced section 8 subsidies are more consistent with the actual computed contract rents. As stated earlier, the current rounding procedure provides many housing authorities and owners with section 8 subsidies substantially beyond their section 8 assistance needs.

Because HUD's resources are tightly constrained, even as the need for housing assistance intensifies, it is essential that HUD use existing resources more efficiently so that HUD may meet the increased demands for housing assistance. The revision to the method of rounding section 8 contract rents, as proposed by this rule, is one way in which HUD is attempting to address these increased housing needs through more effective use of existing resources.

Other Matters

Environmental Impact

An environmental assessment is unnecessary because statutorily required establishment and review of rent schedules that do not constitute a development decision affecting the physical condition of specific project areas or building sites is categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20(l).

Executive Order 12866

This proposed rule was reviewed by the Office of Management and Budget as a significant regulatory action under Executive Order 12866.

Impact on Small Entities

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this proposed rule before publication, and, by approving it, certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities. The proposed rule, if implemented, would result in reduced section 8 subsidies for a substantial number of housing authorities (not necessarily small housing authorities) and project owners. However, the reduced section 8 subsidies would not result in a significant economic impact on these entities because a substantial number of these authorities are currently receiving section 8 subsidies considerably beyond their actual section 8 housing assistance needs. The savings in section 8 subsidies achieved by this rule, if implemented, would result in disbursement of section 8 subsidies to additional housing authorities and owners. Thus, the proposed rule would not result in a significant economic impact on a substantial number of small entities within the meaning of the order.

Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive Order No. 12612, Federalism, has determined that this proposed rule would not have a substantial, direct effect on the States or their political subdivisions or on the relationship between the Federal government and the States, or on the distribution of power or responsibilities among the various levels of government. The proposed rule relates solely to the method of determining Federal financial assistance—that is, the method of determining the amount of section 8 assistance needed by a housing authority or project owner, based on the procedure for computing adjusted contract rent. This matter does not affect the States or their political subdivisions or the distribution of power or responsibilities among the various levels of government.

Impact on the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this proposed rule would not have a potential significant impact on family formation, maintenance, and general well-being, and thus is not subject to review under the order. No significant change in existing HUD policies or programs will proposed rule, as those policies and programs relate to family concerns.

Regulatory Agenda

This proposed rule was not listed in the Department's Semiannual Agenda of Regulations published on October 25, 1993 (58 FR 56402) under Executive Order 12866 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 888

Grant programs—housing and community development, Rent subsidies.

Accordingly, 24 CFR part 888 would be amended as follows:

PART 888—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—FAIR MARKET RENTS AND CONTRACT RENT ANNUAL ADJUSTMENT FACTORS

1. The authority citation for part 888 would continue to read as follows:

Authority: 42 U.S.C. 1437c, 1437f, and 3535(d).

2. In § 888.203, paragraph (b) would be revised to read as follows:

§ 888.203 Use of contract rent automatic annual adjustment factors.

* * * * *

(b) The adjusted monthly amount of the Contract Rent of a dwelling unit shall be determined by multiplying the Contract Rent in Effect on the anniversary date of the contract by the applicable Automatic Annual Adjustment Factor (see paragraph (a) of this section) and rounding the result as follows:

(1) If the result contains a fractional dollar amount ranging from $0.01 to $0.50, round to the next lower whole dollar amount;

(2) If the result contains a fractional dollar amount ranging from $0 51 to $0.99, round to the next higher whole dollar amount.

Dated: December 20, 1993.

Nicolas P. Retsinas,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–27–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 934

North Dakota Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; reopening and extension of public comment period on proposed amendment.

SUMMARY: OSM is announcing receipt of additional revisions pertaining to a previously proposed amendment to the North Dakota permanent regulatory program (hereinafter, the "North Dakota program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The revisions for North Dakota's proposed rules pertain to: Reimbursement of costs of training provided under the Small Operator Assistance Program (SOAP); proposed rules to implement North Dakota's revised statutory provisions for SOAP; the definition of "road" as referenced in the coal exploration performance standards; and the statutory authorization for individual civil and criminal penalties under the North Dakota coal exploration program. The amendment is intended to revise the North Dakota program to be consistent with the corresponding Federal regulations.

This document sets forth the times and locations that the North Dakota program and proposed amendment to that program are available for public inspection and the reopened comment period during which interested persons may submit written comments on the proposed amendment.

DATES: Written comments must be received by 4 p.m., m.s.t., January 12, 1994.

ADDRESSES: Written comments should be mailed or hand delivered to Guy Padgett at the address listed below.

Copies of the North Dakota program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Casper Field Office.

Guy Padgett, Director, Casper Field Office; Office of Surface Mining Reclamation and Enforcement; 100 East B Street, room 2128; Casper, WY 82601–1918. Telephone: (307) 261–5776

Edward J. Englerth, Director, Reclamation Division; Public Service Commission; Capitol Building; Bismarck, ND 58505–0165. Telephone: (701) 224–4092

FOR FURTHER INFORMATION CONTACT: Guy Padgett, Telephone (307) 261–5776.

SUPPLEMENTARY INFORMATION:

I. Background on the North Dakota Program

On December 15, 1980, the Secretary of the Interior conditionally approved the North Dakota program as administered by the Public Service Commission. General background information on the North Dakota program, including the Secretary's findings, the disposition of comments, and conditions of approval of the North Dakota program can be found in the December 15, 1980, **Federal Register** (45 FR 82214). Subsequent actions concerning North Dakota's program and program amendments can be found at 30 CFR 934.15 and 934.16.

II. Submission of Proposed Amendment

By letter dated April 21, 1993 (Administrative Record No. ND–Q–01), North Dakota submitted a proposed amendment ("Amendment XVIII") to its permanent program pursuant to SMCRA. The North Dakota proposed amendment reflects changes to the North Dakota Century Code (NDCC) chapter 38–12.1 in response to the required program amendments 30 CFR 934.16(l) and (y), published in the January 9, 1992 **Federal Register** (57 FR 827). In addition, North Dakota has proposed state-initiated changes to NDCC chapter 38–14.1 reflecting 1992 changes (Energy Policy Act, Pub. L. 102–486) to the Small Operator Assistance Program in SMCRA 507(c), and changes to the requirements for preblasting surveys.

The provisions of the North Dakota Century code (NDCC) that North Dakota proposes to amend are: NDCC 38–14.1–21(5) [permit approval or denial standards]; NDCC 38–14.1–24(13)(e) [environmental protection performance standards]; NDCC 38–14.1–37 [small operators]; NDCC 38–12.1–03 [definitions, coal exploration program]; and NDCC 38–12.1–08 [civil and criminal penalties, coal exploration program].

OSM published a notice in the May 19, 1993, **Federal Register** (58 FR 29155) announcing receipt of the amendment and inviting public comment on its adequacy (Administrative Record No. ND–Q–7). The public comment period ended June 18, 1993.

During its review of the amendment, OSM identified concerns relating to the provisions of: NDCC 38–14.1–21(5) regarding the requirement for an operator to reimburse the regulatory authority for the costs of training if that operator produces in excess of 300,000 tons of coal during the 12 months following permit issuance; NDCC 38–12.1–03(6) regarding the definition of "road" in the coal exploration program; and NDCC 38–12.1–08, pertaining to civil and criminal penalties in the coal exploration program. OSM notified North Dakota of the concerns by letter dated November 12, 1993 (Administrative Record No. ND–Q–14). North Dakota responded in a letter dated December 3, 1993, by submitting clarifications and proposed rule revisions (Administrative Record No. ND–Q–15).

In its December 3, 1993, response, North Dakota states with regard to the first concern above that it intends to submit, in the future, additional statutory changes regarding reimbursement of costs for training provided under SOAP. With regard to the second and third concerns above, North Dakota's response proposes new changes to the rules implementing the coal exploration program, as follows.

North Dakota Administrative Code (NDAC) 43–02–01–20.3(c)(2)

North Dakota proposes to add a new clause clarifying that a road is to be considered altered if it is constructed, reconstructed, improved, or maintained in any way that causes the changes addressed in the rule.

NDAC 43–02–01–05

North Dakota proposes to add a new paragraph providing that, when corporate permittees violate NDCC 38–12.1 or any implementing rule, or any permit condition, directors, officers, or agents who knowingly cause such violations would be subject to the criminal penalties of NDCC 38–12.1–08(2); further, such directors, officers, or agents would be subject to the civil penalties of NDCC 38–12.1-08(1) if they willfully or negligently violate NDCC 38–12.1, any implementing rule, or any permit condition; finally, knowingly, willfully, and negligently are to be understood as defined by NDCC 12.1–02–02.

III. Public Comment Procedures

OSM is reopening the comment period on the proposed North Dakota program amendment to provide the public an opportunity to reconsider the adequacy of the proposed amendment in light of the additional materials submitted. In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the North Dakota program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Casper Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

33 CFR Part 402

Tariff of Tolls

AGENCY: Saint Lawrence Seaway Development Corporation, DOT.

ACTION: Notice of meetings.

SUMMARY: The Saint Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority of Canada have jointly established and presently administer the St. Lawrence Seaway Tariff of Tolls. This Tariff sets forth the level of tolls assessed on all commodities and vessels transiting the facilities operated by the Corporation and the Authority. The Corporation is considering recommending to the Authority that joint rulemaking be undertaken to change the fundamental basis of the toll structure. In order to determine whether such a rulemaking is warranted, what the substance should be, and what is the scope of the issues involved, the Corporation is holding three public meetings to discuss the problems encountered under the existing toll structure and possible solutions. This notice announces the dates, times, and places of the meetings.

DATES: The meetings will be held on February 1, 1994, in Chicago, Illinois, on February 9, 1994, in Cleveland, Ohio, and on February 17, 1994, in Duluth, Minnesota, each beginning at 9 a.m. and concluding at 12 noon.

ADDRESSES: The meetings will be held in: The Cordova Room, Intercontinental Hotel, 505 North Michigan Avenue, Chicago, Illinois; the Conference Room, Cleveland-Cuyahoga County Port Authority, 101 Erieside Avenue, Cleveland, Ohio; and the Conference Room, Seaway Port Authority of Duluth, 1200 Port Terminal Drive, Duluth, Minnesota.

FOR FURTHER INFORMATION CONTACT: Marc C. Owen, Chief Counsel, Saint Lawrence Seaway Development Corporation, P.O. Box 44090, Washington, DC 20026–4090, (202) 366–0091.

SUPPLEMENTARY INFORMATION: Discussions between the Corporation and the Authority about the Seaway Tariff of Tolls has resulted in several basic conclusions for future Tariff amendments. It is necessary to take into account prevailing market conditions and not unduly restrict maritime commerce or create additional barriers to trade in the development of the Tariff. Both parties wish to pursue fairness among their primary goals and strive for equal treatment for vessels and cargoes using the Seaway. It is necessary to seek simplicity in developing the Tariff as complexity and ambiguity tend to provide a disincentive to using the Seaway. Lastly, both parties wish to strive for stability so that those engaged in commerce on the Seaway can make long-term planning decisions with some confidence of future conditions.

Based upon these mutual conclusions, the Corporation is considering recommending to the Authority that joint rulemaking be undertaken to change the fundamental basis of the toll structure. In order to determine whether such a rulemaking is warranted, what the substance should be, and what is the scope of the issues involved, the Corporation is holding three public meetings to discuss the problems encountered under the existing tool structure and possible solutions. These meetings will be open for discussion, however, any person wishing to make a formal presentation is requested to notify the Corporation at least ten working days before the meetings and provide the approximate time desired for the presentation to Marc C. Owen, Chief Counsel, Saint Lawrence Seaway Development Corporation, P.O. Box 44090, Washington, DC 20026–4090. In addition, the Corporation requests an original written text of any formal presentation along with five copies before or at the time of the meeting. Finally, if any person wishes to present written comments, but not participate in the meetings, they may submit those comments to that same address at any time before or at the time of the meetings.

The meetings are open to the public, each beginning at 9 a.m. and concluding at 12 noon, and will be at the following dates and places: On February 1, 1994, in the Cordova Room, Intercontinental Hotel, 505 North Michigan Avenue, Chicago, Illinois; on February 9, 1994, in the Conference Room, Cleveland-Cuyahoga County Port Authority, 101 Erieside Avenue, Cleveland Ohio; and on February 17, 1994, the Conference Room, Seaway Port Authority of Duluth, 1200 Port Terminal Drive, Duluth, Minnesota.

Issued at Washington, DC, on December 21, 1993.

Saint Lawrence Seaway Development Corporation.

Marc C. Owen,

Chief Counsel.

[FR Doc. 93–31635 Filed 12–27–93; 8:45 am]

BILLING CODE 4810–61–M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

34 CFR Ch. VI

Direct Student Loan Regulations Negotiated Rulemaking Advisory Committee and the Guaranty Agency Reserves Regulations Negotiated Rulemaking Advisory Committee; Proposed Establishment

AGENCY: Department of Education.

ACTION: Notice of proposed establishment.

SUMMARY: The Secretary of Education and the Assistant Secretary for Postsecondary Education announce their intention to establish two negotiated rulemaking advisory committees to draft proposed rules for direct lending and guaranty agency reserves, in order to implement the Student Loan Reform Act of 1993. That statute, enacted on August 10, 1993, established a new loan program, known as the Direct Loan Program, under the Higher Education Act of 1965, as amended (HEA). See subtitle A of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66). This program will phase in a system of direct federal lending.

DATES: The first meetings of both committees will be held in mid to late January, 1994, with the specific date, time, and location of each meeting to be announced in a subsequent notice.

FOR FURTHER INFORMATION CONTACT: Jennifer Peck, Office of the Assistant Secretary for Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (room 4082, ROB–3), Washington, DC 20202–5100 Telephone: (202) 708–5547. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Department has retained the services of two professional mediators to serve as neutral convenors and facilitators for the negotiations. Brian Kerrigan, Deputy Director for the Policy, Training, and Analysis Service in the Office of Postsecondary Education is proposed to serve as the negotiator for the Department of Education on the direct lending committee. Donald Feverstein, Special Assistant in the Office of Postsecondary Education, is proposed to serve as the Department's negotiator on the guaranty agency reserves committee. Administrative support for the committees will be provided by the Office of Postsecondary Education. Each negotiating committee will be balanced and representative of all the significantly affected interests, including those of higher education organizations, banks, guaranty agencies, loan servicers, legal aid, students, and states.

1. Issues To Be Negotiated

A. Director Lending Issues To Be Negotiated

—Development of a sliding fee schedule for the payment of fees to schools and consortia that originate Direct Loans. As required by the HEA, the origination fee paid to a school will decrease as the number of loans originated at the school increases.

—Development of procedures to determine the last date on which a student or parent who is eligible for a Direct Loan may apply for that loan, and development of procedures for late disbursement of a Direct Loan.

—Development of procedures and criteria to be used to select schools to participate in the Direct Loan Program in future years. Negotiators will determine to what extent factors such as a school's default rate, commitment to direct lending, capacity to implement and administer the Direct Loan Program, and electronic capabilities will be considered in determining which schools will participate in the Direct Loan Program.

—Development of criteria to be used to determine whether a school participating in the Direct Loan Program will originate Direct Loans or will use an alternative originator to originate Direct Loans. Negotiators will determine to what extent factors such as the school's electronic capabilities and ability to administer the program will be considered in determining which schools originate loans and which schools use alternative origination. The procedures by which an alternative originator participates will also be negotiated.

—Development of procedures under which a school may withdraw from the Direct Loan Program, including the timeframe in which a school may withdraw from the program and the amount of notice a school must give before it may withdraw.

—Development of procedures for the U.S. Department of Education's termination of agreements with schools that participate in the Direct Loan Program, including the type and timing of notice that must be given to a school before termination may occur.

—Development of the terms of the repayment plans for Direct Loans. The four repayment plans required by the HEA are the standard repayment plan, in which the borrower makes fixed payments over a fixed period of time; the extended repayment plan, in which the borrower makes fixed payments for an extended period of time; the graduated repayment plan, in which the borrower makes payments at two or more levels for a fixed or extended period of time; and the income contingent repayment plan, in which the borrower pays a percentage of the income of the borrower and the borrower's spouse (if applicable) over a period of time not to exceed 25 years. Negotiators will determine the method by which income contingent repayment will be calculated and the method by which a borrower's income will be determined and documented.

—Development of procedures under which the Secretary will select a repayment plan for borrowers who do not select a plan for themselves. In accordance with the HEA, the Secretary may select the standard, extended, or graduated repayment plans for a borrower who does not select a repayment plan.

—Development of the terms and conditions under which the Secretary may provide an alternative repayment plan to a borrower who demonstrates that available repayment plans do not accommodate the borrower's exceptional circumstances. Negotiators will determine issues such as the circumstances. under which the Secretary may provide an alternative repayment plan and the permissible terms of an alternative repayment plan.
—Development of the circumstances under which the Secretary may require a borrower who has defaulted on a Direct Loan to repay the loan on an income contingent repayment plan, and development of procedures for placing a borrower who has defaulted on a Direct Loan into an income contingent repayment plan.
—Development of procedures for maintaining fiscal control and accountability for federal funds, including a determination of whether schools must deposit Direct Loan Program funds in an account that is separate from accounts containing other funds under title IV of the HEA, and the development of the accounting procedures that a school in the Direct Loan Program must follow to account for program funds.

B. Guaranty Agency Reserves Issues To Be Negotiated

—Development of the standards by which the Secretary may direct a guaranty agency to return to the Secretary the portion of its reserve fund that the Secretary determines is unnecessary to pay the program expenses and contingent liabilities of the agency.
—Development of the standards by which the Secretary may require a guaranty agency to return (to the Secretary or the guaranty agency) reserve funds or assets held by, or under control of, any other entity, if the Secretary determines those funds or assets are needed to pay the program expenses and contingent liabilities of the guaranty agency, or are required for the orderly termination of the guaranty agency's operations and the liquidation of its assets.

2. Agenda for First Meetings

The following is a draft agenda for the first meeting of each committee, which will be organizational. Meetings will not be held simultaneously.

(1) Welcoming remarks.

(2) Introduction of facilitators and participants.

(3) Discussion of procedural ground rules.

(4) General discussion of participants' perspectives on substantive issues.

(5) Development of issue agendas or drafts for subsequent meetings.

3. Structure of Committees

A. The ultimate goal of negotiated rulemaking is to reach a consensus through discussion and negotiation among all interested and affected parties, including the Department of Education. With this in mind, the Department will conduct these negotiations within a structure that is designed to reach this goal fairly and efficiently and that takes account of the large number and complex nature of the issues to be negotiated.

The neutral convenors retained by the Department have recommended that the Department establish within each Committee a "full" membership and an "associate" membership. All members will be able to participate in discussion and negotiation. However, only full members will have the power to vote to reach a consensus. The Department has determined full members to be those whose interests will be significantly affected by the final rule. Some organizations are proposed to serve as full members of both committees, but, in general, all full members of the Direct Student Loan Negotiated Rulemaking Advisory Committee are proposed to serve as associate members of the Guaranty Agency Reserves Negotiated Rulemaking Advisory Committee, and vice versa. Some organizations with similar interests are proposed as coalition members.

B. The organizations listed below are proposed as full members of the Direct Student Loan Regulations Negotiated Rulemaking Advisory Committee:

Department of Education
American Association of Community Colleges
American Association of Universities
American Association of State Colleges and Universities
American Council on Education
National Association of Independent Colleges and Universities
National Association of State Universities and Land Grant Colleges
Career College Association
American Association of Cosmetology Schools
National Association of State Financial Aid Administrators
National Association of College and University Business Officers
Federation of Associations of Schools for Health Professionals
National Association for Equal Opportunity in Higher Education/United Negro College Fund (a coalition)
Hispanic Association of Colleges and Universities
United States Student Universities
United States Student Association
Legal Aid (a coalition)
State Higher Education Executive Officers Association
Student Loan Servicing Alliance

C. The following organizations are proposed as full members of the Guaranty Agency Reserves Negotiated Rulemaking Advisory Committee:

Department of Education
Consumer Bankers Association
Education Finance Council
National Coalition of Higher Education Loan Programs
Private Guaranty Agency Coalition
Sallie Mae
State Higher Education Executive Officers Association
Student Loan Servicing Alliance
United States Student Association
Legal Aid (a coalition)

D. The following organizations are proposed as full members of both committees:

Department of Education
Legal Aid (a coalition)
Student Loan Servicing Alliance
United States Student Association
State Higher Education Executive Officers Association

4. *Invitation To Comment*

The Secretary and the Assistant Secretary invite comments from interested parties on the proposal to establish the committees described in this notice and the proposed membership of the committees. If an organization believes that it has a significantly affected interest that would not be represented by the proposed members and wishes to apply for membership or nominate another organization for membership, it may do so. Comments on this notice and requests for membership should be sent to Jennifer Peck, at the address stated at the beginning of this notice, no later than 20 days after the publication of this notice. A request must include:

1. Name of the proposed member and a description of the interests to be represented;

2. Evidence that the proposed member is authorized to represent parties related to the interests the member would represent;

3. A written commitment that the proposed member will participate actively and in good faith in the development of the rule under consideration; and

4. The reasons that the organizations listed in the notice to do not adequately represent the interest of the organization submitting the request or nomination.

Please note that participation in the rulemaking process is not limited to members of the committee. Meetings of the negotiated rulemaking committees are open to the public so that interested parties may observe the negotiations, and each meeting will include an opportunity for comment by observers. In addition, following the negotiated rulemaking process, proposed rules will be published in the Federal Register for public comment. There are expected to be a total of approximately five meetings of each committee, all of which will be held in the Metropolitan Washington, DC area. The target date for publication of proposed rules developed by the committees is July 1, 1994.

Dated: December 22, 1993.

Richard W. Riley,

Secretary of Education.

Pesticide Tolerances for Chlorpyrifos

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to revise tolerances for residues of the insecticide chlorpyrifos in or on the raw agricultural commodities pears, peaches, nectarines, and plums. The proposed regulations to revise maximum permissible levels for residues of chlorpyrifos were requested in petitions submitted by DowElanco and are needed to cover maximum expected residues in or on imported commodities.

DATES: Comments, identified by the document control number [PP 4E4288 and PP 4E4289/P574], must be received on or before January 28, 1994.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Dennis H. Edwards, Jr., Product Manager (PM) 19, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. Office location and telephone number: Rm. 207, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703-305-6386).

SUPPLEMENTARY INFORMATION: DowElanco has submitted pesticide petition PP 4E4288 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(e), amend 40 CFR 180.342 by revising the tolerance for residues of the insecticide chlorpyrifos in or on the raw agricultural commodity pears from 0.01 part per million (ppm) to 0.05 ppm; and pesticide petition PP 4E4289 requesting revision of tolerances for residues in or on peaches, nectarines, and plums from 0.01 ppm to 0.05 ppm. These revisions in the tolerances are needed because of differing use patterns of chlorpyrifos in other parts of the world as compared to the U.S.

The Agency has reviewed preliminary residue data and concluded that residues should not exceed the proposed tolerances. However, the Agency has determined that additional residue data for imported pears, peaches (data for peaches will suffice for nectarines), plums, and prunes (the processed commodity of plums) must be submitted. Therefore, the Agency is proposing to revise these tolerances with a 2-year expiration date, at which time the tolerances will revert to the previous 0.01 ppm for the named commodities. Once the required residue data are submitted and determined to be adequate, the Agency, upon request by DowElanco, will take appropriate steps to make the proposed tolerances permanent.

The available data do not support a change in the U.S. use pattern for the crops listed above. If such a change is desired, additional residue data generated in the U.S. must be submitted.

The data submitted in the petitions and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerance include:

1. A 2-year dog feeding study with a no-observed-effect level (NOEL) for systemic effects of 1.0 milligram (mg)/kilogram (kg)/day and lowest effect level (LEL) (increased liver weight) of 3.0 mg/kg/day. The NOELs for cholinesterase (ChE) inhibition were as follows: 0.01 mg/kg/day for plasma, 0.1 mg/kg/day for red blood cells, and 1.0 mg/kg/day for brain cells. Levels tested were 0, 0.01, 0.03, 0.1, 1.0, and 3 mg/kg/day.

2. A voluntary human study with ChE NOEL of 0.03 mg/kg/day (based on 20 days of exposure at this level).

3. A 2-year mouse chronic toxicity/carcinogenicity study with a NOEL of 15 ppm for systemic effects (equivalent to 2.25 mg/kg/day) and no carcinogenic effects observed under the conditions of the study at all levels tested (0, 0.5, 5, and 15 ppm, equivalent to 0.075, 0.75, and 2.25 mg/kg/day).

4. A 2-year rat feeding/carcinogenicity study with ChE NOEL of 0.1 and LEL of 1.0 mg/kg/day (based on decreased plasma and brain ChE activity), and a systemic NOEL of 1.0 mg/kg/day and LEL of 10 mg/kg/day (based on decreased erythrocyte and hemoglobin values and increased platelet count during the first year). There were no observed carcinogenic effects at the levels tested (0.05, 0.1, 1.0, and 10 mg/kg/day) under the conditions of the study.

5. A three-generation reproduction study in rats with no reproductive effects observed at the dietary levels tested (0, 0.1, 0.3, and 1.0 mg/kg/day).

6. Two rat developmental toxicity studies: one negative for developmental toxicity at all dose levels (levels tested were 0.1, 3.0, and 15.0 mg/kg/day); and one with maternal and developmental NOELs of 2.5 mg/kg/day (levels tested, by gavage, were 0, 0.5, 2.5, and 15 mg/kg/day).

7. A mouse developmental toxicity study with a teratogenic NOEL greater than 25 mg/kg/day (highest dose tested) and a developmental fetotoxic NOEL of 10 mg/kg/day and LEL of 25 mg/kg/dav (decreased fetal length and increased skeletal variants).

8. A developmental toxicity study in rabbits with maternal and developmental NOELs of 81 mg/kg/day, and maternal and developmental LELs of 140 mg/kg/day (based on maternal

decreased food consumption on gestation days 15 to 19, and body weight loss during the dosing period followed by a compensatory weight gain; and based on a slight reduction in fetal weights and crown-rump lengths, and fetal increased incidence of unossified fifth sternebrae and/or xiphisternum). Levels tested were 0, 1, 9, 81, and 140 mg/kg/day.

9. An acute delayed neurotoxicity study in the hen that was negative at 50 and 100 mg/kg/day.

10. Several mutagenicity studies which were all negative. These include an Ames assay, two Chinese hamster ovary cell mutation assays, a micronucleus assay for chromosomal aberration, an *in vitro* chromosomal aberration assay with and without enzymatic activation, and an unscheduled DNA synthesis assay.

11. A general metabolism study in rats shows that the major metabolite of chlorpyrifos is 3,5,6-trichloro-2-pyridinol (TCP). The studies listed below were conducted to demonstrate that TCP is less toxic than chlorpyrifos and is not a ChE inhibitor.

a. A 90-day rat feeding study with a systemic NOEL of 30 mg/kg/day. Levels tested were 0, 10, 30, and 100 mg/kg/day.

b. A rat developmental toxicity study with no developmental toxicity observed at the dosages tested (0, 50, 100, and 150 mg/kg/day).

c. Mutagenicity studies (including an Ames assay and an unscheduled DNA synthesis assay) were negative for mutagenic effects.

Based on the above studies, the Agency has concluded that the TCP metabolite is not of toxicological concern.

The reference dose (RfD) based on the human voluntary ChE study (ChE NOEL of 0.03 mg/kg/day) and using a 10-fold uncertainty factor is calculated to be 0.003 mg/kg of body weight/day. Tolerances for food uses appear in 40 CFR 180.342 and 40 CFR 185.1000. The Dietary Risk Exposure Section (DRES) chronic dietary exposure analysis made use, when justified and appropriate, of anticipated residues rather than published tolerance values, and data regarding percent crop treated (when less than 100%). The anticipated residue contribution (ARC) from published uses of chlorpyrifos is 0.000859 mg/kg of body weight/day for the overall U.S. population. This represents 28.6% of the RfD. The proposed tolerances on pears, nectarines, peaches, and plums contribute 0.000001 mg/kg of body weight/day of exposure, raising the ARC to 0.000860 mg/kg of body weight/ day, or 28.7% of the RfD. None of the DRES subgroups has an exposure that exceeds the RfD. The population subgroup most highly exposed is nonnursing infants, less than 1 year old, with an ARC from published uses of 0.002137 mg/kg of body weight/day, 71.2% of the RfD. The proposed tolerances contribute 0.000011 mg/kg of body weight/day, which raises the ARC for that subgroup to 0.002147 mg/kg of body weight/day, or 71.6% of the RfD. The next most highly exposed population subgroup is children, 1 to 6 years old, with an ARC from published uses of 0.001912 mg/kg of body weight/day, 63.7% of the RfD. The proposed tolerances contribute 0.000002 mg/kg of body weight/day, which raises the ARC for that subgroup to 0.001914 mg/kg of body weight/day, or 63.8% of the RfD.

Adequate gas chromatographic analytical methods are available in the Pesticide Analytical Manual, Vol. II (PAM II), for enforcement purposes. There are currently no actions pending against continued registration of this chemical.

Based on the information and data considered, the Agency has determined that the tolerances established by amending 40 CFR 180.342 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408 (e) of the FFDCA.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 4E4288 and PP 4E4289/P574]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

The Office of Management and Budget has exempted this rule from the requirements of Executive Order 12866

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 14, 1993.

Stephen L. Johnson,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.342, by amending paragraph (c) by removing the entries in the table therein for nectarines, peaches, pears, and plums and by adding new paragraph (e), to read as follows:

§ 180.342 Chlorpyrifos; tolerances for residues

* * * * *

(e) Tolerances are established as follows for residues of the insecticide chlorpyrifos [*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate] in or on the following raw agricultural commodities:

Commodity	Parts per million	
	Until Jan. 28, 1996	After Jan. 28, 1996
Nectarines	0.05	0.01
Peaches	0.05	0.01
Pears	0.05	0.01
Plums	0.05	0.01

[FR Doc. 93-31473 Filed 12-21-93; 4:52 pm]

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AC23

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Gymnoderma Lineare

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to list the lichen *Gymnoderma lineare* (rock gnome lichen) as an endangered species under authority of the Endangered Species Act of 1973, as amended (Act). This lichen, which is limited to 25 populations in North Carolina and 7 populations in Tennessee, is threatened by collection, logging, and habitat disturbance due to heavy use by hikers and climbers. It is also indirectly threatened by exotic insect pests and possibly air pollution, which are contributing to the demise of Fraser fir forests at higher elevations in the Southern Appalachians. This proposal, if made final, would implement the Act's protection and recovery provisions for *Gymnoderma lineare*.

DATES: Comments from all interested parties must be received by February 28, 1994. Public hearing requests must be received by February 11, 1994.

ADDRESSES: Comments and materials and requests for public hearings concerning this proposal should be sent to the Field Supervisor, Asheville Field Office, U.S. Fish and Wildlife Service, 330 Ridgefield Court, Asheville, North Carolina 28806. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Nora Murdock at the above address (704/665-1195, Ext. 231).

SUPPLEMENTARY INFORMATION:

Background

Gymnoderma lineare, first described by Evans (1947) as *Cladonia linearis* from material collected in Tennessee, is a squamulose lichen in the reindeer moss family. This species is the only member of its genus occurring in North America (Yoshimura and Sharp 1968). *Gymnoderma lineare* occurs in rather dense colonies of narrow straps (squamules). The only similar lichens are the squamulose species of the genus *Cladonia*. *Gymnoderma lineare* has terminal portions of the strap-like individual lobes that are blue-grey on the upper surface and generally shiny-white on the lower surface; near the base they grade to black (unlike squamulose *Cladonia*, which are never blackened toward the base) (Weakley 1988, Hale 1979). Hale's (1979) description of the species reads as follows: "Squamules dark greenish mineral grey; lower surface white to brownish toward the tips, weakly corticated; podetia lacking, but small clustered apothecia common on low tips. K plus yellow (atranorin)." Weakley further describes the species as having squamules about 1 millimeter across near the tip, tapering to the blackened base, sparingly and subdichotomously branched, and generally about 1 to 2 centimeters long (though they can be longer or shorter, depending upon environmental factors). The squamules are nearly parallel to the rock surface, but the tips curl away from the rock, approaching or reaching a perpendicular orientation to the rock surface. The fruiting bodies (apothecia) are borne at the tips of the squamules and are black (contrasting to the brown or red apothecia of *Cladonia* spp.) (Weakley 1988). The apothecia are borne singly or in clusters, usually at the tips of the squamules but occasionally along the sides; these have been found from July through September (Evans 1947, North Carolina Natural Heritage Program records 1991). The apothecia are either sessile or borne on short podetia 1 to 2 millimeters in height, and the largest of these have a diameter of about 1 millimeter, with most being much smaller. The apothecia are cylindrical in shape and radial in symmetry (Evans 1947). The primary means of propagation of this lichen appears to be asexual, with colonies spreading clonally. *Gymnoderma* was considered a monotypic genus for over a century, until its revision by Yoshimura and Sharp (1968). These authors reclassified Evans' (1947) *Cladonia linearis* as *Gymnoderma lineare* on the basis of its short and solid podetia that lack symbiotic algae.

Gymnoderma lineare is endemic to North Carolina and Tennessee and occurs only in areas of high humidity, either at high elevations, where it is frequently bathed in fog, or in deep gorges at lower elevations. It is primarily limited to vertical rock faces where seepage water from forest soils above flows at (and only at) very wet times. It is almost always found growing with the moss *Andreaea* in these vertical intermittent seeps. This association makes it rather easy to search for, due to the distinctive reddish-brown color of *Andreaea* that can be observed from a considerable distance (Weakley 1988). Most populations occur above 5,000 feet elevation. In Tennessee, it is apparently limited to the Great Smoky Mountains. Other common associates of this species include *Huperzia selago, Stereocaulon* sp., *Scirpus cespitosus, Carex misera, Rhododendron* spp., *Saxifraga michauxii, Krigia montana, Heuchera villosa, Geum radiatum*, and sometimes *Juncus trifidus*. The high-elevation coniferous forests adjacent to the rock outcrops and cliffs most often occupied by the species are dominated by red spruce (*Picea rubens*) and another Federal candidate species, Fraser fir (*Abies fraseri*).

Thirty-seven populations of *Gymnoderma lineare* have been reported historically; thirty-two remain in existence. Seven of these populations are in Sevier County, Tennessee. In North Carolina, two populations remain in Mitchell County, five in Jackson County, four in Yancey County, one in Swain County, three in Transylvania County, four in Buncombe county, two in Avery County, two in Ashe County, one in Rutherford County, and one in Haywood County. Five additional populations were historically known for this species. The reasons for the disappearance of the species at most of these sites are undocumented; however, one is believed to have been destroyed by highway construction. Many of the formerly occupied sites are subjected to heavy recreational use by hikers, climbers, and sightseers. In addition, the coniferous forests, particularly those dominated by Fraser fir at the high-elevation sites, are being decimated by the balsam wooly adelgid, an exotic insect pest, and possibly by air pollution. The death of the forests adjacent to the habitat occupied by this lichen has resulted in locally drastic changes in microclimate, including desiccation and increased temperatures.

The continued existence of this species is threatened by trampling and

associated soil erosion and compaction, other forms of habitat disturbance due to heavy recreational use of the habitat by hikers, climbers, and sightseers, as well as by development for commercial recreational facilities and residential purposes. It is also potentially threatened by logging, collectors, and directly or indirectly by air pollution.

Only 7 of the remaining 32 populations cover an area larger than 2 square meters. Most are 1 meter or less in size. It is unknown what constitutes a genetic individual in this species, and it is possible that each of these small colonies or patches consists of only a single clone (Weakley 1988). Over the past decade several of the currently extant populations have undergone significant declines (Paula DePriest, Smithsonian Institution, personal communication, 1992; Karin Holman, Environmental Consultant, personal communication, 1992), some within as little as 1 year (Alan Smith, Environmental Consultant, personal communication, 1992). Although all but five of the remaining populations are in public ownership, many continue to be impacted by collectors, recreational use, and environmental factors. Although no populations are known to have been lost as a result of logging operations, this is a potential threat.

Federal government actions on *Gymnoderma lineare* began with the 1990 publication in the Federal Register of a revised notice of review of plant taxa for listing as endangered or threatened species (55 FR 6184); *Gymnoderma lineare* was included in that notice as a category 2 species. Category 2 species are those for which listing as endangered or threatened may be warranted but for which substantial data on biological vulnerability and threats are not currently known or on file to support proposed rules.

Subsequent to that notice, the Service received additional information from the North Carolina Natural Heritage Program (Alan Weakley, North Carolina Natural Heritage Program, personal communication, 1991) and the Smithsonian Institution (DePriest, personal communication, 1992); this information and additional field data gathered by the North Carolina Natural Heritage Program, the Fish and Wildlife Service, and the National Park Service (Keith Langdon and Janet Rock, Great Smoky Mountains National Park, personal communication, 1992; Bambi Teague, Blue Ridge Parkway, personal communication, 1991) indicate that the addition of *Gymnoderma lineare* to the Federal List of endangered or threatened plants is warranted. The Service included this species as category 1 candidate in the September, 1993, plant notice of review (58 FR 51167).

Summary of Factors Affecting the Species

Section 4(a)(1) of the Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal list. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Gymnoderma lineare* are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Gymnoderma lineare is a narrow endemic, restricted to high-elevation mountaintops and cliff faces and the lower-elevation gorges in the Southern Appalachians of western North Carolina and eastern Tennessee (see "Background" section for specific distributions). Although populations are declining and vanishing for reasons that are, in many cases, not clearly understood, destruction and adverse modification of habitat pose a major threat to the remaining populations of this species. Fourteen percent of the historically known populations have been completely extirpated, and many others have been severely reduced in size. Only 32 populations, most less than 1 square meter in extent, remain.

Five of these populations are on privately owned lands, with one slated for residential development within the near future. Although the majority of the remaining populations are on publicly owned lands, most of these are subject to heavy recreational use, and many have been damaged as a result. Four populations contain 75 percent of the remaining plants. Three of these are located on lands administered by the National Park Service and the U.S. Forest Service, at sites where they are subjected to intense use by hikers, climbers, and sightseers. The only other relatively large population is located on a privately owned site which has been developed as a commercial recreational facility. All the known populations combined cover a total area of approximately 142 square meters. All five privately owned sites are unprotected and are located in an area that is rapidly developing as a center for resorts and tourism.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Gymnoderma lineare is not currently a significant component of the commercial trade in native plants. Hale (1979) stated, "This is one of the most unusual endemic lichens in North America and should not be collected by individuals." Nevertheless, many populations have been decimated by scientific collectors. Paula DePriest (personal communication, 1992) observed that at least one population in the Great Smokies was virtually wiped out by collections made during a field trip of lichenologists. Given the very small size of most colonies and the slow growth rate of this species, extirpation by collecting or by natural accident (such as slides or floods) is a distinct possibility (Weakley 1988). Many of the populations are easily accessible, being close to trails or roads. Publicity could generate an increased demand and intensify collecting pressure (see "Critical Habitat" section for reasons why critical habitat is not being designated).

C. Disease or Predation

This taxon is not known to be threatened by disease or predation.

D. The Inadequacy of Existing Regulatory Mechanisms

Gymnoderma lineare is afforded legal protection in North Carolina by North Carolina General Statute, Article 20, Chapter 106, Sections 202.1–202.8, that prohibits intrastate trade and taking of State-listed plants without a State permit and written permission of the landowner. *Gymnoderma lineare* is listed in North Carolina as threatened; it is not currently listed in Tennessee. State prohibitions against taking are difficult to enforce and do not cover adverse alterations of habitat or unintentional damage from recreational use. The Endangered Species Act will provide additional protection and encouragement of active management for *Gymnoderma lineare*, particularly on Federal lands.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

This taxon is rare and vulnerable due to its specialized habitat requirements for bare rock faces with a precise amount of moisture and light. As mentioned in the previous sections of this proposed rule, most of the remaining populations are small in numbers of individuals and in terms of area covered by the plants. Therefore, there is probably little genetic variability in this species, making it more important to maintain as much habitat and as many of the remaining colonies as possible. Rock slides, severe storms or droughts, or other natural events could easily eliminate populations of this lichen.

In recent years the spruce-fir forests adjacent to the high-elevation cliffs and rock outcrops occupied by this rare lichen have suffered dramatic declines due, at least in part, to airborne pollution and the impacts of an exotic insect, the balsam wooly adelgid. The impacts of this forest decline on *Gymnoderma lineare* cannot be accurately assessed at this time. Even though rock gnome lichen often grows in exposed places, the drastic decline of adjacent high-elevation forests may result in excessive desiccation of the moist sites required by the species. This theory would seem to be supported by the fact that *Geum radiatum*, already federally listed as endangered, is showing drastic declines at many of the same sites. With all but seven of the remaining populations of *Gymnoderma lineare* being less than 2 square meters in size, and with this species' very slow growth rate, even relatively small declines could pose a significant threat to the long-term survival and recovery of the species.

In addition to the indirect effects of air pollution on this species' habitat, lichens are known to effectively accumulate a wide variety of pollutants washed from the atmosphere by precipitation (St. Clair 1987). Photosynthetic rates, respiration rates, and membrane integrity of lichens have all been found to be very sensitive to a wide range of common air pollutants, including sulfur dioxide. St. Clair (1987) states, "Indeed lichen physiological processes appear to provide an indication of pollution damage long before any visible thallus necrosis or changes in community structure can be detected." A field study conducted by Pearson and Rodgers (1982) showed that membrane integrity in lichens is severely impacted following exposure to sulfur dioxide. Lawrey (1987) found that increasing levels of sulfur dioxide pollution had resulted in the elimination of some species of lichens in an area just north of the range of *Gymnoderma lineare*. Heavy metals and ozone also have been found to negatively affect lichens' potassium efflux, chlorophyll content, and photosynthetic rates (Puckett 1976, Nash and Sigal 1979, Sigal and Taylor 1979). Several observers have already noted declines in populations of *Gymnoderma lineare* which cannot be directly attributed to physical disturbance of the habitat (Weakley, personal communication, 1992; DePriest, personal communication, 1992; Shawn Oakley, The Nature Conservancy, North Carolina Field Office, personal communication, 1992). With the extremely small size of most of the remaining populations, declines of just a few centimeters a year could result in the imminent extinction of all but three of the remaining populations of this species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Gymnoderma lineare* as endangered. With 14 percent of the known populations having been completely extirpated and all the remaining populations subject to some form of threat, this species warrants protection under the Act. With the small number of individuals and area covered by the remaining populations, and with significant declines having been documented in many of these, this species is in danger of extinction throughout all or a significant portion of its range and, therefore, qualifies as an endangered species under the Act. Critical habitat is not being designated for the reasons discussed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for *Gymnoderma lineare*. Publication of critical habitat descriptions and maps would increase public interest and possibly lead to additional threats for this species from collecting and vandalism (see threat factor "B" above). The species has already been subjected to excessive collecting by scientific collectors at several sites. Increased publicity and a provision of specific location information associated with critical habitat designation could result in increased collection from the remaining wild populations. Although taking of endangered plants from lands under Federal jurisdiction (and from privately owned lands under certain circumstances—see "Available Conservation Measures" section) and reduction to possession is prohibited by the Endangered Species Act, taking provisions are difficult to enforce. Publication of critical habitat descriptions would make *Gymnoderma lineare* more vulnerable and would increase enforcement problems for the U.S. Forest Service and the National Park Service. Also, the populations on private lands would be more vulnerable to taking. Increased visits to population locations stimulated by critical habitat designation, even without collection of plants, could adversely affect the species due to the associated increase in trampling of the fragile habitat occupied by this lichen. The lichen is easily scraped off its rocky substrate, and denuded habitat is not quickly recolonized. The Federal and State agencies and land owners involved in managing the habitat of this species have been informed of the plant's locations and of the importance of protection; therefore, it would not be prudent and no additional benefit would result from a determination of critical habitat.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in the destruction or adverse modification of proposed critical habitat. If a species is subsequently listed, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency

must enter into formal consultation with the Service.

The U.S. Forest Service and the National Park Service have jurisdiction over portions of the species' habitat.

Federal activities that could impact *Gymnoderma lineare* and its habitat in the future include, but are not limited to, the following: Construction of recreational facilities (including trails, buildings, or maintenance of these facilities), use of aerially applied retardants in fire-fighting efforts, road construction, certain timber-harvesting techniques, permits for mineral exploration, and any other activities that do not include planning for the species' continued existence. The Service will work with the involved agencies to secure protection and proper management of *Gymnoderma lineare* while accommodating agency activities to the extent possible.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general prohibitions and exceptions that apply to all endangered plants. All trade prohibitions at section 9(a)(2) of the Act, implemented by 50 CFR 17.61 would apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. In addition, the 1988 amendments (Pub. L. 100–478) to the Act protect endangered plants from malicious damage or destruction on Federal lands, and the removal, cutting, digging up, or damaging or destroying in knowing violation of any State law or regulation, including State criminal trespass law. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued since *Gymnoderma lineare* is not common in the wild and is not commercially cultivated. Requests for copies of the regulations on listed plants and inquiries regarding prohibitions should be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, MS 432, 1849 C Street, NW., Washington, DC 20240 (703/358–2104).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Gymnoderma lineare;*

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, and distribution, of this species; and

(4) Current or planned activities in the subject area and their possible impacts on *Gymnoderma lineare.*

Final promulgation of the regulation on *Gymnoderma lineare* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Field Supervisor, Asheville Field Office (see "ADDRESSES" section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulations Promulgation

Accordingly, the Service hereby proposes to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. § 17.12(h) is amended by adding the following, in alphabetical order, under *Cladoniaceae,* to the List of Endangered and Threatened Plants, to read as follows:

§ 17.12 Endangered and threatened plants.

* * * * *

(h) * * *

Species		Historic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Cladoniaceae—Reindeer moss family:						
Gymnoderma lineare.	Rock gnome lichen	U.S.A. (NC, TN)	E		NA	NA

Dated: November 9, 1993.

Notices

Federal Register
Vol. 58, No. 247
Tuesday, December 28, 1993

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Intent To Prepare an Environmental Impact Statement for the Construction of an Office Complex in Beltsville, Prince Georges County, MD

Pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as implemented by the Council on Environmental Quality (40 CFR parts 1500–1508), the Department of Agriculture (USDA) announces its intent to prepare an Environmental Impact Statement (EIS) for the proposed construction of a building complex on Government-owned land within the Beltsville Agricultural Research Center, Prince Georges County, Maryland. The complex has been considered to be constructed in two phases, each with 350,000 square feet of space plus parking for up to 1400 vehicles. The building complex will house elements of USDA currently housed in leased facilities in Washington, DC, Maryland, Virginia and in the Agriculture Headquarters Complex in Washington, DC.

The EIS will consider—Site A: approximately 100 acres located north of Interstate 95, southeast of the intersection of Rhode Island Avenue with Sunnyside Avenue; Site B: approximately 220 acres located east of the Baltimore/Washington Parkway, southeast of the intersection of Powder Mill Road with Soil Conservation Service Road; and Site C: approximately 75 acres located east of Edmonston Road, and 1000 feet south of Beaverdam Road. The EIS will also consider a No Action alternative—continued use of scattered leased facilities.

Potential environmental impacts resulting from the proposed project include short-term construction-related impacts, long-term changes in traffic, and socio-economic and physical conditions within the project area.

USDA will initiate the EIS process with a public scoping meeting for the purpose of determining significant issues related to the proposed construction and relocation of USDA employees. A public scoping meeting will be scheduled for *Monday, January 31, 1994, at 7:00 p.m.* in the auditorium of the *Beltsville Public Library*, located at *4319 Sellman Road*, Beltsville, Maryland. A short formal presentation will precede the request for public comments. USDA representatives will be available at this meeting to receive comments from the public regarding issues of concern. It is important that Federal, state and county agencies, and interested individuals and groups take this opportunity to identify environmental concerns that should be addressed during the preparation of the Draft EIS. In the interest of available time, each speaker will be asked to limit oral comments to ten (10) minutes.

In addition to the scoping meeting, USDA has made available for inspection at the Beltsville Library, and upon request, an Environmental Assessment (EA) addressing construction of the proposed complex at Site A. Agencies and the general public are invited and encouraged to provide written comments on the EA, in addition to, or in lieu of oral comments at the public meeting. To be most helpful, scoping comments should clearly describe specific issues or topics which the commentor believes the EIS should address.

All written statements and/or questions regarding the USDA Beltsville Office Complex must be mailed no later than *Wednesday, February 16, 1994*, to the address below.

Mr. Michael Sazonov, Contracting Officer Technical Representative, United States Department of Agriculture, Office of Operations, Facilities Management Division, Engineering Branch, South Building, room S–313, 14th Street & Independence Avenue SW., Washington, DC 20250.

Dated: December 6, 1993.

Wardell C. Townsend, Jr.,

Assistant Secretary for Administration.

[FR Doc. 93–31606 Filed 12–27–93; 8:45 am]

BILLING CODE 3410-96-M

Federal Crop Insurance Corporation

Termination of the Standard Reinsurance Agreement

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice of termination of the Standard Reinsurance Agreement, and Agency Sales and Service Contract.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) herewith gives notice that it will terminate the current (1994) Standard Reinsurance Agreement, and Agency Sales and Service Contract, effective as of June 30, 1994.

FOR FURTHER INFORMATION CONTACT: E. Heyward Baker, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 254–8245.

SUPPLEMENTARY INFORMATION: The Food, Agriculture, Conservation, and Trade Act of 1990 (The 1990 Farm Act), enacted on November 28, 1990 (Pub. L. 101–624, 104 Stat. 3359) amended the Federal Crop Insurance Act (5 U.S.C. 1501 *et seq.*) to provide that beginning with the 1992 reinsurance year, the FCIC shall revise its reinsurance agreements to require an assumption of a greater share of risk by reinsured companies. In addition, the Omnibus Budget Reconciliation Act of 1993 requires the FCIC to take management actions to achieve budget savings and a projected loss ratio of 1.10 or less by October 1, 1995, and thereafter.

This action is necessary to provide FCIC sufficient time to address issues and changes for the 1995 Standard Reinsurance Agreement and is consistent with the direction provided by the 1990 Farm Act, Omnibus Budget Reconciliation Act of 1993, and other program improvements necessary to attain greater financial soundness in the multiple peril crop insurance program.

Notice

Accordingly, The Federal Crop Insurance Corporation (FCIC) herewith gives notice that it will terminate the current (1994) Standard Reinsurance Agreement and Agency Sales and Service Contract, effective as of June 30, 1994.

Done in Washington, DC on December 20, 1993.

Kenneth D. Ackerman,

Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

Forest Service

National Urban and Community Forestry Advisory Council

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The National Urban and Community Forestry Advisory Council will meet in Ft. Lauderdale, Florida, January 20–22, 1994 with a tour of local projects, January 20, 8:30 a.m., to 4:30 p.m. The Council is comprised of 15 members appointed by the Secretary of Agriculture. The purpose of the meeting is to begin oversight responsibilities and budget estimates for members of Congress. The meeting will be Chaired by William Kruidenier of the International Society of Arboriculture and is open to the public. Time will be provided at the beginning of each major agenda topic for public input. Time to speak must be requested in advance from the committee staff. However, Council discussion is limited to Forest Service staff and Council members. Persons who wish to bring urban and community forestry matters to the attention of the Council may file written statements with the Council staff before or after the meeting.

DATES: The meeting will be held January 20–22, 1994.

ADDRESSES: The meeting will be held at the Courtyard Marriott, 7780 SW., 6th Street, Plantation, Florida 33324.

Send written statements and/or requests for agenda items or participation in the tour to Brian McGuire, National Urban and Community Forestry Advisory Council, c/o Forest Service—Cooperative Forestry, USDA, P.O. Box 96090, Washington, DC 20090–6090, or phone (202) 205–1689.

FOR FURTHER INFORMATION CONTACT: Brian McGuire, Cooperative Forestry Staff, (202) 205–1689.

Dated: December 21, 1993.

Michael T. Rains,

Acting Deputy Chief, State and Private Forestry.

[FR Doc. 93–31523 Filed 12–27–93; 8:45 am]

BILLING CODE 3410-11-M

DEPARTMENT OF AGRICULTURE

Office of General Counsel

DEPARTMENT OF THE INTERIOR

Office of the Solicitor

Water Rights Under the Wilderness Act

AGENCIES: Office of General Counsel, Agriculture; Office of the Solicitor, Interior.

ACTION: Notice with request for comment.

SUMMARY: The Departments of Agriculture and the Interior are seeking public comment on a reevaluation of the Federal position on interpreting the Wilderness Act of 1964 in relation to Water rights.

DATES: Comments are requested by April 1, 1994.

ADDRESSES: Comments may be submitted to James Gilliland, General Counsel, Department of Agriculture, room 107W, Administration Building, 14th and Independence Ave. SW., Washington, DC 20250–1401, or to John D. Leshy, Solicitor, Department of the Interior, MS 6352, 1849 C St. NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: James Gilliland, 202–720–3351, or John D. Leshy, 202–208–4423.

SUPPLEMENTARY INFORMATION: The Departments of Agriculture and the Interior, in consultation with the Department of Justice, are undertaking to reexamine the position of their agencies not to file claims for water rights under federal law based upon congressional designation of federal lands as part of the National Wilderness Preservation System. Pending that reevaluation, a Department of the Interior Solicitor's Opinion reaching that conclusion (# M–36914) (Supp. III) (July 26, 1988), overruling a portion of Solicitor's Opinion M–36914, 86 I.D. 553 (June 25, 1979), has been suspended, as has the concurrence of the Attorney General in the 1988 Opinion.

The legal issue presented is primarily the interpretation to be given certain provisions of the Wilderness Act of 1964 and related federal legislation. As part of this reevaluation, comment is sought from interested persons, including especially state water rights administrators, water users, and others interested in water management. Comment is invited not only on the legal issues, but also on any practical questions that may be raised by their resolution.

Those interested are urged to submit views on these issues and questions to either or both of the addresses listed above by April 1, 1994.

Pending completion of this reevaluation, pertinent federal agencies will, in order not to forfeit claims of water rights that might be made as a result of this reevaluation, file claims for water rights in pertinent designated wilderness areas when required to file water rights claims by court deadlines in pending adjudications.

Dated: December 16, 1993.

James Gilliland,

General Counsel, Department of Agriculture.

John D. Leshy,

Solicitor, Department of the Interior.

BILLING CODE 4310-RF-M

ARMED FORCES RETIREMENT HOME

Privacy Act of 1974; Systems of Records

AGENCY: Armed Forces Retirement Home (AFRH).

ACTION: Notice; systems of records.

SUMMARY: This notice provides an Armed Forces Retirement Home system of records and the routine uses pursuant to the Privacy Act of 1974, (5 U.S.C. 552a) as amended.

DATES: The system of records becomes effective January 27, 1994. Any public comments must be received before the effective date.

ADDRESSES: Written comments may be sent or delivered to the Administrative Officer, Administration Division/ Resource Management Directorate, U.S. Soldiers' and Airmen's Home, 3700 North Capitol Street, NW., Washington, DC 20317–0002.

FOR FURTHER INFORMATION CONTACT: Doris D. Montgomery, 202–722–3230.

SUPPLEMENTARY INFORMATION: The Armed Forces Retirement Home Act of 1991, incorporated the U.S. Soldiers' and Airmen's Home (USSAH) and the United States Naval Home (USNH) into an independent establishment in the Executive Branch of the Federal Government to be known as the Armed Forces Retirement Home. This law requires its residents, who are persons who have met the criteria for membership, to pay a monthly fee, which is a fixed percentage of their monthly Federal payments.

The "Armed Forces Retirement Home Resident Fee Maintenance System" is a system of records used by AFRH/ USSAH personnel to compile information on the source(s) and gross amount(s) of all Federal income entitled to each resident for computation,

billing, and collection of the monthly Resident Fee. The Federal payments include retired or retainer pay, civil service annuity, compensation or pension paid by the Secretary of Veterans Affairs, and Social Security.

The system of records is comprised of hard copies, computer printouts and computerized database. The records will be indexed by the residents' names and/or Social Security numbers.

The records in this system will be maintained in a secure manner and the personnel will be required to adhere to the provisions of the Privacy Act of 1974, (5 U.S.C. 552a) as amended. The system manager will control access to the data . Only authorized users having official duties requiring the use of the information have regular access to the records in this system. Authorized users are AFRH/USSAH employees responsible for implementing the AFRH Resident Fee Maintenance System. Records will be stored in computerized electronic database and file cabinets. Rooms and cabinets where records are stored are locked when not in use. During regular business hours, rooms and cabinets are unlocked but are controlled by on-site personnel.

AFRH—1

SYSTEM NAME:

Armed Forces Retirement Home Resident Fee Maintenance System.

SYSTEM LOCATION:

U.S. Soldiers' and Airmen's Home, Fiscal Division, Resource Management Directorate, 3700 North Capitol Street, NW., Washington, DC 20317–0002.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Residents of the Armed Forces Retirement Home.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains information relating to the residents of the Armed Forces Retirement Home, their Federal income sources, and gross monthly entitlement/s. (Name, SSN, address, source/s of Federal payment, gross amounts of payments, Resident Fee amount, payment history).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 24 U.S.C. 401–441, Armed Forces Retirement Home Act of 1991.

PURPOSE:

The purpose of the system of records is to provide a single central facility within the AFRH to maintain the Federal income sources of each resident for the purpose of billing, maintenance and collection of the monthly Resident Fee. All records in the system are subject to use in authorized approved computer matching programs as regulated by the Privacy Act of 1974, (5 U.S.C. 552a) as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records in this system of records may be disclosed as indicated below:

1. To the Defense Manpower Data Center, Department of Defense, for the verification of retired or retainer benefit pay of the subjects of record.

2. To the Social Security Administration for the verification of benefit payments of the subjects of record.

3. To the Department of Veterans Affairs for the verification of veterans compensation or pension benefits of the subjects of record.

4. To the Office of Personnel Management for the verification of annuity benefits of the subjects of record.

5. To any other Federal agency for verification of Federal payments of subjects of record.

6. To the Inspector General of Department of Defense or his/her designee, while conducting inspections of the records of the AFRH.

7. To a Congressional office in response to an inquiry from that office made at the request of, or about, a subject of a record.

8. To a Federal agency, or an organization or person contracting with the AFRH for information needed in the performance of official duties related to reconciling or reconstructing data files, compiling descriptive statistics, and/or making analytical or financial studies to support the function for which the records were collected and maintained.

9. To a Federal agency, a court, or a party in litigation before a court, or in an administrative proceeding being conducted by a Federal agency, when the Government is a party to the judicial or administrative proceeding.

POLICIES AND PRACTICES OF STORING, RETRIEVING, SAFEGUARDING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in a computerized electronic database, magnetic tape, computer printouts, and on cards.

RETRIEVABILITY:

These records are retrieved by the Social Security Number or name of the individual.

SAFEGUARDS:

Records are maintained in a secured area with access limited to authorized personnel. Confidential passwords are required for access to automated records.

RETENTION AND DISPOSAL:

Records are retained for 3 years. Manual records are destroyed by shredding. Tapes and diskettes are erased.

SYSTEM MANAGER AND ADDRESS:

Budget Officer, Fiscal Division/ Resource Management Directorate, U.S. Soldiers' and Airmen's Home, 3700 North Capitol Street, NW., Washington, DC 20317–0002.

NOTIFICATION PROCEDURE:

Individuals wishing to inquire whether the system of records contains information about themselves should contact the System Manager. Written requests should include full name and Social Security Number, and be signed by the requesting individual. For personal visits, the requesting individual must provide acceptable identification, e.g. USSAH or USNH Identification Card, U.S. Uniformed Services Identification Card, driver's license, etc.

RECORD ACCESS PROCEDURE:

Individuals wishing to request access to records about themselves should contact the System Manager. Written requests should include full name and Social Security Number, and be signed by the requesting individual. For personal visits, the requesting individual must provide acceptable identification, e.g., USSAH or USNH Identification Card, U.S. Uniformed Services Identification Card, driver's license, etc.

CONTESTING RECORD PROCEDURE:

Individuals seeking to amend their records should contact the System Manager. Written requests should include full name and Social Security Number, and be signed by the requesting individual. For personal visits, the requesting individual must provide acceptable identification, e.g., USSAH or USNH Identification Card, U.S. Uniformed Services Identification Card, driver's license, etc.

RECORDS SOURCE CATEGORIES:

Information in this system comes from the individual to whom it applies or the next of kin, relative, power of attorney, conservator and/or guardian acting on behalf of the individual. Verification of income is necessary and is made through the Defense Manpower Data Center, Social Security Administration, Department of Veterans Affairs, and the Office of Personnel Management.

Dennis W. Jahnigen, M.D.,

Armed Forces Retirement Home Chair.

National Institute of Standards and Technology

Preparation of Guidelines for the Production of Lead Containing Reference Materials

AGENCY: National Institute of Standards and Technology, DOC.

ACTION: Notice of public meeting.

SUMMARY: The Inorganic Analytical Research Division (IARD) of the National Institute of Standards and Technology, and the Chemical Management Division of the Office of Pollution Prevention and Toxics of the Environmental Protection Agency will conduct a one day meeting to discuss the preparation of guidelines for the production of lead-containing reference materials which will provide benchmarks for quantitative chemical analyses of lead in paint, soil, and dust. A publication will be produced from this meeting. Interested members of the public are invited to attend. Preregistration is required by January 21, 1994.

DATE: The meeting will convene January 28, 1994, at 9 a.m. to 4 p.m.

ADDRESSES: The meeting will be held in Lecture Room D, Administration Building, National Institute of Standards and Technology, Gaithersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Dr. William F. Koch, Deputy Chief, Inorganic Analytical Research Division, National Institute of Standards and Technology, Gaithersburg, Maryland 20899, telephone number (301) 975–4143 or Mr. John Scalera, Office of Pollution Prevention and Toxics, Environmental Protection Agency, telephone number (202) 260–6709. Preregister by calling Jo Ann Brooks at (301) 975–4143.

Dated: December 20, 1993.

Announcement of Meeting of National Conference on Weights and Measures

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Interim Meeting of the National Conference on Weights and Measures will be held January 9 through 13, 1994, at the Hyatt Regency Bethesda Hotel, Bethesda, MD. The meeting is open to the public.

The National Conference on Weights and Measures is an organization of weights and measures enforcement officials of the States, counties, and cities of the United States, and private sector representatives. The interim meeting of the conference, as well as the annual meeting to be held next July (a notice will be published in the **Federal Register** prior to such meeting), brings together enforcement officials, other government officials, and representatives of business, industry, trade associations, and consumer organizations to discuss subjects that relate to the field of weights and measures technology and administration.

Pursuant to section 2(5) of its Organic Act (15 U.S.C. 272(5)), the National Institute of Standards and Technology acts as a sponsor of the National Conference on Weights and Measures in order to promote uniformity among the States in the complex of laws, regulations, methods, and testing equipment that comprises regulatory control by the States of commercial weighing and measuring.

DATE: The meeting will held January 9–13, 1994.

LOCATION OF MEETING: Hyatt Regency Bethesda Hotel, Bethesda, MD.

FOR FURTHER INFORMATION CONTACT: Dr. Carroll Brickenkamp, Executive Secretary, National Conference on Weights and Measures, P.O. Box 4025, Gaithersburg, Maryland 20885. Telephone: (301) 975–4005.

Dated: December 20, 1993.

Time and Date: January 12, 1994 from 8:30 a.m.–12 noon and 1–4:30 p.m.; and January 13, 1994 from 8:30 a.m.–12 noon and 1–2:30 p.m.

Place: This meeting will take place at the Quality Hotel, 8727 Colesville Road Silver Spring, Maryland 20910.

Status: The meeting will be open to the public. The last 30 minutes of the last day will be set aside for oral comments from the public. Approximately 20 seats will be available on a first-come first-served basis for the public.

Matters to be Considered: This meeting will cover: (1) Final Consultation with the Committee on the FY95 National Implementation Plan and the Final Modernization Criteria; (2) a briefing to the Committee by the National Weather Service Employees Organization; and (3) a briefing by NWS on the status of the Automated Weather Interactive Processing System (AWIPS).

Contact Person for More Information: Mr. Senator Raygor, National Weather Service, Transition Program Office, 1325 East-West Highway, SSMC2, Silver Spring, MD 20910, telephone: (301) 713–0391.

Elbert W. Friday,

Assistant Administrator for Weather Services.

[FR Doc. 93–31569 Filed 12–27–93; 8:45 am]

BILLING CODE 3510–12–M

[Docket No. 931235336; I.D. 111593A]

Western Pacific Bottomfish and Seamount Groundfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic Atmospheric Administration (NOAA), Commerce.

ACTION: Intent to issue a limited entry permit.

SUMMARY: The Regional Director, Southwest Region, NMFS, in consultation with the Western Pacific Fishery Management Council, has determined that the Northwestern Hawaiian Islands (NWHI) limited entry bottomfish fishery in the Ho'omalu Zone is able to support an additional fishing vessel. Under the regulations governing this fishery, this determination is to be announced in the **Federal Register**. The Regional Director intends to issue a limited entry permit to an eligible vessel owner according to regulations at 50 CFR 683.25 governing the bottomfish and seamount groundfish fisheries in the western Pacific region.

DATES: Applications for a NWHI bottomfish limited entry permit must be received by 4:30 p.m., HST January 3, 1994.

ADDRESSES: Requests for and submissions of NWHI bottomfish permit applications should be directed to the

Pacific Area Office, NMFS, 2570 Dole Street, Honolulu, Hawaii 96822, Attn: Permit Application.

FOR FURTHER INFORMATION CONTACT: Svein Fougner, Fisheries Management Division, Southwest Region, NMFS, Long Beach, California 90802 (310) 980–4034; or Alvin Katekaru, Pacific Area Office, Southwest Region, NMFS, Honolulu, Hawaii (808) 955–8831.

SUPPLEMENTARY INFORMATION: The bottomfish fishery in the exclusive economic zone of the NWHI is managed by the Secretary of Commerce (Secretary) according to the Fishery Management Plan for the Bottomfish and Seamount Groundfish Fisheries of the Western Pacific Region (FMP). The Council prepared, and the Secretary approved, the FMP under the authority of the Magnuson Fishery Conservation and Management Act. Permit requirements governing participation of U.S. vessels in the NWHI bottomfish limited access fishery are contained in 50 CFR part 683.

In 1988, Amendment 2 to the FMP created a limited access program for the NWHI bottomfish fishery. A vessel owner who meets one of the six eligibility criteria in the FMP for participation in the NWHI bottomfish limited access fishery (Ho'omalu Zone) was given 5 years from the effective date of the program (i.e., until the end of 1993) to file an application and receive a limited entry permit. This was intended to prevent a rush of entry or reentry to the Ho'omalu Zone and thus reduce the risk of overfishing. The regulations also provide mechanisms for future issuance of permits as exit from the fishery or increases in the stocks provide room for new entry.

At its 81st meeting in September 1993, the Council determined that the NWHI bottomfish fishery is able to support additional vessels in the fishery since the projected total annual revenue to the expanded fleet operating on a full-time equivalent basis will still exceed the total estimated annual fixed and variable costs of the fleet in the Ho'omalu Zone. There has been a gradual decrease in the level of participation in the fishery during the past few years. The number of active vessels dropped from 12 in 1988 to 5 in 1992, and only one of the participants in 1992 was fishing in the area full time. It is estimated the stocks in the Ho'omalu Zone could support 6.5 vessels on a full time basis and up to 11 vessels at the average level of participation on 1992.

The limited entry program anticipated some attrition in the fishery over time. Under the regulations, a permit holder must make three landings in a year to qualify for renewal of his permit. Several persons have lost their permit eligibility. New entry is provided for in two ways: First, prospective entrants may earn "points" toward eligibility by fishing in the Mau Zone or around the main Hawaiian Islands; or second, a former permit holder may surrender his permit to the Regional Director and gain priority for consideration for a permit if the fishery is opened to new persons.

The application deadline for limited entry permits under the initial eligibility criteria occurs at the end of 1993. Based on records available to him concerning participation in the fishery prior to the limited entry program, the Regional Director anticipates that no more than two persons would qualify for permits under the initial criteria. Both of these individuals have indicated an interest in obtaining permits to be effective in 1994. If these persons do apply, there would still be space for one additional vessel. Therefore, in concurrence with the Council's recommendation, the Regional Director has determined that there is room for one additional vessel. He intends to issue one permit under this provision. This permit will be issued to a previous permit holder who was the first to surrender his permit under § 683.25(e)(4) of the regulations and who therefore has top priority for a permit for the fishery.

If the two permit applications anticipated for receipt within the original 5-year application period are not received, the Regional Director will announce a new opportunity for prospective new entrants to apply for permits.

Dated: December 21, 1993.

Nancy Foster,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-M

[I.D. 121793A]

Gulf of Mexico Fishery Management Council; Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council's (Council) Shrimp Advisory Panel (Panel) will meet on January 10, 1994, at the Radisson Inn New Orleans Airport, 2150 Veterans Memorial Boulevard, Kenner, LA; telephone: (504) 467–3111. The meeting will be held from 10 a.m. until 5 p.m.

The Panel will complete the following:

(1) Review the results of the 1993 shrimp season in the Gulf of Mexico and develop recommendations to the Council for the seasonal closure off Texas for 1994;

(2) Receive a status report on studies to characterize and reduce finfish bycatch in shrimp trawls; and

(3) Review Draft Amendment #7 to the Fishery Management Plan for Gulf Shrimp which would provide a definition for overfishing of white shrimp and remedial action if overfishing should occur. It would also delete the total allowable level of foreign fishing for royal red shrimp and increase the domestic harvest levels.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Laura Mataluni at the address below by January 3, 1994.

FOR FURTHER INFORMATION CONTACT: Terrance R. Leary, Fishery Biologist, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, suite 331, Tampa, FL; telephone: (813) 228–2815.

Dated: December 17, 1993.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 93–31693 Filed 12–27–93; 8:45 am]

BILLING CODE 3510-22-P

[I.D. 122093D]

North Pacific Fishery Management Council; Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The North Pacific Fishery Management Council's Industry Individual Fishing Quota (IFQ) Implementation Workgroup will meet on January 4, 1994, at 8 a.m. in conference room 445, at the Federal Building, 709 W. 9th Street, Juneau, AK.

The workgroup will discuss aspects of the final rulemaking for the Sablefish/Halibut IFQ program, which is scheduled to go into effect in 1995.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Judy Willoughby, on (907) 271–2809, at least 10 working days prior to the meeting date.

FOR FURTHER INFORMATION CONTACT: Chris Oliver, The North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: (907) 271–2809.

Dated: December 21, 1993.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 93–31694 Filed 12–27–93; 8:45 am]

BILLING CODE 3510-22-P

Marine Mammals

AGENCY: National Marine Fisheries Service, (NMFS), NOAA, Commerce.

ACTION: Receipt of applications for a scientific research permit (P79H and P558).

SUMMARY: Notice is hereby given that: The Institute of Marine Sciences and Department of Biology, University of California, Santa Cruz, CA 95064 (Dr. Ronald Schusterman, Principal Investigator); and Department of Anatomy, Tulane University School and Medicine, New Orleans, LA 70112 (Dr. Robert D. Yates, Principal Investigator), have each applied for a Permit to take elephant seals (*Mirounga angustirostris*) for scientific research.

ADDRESSES: Documents submitted in connection with the above applications are available for review by writing to or by appointment in the Permits Division, Office of Protected Resources, NMFS, 1315 East-West Hwy., Suite 13130, Silver Spring, MD 20910 (301/713–2289);

(P79H and P558): Director, Southwest Region, NMFS, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213; and

(P558): Director, Southeast Region, NMFS, 9450 Koger Blvd., St. Petersburg, FL 33702–2432 (813–893–3141).

SUPPLEMENTARY INFORMATION: The University of California and Tulane University School of Medicine each request a Scientific Research Permit as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Dr. Schusterman of the Santa Crus will conduct research on one elephant seal. An animal will be obtained from beached/stranded stock or if a suitable animal is not available, a seal will be collected from the wild. If collection will be from the wild, permission is requested to take three animals initially to determine trainability. Two will then be released back into the wild within 1 to 2 weeks after capture. The animal will be used in research to determine aerial and underwater pure tone detection thresholds. The object is to gain an understanding of the sensory systems of the elephant seal in its environment, as well as to determine the impacts of anthropogenic underwater noise on the animal's hearing abilities.

Dr. Yates of TU School of Medicine requests authority to obtain four beached/stranded elephant seals from rehabilitation centers that are earmarked for euthanasia. The hearings will be removed and used for study and biopsies will be taken and processed for routine light and electron microscopy and immunocytochemistry. The objective is to extend the level of information on how cardiac cell ultrastructure varies with activity and the environment. The long-term goal is to apply these findings to an understanding of human cardiac disorders.

Written data or views, or requests for a public hearing on either application should be submitted to the Assistant Administrator for Fisheries, NMFS, U.S. Department of Commerce, 1315 East-West Hwy., room 13130, Silver Spring, MD 20910, within 30 days of the publication of this notice.

Dated: December 21, 1993.

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 93–31588 Filed 12–27–93; 8:45 am]

BILLING CODE 3510-22-M

[I.D. 122093E]

North Pacific Fishery Management Council; Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The North Pacific Fishery Management Council (Council), its Advisory Panel (AP), and Scientific and Statistical Committee (SSC) will meet on January 9–11, 1994, at the Anchorage Hilton Hotel, 3rd Avenue & F Street, Anchorage, AK; telephone: (907) 272–7411.

The AP will begin its meeting on January 9 at 1 p.m., and the SSC will begin its meeting on January 10 at 10:30 a.m. The Council will meet on January 11 at 8 a.m. and continue through the week until the agenda is completed.

The Council will consider and may take action on the following agenda items:

(1) Review of elements and options for the comprehensive rationalization program for groundfish and crab fisheries off Alaska;

(2) Final review of a regulatory amendment that would implement a 5,000 lb. (2267.96 kg) trip limit on the 12-hour halibut openings in International Pacific Halibut Commission area 4B, with a 20-percent set-aside for vessels fishing under the trip limits;

(3) Final review of analysis for a superexclusive registration area for the Norton Sound red king crab fishery;

(4) Review of the provisions in the final rule to implement the Sablefish and Halibut Individual Fishing Quota program and receive a progress report on implementation;

(5) Receive a report from the Halibut Charter Working Group on management options for the Alaska halibut charter fleet and discuss future action;

(6) Develop research priority recommendations to forward to NMFS;

(7) Review an experimental permit request from Terra Marine Research, if available;

(8) Review activities of the Salmon Foundation and receive a report on chum salmon interceptions;

(9) Discuss and develop alternatives for full utilization of the fishery resources off Alaska;

(10) Receive a progress report from NMFS on development of alternatives for requiring total weight measurement in the fisheries; and

(11) Receive a report on bycatch of *C. opilio* in all fisheries and determine whether to proceed with further analysis of prohibited species caps.

Other committees and workgroups may meet during the week. All meetings are open to the public with the exception of a Council executive session, which will be held during the lunch hour sometime during the week. During executive sessions, the Council receives reports on litigation, international affairs, and personnel matters.

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Judy Willoughby, on (907) 271–2809, at least 10 working days prior to the meeting date.

FOR FURTHER INFORMATION CONTACT: The North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: (907) 271–2809.

Dated: December 21, 1993.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 93-31695 Filed 12-27-93; 8:45 am]

BILLING CODE 3510-22-P

National Technical Information Service

Prospective Grant of Exclusive Patent License

This is notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Technical Information Service (NTIS), U.S. Department of Commerce is contemplating the grant of an exclusive license in the United States to practice the invention embodied in U.S. Patent Application Ser. No. 8-087,374, titled "Device for the Removal and Concentration of Organic Compounds from the Atmosphere," to Customs Industrial Analysis Laboratories, having a place of business in St. Joseph, MO. The patent rights in this invention have been assigned to the United States of America.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. While the primary purpose of this notice is to announce NTIS' intent to grant an exclusive license to practice Ser. No. 8-087,374, it also serves to publish said patent's availability for licensing in accordance with law. The prospective exclusive license may be granted unless, within ninety days from the date of this published notice, NTIS receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The present invention describes a device and method for removing, concentrating and analyzing airborne organic compounds. The device includes a nonporous membrane which contains a collection media. The liquid collection media typically includes a component which has a molecular weight that is too large to pass through transport corridors in the nonporous membrane and a component which has a molecular weight which is sufficiently small to pass through the transport corridors in the nonporous membrane and thereby forming a thin film on the exterior surface of the device. The collection media can consist of only components too large to pass through the membrane transport corridors. Organic contaminants are trapped in the thin film on the exterior surface of the device or the membrane and transported by concentration gradient diffusion forces into the bulk of the collection media within the nonporous membrane.

A copy of the above-identified patent application may be purchased from the NTIS Sales Desk by telephoning 1-800-553-NTIS or by writing NTIS at 5285 Port Royal Road, Springfield, VA 22161.

Inquiries, comments and other materials relating to the contemplated license must be submitted to Neil L. Mark, Office of Federal Patent Licensing, NTIS, box 1423, Springfield, VA 22151. Properly filed competing applications received by the NTIS in response to this notice will be considered as objections to the grant of the contemplated license.

Douglas J. Campion,

Acting Director, Office of Federal Patent Licensing.

[FR Doc. 93-31541 Filed 12-27-93; 8:45 am]

BILLING CODE 3510-04-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products Produced or Manufactured in Bangladesh

December 21, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 23, 1993.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-5850. For information on embargoes and quota re-openings, call (202) 482-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing, special shift and carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 57 FR 54976, published on November 23, 1992; and 58 FR 62645, published on November 29, 1993). Also see 57 FR 60174, published on December 18, 1992.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 21, 1993.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 11, 1992, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Bangladesh and exported during the twelve-month period which began on February 1, 1993 and extends through January 31, 1994.

Effective on December 23, 1993, you are directed to amend further the directive dated December 11, 1992 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the People's Republic of Bangladesh:

Category	Adjusted twelve-month limit [1]
334	122,261 dozen.
335	181,024 dozen.
347/348	1,659,021 dozen.
635	241,956 dozen.
647/648	827,650 dozen.
847	390,153 dozen.

[1] The limit has not been adjusted to account for any imports exported after January 31, 1993.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 93-31671 Filed 12-27-93; 8:45 am]

BILLING CODE 3510-DR-F

COUNCIL ON ENVIRONMENTAL QUALITY

Endangered Species Act Exemption; Annual Report Availability

December 21, 1993.

AGENCY: Council on Environmental Quality, Executive Office of the President.

ACTION: Information only: Notice of availability of annual report on Endangered Species Act exemption.

SUMMARY: This notice announces the availability of the 14th Annual Report submitted by Basin Electric Power Cooperative, as Project Manager for the Missouri Basin Power Project in the matter of an exemption granted from the requirements of the Endangered Species Act to Grayrocks Dam. The lead federal agency in the project is the Rural Electrification Administration.

DATES: The report was submitted to the Council On December 3, 1993.

SUPPLEMENTARY INFORMATION: Under the Endangered Species Act, any agency granted an exemption under 16 U.S.C. 1536(h) must submit to the Council on Environmental Quality an annual report describing its compliance methods with the mitigation and enhancement measures prescribed by 16 U.S.C. 1536. See 16 U.S.C. 1536(L)(2). This subsection further requires that the Council publish availability of the report in the **Federal Register**.

On February 7, 1979, the Endangered Species Committee granted an exemption from the requirements of the Endangered Species Act to Grayrocks Dam. In granting the Exemption Order, the Committee, as required by the Act, established requirements for reasonable mitigation and enhancement measures. These requirements are set out in an "Agreement of Settlement and Compromise" and is part of the Annual Report announced here.

ADDRESSES: The Annual Report is available from Basin Electric Power Cooperative, 1717 East Interstate Avenue, Bismarck, ND 58501-0564; Telephone (701) 223-0441.

FOR FURTHER INFORMATION CONTACT: Elisabeth Blaug, Attorney, Council on Environmental Quality, 722 Jackson Place, NW., Washington, DC 20503; telephone (202) 395-5754.

Ray Clark,

Senior Policy Analyst.

Defense Science Board Task Force on Acquiring Defense Software Commercially

ACTION: Notice of advisory committee meeting.

SUMMARY: The Defense Science Board Task Force on Acquiring Defense Software Commercially will meet in open session on January 21, 1994 at Strategic Analysis, Inc., Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting, the Task Force will review current DoD software acquisition regulations, DoD acquisition experience with selected software-intensive systems, and contractor acquisition experiences with DoD and commercial software-intensive systems.

Persons interested in further information should call Ms. Virginia Castor at (703) 614-0212.

Dated: December 21, 1993.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Depot Management

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Task Force on Depot Management will meet in closed session on January 20-21, 1994 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will assess the overall performance and management of depot-level activities of the Department of Defense.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92-463, as amended (5 U.S.C. App. II, (1988)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1)(1988), and that accordingly this meeting will be closed to the public.

Dated: December 21, 1993.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Corps of Engineers

Intent To Prepare a Draft Environment Impact Statement (DEIS), Red River of the North Cumulative Impact Evaluation Study of Impoundments

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The St. Paul District, Corps of Engineers, has received a number of Section 404 permit applications to construct surface water impoundments in the Red River of the North basin. The purpose of these impoundment is flood control, fish and wildlife enhancement/restoration, or a combination of purposes. Nationally significant natural, cultural, and socioeconomic resources

exist in the Red River Basin. Construction of impoundments could result in significant cumulative impacts to these resources. In order to evaluate the potential cumulative impacts of impoundment projects, a joint EIS with the Minnesota Department of Natural Resources will be prepared.

FOR FURTHER INFORMATION CONTACT: Questions concerning the DEIS can be directed to: Colonel James T. Scott, District Engineer, St. Paul District, Corps of Engineers, ATTN: Mr. Robert Whiting, 190 5th Street East, St. Paul, Minnesota 55101–1638.

SUPPLEMENTARY INFORMATION: The EIS will evaluate the potential for the construction of the proposed impoundments to result in cumulative environmental impacts. Alternatives to impoundments will also be evaluated. These alternatives include: levees, channelization, wetland restoration, greenbelt, watershed treatment, floodplain management, and others.

Significant issues and resources to be analyzed in the DEIS will be identified through coordination with responsible Federal, State, and local agencies; the general public; interested private organizations and parties; and affected Native Americans. Anyone who has an interest in participating in the development of the DEIS is invited to contact the St. Paul District, Corps of Engineers.

Significant issues identified to date for discussion in the DEIS are as follows:

1. Natural resources including: fishery, wildlife, vegetation, wetlands, riparian areas, and water quality;
2. Cultural resources in the basin;
3. Federally and State listed threatened or endangered plant or animal species;
4. Social and economic resources in the basin;
5. Tribal Trust resources and responsibilities.

Additional issues of significance may be identified through public and agency meetings. A notice will be provided to interested parties and to local news media.

Our environmental review and consultation will be conducted according to the requirements of the National Environmental Policy Act of 1969, National Historic Preservation Act of 1966, Council on Environmental Quality Regulations, Endangered Species Act of 1973, Section 404 of the Clean Water Act, Section 10 of the Rivers and Harbors Act of 1899, and applicable Corps of Engineers regulations and guidance.

We anticipate that the DEIS will be available to the public in March 1995.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

Army Science Board; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92–463), announcement is made of the following Committee Meeting:

Name of committee: Army Science Board (ASB).
Date of Meeting: 13 January 1993.
Time of meeting: 0800–1700.
Place: Fort Monmouth, NJ.
Agenda: The Army Science Board's C3I Issue Group will meet to hear selected briefing related to the team study titled—"Leveraging Commercial Technologies in Army C3 Systems." This meeting will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Office, Sally Warner, may be contacted for further information (703) 695–0781.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

Army Science Board; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub L. 92–463), announcement is made of the following Committee Meeting:

Name of committee: Army Science Board (ASB).
Date of meeting: 20 January 1993.
Time of meeting: 0800–1700.
Place: Fort Gordon, GA.
Agenda: The Army Science Board's C3I Issue Group will meet to hear selected briefing related to the team study titled—"Leveraging Commercial Technologies in Army C3 Systems." This meeting will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information (703) 695–0781.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTION

OMB Clearance Request for Buy American Act—North American Free Trade Agreement Implementation Act—Balance of Payments Program Certificate

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of new request for OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980, the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve a new information collection requirement concerning Buy American Act—North American Free Trade Agreement Implementation Act—Balance of Payments Program Certificate.

DATES: Comments may be submitted on or before February 28, 1994.

ADDRESSES: Send comments to Mr. Peter Weiss, FAR Desk Officer, OMB, room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Under the North American Free Trade Agreement (NAFTA) Implementation Act, unless specifically exempted by statute or regulation, agencies are required to evaluate offers over a certain dollar limitation to supply an eligible product without regard to the restrictions of the Buy American Act or the Balance of Payments program. Offerors identify excluded end products and NAFTA end products on this certificate.

The contracting officer uses the information to identify the offered items which are domestic and NAFTA country end products so as to give these products a preference during the evaluation of offers. Items having components of unknown origin are considered to have been mined, produced, or manufactured outside the United States.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average .167 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW, room 4037, Washington, DC 20405, and to the FAR Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

The annual reporting burden is estimated as follows: Respondents, 1,140; responses per respondent, 5; total annual responses, 5,700; preparation hours per response, .167; and total response burden hours, 952.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB clearance request regarding Buy American Act—North American Free Trade Agreement Implementation Act—Balance of Payments Program Certificate, FAR case 93–310, in all correspondence.

Dated: December 15, 1993.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, applicable form, and OMB control number: The Army Alumni Survey
Type of request: New Collection
Number of respondents: 4,500
Responses per respondent: 1
Annual responses: 4,500
Average burden per response: 30 minutes
Annual burden hours: 2,250
Needs and uses: This is a survey of Army veterans being conducted to obtain information on their transition to civilian life and their post-service careers. The data will be used to inform those responsible for recruiting, retention, and transition policies and programs.
Affected public: Individuals or households
Frequency: One time
Respondent's obligation: Voluntary
OMB desk officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DOD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD clearance officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202–4302.

Dated: December 21, 1993.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 93–31554 Filed 12–27–93; 8:45 am]

BILLING CODE 5000–04–M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Management Service, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before January 27, 1994.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Cary Green, Department of Education, 400 Maryland Avenue, SW., Room 4682, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Cary Green (202) 401–3200. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public

participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Management Service, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden ; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Cary Green at the address specified above.

Dated: December 21, 1993.

Cary Green,

Director, Information Resources Management Service.

Office of Educational Research and Improvement

Type of Review: New.
Title: Fast Response Survey System—Survey of Public Library Services to Children and Young Adults.
Frequency: One time.
Affected Public: Individuals or households.
Reporting Burden:
Responses: 2,400.
Burden Hours: 792.
Recordkeeping Burden:
Recordkeepers: 0.
Burden Hours: 0.
Abstract: The purpose of this survey is to collect information regarding the services and resources that public libraries offer children and young adults. The Department will use the information to assess public libraries as they relate to the National Education Goals and to update two previous surveys.

BILLING CODE 4000–01–M

Direct Grant Programs and Fellowship Programs

AGENCY: Department of Education.
ACTION: Correction.

In the notice inviting applications for new awards for fiscal year 1994, beginning on page 50138 in the issue of Friday, September 24, 1993, make the following corrections:

On page 50141, in the chart for Office of Elementary and Secondary Education, the listing for CFDA No. 84.258A, Even Start Program—Indian Tribes and Tribal Organizations, should be deleted. The competition for new awards under this program for FY 1994 has been withdrawn. Revised funding estimates preclude an expenditure of funds for new awards for FY 1994.

On page 50147, in the continuation of Chart 4.—Office of Elementary and Secondary Education, the listing for CFDA No. 84.258A, Even Start Program—Indian Tribes and Tribal Organizations, should be deleted for the reason stated in the preceding paragraph.

On page 50151 the application notice for CFDA No. 84.258A, Even Start Program—Indian Tribes and Tribal Organizations, should be deleted.

FOR INFORMATION CONTACT: Patricia McKee, U.S. Department of Education, 400 Maryland Avenue, SW., room 2017, Washington, DC 20202–6132. Telephone (202) 401–1692. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Information about the Department's funding opportunities, including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server at GOPHER.ED.GOV (under Announcements, Bulletins, and Press Releases). However, the official application notice for a discretionary grant competition is the notice published in the **Federal Register**.

Dated: December 20, 1993.

Thomas W. Payzant,

Assistant Secretary for Elementary and Secondary Education.

[FR Doc. 93–31619 Filed 12–27–93; 8:45 am]

BILLING CODE 4000–01–P

Federal Interagency Coordinating Council Meeting (FICC)

AGENCY: Federal Interagency Coordinating Council, Education.
ACTION: Notice of a public meeting.

SUMMARY: This notice describes the schedule and agenda of a forthcoming meeting of the Federal Interagency Coordinating Council. Notice of this meeting is required under section 685(c) of the Individuals With Disabilities Education Act, as amended, and is intended to notify the general public of their opportunity to attend the meeting. The meeting will be accessible to individuals with disabilities.

DATE AND TIME: January 20, 1994, from 10 a.m. to 5 p.m.

ADDRESSES: Crystal Gateway Marriott, Salon VI, 1700 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: Connie Garner, U.S. Department of Education, 400 Maryland Avenue, SW., room 4613, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–8124. Individuals who use a telecommunications device for the deaf (TDD) may call (202) 205–8170.

SUPPLEMENTARY INFORMATION: The Federal Interagency Coordinating Council (FICC) is estimated under section 685 of the Individuals With Disabilities Education Act, as amended (20 U.S.C. 1484a). The Council is established to: (1) Minimize duplication across Federal, State and local agencies of programs and activities relating to early intervention services for infants and toddlers with disabilities and their families and preschool services for children with disabilities; (2) ensure effective coordination of Federal early intervention and preschool programs, including Federal technical assistance and support activities; and (3) identify gaps in Federal agency programs and services and barriers to Federal interagency cooperation. To meet these programs, the FICC seeks to: (1) identify areas of conflict, overlap, and omissions in interagency policies related to the provision of services to infants, toddlers, and preschoolers with disabilities; (2) develop and implement joint policy interpretations on issues related to infants, toddlers, and preschoolers that cut across Federal agencies, including modifications of regulations to eliminate barriers to interagency programs and activities; and (3) coordinate the provision of technical assistance and dissemination of best practice information. The FICC is chaired by the Assistant Secretary for Special Education and Rehabilitative Services.

At this meeting the FICC plans to identify and discuss cross-cutting interagency issues for consideration around the reauthorization of the Individuals With Disabilities Education Act (IDEA).

The meeting of the FICC is open to the public. Written public comment will be accepted at the conclusion of the meeting. These comments will be included in the summary minutes of the meeting. The meeting will be physically accessible, with meeting materials provided in both braille and large print.

Interpreters for persons who are hearing impaired will be available. Individuals with disabilities who plan to attend and need other reasonable accommodations should contact the contact person named above in advance of the meeting.

Summary minutes of the FICC meetings will be maintained and available for public inspection at the U.S. Department of Education, 400 Maryland Avenue, SW., room 3127, Switzer Building, Washington, DC 20202–2644, from the hours of 9 a.m. to 5 p.m., weekdays, except Federal holidays.

Judith E. Heumann,

Assistant Secretary for Special Education and Rehabilitative Services.

[FR Doc. 93–31599 Filed 12–27–93; 8:45 a.m.]

BILLING CODE 4000–01–M

Indian Education National Advisory Council; Meeting

AGENCY: National Advisory Council on Indian Education, Education.
ACTION: Notice of open meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Indian Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATES AND TIME: Tuesday, January 25, 1994 from 9 a.m. to 5 p.m. and Wednesday, January 26, 1994 from 9 a.m. to 3:30 p.m.

ADDRESSES: The meeting will beheld at the Sheraton Tampa East Hotel, 7401 East Hillsborough Avenue, Tampa, Florida, 33610, (813) 626–0999.

FOR FURTHER INFORMATION CONTACT: Robert K. Chiago, Executive Director, National Advisory Council on Indian Education, 330 C Street, SW., room 4072, Switzer Building, Washington, DC 20202–7556. Telephone: 202/205–8353.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Indian Education is established under section 5342 of the Indian Education Act of 1988 (25 U.S.C. 2642). The Council is established to, among other things, assist the Secretary of Education in carrying out responsibilities under the Indian Education Act of 1988 (Part C, Title V, Pub. L. 100–297) and to advise Congress and the Secretary of Education with regard to federal education programs in which Indian children or adults participate or from which they can benefit.

The meeting is open to the public. The agenda of the National Advisory Council on Indian Education includes a general business meeting and a review session of the findings from hearings previously held by the NACIE Executive Committee on November 18 and 19, 1993 in Albuquerque, New Mexico. The hearings were held to allow the Indian community the opportunity to provide written and/or oral testimony on the reauthorization of the Elementary and Secondary Education Act and the Goals 2000: Educate America Act.

Records are kept of all Council proceedings, and are available for public inspection at the office of the National Advisory Council on Indian Education located at 330 C Street SW., room 4072, Washington, DC 20202–7556 from the hours of 9 a.m. to 4:30 p.m. Monday through Friday.

Dated: December 21, 1993.

Robert K. Chiago,

Executive Director, National Advisory Council on Indian Education.

BILLING CODE 4000–01–M

Nominations Committee of the National Assessment Governing Board; Closed Meeting

AGENCY: National Assessment Governing Board; Education.
ACTION: Notice of closed meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming closed meeting of the Nominations Committee of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATES: January 7, 1994.

TIME: 9 a.m. to 4:30 p.m.

LOCATION: 800 North Capitol Street, NW., Suite 825, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mary Ann Wilmer, Operations Officer, National Assessment Governing Board, Suite 825, 800 North Capitol Street, NW., Washington, DC 20002–4233; Telephone: (202) 357–6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Improvement Act (NAEP Improvement Act), Title III–C of the Augustus F. Hawkins—Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100–297), (20 U.S.C. 1221e–1).

The Board is established to formulate policy guidelines for the National Assessment of Educational Progress. The Board is responsible for selecting subject areas to be assessed, developing assessment objectives, identifying appropriate achievement goals for each grade and subject tested, and establishing standards and procedures for interstate and national comparisons

The Nominations Committee of the National Assessment Governing Board will meet in closed session on January 7, 1994, from 9 a.m. until 4:30 p.m., to review and discuss personal qualifications and experience of nominees recommended to serve in the respective category for Board membership. The review and subsequent discussion of this information will touch upon matters that relate solely to the internal rules and practices of an agency and would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. Such matters are protected by exemptions (2) and (6) of section 552b(c) of title 5 U.S.C.

The Public is given less than fifteen days notice of this meeting because of problems encountered in scheduling.

A summary of the activities of the meeting and related matters, which are informative to the public, consistent with the policy of 5 U.S.C. 552b, will be available to the public within fourteen days after the meeting.

Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Suite 825, 800 North Capitol Street, NW., Washington, DC, from 8:30 a.m. until 5 p.m.

Dated: December 22, 1993.

Roy Truby,

Executive Director, NAGB.

[FR Doc. 93–31605 Filed 12–27–93; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.
ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces the procedures

for the disbursement of $200,000, plus accrued interest, obtained by the DOE under the terms of a settlement agreement entered into with the consolidated bankruptcy estate of Ted True, Inc. and Ted W. True (Case No. LEF–0115). The OHA has tentatively determined that the funds will be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 F.R. 27899 (August 4, 1986).

DATE AND ADDRESS: Applications for Refund from the crude oil funds should be clearly labeled "Application for Crude Oil Refunds" and should be mailed to Subpart V Crude Oil Overcharge Refunds, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. Applications for Refund must be filed in duplicate no later than June 30, 1994. Any party who has previously filed an Application for Refund should not file another Application for Refund from the present crude oil funds. The previously filed crude oil application will be deemed filed in all crude oil proceedings as the procedures are finalized.

FOR FURTHER INFORMATION CONTACT: Thomas L. Wieker, Deputy Director, Office of Hearings and Appeals, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586–2390.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy (DOE), 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order sets forth the procedures that the DOE has formulated to distribute $200,000, plus accrued interest, that has been remitted by the consolidated bankruptcy estate of Ted True, Inc. and Ted W. True to the DOE. The DOE is currently holding the funds in an interest bearing account pending distribution.

The DOE has determined to distribute these funds in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986). Under the Modified Policy, crude oil overcharge monies are divided among the states, federal government, and injured purchasers of refined products. Under the plan, refunds to the states will be in proportion to each state's consumption of petroleum products during the period of price controls. Refunds to eligible purchasers will be based on the number of gallons of petroleum products that they purchased and the extent to which they can demonstrate injury.

Applications for Refund must be postmarked no later than June 30, 1994. As we state in the Decision, any party who has previously submitted a refund application for in the crude oil refund proceedings should not file another application for refund in the crude oil proceedings. The previously filed crude oil application will be deemed filed in all crude oil proceedings as the procedures are finalized.

Dated: December 20, 1993.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order

December 20, 1993.

Names of Firms: Ted True, Inc. and Ted W. True.

Date of Filing: October 7, 1993.

Case Number: LEF–0115.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special refund procedures. 10 CFR 205.281. These procedures are used to refund monies to those injured by actual or alleged violations of the DOE price regulations.

In this Decision and Order, we consider a Petition for Implementation of Special Refund Procedures filed by the ERA on October 7, 1993 for crude oil overcharge funds. The funds at issue in this Petition were obtained from the consolidated bankruptcy estate of Ted True, Inc. and Ted W. True (hereafter collectively referred to as "True"). This Office issued a Remedial Order against True for violations of the crude oil price regulations during the period from June 1979 through November 1980. *Ted True, Inc., et al.*, 15 DOE ¶ 83,032 (1987). On October 25, 1990, the United States Bankruptcy Court for the Northern District of Texas issued an order approving a compromise and settlement agreement between the Trustee for True and the DOE. In this agreement, the Trustee for True agreed to pay $200,000 to the DOE in order to resolve the DOE's claim without the expense and inconvenience of further judicial proceedings. The total amount was received by the DOE on November 14, 1990. This Decision and Order establishes the OHA's procedures to distribute those funds.

The general guidelines which the OHA may use to formulate and implement a plan to distribute refunds are set forth in 10 CFR part 205, subpart V. The Subpart V process may be used in situations where the DOE cannot readily identify the persons who may have been injured as a result of actual or alleged violations of the regulations or ascertain the amount of the refund each person should receive. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds, see *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981). We have considered the ERA's request to implement subpart V procedures with respect to the monies received from True and have determined that such procedures are appropriate.

I. Background

On July 28, 1986, the DOE issued a Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986) (the MSRP). The MSRP, issued as a result of a court-approved Settlement Agreement in *In re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. No. 378 (D. Kan. 1986) (the Stripper Well Agreement), provides that crude oil overcharge funds will be divided among the states, the federal government, and injured purchasers of refined petroleum products. Under the MSRP, up to twenty percent of these crude oil overcharge funds will be reserved to satisfy valid claims by injured purchasers of petroleum products. Eighty percent of the funds, and any monies remaining after all valid claims are paid, are to be disbursed equally to the states and federal government for indirect restitution.

Shortly after the issuance of the MSRP, the OHA issued an Order that announced its intention to apply the Modified Policy in all Subpart V proceedings involving alleged crude oil violations. Order Implementing the MSRP, 51 FR 29689 (August 20, 1986). In that Order, the OHA solicited comments concerning the appropriate procedures to follow in processing refund applications in crude oil refund proceedings. On April 6, 1987, the OHA issued a Notice analyzing the numerous comments and setting forth generalized procedures to assist claimants that file refund applications for crude oil monies under the Subpart V regulations. 52 FR 11737 (April 10, 1987) (the April Notice).

The OHA has applied these procedures in numerous cases since the April Notice, i.e., *New York Petroleum, Inc.*, 18 DOE ¶ 85,435 (1988) (*NYP*); *Shell Oil Co.*, 17 DOE ¶ 85,204 (1988); *Ernest A. Allerkamp*, 17 DOE ¶ 85,079 (1988) (*Allerkamp*), and the procedures have been approved by the United States District Court for the District of Kansas as well as the Temporary Emergency Court of Appeals (TECA). In the case *In re: The Department of Energy Stripper Well Exemption Litigation*, various states filed a Motion with the Kansas District Court, claiming that the OHA violated the Stripper Well Agreement by employing presumptions of injury for end-users and by improperly calculating the refund amount to be used in those proceedings. *In re: The Department of Energy Stripper Well Exemption Litigation*, 671 F. Supp. 1318 (D. Kan. 1987), *aff'd*, 857 F. 2d 1481 (Temp. Emer. Ct. App. 1988). On August 17, 1987, Judge Theis issued an Opinion and Order denying the states' Motion in its entirety. The court concluded that the Stripper Well Agreement "does not bar [the] OHA from permitting claimants to employ reasonable presumptions in affirmatively demonstrating injury entitling them to a refund." *Id.* at 1323.

The court also ruled that, as specified in the April Notice, the OHA could calculate refunds based on a portion of the M.D.L. 378 overcharges. *Id.* at 1323–24.

II. *The Proposed Decision and Order*

On October 29, 1993, the OHA issued a Proposed Decision and Order (PDO) establishing tentative procedures to distribute the alleged crude oil violation amount obtained from True. 58 Fed. Reg 59030 (November 5, 1993). The OHA tentatively concluded that the funds should be distributed in accordance with the MSRP and the April Notice. Pursuant to the MSRP, the OHA proposed to reserve initially twenty percent of the crude oil violation funds for direct restitution to applicants who claim that they were injured by the alleged crude oil violations. The remaining eighty percent of the funds would be distributed to the states and federal government for indirect restitution. After all valid claims have been paid, any remaining funds in the claim reserve would also be divided between the states and federal government. The federal government's share ultimately would be deposited into the general fund of the Treasury of the United States.

In the PDO, the OHA proposed to require applicants for refund to document their purchase volumes of petroleum products during the period of price controls and to prove that they were injured by the alleged crude oil overcharges. The PDO stated that end-users of petroleum products whose businesses are unrelated to the petroleum industry are presumed to have absorbed the crude oil overcharges, and need not submit any further proof of injury to receive a refund. The OHA also proposed to calculate refunds on the basis of a volumetric refund amount, as described in the April Notice. The PDO provided a period of 30 days from the date of publication in the **Federal Register** in which comments could be filed regarding the tentative distribution process. More than 30 days have elapsed and the OHA has received no comments concerning the proposed procedures for the distribution of the True settlement funds. Consequently, the procedures will be adopted as proposed.

III. *The Refund Procedures*

A. Refund Claims

The OHA has concluded that the $200,000, plus interest that has accrued on that amount, should be distributed in accordance with the crude oil refund procedures discussed above. We have decided to reserve the full twenty percent of the alleged crude oil violation amount, or $40,000, plus interest, for direct refunds to claimants, in order to insure that sufficient funds will be available for refunds to injured parties.

The process which the OHA will use to evaluate claims based on alleged crude oil violations will be modeled after the process the OHA has used in Subpart V proceedings to evaluate claims based upon alleged overcharges involving refined products. *E.g., Mountain Fuel Supply Co.*, 14 DOE ¶ 85,475 (1986) (*Mountain Fuel*). As in non-crude oil cases, applicants will be required to document their purchase volumes of covered products and prove that they were injured as a result of the alleged violations. Generally, a covered product is any product that was covered by the Emergency Petroleum Allocation Act of 1973, 15 U.S.C. 751–760, and was primarily produced at a crude oil refinery. *E.g., Anchor Continental, Inc.*, 22 DOE ¶ 85,003 (1992). Applicants who were end-users or ultimate consumers of petroleum products, whose businesses are unrelated to the petroleum industry, and who were not subject to the DOE price regulations are presumed to have been injured by any alleged crude oil overcharges. In order to receive a refund, end-users need not submit any further evidence of injury beyond the volume of petroleum products purchased during the period of price controls. *E.g., A. Tarricone, Inc.*, 15 DOE ¶ 85,495 at 88,893–96 (1987). However, the end-user presumption of injury can be rebutted by evidence which establishes that the specific end-user in question was not injured by the crude oil overcharges. *E.g., Berry Holding Co.*, 16 DOE ¶ 85,405 at 88,797 (1987). If an interested party submits evidence that is sufficient to cast serious doubt on the end-user presumption, the applicant will be required to produce further evidence of injury. *E.g., NYP*, 18 DOE at 88,701–03.

Reseller and retailer claimants must submit detailed evidence of injury, and may not rely on the presumptions of injury utilized in refund cases involving refined petroleum products. They can, however, use econometric evidence of the type employed in the *OHA Report to the District Court in the Stripper Well Litigation, reprinted in* 6 Fed. Energy Guidelines ¶ 90,507. Applicants who executed and submitted a valid waiver pursuant to one of the escrows established in the Stripper Well Agreement have waived their rights to apply for crude oil refunds under Subpart V. *Mid-America Dairyman, Inc.* v. *Herrington*, 878 F. 2d 1448 (Temp. Emer. Ct. App. 1989); *accord, Boise Cascade Corp.*, 18 DOE ¶ 85,970 (1989).

Refunds to eligible claimants who purchased refined petroleum products will be calculated on the basis of a volumetric refund amount derived by dividing the alleged crude oil violation amounts involved in this determination ($200,000) by the total consumption of petroleum products in the United States during the period of price controls (2,020,997,335,000 gallons). *Mountain Fuel*, 14 DOE at 88,868 n.4. This yields a volumetric refund amount of $0.0000000989 per gallon.

As we stated in previous Decisions, a crude oil refund applicant will be required to submit only one Application for crude oil overcharge funds. *E.g., Allerkamp*, 17 DOE at 88,176. Any party that has previously submitted a refund Application in the crude oil refund proceedings need not file another Application. That previously filed Application will be deemed to be filed in all crude oil proceedings as the procedures are finalized. The DOE has established June 30, 1994 as the final deadline for filing an Application for Refund from the crude oil funds. See 58 FR 26,318 (May 3, 1993). It is the policy of the DOE to pay all crude oil refund claims filed within this deadline at the rate of $.0008 per gallon. However, while we anticipate that applicants that filed their claims within the original June 30, 1988 deadline will receive a supplemental refund payment, we will decide in the future whether claimants that filed later Applications should receive additional refunds. *E.g., Seneca Oil Co.*, 21 DOE ¶ 85,327 (1991). Notice of any additional amounts available in the future will be published in the **Federal Register.**

B. Crude Oil Application Requirements

To apply for a crude oil refund, a claimant should submit an Application for Refund containing all of the following information:

(1) Identifying information including the claimant's name, current business address, business address during the refund period, taxpayer identification number, a statement indicating whether the claimant is a corporation, partnership, sole proprietorship, or other business entity, the name, title, and telephone number of a person to contact for any additional information, and the name and address of the person who should receive any refund check.[1] If the applicant operated under more than one name or under a different name during the price control period, the applicant should specify these names;

(2) If the applicant's firm is owned by another company, or owns other companies, a list of those companies' names, addresses, and descriptions of their relationship to the applicant's firm;

(3) A brief description of the claimant's business and the manner in which it used the petroleum products listed on its application;

(4) A statement identifying the petroleum products which the applicant purchased during the period August 19, 1973 through January 27, 1981, an annual schedule displaying the number of gallons of each petroleum product purchased during this refund period, and the total number of gallons of all petroleum products claimed on the refund application;

(5) An explanation as to how the applicant obtained the above mentioned purchase volumes, and, if estimates were used, a description of its method of estimation;

(6) A statement that neither the claimant, its parent firm, affiliates, subsidiaries, successors, nor assigns has waived any right it may have to receive a crude oil refund (e.g., by having executed and submitted a valid waiver accompanying a claim to any of the escrow accounts established pursuant to the Stripper Well Settlement Agreement);

(7) A statement that the applicant has not filed any other refund application in the Subpart V crude oil refund proceeding;

(8) If the applicant is not an end-user, was covered by the DOE price regulations, or is related to the petroleum industry, a showing

[1] Under the Privacy Act of 1974, the submission of a social security number by an individual applicant is voluntary. An applicant that does not wish to submit a social security number must submit an employer identification number if one exists. This information will be used in processing refund applications, and is requested pursuant to our authority under the Petroleum Overcharge Distribution and Restitution Act of 1986 and the regulations codified at 10 CFR part 205, subpart V. The information may be shared with other Federal agencies for statistical, auditing or archiving purposes, and with law enforcement agencies when they are investigating a potential violation of civil or criminal law. Unless an applicant claims confidentiality, this information will be available to the public in the Public Reference Room of the Office of Hearings and Appeals.

that the applicant was injured by the alleged crude oil overcharges;

(9) If the Applicant is a regulated utility or a cooperative, certifications that it will pass on the entirety of any refund received to its customers, will notify its state utility commission, other regulatory agency, or membership body of the receipt of any refund, and a brief description as to how the refund will be passed along;

(10) The statement listed below signed by the individual applicant or a responsible official of the company filing the refund application:

I swear (or affirm) that the information contained in this application and its attachments is true and correct to the best of my knowledge and belief. I understand that anyone who is convicted of providing false information to the federal government may be subject to a fine, a jail sentence, or both, pursuant to 18 U.S.C. § 1001. I understand that the information contained in this application is subject to public disclosure. I have enclosed a duplicate of this entire application which will be placed in the OHA Public Reference Room.

All applications should be either typed or printed and clearly labeled "Application for Crude Oil Refund." Each applicant must submit an original and one copy of the application. If the applicant believes that any of the information in its application is confidential and does not wish for this information to be publicly disclosed, it must submit an original application, clearly designated "confidential," containing the confidential information, and two copies of the application with the confidential information deleted. All refund applications should be sent to: Subpart V Crude Oil Overcharge Refunds, Office of Hearings and Appeals, Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585.

The filing deadline is June 30, 1994. Even though an applicant is not required to use any specific form for its crude oil refund application, a suggested form has been prepared by the OHA and may be obtained by sending a written request to the address listed above.

C. Payments to the States and Federal Government

Under the terms of the MSRP, the remaining eighty percent of the alleged crude oil violation amounts subject to this Decision, or $160,000, plus interest, should be disbursed in equal shares to the states and federal government for indirect restitution. Accordingly, we will direct the DOE's Office of the Controller to segregate the $160,000, plus interest, available for disbursement to the states and federal government and transfer one-half of that amount, or $80,000, plus interest, into an interest-bearing subaccount for the states, and one-half, or $80,000, plus interest, to an interest bearing subaccount for the federal government. The share or ratio of the funds which each state will receive is contained in Exhibit H of the Stripper Well Agreement. When disbursed, these funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Stripper Well Agreement.

It Is Therefore Ordered That:

(1) Applications for Refund from the alleged crude oil overcharge funds remitted by the consolidated bankruptcy estate of Ted True, Inc. and Ted W. True ("True") may now be filed.

(2) All Applications submitted pursuant to paragraph (1) above must be filed in duplicate and postmarked no later than June 30, 1994.

(3) The Director of Special Accounts and Payroll, Office of Departmental Accounting and Financial Systems Development, Office of the Controller, Department of Energy, shall take all steps necessary to transfer $200,000 (plus interest) from the True subaccount (Account Number 6A0X00300Z), pursuant to Paragraphs (4), (5), and (6) of this decision.

(4) The Director of Special Accounts and Payroll shall transfer $80,000 (plus interest) of the funds obtained pursuant to paragraph (3) above, into the subaccount denominated "Crude Tracking-States," Number 999DOE003W.

(5) The Director of Special Accounts and Payroll shall transfer $80,000 (plus interest) of the funds obtained pursuant to paragraph (3) above, into the subaccount denominated "Crude Tracking-Federal," Number 999DOE002W.

(6) The Director of Special Accounts and Payroll shall transfer $40,000 (plus interest) of the funds obtained pursuant to paragraph (3) above, into the subaccount denominated "Crude Tracking-Claimants 4," Number 999DOE010Z.

Dated: December 20, 1993.

George B. Breznay,

Director, Office of Hearings and Appeals.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4818-4]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before January 27, 1994.

FOR FURTHER INFORMATION CONTACT: For further information, or to obtain a copy of this ICR, contact Sandy Farmer at 202-260-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Determining Conformity of General Federal Actions to State or Federal Implementation Plans—Information Requirements (EPA ICR No. 1637.02). This is a request for approval of a new information collection.

Abstract: On November 30, 1993 (58 FR 63214), the EPA promulgated a rule to ensure that Federal actions conform to the appropriate State implementation plan (SIP). This rule is effective January 31, 1994, and will be codified at 40 CFR part 51, subpart W and 40 CFR part 93, subpart B. The General Conformity for all Federal actions, except Federal highway and transit actions ("transportation conformity"). Transportation conformity requirements were established in a separate rulemaking (see 58 FR 62188, November 24, 1993).

Conformity to a SIP is defined as meaning conformity to a SIP's purpose of eliminating or reducing the severity and number of violations of the national ambient air quality standards (NAAQS) and achieving expeditious attainment of these standards. The Federal agency responsible for a proposed action is required to determine if its actions conform to the applicable SIP and to submit information to the appropriate State or local air quality agency.

At the time of promulgation of the General Conformity rule, EPA had not yet submitted an ICR to OMB under the Paperwork Reduction Act. Therefore, the final rule was published with a statement that the information requirements would not be effective until approved by OMB. In compliance with the Paperwork Reduction Act, this notice announces that the ICR for the General Conformity rule has been forwarded to OMB for review.

Burden Statement: The public reporting burden for this collection of information is estimated to average 370 hours per response. This estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete and review the collection of information.

Respondents: Federal Agencies or private sponsors of activities that require Federal support or approval; State and local air quality agencies.

Estimated No. of Respondents: 802.

Estimated No. of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 297,140 hours.

Frequency of Collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to:

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (2136), 401 M Street, SW., Washington, DC 20460.

and

Mr. Chris Wolz, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20503.

Dated: December 21, 1993.

Paul Lapsley,

Director, Regulatory Management Division.

BILLING CODE 6560-50-M

[FRL-4815-5]

Oklahoma; Final Determination of Adequacy of State/Tribal Municipal Solid Waste Permit Program

AGENCY: Environmental Protection Agency.

ACTION: Notice of Final Determination on Application of Oklahoma for Full Program Adequacy Determination.

SUMMARY: Section 4005(c)(1)(B) of the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments (HSWA) of 1984, requires States to develop and implement permit programs to ensure that municipal solid waste landfills (MSWLFs) that may receive hazardous household waste or small quantity generator waste will comply with the revised Federal MSWLF Criteria (40 CFR part 258). RCRA section 4005(c)(1)(C) requires the Environmental Protection Agency (EPA) to determine whether States have adequate "permit" programs for MSWLFs, but does not mandate issuance of a rule for such determinations. EPA has drafted and is in the process of proposing a State/Tribal Implementation Rule (STIR) that will provide procedures by which EPA will approve, or partially approve, State/Tribal landfill permit programs. The Agency intends to approve adequate State/Tribal MSWLF permit programs as applications are submitted. Thus, these approvals are not dependent on final promulgation of the STIR. Prior to promulgation of the STIR, adequacy determinations will be made based on the statutory authorities and requirements. In addition, States/Tribes may use the draft STIR as an aid in interpreting these requirements. The Agency believes that early approvals have an important benefit. Approved State/Tribal permit programs provide interaction between the State/Tribe and the owner/operator regarding site-specific permit conditions. Only those owners/operators located in State/Tribes with approved permit programs can use the site-specific flexibility provided by part 258 to the extent the State/Tribal permit program allows such flexibility. EPA notes that regardless of the approval status of a State/Tribe and the permit status of any facility, the federal landfill criteria will apply to all permitted and unpermitted MSWLF facilities.

Oklahoma applied for a determination of adequacy under section 4005 of RCRA. EPA reviewed Oklahoma's application and proposed a determination that Oklahoma's MSWLF permit program is adequate to ensure compliance with the revised MSWLF Criteria. After consideration of all public comments received, EPA is today issuing a final determination that the State's program is adequate.

EFFECTIVE DATE: The determination of adequacy for Oklahoma shall be effective on December 28, 1993.

FOR FURTHER INFORMATION CONTACT: Becky Weber, Chief, Solid Waste Section, US EPA Region 6, Dallas, Texas 75202; (214) 655-6760.

SUPPLEMENTARY INFORMATION:

A. Background

On October 9, 1991, EPA promulgated revised Criteria for MSWLFs (40 CFR Part 258). Subtitle D of RCRA, as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA), requires States to develop permitting programs to ensure that facilities comply with the Federal Criteria under Part 258. Subtitle D also requires in section 4005 that EPA determine the adequacy of State municipal solid waste landfill permit programs to ensure that facilities comply with the revised Federal Criteria. To fulfill this requirement, the Agency has drafted and is in the process of proposing a State/Tribal Implementation Rule (STIR). The rule will specify the requirements which State/Tribal programs must satisfy to be determined adequate.

EPA intends to approve State/Tribal MSWLF permit programs prior to the promulgation of STIR. EPA interprets the requirements for States or Tribes to develop "adequate" programs for permits or other forms of prior approval to impose several minimum requirements. First, each State/Tribe must have enforceable standards for new and existing MSWLFs that are technically comparable to EPA's revised MSWLF criteria. Next, the State/Tribe must have the authority to issue a permit or other notice of prior approval to all new and existing MSWLFs in its jurisdiction. The State/Tribe also must provide for public participation in permit issuance and enforcement as required in section 7004(b) of RCRA. Finally, EPA believes that the State/Tribe must show that it has sufficient compliance monitoring and enforcement authorities to take specific action against any owner or operator that fails to comply with an approved MSWLF program.

EPA Regions will determine whether a State/Tribe has submitted an "adequate" program based on the interpretation outlined above. EPA plans to provide more specific criteria for this evaluation when it proposes the State/Tribal Implementation Rule. EPA expects States/Tribes to meet all of these requirements for all elements of a MSWLF program before it gives full approval to a MSWLF program.

B. State of Oklahoma

On August 10, 1993, Oklahoma submitted an application for adequacy determination for Oklahoma's municipal solid waste landfill permit program. On September 16, 1993, EPA published a tentative determination of adequacy for all portions of Oklahoma's program. Further background on the tentative determination of adequacy appears at 58 FR 48516, 48518 (September 16, 1993). A 30-day public comment period was held until October 18, 1993. In this notice of tentative determination, EPA announced that a public hearing would be held if a sufficient number of people requested a hearing. The Agency received one comment letter in response to the tentative determination. No requests for a public hearing were received, therefore, a hearing was not held.

In the tentative determination notice, EPA discussed that Oklahoma was required to pass regulations that are as stringent as the Federal regulations cited at 40 CFR part 258 (RCRA - Subtitle D) before final approval of the solid waste permitting program would be granted by EPA. On September 22, 1993, the Environmental Quality Board (the Board) of the Oklahoma Department of Environmental Quality (ODEQ) approved the proposed Oklahoma regulations, with some nonsubstantive revisions, as temporary regulations which will expire on June 30, 1994. The Oklahoma regulations were implemented on a temporary basis because of administrative requirements and because of the additional changes made by the Board. It is EPA's understanding that these additional

revisions are beyond Subtitle D requirements. On October 8, 1993, the Governor of the State of Oklahoma signed the Oklahoma regulations into law on an emergency basis effective until June 30, 1994. At the request of the Board, ODEQ currently is amending its solid waste regulations for permanent adoption on or before June 30, 1994. The amendments that are being proposed are minor in nature and do not affect the Subtitle D requirements of the Oklahoma regulations (Oklahoma Administrative Code, Title 252, Chapter 510). These minor amendments are tentatively scheduled to be presented to the Board on February 23, 1994 for final adoption.

C. Public Comments

EPA received one public comment on the tentative determination of adequacy for Oklahoma's MSWLF permit program. The commentator stated that he fully supported the approval of Oklahoma's Solid Waste Management program.

D. Decision

After reviewing the public comment and the temporary nature of the rules adopted by ODEQ on October 8, 1993, EPA concludes that Oklahoma's application for adequacy determination currently meets all of the statutory and regulatory requirements established by RCRA. EPA's final approval of the solid waste program is only applicable through June 30, 1994, since the ODEQ's solid waste regulations adopted on September 22, 1993, expire on that date. Once the ODEQ's Board adopts permanent regulation revisions (proposed date February 23, 1994) and these permanent regulations are submitted by the Governor of the State of Oklahoma as final rules, EPA will re-evaluate the revised regulations to ensure the permanent rules are as stringent as the Federal Criteria for solid waste disposal (40 CFR part 258). EPA will publish another determination of adequacy based on these permanent rule revisions in the **Federal Register**. Accordingly, Oklahoma is granted a determination of adequacy through June 30, 1994, for all portions of its municipal solid waste permit program as adopted on September 22, 1993, and signed by the Governor on October 8, 1993. Oklahoma's solid waste program does not apply and cannot be enforced in Indian country in the State. Section 4005(a) of RCRA provides that citizens may use the citizen suit provisions of section 7002 of RCRA to enforce the Federal MSWLF criteria in 40 CFR part 258 independent of any State/Tribal enforcement program. As EPA explained in the preamble to the final MSWLF criteria, EPA expects that any owner or operator complying with provisions in a State/Tribal program approved by EPA should be considered to be in compliance with the Federal Criteria. See 56 FR 50978, 50995 (October 9, 1991).

Today's action takes effect on the date of publication. EPA believes it has good cause under section 553(d) of the Administrative Procedure Act, 5 U.S.C. 553(d), to put this action into effect less than 30 days after publication in the **Federal Register**. All of the requirements and obligations in the State's/Tribe's program are already in effect as a matter of State/Tribal law. EPA's action today does not impose any new compliance requirements on the regulated community. Nor do these requirements become enforceable by EPA as federal law. Consequently, EPA finds that it does not need to give notice prior to making its approval effective.

Compliance with Executive Order 12291

The Office of Management and Budget has exempted this notice from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this approval will not have a significant economic impact on a substantial number of small entities. It does not impose any new burdens on small entities. This notice, therefore, does not require a regulatory flexibility analysis.

Authority

This notice is issued under the authority of Section 4005 of the Solid Waste Disposal Act as amended; 42 U.S.C. 6946.

Dated: December 15, 1993.

Joe D. Winkle,

Acting Regional Administrator.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 2100 M Street, NW., suite 140, Washington, DC 20037, (202) 857-3800. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632-0276. Persons wishing to comment on this information collection should contact Timothy Fain, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395-3561.

OMB Number: 3060-0549

Title: Cable Programming Service Rate Complaint Form

Form Number: FCC Form 329

Action: Revision of a currently approved collection

Respondents: Individuals or households, state or local governments, nonprofit institutions and businesses or other for-profit (including small businesses)

Frequency of Response: On occasion reporting requirement

Estimated Annual Burden: 23,000 responses; .75 hours average burden per response; 17,250 hours total annual burden

Needs and Uses: The Mass Media Bureau has, on its own motion, adopted a revised cable programming service rate form in order to ensure that all interested parties are able to more easily communicate their cable complaints to the Commission. The revised FCC Form 329 will make it easier for consumers and franchising authorities to request that the FCC investigate alleged violations of the Cable Act. The revised form requests the same information as the earlier edition, but in a more "user-friendly" format. The revised form also provides consumers with helpful information about cable regulations in general. Instructions for using the form have been clarified and the form has been redesigned with questions and instructions in larger type and larger spaces provided for responses. Comments for this information collection will be accepted.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

FCC 329

CABLE PROGRAMMING SERVICE RATE COMPLAINT FORM INSTRUCTIONS

The Federal Communications Commission (FCC) investigates the reasonableness of rates for cable programming service based on complaints filed by subscribers, as well as local and state governments. By filing this form, you begin an investigation of your cable system's rates for cable programming service. Therefore, your participation is critical to the enforcement of the FCC's cable rate regulation rules.

Please read the following information before completing the attached Cable Programming Service Rate Complaint Form.

Who Regulates Cable Rates?

When you subscribe to cable television, your cable system offers you the option of choosing from among different programming packages. Some packages are regulated by the FCC and others by your local franchising authority.

The Federal Communications Commission is the federal administrative agency charged with regulating communications by radio, television, wire, satellite and cable.

A franchising authority is the local municipal, county or other government organization that regulates your cable television service. The name of your local franchising authority should be on the front or back of your current cable bill.

If the information is not on your bill, contact your cable company or your local government.

What Do Local Franchising Authorities Regulate?

In most instances, your local franchising authority is responsible for regulating:

- Rates for basic cable service, equipment used to receive basic cable service and installation and service charges related to basic service. The term "basic service" refers to the lowest level of cable service you can buy, and is the program package that includes signals from local television stations (such as ABC, NBC and CBS affiliates and independent television stations) and public, educational and governmental access channels. Your cable system may use other terms to describe this service.
- Customer service -- for instance, complaints about bills, a cable system's response to inquiries about signal quality and a cable system's response to service requests.
- Franchise fees -- the fees paid by the cable system to the franchising authority for the right to offer cable service.

You should contact your local franchising authority if you believe your rates for basic service, related equipment or installation are unreasonable. Your local franchising authority will tell you if it is not responsible for regulating these rates.

You should contact your local franchising authority, and not the FCC, with complaints regarding customer service and franchise fees.

What Cable Rates Does the FCC Regulate?

The FCC regulates rates you pay for certain programming that the FCC refers to as cable programming service. "Cable programming service" includes all program channels on your cable system that are not included in basic service and are not separately offered as pay-per-channel programming or pay-per-program services.

The FCC also regulates rates for equipment used solely to receive cable programming service and installation and service charges related solely to cable programming service. However, since most equipment used to receive cable programming service is also used to receive basic service, equipment complaints should generally be directed to your local franchising authority.

Are There Some Rates That Neither the FCC Nor Local Franchising Authorities Regulate?

Yes. Neither the FCC nor your local franchising authority regulates rates for pay-per-channel programming (for instance, a premium movie channel such as HBO or Showtime) and pay-per-program services (for instance, pay-per-view sports events). Therefore, you should not file a complaint about these services with the FCC or your local franchising authority..

FCC Form 329
December, 1993

Who Should Fill Out This Form?

You should fill out this form and submit it to the FCC if you are a cable subscriber wishing to file a complaint with the FCC about cable programming service, related equipment or installation. Franchising authorities and other relevant state or local governments may also use this form to file a complaint with the FCC about cable programming service, related equipment or installation.

How Does the Complaint Process Work?

Your complaint begins a legal process that requires your cable company to demonstrate that its rates are reasonable under the law.

The FCC requires your cable company to respond in writing to your complaint within thirty days of the date you file your complaint, unless your cable company is notified by the FCC that your complaint cannot be processed. In its response, your cable company must show that its rates are reasonable under the law. The cable company must provide you with a copy of its response. The FCC will examine the information submitted by the cable company and determine whether its rates for cable programming service are too high. If so, the FCC may order a refund and/or a rate reduction for the cable programming service. You and the franchising authority will receive a copy of the FCC's final ruling on the reasonableness of the cable programming service rate charged by your cable company.

Your complaint will be maintained by the FCC under the cable company's community unit identifier, which is a number assigned to each cable system by the FCC for administrative purposes. This number should appear on your cable bill. Your complaint will not be filed under your name. If you have a question concerning the status of your complaint, you may call (202) 416-0910. Please be prepared to tell us the name of the cable system and the name of the community where the cable system is located.

How To Fill Out This Form

1. You should use this form only to complain about rates for cable programming service, related equipment or installation, as described above.

2. In order to complete this form, you will need a copy of your current cable bill and the name and address of your local franchising authority. The name and address of your local franchising authority should appear on the front or back of your cable bill. If it does not, you must contact your cable company or your local government to obtain this information. We cannot process your complaint unless you include this information!

3. You may ask your local franchising authority for assistance in filling out this form. You may also attach a statement from your local franchising authority describing its views about the cable programming service rate in question. However, this is not a requirement.

4. Please fill in all information requested on this form. If you do not do so, we may not be able to process your complaint.

5. If you have any questions about how to fill out this form, you may call the FCC at (202) 416-0802.

FCC NOTICE TO INDIVIDUALS REQUIRED BY THE PRIVACY ACT AND THE PAPERWORK REDUCTION ACT

The solicitation of personal information in this form is authorized by the Communications Act of 1934, as amended. The Commission will use the information provided in this form to determine the reasonableness of a cable company's rates. In reaching that determination, or for law enforcement purposes, it may become necessary to refer personal information contained in this form to another government agency. All information provided in this form will be available for public inspection. Your response is required to obtain the requested relief.

Public reporting burden for this collection of information is estimated to average 45 minutes including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Federal Communications Commission, Records Management Division, AMD-PRB, Washington, D.C. 20554, and to the Office of Management and Budget, Paperwork Reduction Project (3060-0640), Washington, D.C. 20503.

THE FOREGOING NOTICE IS REQUIRED BY THE PRIVACY ACT OF 1974, P.L. 93-579, DECEMBER 31, 1975, 5 U.S.C. 522(A)(e)(E) AND THE PAPERWORK REDUCTION ACT OF 1980, P.L. 96-511, DECEMBER 11, 1980, 44 U.S.C. 3507.

CABLE PROGRAMMING SERVICE RATE COMPLAINT FORM

1. **PLEASE READ THE ATTACHED INSTRUCTIONS BEFORE COMPLETING THIS FORM**

Your Name		Street Address	
City	State	Zip Code	Daytime Phone Number (optional)

2.

Franchising Authority Name		Street Address	
City	State	Zip Code	The name of your franchising authority should appear on your cable bill. If not, contact your cable company or local government for information

3.

Cable System Name		Street Address	
City	State	Zip Code	If you are complaining about the rates charged by more than one cable system, you must complete and file a separate form for each system

4. What is the FCC's community unit identifier for your cable system? This is a two letter abbreviation followed by four numbers -- for example, PA0000 -- that should appear on your cable bill. If it does not, leave this space blank. [ ][ ][ ][ ][ ][ ]

5. Have you previously filed a complaint against this cable
☐ Yes, on ☐ ☐ ☐ (MONTH DAY YEAR)
☐ No

If yes, was your complaint returned to you by the FCC with a request for additional information?
☐ Yes, on ☐ ☐ ☐ (MONTH DAY YEAR)
☐ No

6. Complaints about rate increases for cable programming services or related equipment must be received by the FCC within 45 days from the date you first received a bill showing the rate increase. (There is one exception to this rule. If you are challenging a rate that was in effect on September 1, 1993, you have until February 28, 1994, to file a complaint about that rate.) Late-filed complaints will be returned and your cable company will not be required to file a response to your complaint, so be sure to file your complaint within 45 days of the first time your bill includes the rate increase.

When did you first receive a bill reflecting the rate increase you are complaining about? (If you are complaining about a rate in effect on September 1, 1993, please enter "September 1, 1993" in this box.) ☐ ☐ ☐ (MONTH DAY YEAR)

7. What is your current monthly rate for cable programming service? $

If you are complaining about a rate increase, what was your previous monthly rate for cable programming service? $

FCC Form 329 December 1993

8. Have any channels been added to or dropped from your cable programming service since your last bill?

a. Yes, channels have been added ☐

b. Yes, channels have been dropped ☐

c. No, there has been no change ☐

9. If you are a cable subscriber, you must attach a copy of your current cable bill or we will not be able to process your complaint. You may attach a copy of your previous cable bill as well; however, this is not required.

10. You may attach any additional comments or explanations to this form.

11. You must send copies of this complaint, your cable bill and any additional comments to your cable company and to your local franchising authority at the addresses you listed above by first class mail, postage prepaid, on the same date you sent this complaint to the FCC. If you do not send the copies, your cable company will not be required to respond and we will not be able to process your complaint.

On what date did you send the copies?

MONTH	DAY	YEAR

12. By signing this form, I certify:

a. That to the best of my knowledge, the information supplied on this form is true and correct;
b. That I am sending a copy of this complaint, including a copy of my cable bill and any additional comments, to the cable company and the local franchising authority at the addresses listed above via first class mail, postage prepaid; and
c. That I believe the cable company's rate for my cable programming service or related equipment is unreasonable.

This form must be signed or we will not be able to process your complaint.

Signature Date

WILLFUL FALSE STATEMENTS MADE ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE TITLE 18, SECTION 1001)

13. Mail the original signed copy of this completed form, with a copy of your cable bill and any additional comments, to:

Federal Communications Commission
Attention: Cable Programming Service Rate Complaint
P.O. Box 19968
Washington, D.C. 20036
Fax Number: (202) 418-0679

Remember to also mail copies of the form, with a copy of your cable bill and any additional comments, to your cable company and your local franchising authority.

YOUR PARTICIPATION IS CRITICAL TO THE IMPLEMENTATION OF THE CABLE ACT.
YOUR INVOLVEMENT IS GREATLY APPRECIATED!

Petitions for Reconsideration and Clarification of Actions in Rulemaking Proceedings

December 22, 1993.

Petitions for reconsideration and clarification have been filed in the Commission rulemaking proceedings listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for viewing and copying in room 239, 1919 M Street, NW., Washington, DC or may be purchased from the Commission's copy contractor ITS, Inc. (202) 857–3800. Opposition to these petitions must be filed by January 12, 1994. See 1.4(b)(1) of the Commission's rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992 (MM Docket No. 92–266).

Petitions for Reconsideration

Number of Petitions Filed: 10.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Statement of Organization, Functions and Delegation of Authority

Part A (Office of the Secretary), Chapter AE (Office of the Assistant Secretary for Planning and Evaluation) of the Statement of Organization, Functions and Delegation of Authority for the Department of Health and Human Services (last amended at 55 FR 249 on December 27, 1990) is amended. The changes are as follows:

A. Chapter AE paragraph E. "The Office of Human Services Policy," delete in its entirety and replace with the following:

E. The Office of Human Services Policy—The Office of Human Services Policy is responsible for policy development—including policy planning, policy and budget analysis, review of regulations and formulation of legislation—and for the conduct and coordination of research and evaluation on issues relating to income assistance, income security, employment, and related human services programs. In particular, the office is responsible for policies concerning families, child and youth development, welfare, retirement and disability assistance. In these matters, the office works closely with the Social Security Administration and the Office of the Assistant Secretary for Children and Families.

1. The Division of Economic Support for Families is responsible for policy coordination, long-range planning, budget and economic analysis, program analysis, review of regulations and reports on legislation, review and conduct of research and evaluation activities, research, and information dissemination related to the Department's programs that provide cash and employment and training assistance to non-elderly populations including families and their children. The principal Department programs examined are Aid to Families with Dependent Children, Child Support Enforcement, Low-Income Home Energy Assistance, JOBS, and refugee assistance. The division performs oversight functions in regard to programs outside the Department that affect employment and income support, such as the Earned Income Tax Credit, Food Stamps, housing assistance programs, and employment and training programs.

2. The Division of Economic Security for the Elderly and Persons with Disabilities is responsible for policy coordination, long-range planning, budget and economic analysis, program analysis, review of regulations and reports on legislation, research, and information dissemination related to income security policies for the aged and persons with disabilities and especially for the Department's Social Security programs. The Division is responsible for monitoring and evaluating the performance of policies and programs affecting the economic well-being of the aged and persons with disabilities in this and other Departments including the Old Age and Survivors Insurance Program, the Supplemental Security Program, the Disability Insurance Program, pension and retirement policies, and favored tax treatment. Responsibilities include advising the Secretary about his or her decisions as a trustee of the several Social Security funds.

3. The Division of Children and Youth Policy is responsible for policy coordination and development, planning, formulating budget and legislative proposals, economic analysis, policy and program analysis, review of regulations, research, and information collection and dissemination related to programs and policies affecting children and youth. The principal areas of responsibility include: child welfare and child protection, family support, child care, child development, human services for children and youth, and issues related to special populations of children such as drug-exposed children, runaway youth, and homeless children and their families.

4. The Division of Data and Technical Analysis is responsible for the development and oversight of research and data gathering activities, analysis of databases, technical assistance and support for policy development, and modeling. The division focuses on Administration for Children and Families and cross-cutting income security issues, including Aid to Families with Dependent Children, Child Support Enforcement, Low-Income Energy Assistance, the Earned Income Tax Credit, Food Stamps, housing assistance programs, and child care.

Kenneth S. Apfel,

Assistant Secretary for Management and Budget.

BILLING CODE 4110-60-P

Food and Drug Administration

[Docket No. 93N-0485]

Opportunity for Submission of Petitions for Essential Use Exemption for Certain Ozone-Depleting Substances Pursuant to the Clean Air Act

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing specific procedures whereby a manufacturer of a potentially essential medical product that is regulated by FDA and that is affected by the nonessential use bans under the Clean Air Act (CAA), as amended in 1990, may apply to FDA, using the petition process provided in FDA's administrative regulations for an exemption from the bans if the product meets certain criteria.

DATES: Submit written comments by January 27, 1994.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857. Submit petitions that do not contain confidential commercial information, pursuant to this notice, to the Dockets Management Branch (address above).

FOR FURTHER INFORMATION CONTACT: For specific questions contact the appropriate center:

For general questions: Ilisa B. Bernstein, Office of Policy, Food and Drug Administration, 5600 Fishers Lane (HF-23), rm. 15-74, Rockville, MD 20857, 301-443-2831.

For questions about medical devices: Kerry G. Rothschild, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 2094 Gaither Rd., Rockville, MD 20850, 301-594-4765.

For questions about human drugs: Wayne Mitchell, Center for Drug Evaluation and Research (HFD-362), Food and Drug Administration, rm. 116, 7500 Standish Place, Rockville, MD 20855, 301-594-1046.

For questions about biological products: Thomas G. Bird, Center for Biological Products (HFM-2), Food and Drug Administration, 1401 Rockville Pike, suite 200S, Rockville, MD 20852, 301-496-3556.

For questions about animal drug products: John C. Mathison, Center for Veterinary Medicine (HFV-150), Food and Drug Administration, MPN-2, 7500 Standish Pl., Rockville, MD 20855, 301-594-1679.

SUPPLEMENTARY INFORMATION:

I. Background

Title VI of the CAA, as amended in 1990 (42 U.S.C. 7671), directs the U.S. Environmental Protection Agency (EPA) to promulgate regulations that prohibit, among other things, the sale or distribution in interstate commerce of certain nonessential products that release class I ozone-depleting substances into the environment (section 610(b) of the CAA) and any aerosol or pressurized dispenser that contains a class II ozone-depleting substance (section 610(d) of the CAA). Class I and class II substances are defined in sections 601(3) and (4) of the CAA. (See EPA's listing notice of January 22, 1991 (56 FR 2420)). Class I ozone-depleting products include chlorofluorocarbons (CFC's), halons, carbon tetrachloride, and methyl chloroform. Class II ozone-depleting substances include hydrochlorofluorocarbons (HCFC's). Section 610(b) of the CAA authorizes EPA to determine which products that release class I substances are nonessential (58 FR 4768, January 15, 1993.) Section 610(d) of the CAA addresses the nonessential use ban for class II substances and authorizes EPA to grant exceptions to the class II ban in certain circumstances (proposed September 27, 1993, 58 FR 50464). Medical products, as defined in section 601(8) (42 U.S.C. 7671(8)), are exempt from the nonessential use ban (42 U.S.C. 7671i(e)). Exempt medical products consist of:

> * * * any device (as defined in the Federal Food, Drug, and Cosmetic Act [21 U.S.C. § 321)), diagnostic product, drug (as defined in the Federal Food, Drug, and Cosmetic Act [21 U.S.C. § 301 et seq.]), and drug delivery system—
>
> (A) if such device, product, drug, or drug delivery system utilizes a class I or class II substance for which no safe and effective alternative has been developed, and where necessary, approved by the Commissioner [of FDA]; and
>
> (B) if such device, product, drug, or drug delivery system, has, after notice and opportunity for public comment, been approved and determined to be essential by the Commissioner in consultation with the Administrator [of EPA].
>
> (42 U.S.C. 7671(8).)

EPA's existing or proposed regulations state that exceptions to the class I (58 FR 4768, January 15, 1993) and class II (proposed September 27, 1993, 58 FR 50464) bans include medical products that FDA considers essential and medical products that FDA has listed in § 2.125(e) (21 CFR 2.125(e)). Pursuant to EPA regulations, the class I ban is effective January 17, 1994. The class II ban is effective January 1, 1994.

Currently, § 2.125 addresses the use of CFC propellants in self-pressurized containers. This document describes the process by which manufacturers of products that use other class I substances and class II substances as propellants in self-pressurized containers, and in aerosols and other pressurized containers, may petition for an exemption from the ban. Petitions need not be submitted for products already listed in § 2.125(e). The use of a CFC propellant in a self-pressurized container in those products is considered an essential use, and such products are exempt under EPA regulations implementing section 610(b) of the CAA (58 FR 4768, January 15, 1993).

II. Opportunity to Petition

A. Process for Submitting a Petition Requesting Exemption

A manufacturer of an FDA-regulated product seeking an essential use exemption from the section 610(b) and section 610(d) bans under the CAA may submit a petition to FDA in accordance with § 10.30 (21 CFR 10.30) requesting the exemption. The petition should include the following information:

1. A request to amend § 2.125(e) to specify the use as essential;

2. The name of the class I or class II substance used in the product and a description of how it is used;

3. A request for an interim exemption pending a decision on the petition;

4. A statement containing an explanation of the basis for the exemption and certifying that:

(a) There are no technically feasible alternatives to the use of a class I or class II ozone-depleting substance in the product;

(b) The product provides a substantial health benefit, environmental benefit, or other public benefit that would not be obtainable without the use of a class I or class II ozone-depleting substance; and

(c) The use does not involve a significant release of class I or class II ozone-depleting substances into the atmosphere or the release is warranted in view of the consequence if the use were not permitted; and

5. Data and information to support the statement described in section II.A.4. of this document.

The criteria listed in section II.A.4. of this document are the same criteria currently listed in § 2.125(f), but they are expanded to apply to all class I and class II substances. These criteria are consistent with the nonessential use criteria that the CAA states EPA shall consider. These include "the purpose or intended use of the product, the technological availability of substitutes for such product and for such class I substance, safety, health, and other relevant factors." (42 U.S.C. 7671i). In addition to these criteria, FDA may also consider the criteria for exemption under the Montreal Protocol on Substances that Deplete the Ozone Layer for that use, including the economic feasibility of using an alternative to a CFC, other class I substance, or class II substance. (See 58 FR 50464 for a summary of the Montreal Protocol).

Petitions should be submitted to the Dockets Management Branch (address above). If a petition contains confidential commercial information that the petitioner does not want to disclose publicly, the petition should be submitted directly to the appropriate reviewing center within FDA. In such an event, a copy of the petition, which refers to, but does not include the confidential data, must also be submitted to the Dockets Management Branch. The center contact person and their address is listed in the "Summary" section of this document.

B. Interim Exemption

Because of the impending effective dates for the class I and class II bans, FDA will consider granting an interim exemption based on the filing of a petition that includes the statement and summary explanation of the basis for the requested exemption, specified in section II.A.4. of this document, and a statement that the supporting data and information specified in section II.A.5. of this document will be provided to FDA within 90 days of filing the original petition. The statements must be certified by a responsible company official.

If an interim exemption has been granted and FDA determines that the certified statement, or any other element of the petition is not supported by data or information available to the agency, was not made in good faith, contains false or misleading information, or the data or information identified in section II.A.5. of this document was not provided to the agency within 90 days, FDA will rescind the interim exemption.

FDA believes that the interim exemption procedure is necessary to prevent a possible public health hazard that may result from the removal from the market of a potentially essential medical product under the CAA. This interim exemption is provided to ensure continued availability of potentially essential medical products pending a full review of all available data and information by the agency.

Pursuant to section 601(8) of the CAA, FDA will consult with EPA prior to granting an interim exemption for a medical product. Periodically, FDA will publish in the **Federal Register** a list of products that have received interim exemptions. FDA intends to place the petitions in the public docket for public comment. FDA also intends to undertake notice and comment rulemaking and to consult with EPA in determining essential use exemptions, which will be codified in FDA regulations. FDA intends to amend § 2.125 and other affected sections to reflect the essential use exemptions and the expansion of the regulation to include other class I and class II substances.

At this time, FDA is not proposing any specific medical products for exemption under § 2.125(e) and section 601(8) of the CAA. Products already exempted in § 2.125(e) will continue to be exempted. FDA will only consider a new exemption or interim exemption upon submission of a petition as described above.

III. Opportunity for Public Comment

Interested persons may, on or before January 27, 1994, submit to the Dockets Management Branch (address above) written comments regarding this notice. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: December 22, 1993.

Michael R. Taylor,

Deputy Commissioner for Policy.

[FR Doc. 93-31705 Filed 12-22-93; 5:08 pm]

BILLING CODE 4160-01-P

Social Security Administration

Agency Forms Submitted to the Office of Management and Budget for Clearance

Normally on Fridays, the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96-511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the **Federal Register** on Friday, December 3, 1993.

(Call Reports Clearance Officer on (410) 965-4142 for copies of package.)

1. Certificate of Election for Reduced Spouse's Benefits— 0960-0398. The information on form SSA-25 is used by the Social Security Administration to entitle eligible spouses to reduced benefits for months in which they do not have an entitled child in care. The affected public consists of spouses who file this certificate to elect reduced benefits.

Number of Respondents—30,000
Frequency of Response—1
Average Burden Per Response—2 minutes
Estimated Annual Burden—1,000 hours

2. Appointment of Representative—0960–NEW. The information on form SSA–1696 is used by the Social Security Administration (SSA) to verify the applicant's appointment of a representative. It allows SSA to inform the representative of items which affect the applicant's claim. The affected public consists of applicants who notify SSA that they have appointed a person to represent them and such representatives.

Number of Respondents—360,000
Frequency of Response—1
Average Burden Per Response—10 minutes
Estimated Annual Burden—60,000 hours

3. Marital Relationship Questionnaire—0960–0460. The information on form SSA–4178 is used by the Social Security Administration to determine if two unrelated individuals of the opposite sex who are living together are considered married for Supplemental Security Income (SSI) purposes. The respondents are applicants for and recipients of SSI who are living together in a questionable relationship.

Number of Respondents—5,100
Frequency of Response—1
Average Burden Per Response—5 minutes
Estimated Annual Burden—425 hours

4. Letter to Employer Requesting Wage Information—0960–0138. The information on form SSA-L4201 is used by the Social Security Administration to verify wages claimed by an applicant for Supplemental Security Income. The affected public consists of employers who are requested to verify the applicant's claim by completing this form.

Number of Respondents—133,000
Frequency of Response—1
Average Burden Per Response—30 minutes
Estimated Annual Burden—66,500 hours

5. Request for Correction of Earnings Record—0960–0029. Form SSA–7008 is used by individuals to request that the Social Security Administration (SSA) correct its record of earnings. The respondents are individuals who question SSA's record of their earnings.

Number of Respondents—375,000
Frequency of Response—1
Average Burden Per Response—10 minutes
Estimated Annual Burden—62,500 hours

6. Report to U.S. Social Security Administration by Person Receiving Benefits for a Child or for an Adult Unable to handle Funds (SSA–7161); Report to U.S. Social Security Administration (SSA–7162)—0960–0049. The information on these forms is used by the Social Security Administration to determine continuing entitlement and proper benefit amounts for Social Security beneficiaries who live outside the U.S. The affected public consists of persons living outside the U.S. who are entitled to benefits or who are representative payees for an entitled beneficiary.

Number of Respondents—275,000
Frequency of Response—1
Average Burden Per Response—(SSA–7161) 15 minutes, (SSA–7162) 5 minutes
Estimated Annual Burden—31,250 hours

7. Employer Classification Update—0960–0262. The information on form SSA–L378 is combined with other data obtained by the Social Security Administration and used in program planning, revenue estimates, and employment studies. The affected public consists of employers who have at least 11 employees and who have not provided sufficient information on form SS–4 for geographical and industrial classification.

Number of Respondents—75,000
Frequency of Response—1
Average Burden Per Response—3 minutes
Estimated Annual Burden—3,750 hours

Written comments and recommendations regarding these information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: January 21, 1993.

Charlotte Whitenight,

Reports Clearance Officer, Social Security Administration.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to The Tatitlek Corporation for approximately 7,789.335 acres. The lands involved are in the vicinity of the Village of Tatitlek, Alaska.

Copper River Meridian, Alaska

T. 11 S., R. 6 W., T. 12 S., R. 6 W., T. 11 S., R. 7 W., T. 12 S., R. 7 W., T. 13 S., R. 8 W., T. 9 S., R. 9 W., T. 10 S., R. 9 W., T. 13 S., R. 9 W., T. 10 S., R. 10 W.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the Cordova Times. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until January 27, 1994, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Terry R. Hassett,

Chief, Branch of KCS Adjudication.

BILLING CODE 4310–JA–P

[AZ–050–04–7122–14–X218; AZA–054–04–01]

Arizona: Temporary Closure of Selected Public Lands in La Paz County, Arizona

AGENCY: Bureu of Land Management, Interior.

ACTION: Temporary closure of selected public lands in Las Paz County, Arizona, during the operation of the 1994 SCORE Parker 400 Off-Road Vehicle Race.

SUMMARY: The District Manager of the Yuma District announces the temporary closure of selected public lands under its administration. This action is being taken to help ensure public safety and prevent unnecessary environmental degradation during the official permitted running of the 1994 SCORE Parker 400 Off-Road Vehicle Race.

DATES: January 19, 1994, through January 23, 1994.

SUPPLEMENTARY INFORMATION: Specific restrictions and closure periods are as follows:

Designated Course

1. The portion of the course comprised of Bureau of Land Management lands, roads, and ways is south of the Bill Williams River. East and north of Highway 72 and west of Wenden Road is closed to public vehicle use from 6 p.m. Wednesday, January 19, 1994, to 12 p.m. (noon) Sunday, January 23, 1994 (Mountain Standard Time).

2. Vehicles are prohibited from the following four Wilderness Areas and one Wilderness Study Area (WSA):

a. AZ–050–12 (Gibraltar Mountain).
b. AZ–050–15A (Swansea).
c. AZ–050–71 (Buckskin Mountains).
d. AZ–050–14A/B (Cactus Plain).
e. AZ–050–17 (East Cactus Plain, WSA).

3. The entire area encompassed by the designated Course and all areas within 1 mile outside the designated Course are closed to all vehicles except authorized and emergency vehicles. Access routes leading to the course are closed to vehicles. All closed routes will be posted throughout the closure period.

4. Vehicle parking or stopping along Bouse Road, Shea Road, and Swansea Road is prohibited except for the designated spectator areas.

5. Spectator viewing is limited to two designated spectator areas located at:

a. South of Shea Road, approximately 6 miles east of Parker, Arizona.
b. Bouse Road, also known as Swansea Road (about 1½ miles north of Bouse, Arizona).

6. The following regulations will be in effect for the duration of the closure. Unless otherwise authorized, no person shall:

a. Camp in any area outside of the designated spectator areas.
b. Enter any portion of the race course or any wash located within the race course, including all portions of Osborne Wash.
c. Spectate or otherwise be located outside of the designated spectator areas.
d. Cut or collect firewood of any kind, including dead and down wood or other vegetative material.
e. Be in possession of any alcoholic beverage unless that person has reached the age of 21 years.
f. Possess, discharge, or use firearms, other weapons, or fireworks.
g. Park, stop, or stand any vehicle outside of the designated spectator areas.
h. Operate any vehicle, including an off-highway vehicle, which is not legally registered for street and highway operation, including operation of such a vehicle in spectator viewing areas, along the race course, and in designated pit areas.
i. Park any vehicle in violation of posted restrictions, or in such a manner as to obstruct or impede normal or emergency traffic movement or the parking of other vehicles, create a safety hazard, or endanger any person, property, or feature. Vehicles so parked are subject to removal and impoundment at the owner's expense.
j. Take any vehicle through, around, or beyond a restrictive sign, recognizable barricade, fence, or traffic control barrier.
k. Fail to keep their site free of trash and litter during the period of occupancy or fail to remove all personal equipment, trash, and litter upon departure.
l. Violate quiet hours by causing an unreasonable noise as determined by the authorized officer between the hours of 10 p.m. and 6 a.m. Arizona time (Mountain Standard Time).
m. Allow any pet or other animal in their care to be unrestrained at any time.

Signs and maps directing the public to the designated spectator areas will be provided by the Bureau of Land Management and the event sponsor.

Signs and maps directing the public to the designated spectator areas will be provided by the Bureau of Land Management and the event sponsor.

The above restrictions do not apply to emergency vehicles and vehicles owned by the United States, the State of Arizona, or to La Paz County. Vehicles under permit for operation by event participants must follow the race permit stipulations. Operators of permitted vehicles shall maintain a maximum speed limit of 35 mph on all La Paz County and Bureau of Land Management administered roads and ways. Authority for closure of public lands is found in 43 CFR 8340, subpart 8341, 43 CFR 8360, subpart 8364.1, and 43 CFR 8370, subpart 8372. Persons who violate this closure order are subject to arrest and, upon conviction, may be fined not more than $100,000 and/or imprisoned for not more than 12 months.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management Law Enforcement Ranger Mark Harris or Outdoor Recreation Planner Myron McCoy, Havasu Resource Area Office, 3189 Sweetwater Avenue, Lake Havasu City, Arizona 86406, telephone (602) 855–8017

Dated: December 17, 1993.

Michael A. Taylor,

Associate District Manager.

Emergency Closure of Public Lands; California; Correction

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Correction to an emergency closure of certain public lands to motorized vehicle use in the Juniper Flats Area of San Bernardino County, California for a period of two years.

Correction

In notice document 93–22712 beginning on page 48667 in the issue of Friday, September 17, 1993, make the following correction:

Insert an additional paragraph in the third column below paragraph (9), describing roads to be exempted from the closure, to read:

(10) Moss Hill Road, south of Moss Hill to Forest Service Road 3N59A, east of Bowen Ranch through public lands only in Sections 11 and 12 of T. 3 N., R. 3 W.

Dated: December 8, 1993.

Karla K.H. Swanson,

Area Manager

Draft Environmental Impact Statement for Newcastle Resource Area, WY

AGENCY: Bureau of Land Management, Interior. Newcastle Resource Area Casper District, Wyoming.

ACTION: Notice of availability of the draft environmental impact statement for the Newcastle Resource Management Plan, for public review and comment.

SUMMARY: The draft environmental impact statement (ESI) for the Newcastle Resource Management Plan (RMP) describes and analyzes four alternative resource management plans (RMPs), including the BLM's preferred alternative, for managing the Wyoming portion of the Newcastle Resource Area. The planning area is located in Crook, Weston and Niobrara Counties, in northeastern Wyoming. When completed, the Newcastle RMP will provide the management direction for future land and resource management actions on approximately 291,000 acres

of public land surface and approximately 1,700,000 acres of Federal mineral estate administered by the BLM within this portion of the Newcastle Resource Area.

The draft EIS focuses on resolving three key issues that were identified with public involvement early in the planning process. These issues are: (1) Retention or disposal of public lands; (2) surface disturbance; and (3) special management area designations.

There is one designated area of environmental concern (ACEC) within the Newcastle RMP planning area, the Whoopup Canyon ACEC designation be retained and that the area of the ACEC be expanded in size. While the potential for new ACEC designation was explored, none were identified and none are proposed in the preferred alternative.

During development of the draft EIS, the BLM conducted a Wild and Scenic Rivers review of BLM administered public lands that lie along waterways within the planning area. There were no BLM administered public lands in the planning area that were found to meet the Wild and Scenic Rivers eligibility criteria to be given further consideration for inclusion in the Wild and Scenic Rivers System.

The coal screening process (including application of the coal unsuitability criteria under 43 CFR part 3461) was not conducted for the planning effort. Any interest in coal exploration or leasing will be handled on a case-by-case basis. If an application for a coal lease is received sometime in the future, an appropriate land use environmental analysis will be conducted (which will include conducting the coal screening process), to determine whether or not the coal areas applied for are acceptable for development and leasing consideration. The RMP will be amended as necessary. To date, there has been no interest expressed to the BLM for leasing and development of BLM-administered coal in the planning area.

Wilderness management and wild horse management were not addressed in the planning effort. There are no wilderness areas or wilderness study areas on BLM-administered public lands in the planning area. In addition, there have been no other areas with wilderness characteristics identified on public lands in the planning area. There are no known wild horses or wild horse herd management areas in the planning area.

DATES: Written comments will be accepted for 90 days following the date the Environmental Protection Agency (EPA) publishes the filing of the Newcastle RMP draft EIS in the Federal Register. This EPA notice was published on December 3, 1993. A public meeting, open house, or both will be held during the 90-day comment period. Notices of these public involvement activities will be sent to all those on the Newcastle RMP mailing list.

ADDRESSES: Copies of the draft EIS for the Newcastle RMP are available from the BLM Newcastle Resource Area Office at 1101 Washington Boulevard, Newcastle, Wyoming 82701, or the BLM Casper District Office at 1701 East "E" Street, Casper, Wyoming 82601. Comments, and requests to be placed on the Newcastle RMP mailing list, should be sent to the Newcastle Area Manager at the Newcastle Resource Area Office.

FOR FURTHER INFORMATION CONTACT: Floyd Ewing, Newcastle Area Manager, or Gary Lebsack, Newcastle RMP Team Leader, at the above address or by telephone (307) 746–4453.

SUPPLEMENTARY INFORMATION: The Newcastle Resource Area is responsible for managing the BLM administered public lands in Crook, Niobrara, and Weston counties in Wyoming, and all BLM administered public lands in Nebraska. Management of the BLM administered public lands in Nebraska is covered under the Nebraska Resource Management Plan complete in 1992.

Within the Newcastle RMP planning area, there are varied and intermingled land surface ownerships and overlapping mineral ownerships. Therefore, the administrative jurisdictions for land use planning and for managing the land surface and minerals are also varied, intermingled, and sometimes overlapping. For this reason, it is important to understand that the Newcastle RMP draft EIS does not address management of lands or minerals within the planning area that are privately owned or owned by the State of Wyoming or local governments (about 1,000 acres). It also does not address those federally owned minerals within the planning area that are under federal land surface managed by other federal agencies (about 420,000 acres).

The draft EIS for the Newcastle RMP presents for alternative, multiple use resource management plans for managing the BLM administered public lands in the planning area, Alternative A (continuation of present management) and three other alternatives that suggest different combinations and emphases for managing the various resource and land uses on the BLM administered public lands, on the basis of needs, opportunities, and public demand. The four alternative plans focus on allocating public lands and resources among their valid uses and prescribing general management actions that would be taken. The Preferred Alternative is a combination of parts of alternatives, A, B, and C and represents what BLM believes is the best balance between the public land and resource uses and environmental protection in the planning area. The various impacts that would be expected from implementing each of the alternatives is also presented in the draft EIS.

Dated: December 13, 1993.

Ray Brubaker,

State Director.

Receipt of Application for the Conveyance of Federally-Owned Mineral Interests

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that pursuant to Section 209 of the Act of October 21, 1976, 90 Stat. 2757, Rayben L. Lebrecht, Trustee, Pima County, Tucso, Arizona, has applied to purchase the mineral estate described as follows:

Gila and Salt River Meridian, Arizona

T. 18 S., R. 15 E.,
Sec. 10, lots 3 and 4, N½SW¼;
Sec. 15, lots 3 and 4, S½NW¼, SW¼.
Containing 471.54 acres.

Upon publication of this notice in the **Federal Register**, the mineral interests described above will be segregated to the extent that they will not be open to appropriation under the public land laws including the mining laws. The segregative effect of the application shall terminate either upon issuance of a patent or other document of conveyance of such mineral interests, upon final rejection of the application or two years from the date of filing of the application, September 24, 1993, whichever occurs first.

FOR FURTHER INFORMATION CONTACT: Additional information concerning this application may be obtained from the Realty Specialist at the Tucson Resource Area Office, 12661 East Broadway, Tucson, Arizona 85748.

Dated: December 14, 1993.

[NV–930–4210–05; N–57367]

Realty Action: Lease/Purchase for Recreation and Public Purposes; Clark County, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Recreation and public purpose lease/purchase.

SUMMARY: The following described public land in Las Vegas, Clark County, Nevada has been examined and found suitable for lease/purchase for recreational or public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*). The County of Clark, a political subdivision of the State of Nevada, proposes to use the land for a Metropolitan Police Substation.

Mount Diablo Meridian, Nevada

T. 21 S., R. 60 E.,
Sec. 17: SE¼SW¼SE¼
Containing 10.00 acres, more or less.

The land is not required for any federal purpose. The lease/purchase is consistent with current Bureau planning for this area and would be in the public interest. The lease/patent, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

and will be subject to:

1. An easement 50.00 feet in width along the south boundary, with 20.00 foot radius spandrel at the east and west corners, in favor of Clark County for roads, public utilities and flood control purposes.

2. An easement 30.00 feet in width along the west boundary, with 15.00 foot radius spandrel at the northerly corner, in favor of Clark County for roads, public utilities and flood control purposes.

3. An easement 30.00 feet in width along the north boundary, with 15.00 foot radius spandrel at the easterly corner in favor of Clark County for roads, public utilities and flood control purposes.

4. An easement 30.00 feet in width along the east boundary in favor of Clark County for roads, public utilities and flood control purposes.

2. Those rights for power project purposes which have been granted to the Federal Energy Regulatory Commission by Permit No. N–56078 under the Act of March 3, 1879 (43 U.S.C. 31).

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease/purchase under the Recreation and Public Purposes Act, leasing under the mineral leasing laws and disposals under the mineral disposal laws.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Las Vegas District, P.O. Box 26569, Las Vegas, Nevada 89126. Any adverse comments will be reviewed by the State Director.

In the absence of any adverse comments, the classification of the land described in this Notice will become effective 60 days from the date of publication in the **Federal Register**. The

lands will not be offered for lease/purchase until after the classification becomes effective.

Dated: December 16, 1993.

Gary Ryan,

District Manager, Las Vegas, NV.

[FR Doc. 93-31545 Filed 12-27-93; 8:45 am]

BILLING CODE 4310-HC-M

[OR 36783; OR-060-04-4210-05; G4-062]

Realty Action; Proposed Recreation and Public Purposes Act Lease

December 16, 1993.

The following described public land has been examined and determined to be suitable for classification for lease to Linn County under the authority of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*):

Willamette Meridian, Oregon.

T. 11 S., R. 3 E.,
Sec. 35, SW¼NE¼SW¼,
N½SE¼NE¼SW¼,
SW¼SE¼NE¼SW¼, W½ Lot 3,
W½SE¼ Lot 3.

The above-described parcel contains 42.65 acres in Linn County.

Linn County has requested that Recreation and Public Purposes Lease OR 36783 be substituted with a new lease, as provided in 43 CFR 2912.3. The only change requested is to add the above-described parcel to its 459.15-acre existing lease. The lease is for the "Quartzville Creek Recreation Area", an area that has become popular for recreational gold panning. Lease of the parcel is consistent with current BLM land use planning and will be in the public interest.

The lease, when issued, will be subject to the following:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. Any other reservations that the authorized officer determines appropriate to ensure public access and proper management of Federal lands and interests therein.

Detailed information concerning this action is available for review at the Salem District Office, 1717 Fabry Road SE., Salem, Oregon 97306.

Upon publication of this notice in the Federal Register, the lands will be segregated from all other forms of appropriation under the public land laws, including the mining laws, except the mineral leasing laws and for lease under the Recreation and Public Purposes Act. For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments regarding the proposed classification and lease to the Santiam Area Manager, Salem District Office, at the above address. Any adverse comments will be reviewed by the Salem District Manager, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification will become effective 60 days from the date of publication of this notice.

Paul Jeske,

Santiam Area Manager.

BILLING CODE 4310-33-M

[UT-942-04-5700-11; UTU-67340 to UTU-67342, UTU-67344, UTU-67346]

Realty Action; Noncompetitive (Direct) Sale of Public Land in Emery County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, UTU-67340 to UTU-67342, UTU-67344, UTU-67346, Noncompetitive (Direct) Sale of public land in Emery County, Utah.

SUMMARY: Notice is given that the following described parcels of public land have been examined, and through the development of local land-use planning decisions, based upon public input, resource, considerations, regulations, and Bureau policies, the parcels have been found suitable for disposal by sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976 (FLPMA) (90 Stat. 2750; 43 U.S.C. 1713) using noncompetitive (direct) sale procedures (43 CFR 2711.3-3):

Salt Lake Meridian, Utah

T. 22S., R. 6E.,
Section 4, Lots 11-16.
The above land aggregates 3.85 acres in Emery County, Utah.

Also, classification of the following land pursuant to the Recreation and Public Purposes Act of 1926, as amended (43 U.S.C. 869, et seq.), is hereby modified to allow for disposal of the land through sale under section 203 of FLPMA (90 Stat. 2750; 43 U.S.C. 1713) using noncompetitive (direct) sale procedures (43 CFR 2711.3-3):

Salt Lake Meridian, Utah

T. 22S., R. 6E.,
Section 4, Lots 11-10.
The above land aggregates 36.14 acres in Emery County, Utah.

The parcels are difficult and uneconomic to manage as part of the public lands, are not needed for any resource programs, and are not suitable for management by the Bureau or any other Federal department or agency.

The parcels will not be offered for sale until at least sixty (60) days after publication of this notice in the Federal Register. These parcels will be sold at no less than the appraised fair market value (FMV).

The Bureau proposes to sell the surface estate only as follows:

UTU-6740, Dermus Jensen, Lots 12 & 16 (0.36 & 1.17 acres respectively, totalling 1.53 acres), FMV $1,000;
UTU-6741, Roger Clark, Lot 11 (1.47 acres), FMV $1,000;
UTU-6742, Russell Jensen, Lot 13 (0.47 acre), FMV $500;
UTU-6744, Randy Anderson, Lots 14 & 15 (0.18 & 0.20 acre, total 0.38 acre), FMV $500.

The above direct sales are being conducted to resolve unauthorized use and occupancy of the public lands. The sales to the adjoining land owners would assure land use compatibility with adjoining lands and protect investments in improvements made to the lands.

UTU-67346, Emery County School District (ECSD), Lot 10 (38.14 acres), FMV $7,650. The land was leased to ECSD under REcreation and Public Purposes (R&PP) lease UTU-48777 with the right to purchase following construction of a public school within five years. The school was not constructed but ECSD desires to purchase the land for future development.

Publication of this notice in the Federal Register segregates the public land from the operation of the public land laws and the mining laws. The segregative effective will end upon issuance of a patent, or two hundred seventy (270) days from the date of the publication, whichever occurs first.

The terms and conditions applicable to the sale are:

1. All minerals, including oil and gas, shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals.

2. A right-of-way will be reserved for ditches and canels constructed by the authority of the United States (Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945).

3. Road right-of-way UTU-70142, issued in the Town of Emery, will be reserved in the patents (45 feet from appropriate side of the centerline) under the authority of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

4. The sale of the parcels will be subject to all valid existing rights, reservations, and privileges of record. Existing rights, reservations, and privileges of record include, but are not limited to the following:

Parcels UTU-67340, UTU-67342, and UTU-67344

a. A right-of-way, Serial Number UTU-53807, to Emery Telephone, its successors or assignees, for a buried telephone line located in SLM, Utah, T. 22 S., R. 6E., Section 4, Lots 12-15, under the authority of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

b. A right-of-way, Serial Number UTU-53813, to PacifiCorp dba UP & L, its successors or assignees, for a powerline located in SLM, Utah, T.22 S. R. 6E., Section 4, Lots 12-15, under the authority of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

SALE PROCEDURES: The buyer will be required to submit the appraised fair market value of the property on the date of the sale. The lands will be offered for sale at the San Rafael Resource Area Office. If the lands are not sold on the same date, they will remain for sale over-the-counter until sold or withdrawn from the market. Over-the-counter bidder qualifications are noted below.

BIDDER QUALIFICATIONS: Bidders must be U.S. citizens 18 years of age or over, a State or State instrumentetlity authorized to hold property; a corporation authorized to hold property; or a corporation authorized to own real estate in the State of Utah.

BID STANDARDS: The BLM reserves the right to accept or reject any and all offers or withdraw the land from sale if, in the opinion of the Authorized officer, consummation of the sale would not be fully consistent with section 203(g) of FLPMA or other applicable laws.

COMMENTS: For a period of forty-five (45) days from the date of publication of this Notice in the Federal Register, interested parties may submit comments to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532. Objections will be reviewed by the Utah State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: Additional information concerning the lands and the terms and conditions of the sale may be obtained from Laurelle Hughes, Area Realty Specialist, San Rafael Resource Area, 900 North East, Price, Utah 84501, (801) 637-4584 or From Brad Groesbeck, District Realty Specialist, Moab District Office, 82 East Dogwood Drive, P.O. Box 970, Moab, Utah 84532 (801) 259-6111.

Dated: December 17, 1993.

Roger Zortman,

District Manager.

BILLING CODE 4310-DQ-M

[CO-070-04-3110-02]

Intent To Consider Amendment of the Grand Junction Resource Area, Resource Management Plan, 1987

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to consider amendment of the Grand Junction Resource Area Resource Management Plan, 1987, to address changes proposed in the Grand Mesa Slopes Special Management Area Management Plan, 1993, and Notice of Public Comment Period to identify issues to be addressed in an Environmental Assessment on the proposed amendment.

SUMMARY: Pursuant to section 102 of the National Environmental Policy Act of 1969 and section 202 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management, Grand Junction Resource Area, will consider an amendment of the Grand Junction Resource Area Resource Management Plan, 1987, and will prepare an Environmental Assessment on the proposed amendment.

SUPPLEMENTARY INFORMATION: The Plan Amendment and Environmental Assessment are being developed to consider changes that have been proposed in the Grand Mesa Slopes Special Management Area Management Plan, 1993. The Grand Mesa Slopes Special Management Area is approximately 80 square miles of mixed ownership lands in Mesa County, Colorado, immediately southeast of Grand Junction, Colorado. A cooperative management plan for the area has been developed involving over 30 government and private entities. The primary goals of the plan are to protect municipal watersheds, manage critical wildlife habitat, provide for managed public recreational uses, protect scenic open space values, and coordinate management of other natural resource programs.

Proposed changes to the Grand Junction Resource Area Resource Management Plan, 1987 involve: (1) Changing the classification of approximately 7,600 acres of BLM land immediately southeast of Grand Junction, Colorado from "suitable for disposal" to "retention as BLM land or suitable for exchange"; (2) Classifying approximately 1,200 acres of BLM land 10 miles southeast of Grand Junction, Colorado as suitable for exchange; (3) Designating approximately 20,000 acres of BLM land immediately southeast of Grand Junction, Colorado as limited to motor vehicle travel only on designated routes, and; (4) Designating approximately 500 acres of BLM land four miles south of Grand Junction, Colorado as open for off-highway-vehicle use.

A public meeting to accept comments on the Grand Mesa Slopes Special Management Area Management Plan, 1993, and the related actions in the proposed Grand Junction Resource Area Resource Management Plan, 1987 Plan Amendment will be held January 27, 1994 at 7 p.m. in the City/County Auditorium, 250 North 5th Street, Grand Junction, Colorado. For a period of 30 days from the date of this notice, interested parties may submit comments to the District Manager, Grand Junction District Office, 2815 H Road, Grand Junction, Colorado, 81506.

FOR FURTHER INFORMATION CONTACT: Additional information concerning this proposal is available for review at the Grand Junction District Office, 2815 H Road, Grand Junction, Colorado 81506, or by contacting Carlos Sauvage, Realty Specialist, at (303) 244-3022.

Tim Hartzell,

District Manager.

BILLING CODE 4310-GJ-M

[OR-942-09-4730-02; G4-049]

Filing of Plats of Survey: Oregon/Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Oregon State Office, Portland, Oregon, thirty (30) calendar days from the date of this publication.

Willamette Meridian

Oregon

T. 9 S., R. 3 E., accepted November 24, 1993
T. 40 S., R. 6 E., accepted November 16, 1993
T. 33 S., R. 35 E., accepted October 19, 1993
T. 9 S., R. 41 E., accepted November 3, 1993
T. 20 S., R. 2 W., accepted November 15, 1993
T. 20 S., R. 2 W., accepted November 15, 1993
T. 21 S., R. 5 W., accepted November 22, 1993
T. 18 S., R. 6 W., accepted October 28, 1993
T. 20 S., R. 7 W., accepted November 3, 1993

Washington

T. 32 N., R. 41 E., accepted October 28, 1993
T. 18 N., R. 12 W., accepted November 27, 1993

If the protests against a survey, as shown on any of the above plat(s), are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

The plat(s) will be placed in the open files of the Oregon State Office, Bureau of Land Management, 1300 N.E. 44th Avenue, Portland, Oregon 97213, and will be available to the public as a matter of information only. Copies of the plat(s) may be obtained from the above office upon required payment. A person or party who wishes to protest against a survey must file with the State Director, Bureau of Land Management, Portland, Oregon, a notice that they wish to protest prior to the proposed official filing date given above. A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within thirty (30) days after the proposed official filing date.

The above-listed plats represent dependent resurveys, survey and subdivision. **FOR FURTHER INFORMATION CONTACT:** Bureau of Land Management, 1300 N.E. 44th Avenue, P.O. Box 2965, Portland, Oregon 97208.

Dated: December 15, 1993.

William E. Bliesner,

Acting Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-33-M

Bureau of Reclamation

Enforce Existing Off-Road Motor Vehicle Closure on Bureau of Reclamation Lands Below American Falls Dam, Idaho

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent.

SUMMARY: The Bureau of Reclamation (Reclamation) is enforcing a 1972 off-road motor vehicle closure on the lands within the American Falls Natural Resource Area. Current public off-road vehicle activity requires active enforcement of the closure. This action is necessary to protect and preserve archeological sites located in the area.

ADDRESSES: Maps are available for review at:

- American Falls Dam, 2881 Highway 39, American Falls, Idaho 83211;
- Minidoka Project Office, 1359 Hansen Avenue, Burley, Idaho 83318;
- Pacific Northwest Regional Office, 1150 N. Curtis Rd., Boise, Idaho 83706

EFFECTIVE DATE: The off-road vehicle closure has been in effect since 1972, but not actively enforced. The closure will be enforced effective December 28, 1993 and will continue to be enforced until a decision is made on the future use and management of the area.

FOR FURTHER INFORMATION CONTACT: Eileen R. Salenik, Resource Management Planner, Bureau of Reclamation, Pacific Northwest Region, 1150 N. Curtis Rd., Boise, Idaho 83706, (208) 378-5314

SUPPLEMENTARY INFORMATION: American Falls Natural Resource Area, approximately 3,000 acres, is located just below American Falls Dam in southeastern Idaho. The general location is described below:

Reclamation withdrawn and acquired lands along the Snake River (between American Falls dam and the Minidoka National Wildlife Refuge) located in:

T. 8 S., R. 30 E., Boise Meridian: portions of Sections 15, 21, 22, 28, 29, 31, and 32
T. 9 S., R. 30 E., B.M.: portions of Section 6
T. 9 S., R. 29 E., B.M.: portions of Sections 1, 9-12, 14-17, and 19-21
T. 9 S., R. 28 E., B.M.: portions of Section 24

A 1992 Cultural Resource Class III survey verified this area has over 150 archeological sites dating back as far as 10,000 years. Pursuant to the authority granted by section 9(b) of Executive Order 11644, Feb. 8, 1972, 3 CFR 1971-1975 Comp., p. 666, as amended by Executive Order 11989, May 24, 1977, 3 CFR 1977 Comp., p. 120, Reclamation in 1972 closed to off-road vehicles the land administered by Reclamation downstream of American Falls Reservoir along the Snake River in southeastern Idaho. Previously limited enforcement resources and increasing off-road vehicle use by the public in contravention of the previous closure require reiteration of the closure notice. Reclamation will begin enforcing the closure immediately. Additional information concerning the closure and enforcement is available at Reclamation's Pacific Northwest Regional Office located at 1150 N. Curtis Road in Boise, Idaho, 83706.

The Shoshone-Bannock Tribes indicate this area has traditional cultural values and may consider the entire area to qualify for protection under the American Indian Religious Freedom Act.

In 1992, Reclamation worked with an agency/citizen task force to develop a feasible range of alternatives for the American Falls Resource management Plan Environmental Assessment. The Environmental Assessment, prepared in accordance with the National Environmental Policy Act and the National Historic Preservation Act, is available for public review and comment until December 31, 1993. The closure will be enforced until a decision for public use in the American Falls Natural Resource Area is made in 1994.

Dated: December 17, 1993.

Donald R. Glaser,

Deputy Commissioner.

BILLING CODE 4310-94-P

Fish and Wildlife Service

Notice of Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*):

PRT-760716

Applicant: Exotic Animals, Tarzana, CA.

The applicant requests a permit to import one male captive-born tiger (*Panthera tigris*) from the Bahamas. This tiger is progeny of the applicant's own tigers that are currently performing in the Bahamas. The tiger will be imported for the purpose of enhancement of survival through conservation education.

PRT-763786

Applicant: San Antonio Zoological Gardens, San Antonio, TX.

The applicant requests a permit to purchase in interstate commerce one captive-held female gavial (*Tomistoma schlegeli*) from the Buffalo Zoo for the purpose of enhancement of survival through conservation education and zoological exhibition.

PRT-765126

Applicant: University of Nevada, Reno, NV.

The applicant requests a permit to import blood and tissue samples taken from wild black-faced impala (*Aepyceros melampus petersi*) for DNA analysis to enhance the propegation and survival of the species.

PRT-765148

Applicant: Ogden Environmental and Energy Services, Co., Inc., San Diego, CA.

The applicant requests a permit to take endangered Riverside fairy shrimp (*Streptocephalus woottoni*) from vernal pools using hand and/or plankton nets to determine the presence or absence of the species on Miramar Naval Air Station, California.

PRT-770279

Applicant: New York Zoological Society, Bronx, NY.

The applicant requests a permit to import blood and tissue samples from live animals and carcasses, respectively, obtained opportunistically from wild origin deer (*Cervidae*), tapirs (*Tapiridae*), crocodiles (*Crocodilidae*), falcons (*Falconidae*), psittacines (*Psittacidae*), ibises (*Ciconidae*), and vultures (*Cathartidae*) in Bolivia for the purpose of scientific research.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication. Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 420(c), Arlington, Virginia 22203. Phone: (703/358-2104); FAX: (703/358-2281).

Dated: December 22, 1993.

Susan Jacobsen,

Acting Chief, Branch of Permits, Office of Management Authority.

BILLING CODE 4310-55-P

Polar Bear Habitat Protection Strategy

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent to prepare a polar bear habitat protection strategy, conduct public meetings, and request information.

SUMMARY: The U.S. Fish and Wildlife Service (Service) intends to develop and implement a strategy for the identification and protection of important polar bear habitats. Development of the strategy for Alaska will be achieved as part of the Service's on-going polar bear conservation planning process and in cooperation with the State of Alaska, Alaska Natives, oil and gas industry, conservation organizations, and others. The Service is requesting information, suggestions, and participation in the development of this strategy.

DATES: Comments and information should be received by February 11, 1994. Public meetings on the strategy are schuduled as follows:

1. January 20, 1994, 7:30 p.m., Wilda Marston Theater, 1st floor, Loussac Library, 3600 Denali Street, Anchorage, Alaska.
2. January 25, 1994, 7:30 p.m. North Slope Borough Assembly Chambers, Barrow, Alaska.

ADDRESSES: Written comments should be submitted to Supervisor, Marine Mammals Management, U.S. Fish and Wildlife Service, 4230 University Drive, suite 310, Anchorage, AK 99508. Comments may also be hand delivered to the same address or sent by FAX (907) 271-2381. Comments and materials received in response to this action will be available for public inspection at this address during normal working hours of 8 a.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Scott Schliebe at the U.S. Fish and Wildlife Service, Marine mammals Management, 4230 University Drive, suite 310, Anchorage, AK 99508, (800) 362-5148 or (907) 271-2394.

SUPPLEMENTARY INFORMATION:

Background

On December 30, 1992, the Service issued a proposed rule that would authorize the incidental take of small numbers of polar bear and Pacific walrus during oil and gas industry operations year round in the Beaufort Sea and adjacent northern coast of Alaska (57 FR 62283). The final rule to authorize incidental take was issued on Tuesday, November 16, 1993.

The final rule contains a provision that the U.S. Fish and Wildlife Service will develop and begin implementing a polar bear habitat protection strategy within 18 months. This provision is in response to public comments on the proposed rule and in agreement with the 1973 International Agreement on the Conservation of Polar Bears.

Information Solicited

The Service requests interested persons to submit comments, information, and suggestions concerning the development and implementation of an Alaska Polar Bear Habitat Protection Strategy. A draft Polar Bear Habitat Protection Strategy will be developed based upon comments received, information generated from polar bear research, and local knowledge of the indigenous people. A Federal Register notice will announce the development of the draft Alaska Polar Bear Habitat Protection Strategy. Once the draft Strategy is developed, opportunities for public review and comment will be provided.

Date: December 16, 1993

Walter O. Stieglitz,

Regional Director.

BILLING CODE 4310–70–M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in United States versus California State University et al., Civil Action No. CV–S–93–1910 LKK GGH was lodged on December 7, 1993 with the United States District Court for the Eastern District of California. The proposed decree settles an action brought pursuant to section 113(b) of the Clean Air Act (the "Act"), 42 U.S.C. 7413(b) and the National Emission Standards for Hazardous Air Pollutants for Asbestos ("NESHAP"), promulgated under sections 112 and 114 of the Act, 42 U.S.C. 7412 and 7414, and codified at 40 CFR part 61, subpart M. The complaint alleges that the defendants are liable for conducting a demolition of a facility owned by California State University without (1) adequately wetting the friable asbestos materials exposed during cutting and disjointing, in violation of 40 CFR 61.147(b) (1989) and section 112 of the Act, 42 U.S.C. 7412, and (2) ensuring that the friable asbestos materials stripped or removed from pipes were kept adequately wet until collected for disposal, in violation of 40 CFR 61.147(e)(1) (1989) and section 112 of the Act, 42 U.S.C. 7412. Under the terms of the decree, ACG agrees to pay a civil penalty of $35,000, and CSU and Bender will be subject to an injunction to comply with the asbestos NESHAP in the future.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to United States versus California State University, et. al., DJ# 90–5–2–1–1491. The proposed consent decree may be examined at the office of the United States Attorney, 555 Capitol Mall, 15th Floor, Sacramento, California 95814; the Region IX Office of the Environmental Protection Agency, 75 Hawthorne Street, San Francisco, California 94105, and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $11.50 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 CFR § 50.7, notice is hereby given that a proposed consent decree in *United States and the State of Ohio* v. *City of Middletown, Ohio*, Civil Action No. C–1–93–861, was lodged on December 10, 1993 with the United States District Court for the Southern District of Ohio. The Consent Decree resolves claims of the United States for civil penalties arising from alleged violations of Sections 301, 402 and 404 of the Clean Water Act, 33 U.S.C. 1311, 1342 and 1344 by the City of Middletown, Ohio. The Consent Decree requires defendant Middletown to pay a civil penalty of $288,000 for its past violations of the Clean Water Act.

The Department of Justice will receive, for a period of thirty (3)) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States and the State of Ohio* v. *City of Middletown, Ohio*, DOJ Ref. t90–5–1–1–3779.

The proposed consent decree may be examined at the office of the United States Attorney, 602 Federal Building, 200 West Second Street, Dayton, Ohio, 45402; the Region Five Office of the Environmental Protection Agency, 77 West Jackson Blvd., Chicago, Illinois, 60604; and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $3.25 (25 cents per page reproduction costs,), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response Compensation and Liability Act ("CERCLA")

In accordance with Department policy, 28 CFR 50.7, 38 FR 19029, and 42 U.S.C. 9622(d), notice is hereby given that a proposed consent decree in *United States* v. *Nabisco, Inc., et al.*, Civil Action No. 93–5611, was lodged on December 10, 1993, with the United States District Court for the Eastern District of New York. The Consent Decree addresses the hazardous waste contamination at the Rowe Industries Superfund Site ("Rowe Site") in the Town of Sag Harbor, New York. The Consent Decree requires the defendants to implement the remedial action selected by the Environmental Protection Agency in the Record of Decision dated September 30, 1992. Additionally, $493,561 in U.S. EPA past costs at the Rowe Site.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed

consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Nabisco, Inc., et al.*, DOJ Ref. # 90–11–3–112A.

The proposed consent decree may be examined at the office of the United States Attorney for the Eastern District of New York, 1 Pierrpont Plaza, Brooklyn, New York, 11201; the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York, 10278 (contact Assistant Regional Counsel Beverly Kolenberg); and at the Consent Decree Library, 1120 G Street NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $56.50 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response Compensation and Liability Act of 1980 As Amended

In accord with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Wheaton Industries*, Civil Action No. 90–3880 (CSF), was lodged on December 15, 1993 with the United States District Court for the District of New Jersey. The decree resolves claims of the United States against defendant *Wheaton Industries* ("Settling Defendant") in the above-referenced action under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA") for contamination at the Williams Property Superfund Site in Middle Township, New Jersey (the "Site"). In the proposed consent decree the Settling Defendant agrees to pay the United States $3,554,400.00 in settlement of the United States' claims for response costs incurred and to be incurred by the Environmental Protection Agency at the Site.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Wheaton Industries*, DOJ Ref. # 90–11–2–288.

The proposed consent decree may be examined at the Office of the United States Attorney, 970 Broad Street, Newark, New Jersey; the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York; and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $6.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Fuel Cell Commercialization Group

Notice is hereby given that, on November 30, 1993, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Fuel Cell Commercialization Group ("FCCG") filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, New England Electric System, Westborough, MA; Northern States Power, Minneapolis, MN; Oglethorpe Power Corporation, Tucker, GA; and Washington Water Power Company, Spokane, WA have become members of the FCCG. In addition, Pacific Gas & Electric Company has resigned from the FCCG.

No other changes have been made in either the membership or planned activity of the FCCG. Membership in the FCCG remains open subject to certain adjustments in the membership benefits available to members joining hereafter. The FCCG intends to file additional written notification disclosing all future changes in membership.

On September 21, 1990, the FCCG filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice to the Federal Register pursuant to section 6(b) of the Act on October 25, 1990, 55 FR 43050. The last notification was filed with the Department on August 12, 1992. A notice was published in the Federal Register pursuant to section 6(b) of the Act on October 13, 1992, 57 FR 46879.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Underwater Welding Research and Development Program

Notice is hereby given that, on October 26, 1993, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301, *et seq.* ("the Act"), Global Industries, Ltd. has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the protections of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the following additional parties have become new members of the project: U.S. Department of the Interior Mineral Management Services, Herndon, VA; Health and Safety Executive, Offshore Safety Division, London, England; and Chevron Research and Technology Company, Richmond, CA.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and Global Industries, Ltd. intends to file additional written notification disclosing all changes in membership.

On January 25, 1993, Global Industries, Ltd. filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the Federal Register pursuant to section 6(b) of the Act on March 9, 1993, 58 FR 13091.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—National Information Technology Center of Maryland, Inc.

Notice is hereby given that, on December 2, 1993, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the National Information Technology Center of Maryland, Inc. ("NITC") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the following have become members of NITC: Bechtel Corporation, Gaithersburg, MD; Intermax CD–ROM, Rockville, MD; Montgomery College, Rockville, MD. The following has withdrawn from membership in NITC: Federal Information Exchange.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and NITC intends to file additional written notification disclosing all changes in membership.

On September 12, 1991, NITC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the Federal Register pursuant to section 6(b) of the Act on October 22, 1991 (56 FR 54,586).

The last notification was filed with the Department on September 3, 1993. A notice was published in the Federal Register pursuant to section 6(b) of the Act on October 8, 1993 (58 FR 52,508).

Drug Enforcement Administration

Manufacturer of Controlled Substances; Application

Pursuant to Section 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on October 5, 1993, High Standard Products, 1100 W. Florence Avenue, #B, Inglewood, California 90301, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Methaqualone (2565)	I
Lysergic acid diethylamide (7315)	I
Tetrahydrocannabinols (7370)	I
3,4-Methylenedioxyamphetamine (7400).	I
3,4-Methylenedioxymethamphetamine (7405).	I
4-Methoxyamphetamine (7411)	I
1-(1-Phenylcyclohexyl)pyrrolidine (7458).	I
Normorphine (9313)	I
3-Methylfentanyl (9813)	I
Amphetamine (1100)	II
Methamphetamine (1105)	II
Phencyclidine (7471)	II
Cocaine (9041)	II
Codeine (9050)	II
Diphenoxylate (9170)	II
Benzoylecgonine (9180)	II
Hydrocodone (9193)	II
Methadone (9250)	II
Morphine (9300)	II
Fentanyl (9801)	II

High Standard Products plans to procure or manufacture small quantities from 10 to 20 grams annually for manufacturing standards and deuterated analytical standards.

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections, or requests for a hearing may be addressed to the Director, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than January 27, 1994.

Dated: December 21, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–31611 Filed 12–27–93; 8:45 am]

BILLING CODE 4410–09–M

Manufacturer of Controlled Substances; Application

Pursuant to section 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on November 9, 1993, Orpharm, Inc., 728 West 19th Street, Houston, Texas 77006, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the Schedule II basic class of controlled substance Methadone (9250).

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections, or requests for a hearing may be addressed to the Director, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than January 27, 1994.

Dated: December 21, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–31612 Filed 12–28–93; 8:45 am]

BILLING CODE 4410–09–M

Importation of Controlled Substances; Application

Pursuant to section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(i)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under Section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with Section 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on November 2, 1993, The Binding Site, Inc., 5889 Oberlin Drive, Suite 101, San Diego, California 92121, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Methaqualone (2565)	I
Lysergic acid diethylamid (7315)	I
Tetrahydrocannabinols (7370)	I
Normorphine (9313)	I
Amphetamine (1100)	II
Methamphetamine (1105)	II
Amobarbital (2125)	II
Phencyclidine (7471)	II
Cocaine (9041)	II
Ethylmorphine (9190)	II
Methadone-intermediate (9254)	II

The firm plans to import the above listed substances in milligram quantities for labelling with enzymes, fluorophores and radioisotopes for immunoassays.

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections, or requests for a hearing may be addressed to the Director, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than January 27, 1994.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42(b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to improt a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Director, Office of Diversion Control, Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42(a), (b), (c), (d), (e), and (f) are satisfied.

Dated: December 21, 1993.

Gene R. Haislip,

Director, Office of Diversion Control Drug Enforcement Administration.

[FR Doc. 93–31613 Filed 12–27–93; 8:45 am]

BILLING CODE 4410–09–M

Manufacturer of Controlled Substances; Registration

By Notice dated October 18, 1993, and published in the **Federal Register** on October 26, 1993 (58 FR 57623), Eli Lilly Industries, Inc., Chemical Plant, Kilometer 146 7, State Road 2, Mayaguez, Puerto Rico 00680, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of Dextropropoxyphene, bulk (non-dosage forms) (9273), a basic class of controlled substance listed in Schedule II.

No comments of objections have been received. Therefore, pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, Section 1301.54(e), the Director hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic class of controlled substance listed above is granted.

Dated: December 21, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–31614 Filed 12–27–93; 8:45am]

BILLING CODE 4410–09–M

Manufacturer of Controlled Substances; Registration

By Notice dated October 18, 1993, and published in the **Federal Register** on October 26, 1993, (58 FR 57624), Sanofi Winthrop L. P., DBA Sterling Organics, 33 Riverside Avenue, Rensselaer, New York 12144, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of Meperidine (9230), a basic class of controlled substance listed in Schedule II.

No comments or objections have been received. Therefore, pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, Section 1301.54(e), the Director hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic class of controlled substance listed above is granted.

Dated: December 21, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–31615 Filed 12–27–93; 8:45 am]

BILLING CODE 4410–09–M

Importer of Controlled Substances; Notice of Registration

By Notice dated April 27, 1992, and published in the **Federal Register** on May 1, 1992, (57 FR 18909), Penick Corporation, 158 Mount Olivet Avenue, Newark, New Jersey 07114, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Phenylacetone (8501)	II
Coca Leaves (9040)	II
Opium, raw (9600)	II
Opium, poppy (9650)	II
Poppy Straw Concentrate (9670)	II

Two registered manufacturers did file objections with respect to the continued registration of Penick Corporation, however, no written request for a hearing was filed. The DEA has considered the comments and has concluded that the registration of Penick Corporation as an importer is in the public interest.

Therefore, pursuant to Section 1008(a) of the Controlled Substances Import and Export Act and in accordance with Title 21, Code of Federal Regulations, Section 1311.42, the above firm is granted registration as an importer of the basic classes of controlled substances listed above.

Dated: December 21, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–31617 Filed 12–27–93; 8:45 am]

BILLING CODE 4410–09–M

Importer of Controlled Substances; Notice of Registration

By Notice dated November 4, 1993, and published in the **Federal Register** on November 12, 1993, (58 FR 60061), Penick Corporation, 158 Mount Olivet Avenue, Newark, New Jersey 07114, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Coca Leaves (9040)	II
Opium, raw (9600)	II
Opium poppy (9650)	II
Poppy Straw Concentrate (9670)	II

No comments or objections have been received. Therefore, pursuant to Section 1008(a) of the Controlled Substances Import and Export Act and in accordance with Title 21, Code of Federal Regulations Section 1311.42, the above firm is granted registration as an importer of the basic classes of controlled substances listed above.

Dated: December 21, 1993.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting/recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement. The OMB and/or Agency identification numbers, if applicable. How often the recordkeeping/reporting requirement is needed. Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Kenneth A. Mills ((202) 219–5095). Comments and questions about the items on this list should be directed to Mr. Mills, Office of Information Resources Management Policy, U.S. Department of Labor, 200 Constitution Avenue, NW., room N–1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, room 3001, Washington, DC 20503 ((202) 395–6880).

Any member of the public who wants to comment on recordkeeping/reporting requirements which have been submitted to OMB should advise Mr. Mills of this intent at the earliest possible date.

New

Bureau of Labor Statistics

Pricing Collective Bargaining Settlements—Private Sector

Businesses or other for-profit

396 respondents; 35.1 minutes per response; 232 total hours; 2 forms

The Bureau of Labor Statistics will use the information collected in Pricing Collective Bargaining Settlements to compile quarterly measures of collective bargaining settlements. As a Primary Federal Economic Indicator, the series are used by Federal policymakers to help set economic policy. In addition, company officials and labor groups request the data for collective bargaining negotiations and researchers use the data for compensation and unionization analyses.

New

Assistant Secretary for Administration and Management

[TA-W-28,496]

Jones and Lamson Waterbury Farrell Corp. a/k/a Waterbury Farrell Technologies, Cheshire, CT. Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Notice of Revised Determination on Reopening on December 2, 1993 for workers of Jones & Lamson Waterbury Farrell Corporation in Cheshire, Connecticut. The certification notice was published in the **Federal Register** on December 13, 1993 (58 FR 65195).

At the request of the State Agency, the Department reviewed the certification for workers of the subject firm. The investigation findings show that Waterbury Farrell Technologies in Cheshire, Connecticut meets all the requirements of a successor-in-interest firm for Jones & Lamson Waterbury Farrell Corporation.

Accordingly, the Department is amending the certification to properly reflect the correct worker group.

The amended notice applicable to TA-W-28,496 is hereby issued as follows:

All workers and former workers of Jones & Lamson Waterbury Farrell Corporation, Cheshire, Connecticut also known as (a/k/a) Waterbury Farrell Technologies, Cheshire, Connecticut who became totally or partially separated from employment on or after March 17, 1992 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC., this December 20, 1993.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-28,939]

Radiometer Technology, Inc., Westlake, OH; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance applicable to all workers of Radiometer Technology, Inc., Westlake, Ohio. The notice was issued on October 7, 1993 and published in the **Federal Register** on October 21, 1993 (58 FR 54377).

At the request of one of the workers, the Department reviewed the certification for workers of the subject firm. New findings from the company show that some workers were separated a few weeks prior to the July 1, 1993 impact date set in the certification. The workers were laid off in anticipation of company imports.

Accordingly, the Department is amending the certification to show the correct impact date.

The amended notice applicable to TA-W-28,939 is hereby issued as follows:

"All workers Radiometer Technology, Inc., Westlake, Ohio engaged in employment related to the production of arterial blood samplers who became totally or partially separated from employment on or after May 1, 1993 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974."

Signed at Washington, DC this 17th December, 1993.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of December, 1993.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-29,037; Simonds Industries, Inc., Newcomerstown, OH
TA-W-29,087; Charles E. Gillman Co., Rio Rico, AZ
TA-W-29,063; Virginia Apparel Corp., Blackstone, VA
TA-W-29,096; Nelbro Packing Co., Anacortes, WA
TA-W-28,997; AGIP Petroleum Co., Inc., Houston TX
TA-W-29,071; Midcon Cables Co., Joplin, MO
TA-W-29,086; Sunstrand Electrical Power Systems, Lima, OH
TA-W-28,692; Continental Electric Co., Inc., Newark, NJ
TA-W-29,157; Loranger Manufacturing Corp., Warren, PA
TA-W-29,046; George Newman & Co., Biddeford, ME
TA-W-29,103; Greenleaf Corp., Saegertown, PA
TA-W-29,160; Benteler Industries, Grand Rapids, MI

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-28,993; Brown & Root Industrial Service, Houston, TX
The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-28,967; Lyondell Petrochemical Co., Houston, TX
The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-29,146; GTE North, Inc., Westfield, IN
The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-29,007; The Standard Products Co., Port Clinton Div., Port Clinton, MI
Increased imports did not contribute importantly to worker separations at the firm.

TA-W-29,097; FD Services, Inc., Casper, WY
Increased imports did not contribute importantly to worker separations at the firm.

TA-W-29,100; Intratex Gas Co., (An Affiliate of Enron Corp), Houston, TX
Increased imports did not contribute importantly to worker separations at the firm.

TA-W-29,220; Spot-Bilt, Inc., Bangor, ME
The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period for certification.

TA-W-29,091; UVC Corp., Irvine, CA
The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period for certification.

TA-W-29,151; Brown Shoe Co/Pagoda Trading Co., St. Louis, MO
The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-29,207; Kerr-McGee Refining, Wynnewood, OK
The investigation revealed that criterion (2) and criterion (3) have not been met. Sales or production did not decline during the revelant period for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations or threat thereof, and the absolute decline in sales or production.

TA-W-29,208; Kerr-McGee Pipeline, Wynnewood, OK
The investigation revealed that criterion (2) and criterion (3) have not been met. Sales or production did not decline during the revelant period for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations or threat thereof, and the absolute decline in sales or production.

Affirmative Determinations

TA-W-29,187; E.I. Dupont & Co., Inc., Martinsville, VA
A certification was issued covering all workers separated on or after October 20, 1992.

TA-W-29,013; Lincoln Brass Works, Inc., Detroit, MI
A certification was issued covering all workers separated on or after August 16, 1992.

TA-W-29,092; Great Northern Paper, Inc., Millinocket East & West Operations, Millinocket, ME
A certification was issued covering all workers separated on or after May 22, 1993.

TA-W-28,976; RNH Corp., Canastota, NY
A certification was issued covering all workers separated on or after July 1, 1993.

TA-W-28,977; The People Pool, Inc., Canastota, NY
A certification was issued covering all workers separated on or after July 1, 1993.

TA-W-29,254; Reed & Barton, Silversmiths, Taunton MA
A certification was issued covering all workers separated on or after November 5, 1992.

TA-W-29,249; MG Products, Inc., Independence, OH
A certification was issued covering all workers separated on or after November 8, 1992.

TA-W-29,118; Linden Sportswear, Linden, AL
A certification was issued covering all workers separated on or after September 30, 1992.

TA-W-29,165; American Precision Industries (API), Delevan Div., East Aurora, NY and
TA-W-29,166; American Precision Industries (API), Surface Mount Div., Arcade, NY
A certification was issued covering all workers separated on or after October 4, 1992.

TA-W-29,268; Mount Olive Sportswear Corp., Mount Olive, NC
A certification was issued covering all workers separated on or after November 16, 1992.

TA-W-29,026; IBM Adstar, Rockester, MN
A certification was issued covering all workers separated on or after September 1, 1993.

TA-W-29,038; Saha-Union International (GA), Inc., Tallapoosa, GA
A certification was issued covering all workers separated on or after September 8, 1992.

TA-W-29,039; Develco, Inc., Houston, TX
A certification was issued covering all workers separated on or after September 5, 1992 and before January 1, 1993.

TA-W-29,109; Titanium Metals Corp., Toronto, OH
A certification was issued covering all workers separated on or after September 28, 1992.

TA-W-29,128 & TA-W-29,129; Hitchcock, Industries, Inc., Bloomington, MN and Lakeville, MN
A certification was issued covering all workers separated on or after September 29, 1992.

I hereby certify that the aforementioned determinations were issued during the month of December, 1993. Copies of these determinations are available for inspection in room C-4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: December 20, 1993.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 7, 1994.

Interested persons are invited to submit written comments regarding the

subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 7, 1994.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington DC this 13th day of December, 1993.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Enlow Fork Mining Company

[Docket No. M–93–314–C]

Enlow Fork Mining Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241–1421 has filed a petition to modify the application of 30 CFR 75.380(d)(4) (escapeways; bituminous and lignite mines) to Enlow Fork Mine (I.D. No. 36–07416) located in Greene County, Pennsylvania. The petitioner proposes to maintain a minimum clearance of 4 feet along the development and retreat section in the primary escapeway. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

2. Buck Mountain Coal Company No. 2

[Docket No. M–93–313–C]

Buck Mountain Coal Company No. 2, R.D. 2, Box 425–B2, Pine Grove, Pennsylvania 17963 has filed a petition to modify the application of 30 CFR 75.1405 (automatic couplers) to its Buck Mountain Slope (I.D. No. 36–02053) located in Schuylkill County, Pennsylvania. The petitioner proposes to use bar and pin or link and pin couplers on underground haulage equipment instead of automatic couplers. The petitioner states that application of the standard would result in a diminution of safety to the miners. In addition, the petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

3. Costain Coal, Inc.

[Docket No. M–93–316–C]

Costain Coal, Inc., P.O. Box 289, Sturgis, Kentucky 42459–0289 has filed a petition to modify the application of 30 CFR 77.1911(b)(1) (ventilation of slopes and shafts) to its Baker Mine (I.D. No. 15–14492) located in Webster County, Kentucky. The petitioner proposes to operate its ventilation fan at an underground location and ventilate further slope development by using the existing return entries; to install a fire suppression system above the fan; and to install a carbon monoxide monitoring device down wind of the fan to show both a visual and audible alarm within sight of the excavation area and at the mouth of the slope when carbon monoxide reaches 10 ppm above the ambient. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

4. Richland Coal Company

[Docket No. M–93–317–C]

Richland Coal Company, P.O. Box 340, Barbourville, Kentucky 40906 has filed a petition to modify the application of 30 CFR 75.342 (methane monitors) to its Mine No. 36 (I.D. No. 15–13873) located in Knox County, Kentucky. The petitioner proposes to monitor continuously with a hand-held methane and oxygen detector instead of using a methane monitoring system on permissible three-wheel tractors with drag bottom buckets. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

5. Consolidation Coal Company

[Docket No. M–93–318–C]

Consolidation Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241–1421 has filed a petition to modify the application of 30 CFR 75.343(b) (underground shops) to its Humphrey No. 7 Mine (I.D. No. 46–01453) located in Monongalia County, West Virginia. Due to deteriorating conditions in the air course, traveling the entire area would be unsafe. The petitioner proposes to ventilate the underground motor barn with intake air that is coursed through the affected air course directly into a return air course and that is not used to ventilate working places; and to establish check points to monitor for methane and the quantity of air in the affected area on a weekly basis. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

6. Raven Mining Company

[Docket No. M–93–319–C]

Raven Mining Company, P.O. Box 1409, Pikeville, Kentucky 41502 has filed a petition to modify the application of 30 CFR 75.333(b)(3) (ventilation controls) to its No. 2 Mine (I.D. No. 15–16832) located in Martin County, Kentucky. The petitioner proposes to stack 8" x 8" x 16" concrete blocks without mortered joints on the intake side of the belt in short panels, 800 feet or less, off the mains with return side stopping line left intact, and to remove the intake side stopping line as each short panel is completed. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

7. Consol Pennsylvania Coal Company

[Docket No. M–93–320–C]

Consol Pennsylvania Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241–1421 has filed a petition to modify the application of 30 CFR 75.364(b)(1) (weekly examination) to its Bailey Mine (I.D. No. 36–07230) located in Greene County, Pennsylvania. Due to deteriorating roof conditions, certain areas of the intake air course cannot be traveled safely. The petitioner proposes to establish check points and to have a certified person test for methane and the quantity of air at each check point on a weekly basis and record test results in a record book which would be kept on the surface and made available for inspection by interested persons. The petitioner states that application of the standard would result in a diminution of safety to the miners. In addition, the petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

8. Energy West Mining Company (formerly Utah Power & Light Mining Company)

[Docket No. M–93–321–C]

Energy West Mining Company, P.O. Box 310, Huntington, Utah 84528 has filed a petition to modify the application of 30 CFR 75.1101–8 (water sprinkler systems; arrangement of sprinklers) to its Deer Creek Mine (I.D. No. 42–00121); its Cottonwood Mine (I.D. No. 42–01944); and its Trail Mountain Mine (I.D. No. 42–01211) all located in Emery County, Utah. The petitioner request that previously granted petition, docket number M–85–49–C, be amended. The petitioner proposes to protect all belt drives in these mines with water sprinkler systems; to use upright type sprinkler heads instead of the previously approved pendant type sprinkler heads; and to include an optional 2-inch outlet at the end of the 2-inch sprinkler pipe to extend the circuit to provide optional coverage of remote headrollers. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

9. Energy West Mining Company

[Docket No. M–93–322–C]

Energy West Mining Company, P.O. Box 310, Huntington, Utah 84528 has filed a petition to modify the application of 30 CFR 75.352 (return air courses) to its Trail Mountain Mine (I.D. No. 42–01211) located in Emery County, Utah. The petitioner proposes to use belt entries as return entries during two entry longwall panel development mining to provide miners with maximum protection under deep cover. The petitioner states that application of the standard would result in a diminution of safety to the miners. In addition, the petitioner asserts that the proposed alternate method would provide at least the same protection as would the mandatory standard.

10. Jersey Miniere Zinc

[Docket No. M–93–12–M]

Jersey Miniere Zinc, P.O. Box 359, Gordonsville, Tennessee 38563 has filed a petition to modify the application of 30 CFR 75.11050(a) (escapeways and refuges) to its Elmwood/Gordonsville Mine (I.D. No. 40–00864) located in Smith County, Tennessee. The petitioner proposes to remove the Stonewall No. 6 Shaft from its designation as a secondary escapeway and delete it from the Mine Evacuation Plan, due to ground problems in the shaft area. The petitioner states that using the No. 6 Shaft for escape would result in a diminution of safety to the miners.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 27, 1994. Copies of these petitions are available for inspection at that address.

Dated: December 21, 1993.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510–43–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 93–094]

NASA Advisory Council, Space Science Advisory Committee; Space Physics Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science Advisory Committee, Space Physics Subcommittee.

DATES: January 5–7, 1994, 8 a.m. to 5 p.m.

ADDRESSES: National Aeronautics and Space Administration, Room MIC–5m 300 E Street, SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. George L. Withbroe, Code SS, National Aeronautics and Space Administration, Washington, DC 20546, 202/358–1544.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. The agenda for the meeting is as follows:

—Space Physics Division Overview: Budget, Ongoing Program, Future Activities
—Program Reports for Magnetospheric, Cosmic and Heliospheric Physics, Solar Physics, and Ionosphere—Thermosphere—Mesophere
—Space Physics Research and Analysis Program
—Strategic Planning
—Discussion and Writing Groups

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitor's register.

Dated: December 21, 1993.

Timothy M. Sullivan,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 93-31601 Filed 12-27-93; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: David C. Fisher, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone (202) 606-8322. Hearing-impaired individuals are advised that information on this matter may be obtained by contacting the Endowment's TDD terminal on (202) 606-8282.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; or (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee meetings, dated July 19, 1993, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), and (6) of section 552b of title 5, United States Code.

1. *Date:* January 24, 1994
Time: 8:30 to 5 p.m.
Room: 415
Program: This meeting will review applications for the National Heritage Preservation Program Projects, submitted to the Division of Preservation and Access, for projects beginning after July 1, 1994.

2. *Date:* January 31, 1994
Time: 8:30 to 5 p.m.
Room: M-07
Program: This meeting will review applications for the National Heritage Preservation Program Projects, submitted to the Division of Preservation and Access, for projects beginning after July 1, 1994.

David C. Fisher,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

Licensing Support System Advisory Review Panel; Renewal

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of renewal of the Licensing Support System Advisory Review Panel (LSSARP) for a period of three months.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission has determined that renewal of the charter for the LSSARP for a period of three months commencing December 9, 1993 is in the public interest in connection with duties imposed on the Commission by law. This action is being taken in accordance with the Federal Advisory Committee Act after consultation with the Commission Management Secretariat, General Services Administration.

The purpose of the LSSARP is to provide advice to (1) the Department of Energy on the fundamental issues of design and development of an electronic information management system to be used to store and retrieve documents relating to the licensing of a geologic repository for the disposal of high-level radioactive waste, and (2) the Nuclear Regulatory Commission on the operation and maintenance of the system. This electronic information management system is known as the Licensing Support System (LSS).

Membership of the Panel is drawn from those interests that will be affected by the use of the LSS, including the Department of Energy, the NRC, the State of Nevada, Tribal interests, affected units of local governments in Nevada, and the nuclear industry. Federal agencies with expertise and experience in electronic information management system also participate on the Panel.

Further information regarding the LSS Advisory Review Panel may be obtained from John Hoyle, Office of the Secretary, NRC, Washington, DC 20555; telephone: (301) 504-1968.

John C. Hoyle,

Advisory Committee Management Officer.

Dated: December 21, 1993

[FR Doc. 93-31600 Filed 12-27-93; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-293]

Boston Edison Co., Pilgrim Nuclear Power Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the approval of an exemption, pursuant to 10 CFR 20.2301, from the requirements of 10 CFR part 20, Appendix B, Table 1, to Boston Edison Company, for the Pilgrim Nuclear Power Station (PNPS) located in Plymouth, Massachusetts. The requested exemption would allow the use of a derived air concentration (DAC) of 10^{-6} for krypton-89 and a DAC of 10^{-5} xenon-137, instead of using the generic value DAC of 10^{-7} µCi/ml that is specified in Appendix B to 10 CFR 20.1001-20.2402 for these two radionuclides, when determining when an area is, and requires posting as, an airborne radioactivity area in accordance with the requirements of 10 CFR part 20.

Environmental Assessment

Identification of the Proposed Action

The proposed action would approve the use of the requested DAC values for posting airborne radioactivity areas at PNPS. Posting of airborne radioactivity areas is required by 10 CFR part 20 as one means of controlling occupational radiation exposure.

The Need for the Proposed Action

The Boston Edison Company (BECo) states the requested exemption is needed because krypton-89 and xenon-137 are a significant fraction of the noble gas radioactivity in a boiling water reactor (BWR) and the DAC of 10^{-7} µCi/ml specified in Appendix B to 10 CFR 20.1001-20.2402 is too small for these particular radionuclides. BECo further states that the use of the 10^{-7} µCi/ml value for the krypton-89 and xenon-137 DACs would cause over posting of airborne radioactivity areas, which erodes the significance of the posting and consumes resources. BECo also states that the use of the 10^{-7} µCi/ml value for the krypton-89 and xenon-137 DACs would result in undue hardship and would overburden operational staff by posting areas that are normally not required to be posted while providing little to no benefit.

Environmental Impacts of the Proposed Action

The Commission has evaluated the environmental impact of the proposed action and has concluded that the use of the proposed DACs for posting airborne radioactivity areas will not result in any significant increase in individual or cumulative occupational radiation exposure. The radiation doses corresponding to the DAC values requested by BECo for krypton-89 and xenon-137 are within the radiation dose limits that were used to calculate the DAC values for the other radioisotopes of krypton and xenon that are listed in Appendix B to 10 CFR 20.1001-20.2402. The staff has determined that this exemption involves no significant increase in the amounts, and no significant change in the types, of any effluents that may be released. Accordingly, the Commission has concluded that there are no significant radiological environmental impacts associated with the proposed exemption.

With regard to potential nonradiological impacts, the proposed approval would not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there is no significant nonradiological environmental impact associated with the proposed exemption.

Alternatives to the Proposed Action

Since the Commission has concluded that the environmental effects of the proposed action are not significant, any alternatives with equal or greater environmental impact need not be evaluated.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impact attributable to this facility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Pilgrim Nuclear Power Station, dated May 1972.

Agencies and Persons Consulted

The NRC staff consulted with Dr. Keith Eckerman, Oak Ridge National Laboratory, to obtain calculations of relevant radiation dose conversion factors for krypton-89 and xenon-137.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to this action, see the application for exemption dated September 13, 1993, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC 20555, and at the local public document room located at the Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

Dated at Rockville, Maryland, this 21st day of December 1993.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I-3, Division of Reactor Project—I/II Office of Nuclear Reactor Regulation.

[FR Doc. 93-31608 Filed 12-27-93; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-320]

Environmental Assessment and Finding of No Significant Impact; GPU Nuclear Corp., Three Mile Island Nuclear Station, Unit No. 2

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to the Possession Only License (POL) DPR-73 issued to GPU Nuclear Corporation (the licensee or GPUN). The amendment would substantially change and reissue the Appendix A and B Technical Specifications for the Three Mile Island Nuclear Station Unit 2 (TMI-2), located in Dauphin County, Pennsylvania.

The licensee has requested by letter dated August 16, 1988, as amended by submittals dated September 19, 1988, February 9, 1989, March 31, 1989, June 26, 1989, October 10, 1989, November 22, 1989, June 21, 1990, October 15, 1990, November 7, 1990, February 19, 1991, April 19, 1991, June 21, 1991, August 28, 1991, October 9, 1991, January 13, 1992, January 18, 1993, May 28, 1993, October 24, 1993, and November 12, 1993, that the technical specifications for TMI-2 be amended to permit long term storage of the facility.

Environmental Assessment

Identification of the Proposed Action

The POL allows the licensee to possess but not operate TMI-2 and establishes requirements that are applicable to the facility in its post accident, inoperable, and essentially defueled condition. The proposed amendment to the facility technical specifications would permit the licensee to place the TMI-2 facility in long-term monitored storage, termed Post-Defueling Monitored Storage (PDMS) by the licensee.

The Need for the Proposed Action

The licensee has completed the current phase of the cleanup effort. The licensee has determined that the facility should be maintained in the PDMS condition until the time Three Mile Island Nuclear Station Unit 1 (TMI-1) is ready for decommissioning, at which time both TMI-1 and TMI-2 will be decommissioned simultaneously. In order to permit and facilitate long term storage of TMI-2, the licensee has proposed a number of changes to the technical specifications. The licensee has determined that many of the requirements contained in the current technical specifications are inappropriate and not required to ensure the safety of a post-accident, inoperable, and essential defueled facility possessing a POL.

Background

In March 1981, the NRC staff issued NUREG-0683, "Programmatic Environmental Impact Statement Related to Decontamination and Disposal of Radioactive Wastes Resulting from the March 28, 1979 Accident at TMI-2" (PEIS). The PEIS has been supplemented by the staff three times. In August 1989, the NRC staff issued PEIS Final Supplement 3, which assessed, in part the environmental impacts associated with the licensee plans to place the facility into PDMS. Seven alternatives to the licensee proposal were also evaluated in PEIS Supplement 3.

The staff concluded in PEIS Supplement 3 that the licensee proposal:

(1) Is within the applicable regulatory limits, and could be implemented without significant environmental impact since the health impact on both the workers and the offsite public is very small;

(2) Would result in a radiological dose to the public that are fractions of the dose received from background radiation;

(3) Would result in substantial occupational dose savings and reduced transportation impacts over several of the alternatives considered; and

(4) Is environmentally acceptable and will not significantly affect the quality of the human environment.

The staff evaluation of the licensee proposal was based principally on the licensee description of PDMS contained in the 1987 licensee submittal entitled "Technical Plan, TMI–2, Cleanup Program Post-Defueling Monitored Storage" and on the licensee submittal of August 1988, entitled "Post-Defueling Monitored Storage Proposed License Amendment and Safety Analysis Report." The 1988 submittal by the licensee provided the detailed system by system description of the facility during PDMS and provided the safety analysis necessary to assess the potential for environmental impact during storage. Since August 16, 1988 submittal, the licensee has updated the PDMS proposed license amendment and Safety Analysis Report (SAR) 19 times (September 19, 1988 through November 12, 1993). Since issuance, by the NRC staff, of the August 1989, PEIS Supplement 3, the PDMS proposed license amendment and SAR have been updated 15 times (October 10, 1989 through November 12, 1993).

The purpose of this environmental assessment is to determine if the August 1989, PEIS Supplement 3 dealing with PDMS remains valid after a review of the 15 amendments to the August 16, 1988 SAR, as well as other significant submittals, issued since publication of PEIS Supplement 3.

Environmental Assessment

The staff has reviewed the licensee amendments to the August 16, 1988 submittal that have been submitted to the NRC staff since issuance of the August 1989, PEIS Supplement 3. The staff also reviewed the licensee Defueling Completion Report dated February 22, 1990, the results of the post lower head sampling program cleanup in a letter dated April 12, 1990, the post-defueling survey reports, the initial report dated September 30, 1988 and final report dated Febraury 1, 1993, and the results of the independent staff analyses done for the staff by Battelle Pacific Northwest Laboratory. The purpose of this reviews was to determine if the licensee proposal and the subsequent assessment of environmental impact is still within the scope of the August 1989 PEIS Supplement 3.

The amendments to the August 16, 1988 submittal, sent to the staff after the publication of the August 1989, PEIS Supplement 3, consist primarily of written respnses to detailed staff questions, updates to the descriptive information in the SAR, and changes in the proposed PDMS Technical Specifications. Some of the changes to the SAR resulted in physical changes to the facility that were not considered during the preparation of PEIS Supplement 3 (e.g. a closure mechanism for the atmospheric breather, and containment penetration overpressurization limits). The staff has reviewed these changes and has determined that there is no significant change in potential environmental impact due to these modifications. Some of the changes identified in the amendments to the SAR deal with changes in values of measurements, estimates, or monitoring programs (e.g. residual fuel in the facility, level of contamination, unfiltered leak rate test for the reactor building). These revised values or tests do not alter the conclusions in the PEIS Supplement 3. Finally, some of the changes in the SAR revise analyses of potential accidents (e.g. fire in containment). Review of these revised analyses did not reveal any significant changes in predicted impact.

The staff reviewed the licensee-submitted Defueling Completion Report, the Post-Defueling Survey Reports (PDSR, particulary the PDSR of February 1, 1993 related to the reactor vessel, and the licensee submittal of December 18, 1992 entitled "TMI–2 Reactor Vessel Criticality Safety Analysis". The principal issue in this review was the potential for inadvertent recriticality of the fuel remaining at the facility. The staff found that the feul remaining at the facility was in a configuration that precluded criticality. This condition was assumed by the staff in PEIS Supplement 3; therefore, the finding is consistent with the earlier evaluation by the staff.

The staff reviewed the results of independent analyses done while preparing the PDMS Safety Evaluation (SE). These analyses were done by both the NRC staff and their contractor, Battelle Pacific Northwest Laboratory. In one case, the results of an analysis of a different fire scenario in the reactor containment building showed offsite doses in excess of those evaluated for the fire analysis in PEIS Supplement 3. PEIS Supplment 3 predicted the consequences of a fire in the containment stairwell as a 50-year dose commitment to the maximally exposed member of the public of 1.6 mrem to the whole body. The staff PDMS SE evaluated the consequences of a fire inside the D-rings in the containment. The predicted 50-year dose commitment to the maximally exposed member of the public for this accident scenario is 49 mrem to the whole body.

For an accident situation, the guidance provided in 10 CFR part 100 limits the total radiation dose to a member of the public to less than 25 rem to the whole body. The U.S. Environmental Protection Agency (EPA) Protective Action Guidelines (PAG) trigger actions on the part of the licensee, local and state governments to limit public exposure in the range of 1 to 5 rem to the whole body. Although the predicted 50-year dose commitment to the maximally exposed member of the public in the revised accident analysis presented in the staff-issued PDMS SE is greater than that predicted in PEIS Supplement 3, the revised whole body dose of 49 mrem to the maximally exposed member of the public is still a small fraction (lses than 0.2 percent) of the 10 CFR Part 100 guidance and well below the EPA PAG.

This small increase (from 1.6 to 49 mrem) in the 50-year whole body dose commitment to the maximally exposed member of the public does not change the conclusions of PEIS Supplement 3. Specifically, the calculated dose to the public are fractions of the dose received by a member of the public from background radiation (≈ 300 mrem annually), are within the applicable regulatory limits (<25 rem), and the potential health impact on the public is very small. Based on the above evaluation, the staff concludes that the proposed changes to the Appendix A and B Technical Specifications for TMI–2 will result in environmental impacts that are still within the scope of the August 1989, PEIS Supplement 3.

Alternatives to the Proposed Action

Alternatives to the proposed action are evaluated in PEIS Supplement 3. The staff concludes in PEIS Supplement 3 that the licensee proposal, and the seven NRC staff-identified alternatives (with the exception of the no-action alternative which was found not to be viable because it would be contrary to regulations) could each be implemented without significant environmental impact. The staff has not identified any new alternatives or any new information, since issuance of PEIS Supplement 3, that would change its evaluation and conclusions on impacts for the licensee proposal or any of the alternatives. Therefore, any reasonable alternative to this action would not have a significant environmental impact.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered by the NRC staff in the March 1981, PEIS (NUREG–0683) as supplemented.

Agencies and Persons Consulted

The staff widely distributed PEIS Draft Supplement 3 and received comments from a number of Federal, State, and local agencies, the licensee, local citizens and citizen organizations. These comments were incorporated in PEIS Final Supplement 3, issued in August 1989. On April 25, 1991, the staff published a notice of opportunity for a prior public hearing regarding, in part, the license amendment request for the changes to the technical specifications (56 FR 19128). In response to the staff notice of opportunity for a prior public hearing, a member of the public petitioned to intervene. A settlement agreement, between the petitioner, the licensee, and the NRC staff, was filed on September 25, 1992, before the Atomic Safety and Licensing Board (ASLB), assigned to this docket. Based on the settlement agreement, the ASLB dismissed the proceedings on October 16, 1992. The NRC staff consulted with a representative of the Commonwealth of Pennsylvania regarding the environmental impact of the proposed action on December 21, 1993. The State representative contacted had no comment.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concludes that the proposed actions will not have a significant effect on the quality of the human environment and the impacts of this action remain within the scope of those evaluated in the August 1989, PEIS Supplement 3. Therefore, the Commission has determined that the PEIS Final Supplement 3 (NUREG–0683) need not be supplemented.

PEIS Final Supplement 3 (NUREG–0683), the staff Safety Evaluation, the licensee amendments to their August 16, 1988 submittal, as amended by submittals dated September 19, 1988, February 9, 1989, March 31, 1989, June 26, 1989, October 10, 1989, November 22, 1989, June 21, 1990, October 15, 1990, November 7, 1990, February 19, 1991, April 19, 1991, June 21, 1991, August 28, 1991, October 9, 1991, January 13, 1992, January 18, 1993, May 28, 1993, October 24, 1993, November 12, 1993, and the licensee February 22, 1990 Defueling Completion Report, the Post-Defueling Survey Reports (PDSR), particularly the PDSR of February 1, 1993 related to the reactor vessel, and the licensee submittal of December 18, 1992 entitled "TMI–2 Reactor Vessel Criticality Safety Analysis" are available for public inspection at the Commission Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, and the local public document room at the Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Harrisburg, Pennsylvania 17105.

Dated at Rockville, Maryland, this 21st day of December 1993.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactors and Decommissioning Project Directorate, Division of Operating Reactor Support, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket No. 50–322]

Long Island Power Authority, Shoreham Nuclear Power Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission is considering issuance of an exemption from the requirements of 10 CFR 50.54(w) to the Code of Federal Regulations to the Long Island Power Authority (LIPA or the licensee) for the Shoreham Nuclear Power Station (SNPS), Unit 1, pursuant to the requirements of 10 CFR 50.12.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant LIPA an exemption from the requirements of 10 CFR 50.54(w) to maintain on-site property insurance for the Shoreham Nuclear Power Station, pursuant to the requirements of 10 CFR 50.12. By letter dated August 2, 1993, the licensee requested this exemption.

The Need for the Proposed Action

The exemption is needed to eliminate the requirements of 10 CFR 50.54(w) that are appropriate for an operating plant but are not needed at a defueled plant that is being dismantled. Granting the proposed exemption would remove the requirements to comply with 10 CFR 50.54(w) to maintain on-site property insurance for an accident of a type that cannot occur at SNPS.

Environmental Impact of the Proposed Action

The proposed exemption would eliminate the requirements to have in effect, and to continue to maintain, on-site property insurance. Granting the exemption will have no environmental impact because SNPS is permanently shutdown, defueled, 75 percent decommissioned, and the risk of an accident that would require reactor stabilization or extensive decontamination as defined in 10 CFR 50.54(w) does not exist at Shoreham. In addition, there are no credible accident scenarios that could result in offsite doses greater than a small fraction of the U.S. Environmental Protection Agency's "Protective Action Guidelines."

The requested exemption would not authorize a change in licensed activities and would not effect changes in the permitted types or amounts of radiological effluent. Accordingly, the NRC staff concludes that this proposed action would result in no significant radiological environmental impact. With regard to potential non-radiological impacts, the proposed action does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the NRC concludes that there are no significant non-radiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

Since the NRC concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

Alaternative Use of Resources

This action does not involve the use of any resources not previously considered in the "Final Environmental Statement" for SNPS.

Agencies and Persons Consulted

The licensee initiated this exemption request. The NRC staff is reviewing this request. The State of New York was notified of the proposed exemption and provided no comments.

Finding of No Significant Impact

Based upon this environmental assessment, the NRC staff concludes that the proposed action will not have a significant effect on the quality of the human environment. Therefore, the NRC staff will not prepare an environmental impact statement for the proposed exemption.

A copy of the licensee's request for exemption and supporting

documentation dated August 2, 1993, and the NRC staff's Safety Evaluation, included in the exemption, are available for public inspection at the NRC's Public Document Room, 2120 L Street, NW., Washington, DC 20037, and at the local public document room at the Shoreham Wading River Public Library, Shoreham Wading River High School, Route 25A, Shoreham, NY 11792.

Dated at Rockville, Maryland, this 14th day of December, 1993.

For The Nuclear Regulatory Commission.

John H. Austin,

Chief, Decommissioning and Regulatory Issues Branch, Division of Low-Level Waste Management and Decommissioning, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Notice of Request for Revision of Forms RI 30-2, and RI 30-44

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In acordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request for clearance of a revised information collection. Form RI 30-2, Annuitant's Report of Income, is used by disability annuitant's under age 60 to report their earnings annually to the Office of Personnel Management. RI 30-44, Report of Income is Not Usable, is used to report earnings when the information from the RI 30-2 is unusable.

There are estimated to be 60,000 respondents for RI 30-2, and 780 for RI 30-44. It takes approximately 30 minutes to complete RI 30-2, and 5 minutes to complete RI 30-44. The combined annual burden is 30,065 hours.

For copies of this proposal, call C. Ronald Trueworthy on (703) 908-8550.

DATES: Comments on this proposal should be received on or before January 27, 1994.

ADDRESSES: Send or deliver comments to—

Lorraine E. Dettman, Retirement and Insurance Group, Operations Support Division, U.S. Office of Personnel Management, 1900 E. Street, NW., room 3349, Washington, DC 20415.

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., room 3002, Washington, DC 20503.

AGENCY: Office of Personnel Management.

ACTION: Notice of meetings.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the thirty-first meeting of the Federal Salary Council will be held at the time and place shown below. At the meeting the Council will continue discussing issues relating to locality-based comparability payments authorized by the Federal Employees Pay Comparability Act of 1990 (FEPCA). The meetings are open to the public.

DATES: January 18, 1994, at 10 a.m.

ADDRESSES: Office of Personnel Management, 1900 E Street, NW., room 7B09, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ruth O'Donnell, Chief, Salary Systems Division, Office of Personnel Management, 1900 E Street, NW., room 6H31, Washington, DC 20415-0001. Telephone number: (202) 606-2838.

For the President's Pay Agency.

Lorraine A. Green,

Deputy Director.

BILLING CODE 6325-01-M

Privacy Act of 1974: Computer Matching Program Between the Office of Personnel Management and the Social Security Administration

AGENCY: Office of Personnel Management (OPM).

ACTION: Notice of a computer matching program between OPM and the Social Security Administration (SSA) for public comment.

SUMMARY: OPM is publishing notice of its computer matching program with SSA to meet the reporting and publication requirements of Pub. L. 100-503, the Computer Matching and Privacy Protection Act of 1988. In this match, SSA records are used in redetermining and recomputing certain annuitants' benefits where computations are based, in part, on military service performed after December 1956 under the Civil Service Retirement System (CSRS) and for annuitants under the Federal Employees' Retirement System (FERS) who have a CSRS component in their FERS annuity computation. The purpose of this match is to identify these beneficiaries.

DATES: This proposed action will become effective 40 days after the agreements by the parties participating in the match have been submitted to Congress and the Office of Management and Budget, unless either the Congress or the Office of Management and Budget objects thereto. Any public comments on this matching program must be submitted within the 30-day public notice period, which begins on the publication date of this notice.

ADDRESSES: Send comments to Reginald M. Jones, Jr., Assistant Director for Retirement and Insurance Policy, Retirement and Insurance Group, Office of Personnel Management, 1900 E Street, NW, room 4351, Washington, DC 20044; or deliver to OPM, room 4351, 1900 E Street, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Joy Anderson, (202) 606-2099.

SUPPLEMENTARY INFORMATION: OPM and SSA have concluded an agreement to conduct a computer matching program between the two agencies. The purpose of the agreement is to establish the conditions under which SSA agrees to the disclosure of Social Security Benefit and/or tax return information to OPM. OPM, as specified in 5 U.S.C. 8332(j)(1), has an obligation to use post-1956 earnings data in redetermining and recomputing annuities for certain CSRS and FERS annuitants. Section 1106 of the Social Security Act (42 U.S.C.) requires that SSA disclose the needed data to OPM.

Office of Personnel Management.

Lorraine A. Green,

Deputy Director.

Report of Computer Matching Program Between the Office of Personnel Management and the Social Security Administration

A. Participating Agencies

OPM and SSA.

B. Purpose of the Matching Program

Chapters 83 and 84 of title 5, United States Code (U.S.C.), provide the basis for computing annuities under the Civil Service Retirement System and the Federal Employees' Retirement System respectively, and require release of information by SSA in order to administer post-1956 data exchanges. In this match, SSA records are used in redetermining and recomputing certain annuitants' benefits where computations are based, in part, on military service performed after December 1956 under the Civil Service Retirement System (CSRS) and for annuitants under the Federal Employees' Retirement System (FERS) who have a CSRS component in their FERS annuity computation. The purpose of this match is to identify these beneficiaries.

C. Authority for Conducting the Match Program

Chapters 83 and 84, title 5, United States Code, section 1106 of the Social Security Act (42 U.S.C. 1306), and the Internal Revenue Code (26 U.S.C. 6103).

D. Categories of Records and Individuals Covered by the Match

SSA will disclose data from its Master Beneficiary Record and Master Earnings Files, and manually extract post-1956 military wage information from SSA's "1086" microfilm file when required. SSA has published routine uses for these systems of records, published at 58 FR 35025, June 30, 1993, and also at 58 FR 45895, August, 31, 1993.

OPM's records consist of annuity data from its system of records entitled OPM/Central-1—Civil Service Retirement and Insurance Records, last published in the **Federal Register** at 58 FR 19154 on April 12, 1993, and revised at 58 FR 41300, August 3, 1993.

E. Description of Matching Program

OPM provides a monthly magnetic tape to SSA containing data on those individuals for whom OPM requests post-1956 military service benefit information. These elements will be matched against SSA records. SSA furnishes OPM by magnetic tape benefit information on these individuals, including the amount of the SSA benefit attributable to the post-1956 military service (which constitutes the CSRS or FERS annuity reduction amount).

F. Privacy Safeguards and Security

The personal privacy of the individuals whose names are included in the tapes is protected by strict adherence to the provisions of the Privacy Act of 1974 and OMB's "Guidance Interpreting the Provisions of Pub. L. 100-503, the Computer Matching and Privacy Protection Act of 1988." Access to the records used in the data exchange is restricted to only those authorized employees and officials who need it to perform their official duties. Records matched or created will be stored in an area that is physically safe from access by authorized personnel during duty hours as well as nonduty hours or when not in use. Records used in this exchange and any records created by this exchange will be processed under the immediate supervision and control and authorized personnel in a manner which will protect the confidentiality of the records.

Both SSA and OPM have the right to make onsite inspections or make other provisions to insure that adequate safeguards are being maintained by the other agency.

F. Inclusive Dates of the Matching Program

This computer matching program is subject to review by the Congress and the Office of Management and Budget. OPM's report to these parties must be received at least 40 days prior to the initiation of any matching activity. If no objections are raised by either Congress or OMB, and the mandatory 30-day public notice period for comment for this **Federal Register** notice expires with no significant receipt of adverse public comments resulting in a contrary determination, then this computer matching program becomes effective. By agreement between OPM and SSA, the matching program will be in effect and continue for 18 months with an option to renew for 12 additional months under the terms set forth in 5 U.S.C. 552a(o)(2)(D).

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title:* Employer's Quarterly Report of Contributions Under the RUIA.

(2) *Form(s) submitted:* DC-1.

(3) *OMB Number:* 3220-0012.

(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.

(5) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.

(6) *Frequency of response:* Quarterly.

(7) *Respondents:* Businesses or other for-profit, Small businesses or organizations.

(8) *Estimated annual number of respondents:* 550.

(9) *Total annual responses:* 2,200.

(10) *Average time per response:* .4168 hours.

(11) *Total annual reporting hours:* 917.

(12) *Collection description:* Railroad employers are required to make contributions to the RUI fund quarterly or annually equal to a percentage of the creditable compensation paid to each employee. The information furnished on the report accompanying the remittance is used to determine correctness of the amount paid.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the form and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312-751-4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611-2092 and the OMB reviewer, Laura Oliven (202-395-7316), Office of Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

Agency Forms Submitted for OMB Review

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title:* Prior Service Reports.

(2) *Form(s) submitted:* AA-15, AA-2P(R), G-86.

(3) *OMB Number:* 3220-0003.

(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.

(5) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the

substance or in the method of collection.

(6) *Frequency of response:* On occasion.

(7) *Respondents:* Individuals or households, Businesses or other for-profit.

(8) *Estimated annual number of respondents:* 410.

(9) *Total annual responses:* 410.

(10) *Average time per response:* .358 hours.

(11) *Total annual reporting hours:* 147.

(12) *Collection description:* Railroad service prior to 1937 which can be used to determine entitlement to and amount of annuity under the RRA is not carried on Railroad Retirement Board records. The reports obtain verification of such records, or in the absence of such records, obtain information from the applicant to support the claim.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the form and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312–751–4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092 and the OMB reviewer, Laura Oliven (202–395–7316), Office of Management and Budget, Room 3002, New Executive Office Building, Washington, DC 20503.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Rel. No. 19964; 811–7722]

High Rollers Gaming Sector Fund, Inc.; Notice of Application

December 20, 1993.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: High Rollers Gaming Sector Fund, Inc.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring it has ceased to be an investment company.

FILING DATE: The application was filed on December 13, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 14, 1994, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, D.C. 20549. Applicant, 400 Park Place, suite 2C, Fort Lee, N.J. 07024.

FOR FURTHER INFORMATION CONTACT: Diane L. Titus, Paralegal Specialist, at (202) 272–3018, or Barry D. Miller, Senior Special Counsel, at (202) 272–3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end, non-diversified management investment company organized under the laws of the State of New Jersey. On May 13, 1993, applicant filed a Notification of Registration pursuant to section 8(a) of the Act on Form N–8A. Applicant did not file a registration statement pursuant to section 8(b) of the Act. Applicant has never made any sales of securities of which it is the issuer.

2. Applicant has no shareholders, assets or liabilities. Applicant is not a party to any litigation or administrative proceeding.

3. Applicant is not engaged, and does not propose to engage in any business activities, other than those necessary to wind-up its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–19966; No. 812–8053]

Protective Life Insurance Company, et al.

December 20, 1993.

AGENCY: Securities and Exchange Commission ("Commission" or "SEC").

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Protective Life Insurance Company ("Protective Life"), Protective Variable Annuity Separate Account ("Variable Account"), and Investment Distributors, Inc. ("IDI") (collectively, "Applicants").

RELEVANT 1940 ACT SECTIONS: Order requested under Section 6(c) from the Investment Company Act of 1940 ("1940 Act") granting exemptions from the provisions of Sections 26(a)(2) and 27(c)(2) of the 1940 Act.

SUMMARY OF APPLICATION: Applicants seek an order permitting the deduction from the assets of the Variable Account of mortality and expense risk charges in connection with the offer and sale of certain flexible premium deferred variable and fixed annuity contracts.

FILING DATE: The application was filed on October 28, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving the Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on January 14, 1994, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Commission's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Protective Life Insurance Co., 2801 Highway 280 South, Birmingham, Alabama 35223.

FOR FURTHER INFORMATION CONTACT: Yvonne Hunold, Senior Counsel (202) 272–2878, or Michael Wible, Special Counsel (202) 272–2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the Commission a Public Reference Branch.

Applicant's Representations

1. Protective Life, a wholly-owned subsidiary of Protective Life Corporation ("PL–Corp.") is licensed to conduct business in the District of Columbia, Puerto Rico, Guam, and in all states except New York. Protective Life engages in the sale of life and health insurance and annuities. As of December 31, 1992, Protective Life had assets of over $3.7 billion.

2. The Variable Account is a separate account of Protective Life. On October 28, 1993, the Variable Account filed on Form N–8A (File No. 811–8108) a notice of registration as a unit investment trust under the 1940 Act. The Variable Account also filed a registration statement on Form N–4 (File No. 33–70984) under the Securities Act of 1933 in connection with a flexible premium deferred variable annuity contract ("Contract") and under section 8(b) of the 1940 Act in connection with the Variable Account. The Variable Account has six sub accounts: Money Market, Select Equity, Small Cap Equity, International Equity, Growth and Income and Global Income ("Sub-Accounts"). Each Sub-Account invests in shares of the corresponding investment portfolio of Protective Investment Company ("PIC"). Other portfolios of PIC or other mutual funds also may be made available for investment in the future through additional sub-accounts.

3 IDI, a wholly owned subsidiary of PL-Corp., is the principal underwriter of the Contracts, a registered broker-dealer under the Securities Exchange Act of 1934, as amended, and a member of the National Association of Securities Dealers, Inc. Registered representatives of IDI and licensed agents of Protective Life will offer the Contracts on a continuous basis. IDI also will contract with other broker-dealers for their services in connection with the distribution of the Contract.

4. The Contract will be offered in connection with certain retirement plans that receive special federal income tax treatment and to individuals and entities that do not qualify for special tax treatment. The Contracts require certain minimum initial payments, permit certain additional payments, and restrict the maximum aggregate payments, unless otherwise approved by Protective Life (collectively, "Payments"). Contractowners may allocate Payments, and later transfer accumulated Contract Value, among and between the different Sub-Accounts or to Protective Life's general account ("General Account") prior to the Annuity Commencement Date. A Guaranteed Death Benefit will be payable.

5. Various fees and expenses are deducted from each Contract. While no sales charges are deducted from premium payments, a 7% contingent deferred sales charge ("CDSC") is deducted for full or partial surrenders during the Contract's first year. Beginning in the Contract's second year, the CDSC will be a maximum of 6% of each payment for deductions or surrenders within a year after such payment is made, thereafter declining by 1% per year to 0% at the end of the sixth year. The aggregate CDSC applicable to any Contract, however, will not exceed 8.5% of total Payments. Under certain circumstances, up to 10% of the initial Payment will not be subject to the CDSC, and the CDSC may be waived under certain circumstances. If the CDSC is insufficient to pay the cost of distributing the Contracts, the deficiency will be met from General Account assets, which may include amounts derived from the mortality and expense risks charge discussed below.

6. An Administration Charge of .15% of the daily value of net assets in the Variable Account is deducted on an annual basis prior to the Annuity Commencement Date. This charge is guaranteed not to increase for the duration of the Contract.

7. An annual Contract Maintenance Fee of $35 will be deducted from the Variable Accounts Value attributable to each Sub-Account in proportion to the amounts invested in each Sub-Account. This fee also will be deducted upon surrenders, other than on a Contract anniversary, in order to partially compensate Protective Life for administrative services. The fee may be waived under certain circumstances.

8. Currently, there is no charge for transfers ("Transfer Fee"). Protective Life, however, reserves the right to charge a $25 Transfer Fee for each transfer after the first 12 transfers in any Contract Year. The Transfer Fee will be deducted, either from the Payment when received, upon partial or full surrenders, or from the amount applied to effect an annuity, for payment of a premium tax in states that impose this tax. No other charges currently are made against the Variable Account for federal, state or local taxes, but these charges may be imposed in the future.

9. Each Fund will pay all its operating expenses. Each Fund also pays a monthly fee from its daily net assets to its investment manager for managing its investments and business affairs. The investment management fees vary among the Funds and range from an annual rate of .60% for the Protective Money Market Fund to 1.10% for each of the Protective International Equity and Protective Global Income Funds.

10. The charges for administration of the Contracts are deducted in reliance on Rule 26a–1 of the 1940 Act and are not greater than the cost of the administrative services to be provided over the life of the Contract. Protective Life does not expect or intend to make a profit from the Administration Charge, the Contract Maintenance Fee, or any Transfer Fee.

11. An annual charge of 1.25% of the Variable Account's assets will be deducted for mortality and expense risks assumed by Protective Life, of which approximately .50% is for mortality risks and .75% for expense risks. The 1.25% rate is guaranteed not to increase for the duration of the Contract. If the charge is insufficient to cover the assumed risks, the loss will be assumed by Protective Life. Conversely, the charge may be a source of profit for Protective Life which will be added to Protective Life's surplus. Protective Life currently anticipates a profit from this charge. Any profits which may result from this charge may be used by Protective Life for, among other things, the payment of distribution, sales and other expenses.

12. The mortality risk assumed by Protective Life under the Contracts arises from its contractual obligation to make periodic annuity payments in accordance with annuity tables and other contract provisions regardless of how long all Annuitants or any one Annuitant may live. Thus, Protective life assumes the risk that Annuitants, as a class, may live longer than has been estimated by its actuaries, and Contractowners are assured that neither longevity nor an improvement in life expectancy, generally, will have an adverse effect on annuity payments. Protective Life also incurs a mortality risk in connection with the Guaranteed Death Benefit.

13. The expense risk assumed by Protective Life is that the actual expenses involved in administering the Contracts and the Variable Account in connection with the Contracts will exceed the amounts recovered from the Administration Charge, the Contract Maintenance Fee, and, if applicable, the Transfer Charge.

Legal Analysis

1. Section 6(c) of the 1940 Act authorizes the Commission, by order upon application, to conditionally or unconditionally grant an exemption from any provision, rule or regulation of the 1940 Act to the extent that the exemption is "necessary or appropriate

in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act."

2. Sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act, in relevant part, prohibit a registered unit investment trust, its depositor or principal underwriter, from selling periodic payment plan certificates unless the proceeds of all payments, other than sales loads, are deposited with a qualified bank and held under arrangements which prohibit any payment to the depositor or principal underwriter except a reasonable fee, as the Commission may prescribe, for performing bookkeeping and other administrative duties normally performed by the bank itself.

3. Applicants request exemptions from Sections 26(a)(2) and 27(c)(2) of the 1940 Act to the extent necessary to permit the deduction from assets of the Variable Account of the 1.25% charge for the assumption of mortality and expense risks. Applicants represent that the charge is consistent with the protection of investors because it is a reasonable and proper insurance charge to compensate Protective Life for assuming the mortality and expense risks. Protective Life represents that the 1.25% per annum mortality and expense risks charge is within the range of industry practice for comparable annuity products. This representation is based upon an analysis of publicly available information about similar industry products, taking into consideration such factors as the current charge levels, existence of charge level guarantees, any death benefit guarantees, guaranteed annuity rates, and other policy options. Protective Life will maintain at its administrative offices, available to the Commission, a memorandum setting forth in detail the products analyzed in the course of, and the methodology and results of, its comparative survey.

4. The charge of mortality and expense risks may be a source of profit which would increase Protective Life's general assets available to pay distribution expenses not reimbursed by a sales charge. There is a reasonable likelihood that the proposed distribution financing arrangements will benefit the Variable Account and the Contract Owners. The basis for that conclusion will be set forth in a memorandum which will be maintained by Protective Life at its administrative offices and made available to the Commission upon request.

5. The Variable Account will only invest in management investment companies which undertake, in the event any such company adopts a plan under Rule 12b-1 to finance distribution expenses, to have a board of directors or trustees, a majority of whom are not interested persons, formulate and approve any such plan.

Conclusion

For the reasons set forth above, Applicants represent that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25863]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 17, 1993.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by January 10, 1994, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

American Electric Power Company, Inc., et al. (70-7822)

American Electric Power Company, Inc. ("AEP"), a registered holding company, and its nonutility subsidiary company, AEP Resources, Inc. ("Resources") (collectively, "Applicants"), both located at 1 Riverside Plaza, Columbus, Ohio 43215, have filed a post-effective amendment pursuant to sections 6, 7, 9(a), 10, 12(b), 13(b), 32, and 33 of the Act and Rules 45, 53, 87, 90, and 91 thereunder to their application-declaration filed pursuant to sections 6(a), 7, 9(a), 10, 12(b), and 13(b) of the Act and Rules 43, 45, 50(a)(5), 87, 90, and 91 thereunder.

By orders dated June 6, 1989 and October 8, 1993 (HCAR Nos. 24898 and 25905), AEP was authorized to invest in Resources up to $7.5 million per year through December 31, 1996 for preliminary development activities related to qualifying cogeneration facilities or small power production facilities (collectively, "QFs"), as defined in the Public Utility Regulatory Policies Act of 1978 and rules thereunder.

The Applicants now propose to expand the scope of Resources's preliminary development activities to include activities related to independent power production facilities ("IPPs"), exempt wholesale generators ("EWGs"), and foreign utility companies ("FUCOs"). AEP also proposes to issue guarantees and assume liabilities of Resources owed to third parties in connection with development activities. The arrangements would take the form of direct contractual obligations of AEP, and would not involve the interposition of unaffiliated third parties, such as a letter of credit bank. The Applicants state that these arrangements can provide them with opportunities to participate in power opportunities on a favorable basis without expanding funds. The Applicants represent that, until such time as there is no possibility of a claim against AEP or Resources, the full contingent amount of any guarantee or assumption of liability would be counted as part of the $7.5 million authorized development activities limit described above.

The Applicants would not acquire an interest in a QF or IPP without prior Commission approval. In addition, the Applicants would not organize any intermediate subsidiary that would acquire an interest in a FUCO without prior Commission approval. No associate company of AEP would provide services to an EWG or FUCO in which it has an interest without prior Commission approval. In addition, in no event will Resources provide services to an EWG or FUCO.

Resources' preliminary development activities include the investigation of sites, preliminary engineering and licensing activities, acquiring options and rights, contract drafting and negotiating, preparation of proposals and other necessary activities to identify and analyze feasible investment opportunities and to initiate the commercialization of a project. Authorized administrative activities will include the ongoing personnel, accounting, engineering, legal, financial and other support activities necessary for Resources to manage its preliminary development activities related to Power Projects, and potential investments therein.

Resources will undertake development activities on its own and in conjunction with third parties through cost sharing contractual arrangements which will not involve the formation of corporations, partnerships, joint ventures or other business entities. Resources states that, by its participation in these informal and unincorporated consortia, it intends to diversify its risk, access skills and relationships that it may require, and access more of a diversity of projects than it could if it concentrated on developing such project by itself.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Release No. 19965; International Series Release No. 623; (812-8568)]

Standard Chartered Bank; Notice of Application

December 20, 1993.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANT: Standard Chartered Bank ("SCB").

RELEVANT ACT SECTIONS: Exemption requested under section 6(c) from the provisions of section 17(f).

SUMMARY OF APPLICATION: SCB seeks an order to permit the maintenance of foreign securities and other assets of registered investment companies other than investment companies registered under section 7(d) of the Act (an "Investment Company"), and custodians of such investment companies, with Standard Chartered Bank Malaysia ("SCBM"), a subsidiary of SCB located in Malaysia.

FILING DATE: The application was filed on November 5, 1993, and amended on December 8, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 13, 1994, and should be accompanied by proof of service on applicant, in the form of an affidavit, or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, c/o Daniel L. Goelzer, Esq., Baker & McKenzie, 815 Connecticut Avenue, NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Joseph G. Mari, Senior Special Counsel, (202) 272-3030, or Barry D. Miller, Senior Special Counsel, (202) 272-3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations and Legal Analysis

1. SCB seeks an order to exempt it, any Investment Company, any custodian for an Investment Company, and SCBM, from section 17(f) of the Act to permit SCB, such Investment Company, and such custodian to maintain foreign securities, cash, and cash equivalents (collectively, "Assets") in custody of SCBM. For purposes of this application, "foreign securities" includes (a) securities issued and sold primarily outside the United States by a foreign government, a national of any foreign country, or a corporation or other organization incorporated or organized under the laws of any foreign country, and (b) securities issued or guaranteed by the Government of the United States or by any state or any political subdivision thereof or by any agency thereof or by any entity organized under the laws of the United States or of any state thereof which have been issued and sold primarily outside the United States.

2. Section 17(f) of the Act requires every registered management investment company to place and maintain its securities and similar investments in the custody of certain enumerated entities. Rule 17f-5 under the Act expands the group of entities located outside the United States that are permitted to serve as custodians for the Assets of registered management investment companies. Rule 17f-5 defines the term "eligible foreign custodian" to include a banking institution or trust company incorporated or organized under the laws of a country other than the United States that is regulated as such by that country's government or an agency thereof and that has shareholders' equity in excess of US$200,000,000.

3. SCB is a wholly-owned subsidiary of Standard Chartered PLC, an English public limited company. SCB is an "eligible foreign custodian" under the requirements of rule 17f-5 since it has shareholders' equity well in excess of the pound sterling equivalent of US$200,000,000; it is organized and existing under the laws of England and Wales; and it is authorized and regulated as a bank in the United Kingdom by the Bank of England. In the United States, SCB is regulated as a bank holding company and is subject to the International Banking Act of 1978. Standard Chartered PLC, with its subsidiaries, including SCB, set up a division known as the "Equitor Group," which maintains a network of custodial and sub-custodial services for Investment Companies and their custodians at various locations throughout the world through SCB, it branches and subsidiaries. Although the Equitor Group currently offers custodial services in Malaysia through SCB's Kuala Lumpur branch, under new legislation in Malaysia, SCB may continue doing business in Malaysia only through a locally incorporated entity. To comply with Malaysian law, SCB proposes to transfer all the activities of its branch, as well as its personnel, to SCBM, when SCBM obtains a Malaysian banking license.

4. SCBM, a wholly-owned subsidiary of SCB, was incorporated in Malaysia in 1984 but has been inactive since then and has only nominal capital. Its application for a banking license in Malaysia is pending and is expected to issue in the near future. Pending the issuance of the order requested herein, SCB's Kuala Lumpur branch will continue to perform custodian services

for Investment Company Assets. When licensed, SCBM will assume the assets, liabilities, and business of the Kuala Lumpur Head Office and other branches of SCB in Malaysia and become subject to the supervision of the Malaysian Central Bank under the Banking and Financial Institutions Act.

5. Where custodial services are required in Malaysia, SCB will hold the Assets of Investment Companies and their custodians and will deposit the Assets with SCBM in the manner contemplated by the agreement described in condition 2 below.

6. SCBM satisfies the requirements of rule 17f–5 insofar as it is a banking institution or trust company incorporated or organized under the laws of a country other than the United States and will be regulated as such by that country's government or an agency thereof upon issuance of its banking license. Applicant will not offer the custodial services of SCBM to Investment Companies until the license is issued. SCBM, however, does not meet the shareholders' equity requirement of the rule.

7. SCBM is well-qualified to provide custodial and sub-custodial services for Investment Company Assets. SCB's Kuala Lumpur branch is experienced in providing custodial services, and SCBM, as the successor to the business of the branch, will subsume the personnel and functions of SCB's branches in Malaysia. Under the proposed foreign custody arrangements, the protection afforded the assets of Investment Companies held by SCBM would not be diminished from the protection afforded the assets held directly by SCB.

Applicant's Conditions

Applicant agrees that any order of the SEC granting the requested relief may be conditioned upon the following:

1. The foreign custody arrangements proposed regarding SCBM satisfy the requirements of rule 17f–5 in all respects other than SCBM's level of shareholders' equity.

2. SCB will deposit Assets with SCBM only in accordance with an agreement (the "Agreement") required to remain in effect at all times during which SCBM fails to satisfy all the requirements of rule 17f–5. Each Agreement will be a three-party agreement among SCB, SCBM, and the Investment Company or the custodian for an Investment Company pursuant to which SCB will undertake to provide specified custodial or sub-custodial services and will delegate to SCBM such of the duties and obligations of SCB as will be necessary to permit SCBM to hold in custody in Malaysia Assets of the Investment Company or custodian. The Agreement will further provide that the delegation by SCB to SCBM will not relieve SCB of any responsibility to the Investment Company or custodian for an Investment Company for any loss due to such delegation, and that SCB will be liable for any loss or claim arising out of or in connection with the performance by SCBM of its responsibilities under the Agreement to the same extent as if SCB had itself been required to provide custody services under the Agreement.

3. SCB currently satisfies and will continue to satisfy the minimum shareholders' equity requirement set forth in rule 17f–5(c)(2)(i).

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

Interest Rate Policy Change

The current Small Business Administration (SBA) maximum interest rate for fixed rate section 7(a) loans is 2.75 percentage points over the Wall Street Journal Prime Rate for loans with a maturity of seven years or longer and 2.25 percentage points over the Prime Rate for loans with a maturity of less than seven years. SBA has received requests to modify the fixed rate policy. Lenders have indicated to SBA that the permitted spreads are not sufficient to induce them to make fixed rate loans.

SBA is proposing a new maximum interest rate policy for fixed rate loans. The new policy will permit lenders to add up to 3.75 percentage points to the Wall Street Journal Prime Rate to establish the interest rate on a fixed rate loan. There will be no change in the manner in which the interest rate is determined. The rate will be established on the date that the loan application is received by the SBA field office or the date the loan number is given to the lender for a loan approved under the Preferred Lenders Program.

The purpose of this change is to encourage lenders to make fixed rate loans. SBA's fixed rate lending has dropped from 30% of activity in the mid 1980s to about 20% presently. The Agency wishes to give its small business clientele the opportunity to lock in the favorable rates that presently exist in the market place.

Previously, SBA approved an increase in the spread that may be added to the base interest rate for loans of $50,000 and less. After this change, small lending increased from approximately 14% to about 16% of approvals. This 14% increase in small loans cannot be completely attributed to the interest rate increase, but SBA is of the opinion that the increase was a significant factor. We hope that the increase in the maximum rate for fixed rate loans will have a similar effect.

Respondents are asked to comment on whether the proposed increase in the maximum rate will encourage lenders to make fixed rate loans. For further information write to James W. Hammersley, Deputy Director, Office of Financing, Small Business Administration, 8th floor, 409 3rd St. SW., Washington, DC 20416, or call 202–205–6493.

Dated: December 21, 1993.

Erskine B. Bowles,

Administrator.

BILLING CODE 8025–01–M

DEPARTMENT OF STATE

Bureau of Economic and Business Affairs

[Public Notice 1917]

Finding of No Significant Impact: Boise Cascade Corporation Pipeline at International Falls, MN

AGENCY: Department of State.

ACTION: Notice of a finding of no significant impact with regard to an application to change the use of an existing pipeline across the U.S.-Canada border.

SUMMARY: The Department of State has conducted an environmental assessment of a change in use of an existing Boise Cascade Corporation water pipeline across the International Falls Bridge at International Falls, Minnesota. Based on the environmental assessment and after reviewing all comments, the Department of State has concluded that issuance of a new Presidential Permit authorizing the proposed change in use of the pipeline will not have a significant effect on the human environment.

FOR FURTHER INFORMATION ON THE PIPELINE CHANGE OF USE APPLICATION, CONTACT: Donald E. Grabenstetter, Office of International Energy Policy, room 3535, U.S. Department of State, Washington DC, 20520, (202) 647–4557.

FOR FURTHER INFORMATION ON THE ENVIRONMENTAL ASSESSMENT, CONTACT: Evelyn Wheeler, Office of Ecology, and Terrestrial Conservation, room 4325, U.S. Department of State, Washington DC 20520, (202) 647–3367.

SUPPLEMENTARY INFORMATION: Boise Cascade Corporation has applied for a Presidential Permit authorizing a change in the use of an existing 10-inch pipeline routed across the International Bride between Fort Francis, Ontario and International Falls, Minnesota. The pipeline currently transports water and the proposed change in use would add up to 300 dry tons a day of wood pulp to the water. The purpose of the proposed change is to eliminate dual waste water treatment facilities in the two Boise Cascade factories on either side of the border.

The Department of State, Bureau of Oceans and International Environmental and Scientific Affairs and Bureau of Economic and Business Affairs, has concluded that issuance of the permit will not have a significant effect on the quality of the human environment within the United States. This finding is based on an environmental assessment conducted by the Department of State which included review and comments by the following federal agencies: the Department of Defense, Department of the Treasury, Department of the Interior, Department of Commerce, Department of Justice, Department of Transportation, Interstate Commerce Commission and Federal Emergency Management Agency.

The proposed change in use of the pipeline will require no physical construction or alteration of the existing pipeline. The proposed change will eliminate the need to construct, operate and maintain duplicate water treatment facilities on both ends of the pipeline. The treatment of waste water by Boise Cascade is subject to regulation by the Environmental Protection Agency.

Dated: December 6, 1993.

Joan E. Spero,

Under Secretary of State for Economic and Agricultural Affairs.

BILLING CODE 4710–07–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Southcentral Alaska

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway reconstruction project in southcentral Alaska.

FOR FURTHER INFORMATION CONTACT: Phillip A. Smith, Field Operations Engineer, Federal Highway Administration, P.O. Box 21648, Juneau, Alaska, 99802–1648, Telephone (907) 586–7428; and Rodney R. Platzke, P.E., Director, Alaska Department of Transportation and Public Facilities, Division of Design and Construction, Northern Region, 2301 Peger Road, Fairbanks, Alaska, 99709–5316, Telephone (907) 451–2215.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the Alaska Department of Transportation and Public Facilities (ADOT&PF) will prepare an Environmental Impact Statement (EIS) on a proposed project to reconstruct the existing gravel road from Chitina to McCarthy in southcentral Alaska. The purpose and need for the proposed project is to accommodate the increasing number of visitors to the Wrangell-St. Elias National Park and Preserve, the town of McCarthy, and the historical Kennecott Mines. The number and size of recreational vehicles has increased to the point that it becomes dangerous to drive the existing one-lane road. The proposed project would increase the safety and accessibility for both the recreational visitors and the local area residents whose homes are scattered along the length of the road.

The McCarthy Road is accessed via the Edgerton Highway approximately 31 miles from the Richardson Highway. It begins at Chitina on the banks of the Copper River and follows the historic Copper River and Northwestern Railway corridor (which is eligible for the National Register of Historic Places) for approximately 60 miles, ending at McCarthy. Approximately 4.5 miles beyond McCarthy are the historic remains of the Kennecott mining operations.

About 1/2 mile before reaching McCarthy, the Kennecott River crosses the alignment. The bridges over this river washed out about 20 years ago and were replaced with hand-operated trams for pedestrian access. Vehicle access ends on the western bank of the river.

Alternatives that will be investigated in the EIS include: (1) No-action, and (2) upgrading the existing highway to current design standards that meet both the Federally approved State standards and the National Park Service guidelines for park access roads. Alternatives will range from the current situation (vehicle access only to Kennecott river and pedestrian access on to McCarthy) to full vehicle access to McCarthy. The alternative of completely realigning the highway is neither necessary nor considered a feasible nor prudent alternative.

In addition to merely considering alternatives for the safe passage of increased traffic, the EIS will consider highway amenities. These could include scenic turnouts, waysides, traveler rest areas, picnic areas and camping facilities, and interpretive areas for historic and geological interest. Historical aspects of the proposed action will be considered. The potential for discovering historic and prehistoric remains will also be investigated.

Letters describing the proposed action and soliciting input will be sent to appropriate federal, state and local agencies, and to private organizations and citizens who have previously expressed, or are known to have an interest in this proposal. Scoping activities will also include meetings with the appropriate agencies at a convenient location. Public meetings will be held in potentially affected communities. In addition, public hearings will be held following publication of the Draft EIS in late 1995. Public notice will be given of the time and place of the meetings and hearings. The Draft EIS will be available for public and agency review and comment prior to the public hearings.

To ensure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are requested from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the ADOT&PF at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: December 16, 1993.

Robert E. Ruby,

Division Administrator, Juneau, Alaska.

Sunshine Act Meetings

Federal Register
Vol. 58, No. 247
Tuesday, December 28, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 11:00 a.m., Monday, January 3, 1994.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Federal Reserve Bank and Branch director appointments. (This item was originally announced for a closed meeting on December 15, 1993.)
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

DATED: December 23, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 7020-02-P

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Operations and Regulations Committee Meeting; Notice

TIME AND DATE: The Legal Services Corporation Board of Directors Operations and Regulations Committee will meet on January 7, 1994. The meeting will commence at 9 a.m. It is anticipated the substantive, open portion of the meeting (i.e., deliberation of agenda item number 4) will commence at approximately 10 a.m.

PLACE: The Legal Services Corporation, 750 First Street NE., the Board Room, 11th Floor, Washington, DC 20002, (202) 336–8800.

STATUS OF MEETING: Open, except that part of the meeting may be closed pursuant to a vote, to be solicited prior to the meeting, of a majority of the Board of Directors. Should the aforementioned majority vote to close all or a portion of the meeting be obtained, the Committee will hear the report of the General Counsel on litigation to which the Corporation is or may become a party. In addition, the Committee will consider and act on internal personnel and operational matters related to the Executive Office, the Office of the General Counsel, and the Office of Administration and Human Resources/Equal Opportunity, the three offices of the Corporation under the Committee's purview. The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. 552b(c) (2), (6), and (10)], and the corresponding regulation of the Legal Services Corporation [45 CFR 1622.5 (a), (e), and (h)]. The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at 750 First Street NE., Washington, DC 20002, in its eleventh floor reception area, and will otherwise be available upon request.

MATTERS TO BE CONSIDERED:

Open Session

1. Approval of Agenda.

Closed Session

2. Consider and Act on General Counsel's Report on Litigation to Which the Corporation Is or May Become a Party.
3. Consider and Act on Internal Personnel and Operational Matters.

Open Session (Resumed)

4. Approval of Minutes of December 4, 1993 Meeting.
5. President's Report.
6. General Counsel's Report.
7. Office of Administration and Human Resources Director's Report.
8. Development of Mission Statement to Guide the Committee in Its Rulemaking Activities.
9. Development of Process to Guide the Committee in Its Rulemaking Activities.
10. Development of Mission Statement to Guide the Corporation in Its Reauthorization-Related Activities.
11. Consider and Act on Report on Finalized Grant Assurances for 1994.

CONTACT PERSON FOR INFORMATION: Patricia Batie, (202) 336–8800.

Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments.

Individual who have a disability and need an accommodation to attend the meeting may notify Patricia Batie at (202) 336–8800.

Dated: December 22, 1993.

Patricia D. Batie,

Corporate Secretary.

Part II

Department of Education

Federal Direct Student Loan Program; Notice

DEPARTMENT OF EDUCATION

Federal Direct Student Loan Program

AGENCY: Department of Education.

ACTION: Notice.

SUMMARY: The Secretary of Education issues a notice announcing the schools selected for participation in the first year of the Federal Direct Student Loan Program (Direct Loan Program), which is the academic year beginning July 1, 1994.

EFFECTIVE DATE: This notice is effective on December 28, 1993.

FOR FURTHER INFORMATION CONTACT: Barbara Ragon, U.S. Department of Education, 400 Maryland Ave. SW., (room 4310, ROB–3), Washington, DC 20202–5162. Telephone: (202) 708–8242. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Student Loan Reform Act of 1993, part of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66), established a new loan program under title IV, part D of the Higher Education Act of 1965, as amended (HEA). Under this program, known as the Federal Direct Student Loan Program (Direct Loan Program), loan capital is provided directly to student and parent borrowers by the Federal Government rather than through private lenders.

In a notice published in the **Federal Register** on September 10, 1993, 58 FR 47816, the Secretary invited applications by schools to participate in the Direct Loan Program for the academic year beginning July 1, 1994. The notice outlined the requirements for participation in this program and the criteria for school selection. Over 1,100 schools applied.

For the first academic year during which the Direct Loan Program is operational, the year beginning July 1, 1994, the Secretary has selected 104 schools to participate from those that applied. The Secretary believes that the selection of these schools will result in the Direct Loan Program making up 5 percent of the new student loan volume for the 1994–95 academic year. The Secretary also believes the selection of these schools will ensure as smooth an implementation of the program as possible and provide a solid base of experience for the increase in Direct Loan volume. The goals for the percentage of new student loan volume made under this program increase significantly in subsequent years. See section 453(a)(2) of the HEA. Schools selected to participate in the Direct Loan Program in the 1994–95 academic year are expected to continue to participate and will not be required to reapply.

The Secretary will publish rules regarding the administration and operation of the Direct Loan Program for the 1994–1995 academic year in the **Federal Register** in January 1994. Schools that have been selected to participate in the Direct Loan Program will be allowed to withdraw within 30 days of the date of publication of the rules. If a school wishes to withdraw, it must submit a written request to that effect within that period. The written request should be submitted to the Direct Loan Task Force, U.S. Department of Education, room 4034, ROB–3, 400 Maryland Avenue, SW., Washington, DC 20202.

(Catalog of Federal Domestic Assistance Number has not been assigned.)

Dated: December 21, 1993.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

Part III

Department of the Interior

Bureau of Indian Affairs
Distribution of Fiscal Year Contract Support Funds; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Distribution of Fiscal Year 1994 Contract Support Funds

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of method for distribution and use of FY 1994 Contract Support Funds.

SUMMARY: The purpose of this Announcement is to provide information to Indian tribes and tribal organizations contracting under the Indian Self-Determination and Education Assistance Act, as amended, about the distribution and use of Contract Support Funds (CSF) Fiscal Year (FY) 1994.

FOR FURTHER INFORMATION: Please contact the Bureau of Indian Affairs, Division of Self-Determination Services, 1849 C Street, NW., MS–4627–MIB, Washington, DC 20240, or (202) 208–3708.

This Notice is published in exercise of the authority delegated by the Secretary of the Interior to the Assistant Secretary-Indian Affairs by 209 DM 8.1.

SUPPLEMENTARY INFORMATION: The information detailed herein has been developed to comply with the following language in the Appropriation Act for the Department of the Interior and related agencies for FY 1994, Public Law 103–138:

"* * * Provided further, that not to exceed $91,223,000 of the funds in this Act shall be available for payments to tribes and tribal organizations for indirect costs associated with contracts or grants or compacts authorized by the Indian Self-Determination Act of 1975, as amended, for FY 1994 and previous years, * * *"

In addition, the Conference Report accompanying the FY 1994 Interior Appropriation Act states:

"The managers have agreed to a total of $91,223,000 for contract support, which includes $6,415,000 for the self-governance tribes. Bill language proposed by the Senate earmarking the total amount available in 1994 has been modified to authorize payments of contract support shortfalls from previous years, based on amounts agreed to by tribes and the Inspector General's Office. Since making these prior year payments will reduce the amount of funds available for FY 1994 contract support costs, the Bureau is directed to allocate funding in such a manner throughout the year that all tribes will be treated the same if there is a shortfall in contract support funds by the end of the year. The managers remain very concerned about the continued growth in contract support costs, and caution that it is unlikely that large increases for this activity will be available in future years' budgets. It is also a concern that significant increases in contract support will make future increases in tribal programs difficult to achieve. The managers believe the Bureau should look at establishing a self-determination fund for new or expanded contracting in the 1995 budget. The Bureau should also work with the tribes on possible methodologies for establishing advance notification requirements for new contracting."

The above language limits the amount of CSF to ($91,223,000) that the Bureau can pay in FY 1994 to Public Law 93–638 contractors for indirect costs. The language also authorizes payment, to be taken from this amount, of prior year shortfall and implies that the prior year shortfall amount should be paid before payment is made for current year contracts. It further states that all tribes should be treated the same if there is a shortfall in CSF.

Prior Year Shortfall

Based on the above language the Bureau will pay the prior year shortfall "off the top" from the amount available for CSF. At this time, approximately $15,365,000 has been identified as prior year shortfall need. After payments are made to cover the prior year shortfall, the amount remaining to meet FY 1994 contractor indirect cost rates will be $75,858,000.

Using FY 1993 experience which resulted in a total CSF need of approximately $85,000,000, we project a shortfall of at least $10,000,000 in FY 1994 and possibly a shortfall as high as $25,000,000. It is important to restate that the Bureau can only utilize the amount appropriated for the CSF account to meet indirect cost needs. That is, the Bureau can no longer reprogram funds from other Bureau accounts to cover CSF shortfalls.

In order to satisfy the Congressional language to treat all tribes the same in the event of a shortfall in CSF this year, the Bureau will institute the following procedures.

FY 1994 Contracts and Compacts

1. A cutoff date of May 1, 1994, has been established for funding of any new CSF needs as a result of higher or new indirect cost rates. Any new or renewal contracts or compacts executed after May 1, 1994, through the end of the Fiscal Year will not receive CSF in the event of the anticipated shortfall. Consequently, areas are directed to obligate all CSF based on the above procedures for legitimate needs received and verified by each area prior to May 1.

2. There will be two distributions of CSF from the Central Office to each area office. The first distribution will be made immediately upon publication of this Notice and the second will be made as close to May 1, 1994 as possible.

3. The amount of CSF allotted in the first distribution to the areas will include; (a) the prior year shortfall amount that has been identified; and (b) a total of $56,893,500 to cover FY 1994 needs. The $56,893,500 will be distributed to each area based on our FY 1993 experience.

4. Each area director is directed to first fully fund identified prior year shortfalls. Secondly, each area director shall fund not more than fifty percent of FY 1994 indirect cost requirements for contracts or compacts based on the current approved indirect cost rate, for Bureau programs being contracted or compacted as shown in the negotiated rate agreement.

5. In determining legitimate FY 1994 indirect cost requirements each area director should fund only those contracting or compacting tribal organizations that have current approved indirect cost rates or current indirect cost proposals being considered by the Bureau or to be negotiated by the Inspector General. After determining legitimate costs, each area should then fund eligible tribal organizations at fifty percent of the identified need. Current proposals mean proposals scheduled for active consideration which are submitted to the Inspector General prior to May 1, 1994.

Additional Reports

In early Spring 1994 each area will be asked to provide the Central Office with a report showing the amounts provided to cover prior year shortfalls, the amounts and percentages funded for current year contracts and a revised detailed need request. As mentioned above, the second distribution of CSF will be made around May 1, and will be based on the revised need request submitted by each area. At the time the second distribution is made to the areas, instructions will be provided advising each area of the level to be applied to each contract.

Dated: December 17, 1993.

Marshall M. Cutsforth,

Acting Assistant Secretary.

Department of the Interior

Bureau of Indian Affairs

Small Tribes Grant Program; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Small Tribes Grant Program

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability of discretionary grant funds for small federally recognized Indian tribes.

SUMMARY: The Bureau of Indian Affairs invites applications from small Indian tribes within the contiguous 48 United States and Alaska, population 1500 or less Indian people residing on or near the applicant tribe's reservation or community, for a grant program. The purpose of this grant program is to permit small tribes to improve their capabilities to manage and administer tribal governmental affairs as well as federal and tribal programs. Grant awards will be made on a competitive basis under criteria, terms, and conditions set forth in this Announcement. Grants awarded under this Announcement are authorized by Section 103 of the Indian Self-Determination and Education Assistance Act of 1975, Public Law 93-638, as amended by Public Law 100-472, Public Law 101-301, and Public Law 101-644. This Notice is published in exercise of the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.1.

DATES: The closing date for submission of applications under this Announcement is February 28, 1994.

ADDRESSES: Applications should be sent to the appropriate Bureau of Indian Affairs Area Office listed below.

Aberdeen Area Office

Diane Turgeon, 115 4th Avenue, SE, Aberdeen, SD 57401-4382, Telephone: (605)226-7426

SUPPLEMENTARY INFORMATION:

A. Purpose of the Grant Program

The purpose of this grant program is to provide financial support to enable small Indian tribes to meet the administrative needs necessary to develop, improve, and/or maintain tribal government functions as well as tribal service delivery systems. To accomplish this purpose, the Bureau of Indian Affairs announces the availability of up to $2.275 million for a Small Tribes Grant Program which is more responsive to the needs of small Indian tribes. The program is designed to meet the needs of three (3) categories of small tribes, as follows:

(1) Developmental Component

This program component is for small Indian tribes without basic management systems and without experience operating under such systems; small Indian tribes not heretofore contracting or applying for grants; tribes or villages in consortia which want to contract or receive grants on their own;

(2) Basic Small Tribes Component

This program component is for small Indian tribes experiencing problems operating programs and operating properly under basic management systems (this is the basic Core Management type program component);

(3) Expansion/Enhancement Component

This program component is for small Indian tribes which, for the most part, have eliminated their administrative and management problems and want to plan for the expansion or the enhancement of governmental functions as well as for the expansion or enhancement of service delivery systems but do not have the capability or the resources to do so.

B. Eligibility Criteria

(1) Developmental Component

Small tribes applying for a grant under this component shall meet the following criteria:

(a) Only the governing body of a small Indian tribe may apply for, or authorize a multi-tribal organization to apply for, a grant under this Announcement;

(b) Only a federally recognized Indian tribe with a population of 1500 or less who resides on or near the applicant tribe's reservation or community and has a leadership empowered under the tribe's system of government to act on behalf of the tribe may apply for a grant under this Announcement.

(c) In addition to the basic eligibility criteria in (a) and (b), above, to be eligible for a grant under this component a tribe must satisfy at least three (3) of the following:

(i) Have an active tribal government;

(ii) Have a tribal office;

(iii) Lack financial resources to meet its core administrative or management needs;

(iv) Have inadequate or ineffective management systems.

(2) Basic Small Tribes Component

Small tribes applying for a grant under this component shall meet all of the following criteria:

(a) Only the governing body of a small Indian tribe may apply for, or authorize a multi-tribal organization to apply for, a grant under this Announcement;

(b) Only a federally recognized Indian tribe with a population of 1500 or less who resides on or near the applicant tribe's reservation or community and has a leadership empowered under the tribe's system of government to act on behalf of the tribe may apply for a grant under this Announcement.

(c) The tribe must lack financial resources to meet its core administrative or management needs.

(d) The tribe must have inadequate management systems, or problems operating thereunder.

(3) Expansion/Enhancement Component

Small tribes applying for a grant under this component shall meet all of the following criteria:

(a) Only the governing body of a small Indian tribe may apply for, or authorize a multi-tribal organization to apply for, a grant under this Announcement;

(b) Only a federally recognized Indian tribe with a population of 1500 or less who resides on or near the applicant tribe's reservation or community and has a leadership empowered under the tribe's system of government to act on behalf of the tribe may apply for a grant under this Announcement:

(c) In addition to the basic eligibility criteria in (a) and (b), above, tribes applying for a grant under this component must provide a copy of their current organization-wide Single Audit Report prepared in accordance with the Single Audit Act of 1984 (Pub. L. 98-502), as implemented through OMB Circular A-128. Such Audit Report must be free of any significant or material weaknesses.

C. Content of Application

(1) Applications for a grant in response to this Anpouncement shall follow the application requirements set forth in Office of Management and Budget Circular A-102, Uniform Requirements for Assistance to State and Local Governments (the Common Rule), and as implemented within the Department of the Interior in 43 CFR part 12. Under Part IV of Standard Form 424, Program Narrative Statement, applicants shall provide the following:

(a) Developmental Component

(i) In addition to the basic eligibility criteria in Section B(1), above, tribal applicants must provide a statement of specific needs or problems to be addressed under the proposed grants which may include, but not be limited to, the following:

(A) Staff

—Tribal Administrator
—Clerical/Bookkeeper

(B) Training of Tribal Officials and Staff

(C) Management Systems/includes Certification

(D) Funds to cover office costs, such as:

—Supplies
—Equipment/Furniture
—Telephone
—Utilities
—Space
—Postage

(ii) A description of how the grant funds will be used to overcome the problems or meet the needs which have been identified.

(iii) A schedule for the start and projected completion dates for actions or efforts to be taken to resolve problems or meet needs identified under the proposed grants.

(iv) A description of the personnel required, if any, to carry out grant activities and/or objectives; also provide position descriptions which include qualifications for education and experience.

(v) A detailed description of how grant funds will be used, if applicable, in coordination with, or to supplement, grants and/or contracts or funds from other agencies.

(vi) A budget justification which indicates how grant funds will be used to carry out the actions or efforts and achieve the goals and objectives of the proposed grant.

(b) Basic Small Tribes Component

(i) In addition to the basic eligibility criteria in section B(2), above, to be eligible to receive a grant under this component a tribe must furnish documents such as audits, reports, and correspondence which indicate difficulties in the performance Federal and State grants, programs and contracts, examples include, but are not limited to the following:

(A) Current Audit Report indicates serious financial management problems;

(B) Delinquency in making progress or financial status reports;

(C) Failure to close-out program grants or contracts which are no longer in operation;

(D) Problems in achieving current or past grant or contract program goals or objectives.

(ii) Tribal applicants may propose to meet their respective core administrative or management needs in a variety of ways. Tribes must provide a statement of specific needs or problems to be addressed under the proposed grant which may include, but not be limited to, the following:

(A) Employ an administrator and/or necessary support staff;

(B) Employ a bookkeeper;

(C) Hire a "Circuit Rider" accountant, administrator, planner and/or other key staff position to meet the needs of a multi-tribal consortium;

(D) Employ staff to address specific managerial problems under a one-time only grant;

(E) Retain an accountant to prepare for the conduct of annual independent audits and/or to correct current or past audit deficiencies.

(iii) A statement of specific needs and/or problems to be addressed under the proposed grants.

(iv) A description of how the grant funds will be used to overcome the problems or meet the needs which have been identified.

(v) A schedule for the start and projected completion dates for actions or efforts to be taken to resolve problems or meet needs identified under the proposed grants.

(vi) A description of the personnel required, if any, to carry out grant activities and/or objectives; also provide position descriptions which include qualifications for education and experience.

(vii) A detailed description of how grant funds will be used, if applicable, in coordination with, or to supplement, grants and/or contracts or funds from other agencies.

(viii) A budget justification which indicates how grant funds will be used to carry out the actions or efforts and achieve the goals and objectives of the proposed grant.

(c) Expansion/Enhancement Component

(i) Tribal applicants may propose to meet their respective expansion or enhancement needs in a variety of ways. Such grants may be used by a tribe to centralize or consolidate all of its administrative functions, to consolidate or integrate federal programs serving the tribe as well as formulate short and long range plans for tribal governmental development including enhancing a tribe's ability to exercise it's authority.

(ii) Expansion/enhancement grants permit, but are not limited to, the following:

(A) Monitor, evaluate, plan and design or redesign federal programs serving the tribe;

(B) Assume more control over programs designed to serve tribal populations, diminishing federal domination over programs serving Indians;

(C) To assist tribes in their efforts to reduce dependence on federal grants or contracts for services, income, and employment opportunities.

(iii) A work statement of how the applicant will accomplish the goals and objectives under the proposed grant.

(iv) A description of how the grant funds will be used to meet the goals and objectives identified under the proposed grant.

(v) A schedule for the start and projected completion dates for actions or efforts to be taken to meet the goals and objectives identified under the proposed grant.

(vi) A description of the personnel required, if any, to carry out grant activities and/or objectives; also provide position descriptions which include qualifications for education and experience.

(vii) A detailed description of how grant funds will be used, if applicable, in coordination with, or to supplement, grants and/or contracts or funds from other agencies.

(viii) A budget justification which indicates how grant funds will be used to carry out the actions or efforts and achieve the goals and objectives of the proposed grant.

(2) The applicant must indicate how other available resources such as tribal income, other Bureau grants or capacity

building grants from other agencies will be committed to complement or support this effort.

(3) The applicant must make a written commitment to incorporate and maintain the positive results expected from the grant and to maintain sound management systems.

(4) The applicant must certify that no elected tribal official will receive a salary or any other form of compensation from a grant under this Announcement.

(5) If a tribe's application is prepared by an outside consultant, the application must indicate the role of the grant preparer to the tribe during the grant period; e.g., will the preparer be funded through the proceeds of the grant as a consultant, full time employee, part time employee, etc.

(6) The grantee must agree in its application to submit quarterly financial status and progress reports;

(7) Progress and accomplishment reports for a prior year grant must be submitted with an application for a continuation grant. Reports will be used in the rating of continuation grant applications, appropriations permitting, since subsequent grants will include performance as a criteria for grant renewal.

(8) The applicant must complete a certification regarding drug-free workplace requirements.

(9) The grant funds awarded under this Announcement may be used as matching shares for any other federal or non-federal grant programs which contribute to the purposes for which these grants are made.

D. Application Review and Rating

Applications submitted in response to this Announcement will be received and rated as follows:

(1) Agency Office Responsibility

Applications shall initially be submitted to the appropriate agency Superintendent for review and comment, with a recommendation to approve or disapprove the application to insure that the application is consistent with the conditions set forth in Sections A, B, and C of this Announcement. The Superintendent upon receipt of the application shall:

(a) Acknowledge in writing receipt of the application within five (5) calendar days of its arrival at the agency office.

(b) Review the application for completion of information and, within ten (10) calendar days, request any additional information which may be required to conduct a review of the application.

(c) If the application is sufficiently complete, forward it to the Area Director with comments and recommendations to approve or disapprove within fifteen (15) calendar days.

(d) In instances where disapproval of an application is recommended, the Superintendent shall provide detailed reasons for the recommendation.

(2) Area Office Responsibility

Upon receipt of the application the Area Director shall:

(a) Within fifteen (15) calendar days, conduct a review of each application for consistency with Sections A, B, and C of this Announcement, in this review the Area Director shall utilize the comments and recommendations from the agency Superintendent.

(b) Upon completion of the application review process, the Area Director shall rate each application based on the criteria set forth in Sections A, B, and C of this Announcement in accord with the following guidelines:

(i) Developmental Component

(A) Criteria—the applicant can document or demonstrate it satisfies 3 or more of the needs contained in Section B (1). Points: (0–35)

(B) Work Statement—the application work plan describes in detail how it will satisfy the goals and objectives of the proposed grant. The work plan contains a schedule of activities, which if executed properly will accomplish the goals and objectives of the proposed grant. Points: (0–35)

(C) Budget Justification—the application contains a line item budget with a separate narrative explaining each cost item and how such costs are reasonable. Points: (0–15)

(D) Management or Self-Monitoring System—the application indicates how the grantee will monitor progress in achieving grant objectives and how corrective action will be taken, if necessary. Points: (0–15)

(ii) Basic Small Tribes Component

(A) Purpose—applications most consistent with the purpose of this component of the program will receive higher ratings than those which are for the purpose of purchasing professional expertise or equipment. An application for staff with a sound position description would rate higher than one used to hire a consultant since a good staff person will enable the grantee to meet the grant objectives on a more permanent basis. Points: (0–10)

(B) Need/Problem Statement—the applicant can document or demonstrate it satisfies all of the criteria contained in Section B (2). Points: (0–30)

(C) Work Statement—the application work plan describes in detail how it will meet the needs or overcome problems cited in (B), above. The work plan contains a schedule of activities, which if executed properly will accomplish the objectives and goals of the proposed grant. Points: (0–35)

(D) Budget Justification—the application contains a line item budget with a separate narrative explaining each cost item and how such costs are reasonable. Points: (0–10)

(E) Management or Self-Monitoring System—the application indicates how the grantee will monitor progress in achieving grant objectives and how corrective action will be taken, if necessary. Points: (0–15)

(iii) Expansion/Enhancement Component

(A) Purpose—applications most consistent with the purpose of this component of the program and those with clearly stated developmental objectives will receive higher ratings than those which are for the purpose of purchasing professional expertise or equipment. Points: (0–25)

(B) Work Statement—the application work plan describes in detail how it will accomplish the purpose and objectives of the application cited in (A), above. The work plan contains a schedule of activities, which if executed properly will accomplish the objectives and goals of the proposed grant. Points: (0–40)

(C) Budget Justification—the application contains a line item budget with a separate narrative explaining each cost item and how such costs are reasonable. Points: (0–20)

(D) Management or Self-Monitoring System—the application indicates how grantee will monitor progress in achieving grant objectives and how corrective action will be taken, if necessary. Points: (0–15)

(c) Upon completion of the application review and rating process the Area Director shall, within fifteen (15) calendar days, initiate one of the following actions:

(i) Approve the application for funding based on the Superintendent's recommendation and the Area Office review and rating process.

(ii) Disapprove the application based on the Area Office review and rating process. Notify the applicant by explanatory letter of the decision to disapprove the application, advising the applicant of its appeal rights.

d. Within thirty (30) calendar days of notification of approval of a grant, the Area Director shall award the grant funds to the successful tribal applicant.

E. Other Conditions

(1) Appeals from administrative decisions made by the Bureau of Indian Affairs shall be made under provisions as set forth in 25 CFR, part 2. Send appeals to the appropriate Area Office. The Area Office will forward the appeals to: Office of Hearings and Appeals, Board of Indian Appeals, Attention: Kathryn A. Lynn, Chief Administrative Judge, 4015 Wilson Boulevard, MS–1103, Ballston Tower No. 3, Arlington, Va 22203.

(2) Unresponsive applications will not be reviewed or rated, and there shall be no appeal rights for non-funding of such applications. An unresponsive application is an application without a current tribal council or governing body resolution; an application requesting a grant where the anticipated grant outcomes have no relationship to the purposes of these grants; e.g., to fund and/or augment the funding of a wildlife and parks program grant, etc.

(3) Applicants should submit an original and two copies of their applications.

(4) No indirect cost funds shall be provided for grants under this Announcement.

(5) Tribal applicants may request grant funds up to a maximum of $35,000.

G. Submission of Applications

Applications submitted in response to this Announcement must be:

(1) Postmarked no later than midnight February 28, 1994, if mailed;

(2) Received in the agency office no later than the close of business February 28, 1994, if hand delivered. Send appeals to the appropriate area office.

Marshall M. Cutsforth,

Acting Assistant Secretary—Indian Affairs.

Department of the Interior

Bureau of Indian Affairs

Training and Technical Assistance Grant and Planning Grant Programs; Notice

VOL 58 ISS 247 DEC 28 1993 UMI

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Training and Technical Assistance Grant and Planning Grant Programs

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability of discretionary grant funds for federally recognized Indian tribes.

SUMMARY: The Bureau of Indian Affairs invites applications from Indian tribes within the contiguous 48 United States and Alaska, for two (2) separate grant programs. The purposes of these grant programs are: (1) To allow tribes to address governmental and/or program operational problems through technical assistance grants; and, (2) to monitor, contract, plan, design or redesign programs serving the tribe under a planning grant. Grant awards will be made on a competitive basis under criteria, terms, and conditions set forth in this Announcement. Such grants are authorized by Section 103 of the Indian Self-Determination and Education Assistance Act of 1975, Public Law 93–638, as amended by Public Law 100–472, Public Law 101–301 and Public Law 101–644. This Notice is published in exercise of the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.1.

DATES: The closing date for submission of applications under this Announcement is 60 days from the publication date of this Announcement in the **Federal Register**.

ADDRESSES: Applications should be sent to the appropriate Bureau of Indian Affairs Area Office listed below.

Aberdeen Area Office

Diane Turgeon, 115 4th Avenue, SE., Aberdeen, SD 57401–4382, Telephone: (605)226–7426

Albuquerque Area Office

Karen Foster, 615 1st Street, NW., Box 265, Albuquerque, NM 87125–6567, Telephone: (505)766–3172 or 766–2559

Minneapolis Area Office

Stuart Mani, 331 South 2nd Avenue, Minneapolis, MN 55401–2241, Telephone: (612)373–1031

Muskogee Area Office

Edward L. Lowery, 101 North 5th Street, Muskogee, OK 74401–6206, Telephone: (918)687–2447

Anadarko Area Office

Terry Bruner, WCD Office Complex, Box 368, Anadarko, OK 73005–0368, Telephone: (405)247–6673 ext. 209

Billings Area Office

Henry Graham, 316 North 26th Street, Billings, MT 59101, Telephone: (406)657–6313

Eastern Area Office

Larry Blair, 3701 N Fairfax Dr, MS–260–VA-SQ, Arlington, VA 22203, Telephone: (703)235–2443

Timothy R. Brown, 911 NE. 11th Avenue, Portland, OR 97232–4169, Telephone: (503)231–6702

Sacramento Area Office

Joan Burcell, 2800 Cottage Way, Sacramento, CA 95825–1884, Telephone: (916)978–4590

SUPPLEMENTARY INFORMATION:

A. Purpose of the Grant Programs

The purpose of the grant programs under this Announcement is twofold: (1) To allow tribes to address needs and/or problem areas associated with governmental affairs, program administration and operations, and/or service delivery; and, (2) to permit tribes to monitor, evaluate, plan and design or redesign the federal programs serving them.

Each of these grant initiatives has its own criteria and guidelines which are designed to accomplish specific objectives for a targeted subgroup of tribes. For instance, the criteria for training and technical assistance grants requires that the tribal applicants document specific needs and/or problems and devise step-by step strategies to satisfy the needs or resolve the problems which are impediments to their growth. Using the same principle, criteria for planning grants were formulated to specify that these grants would be awarded to the most capable tribes. These are tribes not normally in need of strategical technical assistance since they generally have clean audits, operate mature contracts and have the reputation of administering "good" programs and service delivery systems. Tribes most capable of planning and operating programs may receive planning grants for comprehensive program planning, program redesign, as well as planning for reservation resources development.

To accomplish these ends, the Bureau of Indian Affairs announces the availability of up to $2.0 Million for the two (2) grant programs.

B. Training and Technical Assistance Grant Program

(1) Purpose of the grant program

The purpose of this grant program is to allow tribes to address needs and/or problems associated with governmental affairs, program administration and operations, and/or service delivery. Such grants will enable tribes to resolve present and past problems thereby permitting grantee tribes to improve conditions, advance their movement toward self-sufficiency, and to exercise a greater degree of self-determination in the operation of programs designed to benefit their membership and/or other resident Indian peoples.

(2) Eligibility criteria

To receive a training and technical assistance grant, a tribe, including an authorized tribal organization, must be able to document and/or demonstrate its needs utilizing five (5) or more of the following identifying conditions or criteria:

(a) The current organization-wide, single audit report findings contain significant and/or material audit exceptions;

(b) Correspondence or other documentation that the tribe is not presently capable of withstanding an organization-wide single audit. This means that:

(i) The tribe's books or records are missing, incomplete or are not in reviewable condition and/or in a condition to sustain a full audit;

(ii) The tribe has not met specific audit requirements for a federal program it operates although the program is complete and an audit is due; and/or

(iii) The tribe has been notified it cannot receive an initial or continuation grant or contract from one (1) or more agencies due to outstanding audits and/or audit exceptions;

(c) The tribe has had debt collection notices and/or notification it cannot receive a grant or contract until an approved corrective action plan which has the potential to resolve current and/or past audit exceptions is formulated and is in place;

(d) The tribe is unable to accomplish current or past grant/contract objectives and/or is not capable of preparing successful grant/contract applications;

(e) The tribe is not able to operate properly under its management systems although the systems have been approved as satisfying regulatory requirements;

(f) The tribal government has little or no control over its various program operations, thus no control over service delivery, and cost overruns, etc.;

(g) The tribal government needs help but is in such a state it is unable to indicate the type or amount of assistance needed;

(h) The tribal government is experiencing serious internal strife and the tribe is paralyzed with political factionalism which results in the deterioration of its government as well as its program or service delivery systems.

(3) Continuation grants

In cases where a continuation grant is requested, documentation of the prior year's performance is an additional requirement. A continuation grant application must document that the applicant tribe has accomplished, or can demonstrate that it has made substantial progress toward accomplishing its prior year's grant objectives in order to receive a continuation grant. Prior year quarterly and annual progress and/or accomplishment reports must be submitted with the application for a continuation grant. To document continuing needs or problems, the applicant may furnish new Office of Management and Budget (OMB) Circular A–128 organization-wide single audit reports, OMB Circular A–123 internal control reviews, Area and/or Agency Office monitoring reports reflecting the existence of problems or poor program performance, and/or Office of the Inspector General (OIG) or General Accounting Office (GAO) reports. Further, evidence that one (1) or more federal agencies have initiated debt collection action against the applicant tribe and will not renew or award any new grants or contracts to the applicant tribe until the debt is cleared.

(4) Content of application

Applications for a training and technical assistance grant must:

(a) Contain a current tribal council resolution which specifically authorizes the preparation of an application for a training and technical assistance grant.

(b) Contain a written commitment to use the training and technical assistance grant to address the needs and/or problems cited in the section B(2) of this Announcement.

(c) Follow the application requirements set forth in Office of Management and Budget Circular A–102, Uniform Requirements for Assistance to State and Local Governments (The Common Rule), and as implemented within the Department of the Interior in 43 CFR part 12. Under Part IV of Standard Form 424, Program Narrative Statement, applicants shall provide the following:

(i) A statement of specific needs and/or problems to be addressed under the proposed grant along with the documentation used to support the needs or problems statement; e.g., OMB Circular A–128 Audit Reports;

(ii) A description of how the grant funds will be used to overcome the problems or meet the needs which have been identified;

(iii) A schedule for the start and projected completion dates for actions or efforts to be taken to resolve problems or meet needs identified under the proposed grants;

(iv) A description of the personnel required, if any, to carry out grant activities and/or objectives; and provide position descriptions which include qualifications for education and experience;

(v) A line item budget, with narrative justification, to demonstrate how grant funds will be used to carry out the actions or efforts and achieve the goals and objectives of the proposed grant, and that costs associated with the grant application are reasonable, allowable and allocable to the program in terms of the cost principles found in OMB Circular A–87, Cost Principles for State and Local Governments.

(d) The applicant must indicate how other available resources such as tribal income, other Bureau grants or capacity building grants from other agencies will be committed to complement or support this effort.

(e) The applicant must make a written commitment to maintain the positive results expected from the grant.

(f) The applicant must certify that no elected tribal official will receive a salary or any other form of compensation from a grant under this Announcement.

(g) If a tribe's application is prepared by an outside consultant, the application must indicate the role of the grant preparer to the tribe during the grant period; e.g., will the preparer be funded through the proceeds of the grant as a consultant, full-time employee, parttime employee, etc.

(h) The grantee must agree in its application to submit quarterly financial status and progress reports.

(i) The applicant must complete a Certification regarding drug-free workplace requirements.

(j) No indirect cost funds shall be provided for grants under this Announcement.

(5) Other conditions

(a) Contain the vitae or resumes of project staff and/or third party technical assistance providers or, if the project staff and/or third party technical assistance providers have not been selected, a description of the qualifications and experience necessary for project staff and/or third party technical assistance providers to accomplish the tribe's grant objectives;

(b) A tribe making application for the purchase of third party technical assistance must agree to develop a plan for delivery of technical assistance which contains a schedule of activities and clearly indicates the person(s) responsible for carrying out each of the grant activities;

(c) Deviation or non-adherence to the technical assistance plan by the technical assistance provider can result in nonpayment to the technical assistance provider.

(d) The funds awarded under this Announcement may be used as matching shares for any other federal or non-federal grant programs which contribute to the purposes for which these grants are made.

(6) Review, rating and approval of applications for training and technical assistance grants

An original and two (2) copies of the training and technical assistance grant application are to be submitted to the local Agency Office. Applications submitted in response to this Announcement will be received, reviewed, and rated as follows:

(a) Application Review Process

(i) Agency office responsibility. Applications shall be submitted to the appropriate Agency Superintendent for review and comment. The Superintendent upon receipt of the application shall:

(A) Acknowledge, in writing, receipt of the application within five (5) calendar days of its arrival at the Agency office.

(B) Review the application for completeness of information and to insure that the application is consistent with the conditions set forth in Sections B(1) through B(5) of this Announcement. Within ten (10) calendar days of its arrival in the Agency office, request any additional information which may be required to conduct a review of the application.

(C) If the application is sufficiently complete, forward it to the Area Director with comments and recommendations for approval or disapproval within fifteen (15) calendar days of its receipt.

(D) In instances where disapproval of an application is recommended, the Superintendent shall provide detailed reasons for the recommendation.

(ii) Area office responsibility. Upon receipt of the application the Area Director shall:

(A) Within fifteen (15) calendar days, conduct a review of each application for consistency with Sections B(1) through B(5) of this Announcement. In this review the Area Director shall utilize the comments and recommendations from the Agency Superintendent.

(B) Exception in this application review process. An application for a technical assistance grant received from a tribe experiencing internal strife may be recommended for approval based on the Area Director's judgment that the applicant tribe is making a serious effort to resolve its internal problems. Further, it must be clearly documented in the application that the tribal factions will accept third party intervention in an attempt to resolve the problems causing the internal strife.

(b) Application Rating Process

(i) Upon completion of the application review process the Area Director shall rate each application based on the criteria set forth in Sections B(1) through B(5) of this Announcement.

(ii) Applications shall be rated in accordance with the following guidelines:

(A) *Criteria—Need/Problem:* the applicant can furnish documentation or demonstrate it has five (5) or more of the identifying conditions or criteria listed in section B(2) of the Training and Technical Assistance Grant program. *Points* (0–30)

(B) *Criteria—Work Statement:* the application work plan describes in detail how it will meet the needs or overcome problems cited in criteria (A). The work plan also contains a schedule of activities, which if executed properly, will accomplish the goals and/or objectives of the grant. *Points* (0–30)

(C) *Criteria—Applicant Capability:* the application contains the vitae or resumes of project staff and/or third party technical assistance providers or, if the project staff and/or third party technical assistance providers have not been selected, a description of the qualifications and experience necessary for project staff and/or third party technical assistance providers to accomplish the grant objectives. *Points* (0–15)

(D) *Criteria—Budget Justification:* the application contains a line item budget with a separate narrative explaining each cost item and how such costs are reasonable. *Points* (0–10)

(E) *Criteria—Management or Self-Monitoring System:* the application indicates how the grantee will monitor progress in achieving grant objectives and how corrective action will be taken, if necessary. *Points* (0–15)

(c) Application Approval Process

Upon completion of the application review and rating process the Area Director shall, within fifteen (15) calendar days, initiate one of the following actions:

(i) Approve the application for funding based on the Superintendent's recommendation and the Area Office review and rating process.

(ii) Disapprove the application based on the Area Office review and rating process. Notify the applicant by letter of the specific reason for the disapproval of the application; advise the applicant of its appeal rights.

(d) Within thirty (30) calendar days of notification of approval of a grant, the Area Director shall award the grant funds to the successful tribal applicant.

(7) Schedule for the Receipt of Training/Technical Assistance Grant Applications

Area Offices are to formally notify Agency Offices and tribes that this program exists in FY 1994, immediately upon the receipt of this Announcement. Area Offices shall provide copies of the grant criteria and all other pertinent information to all Agency Offices and tribes in an Area Office's jurisdiction.

(8) Submission of applications for training and technical assistance grants

Applications submitted in response to this Announcement must be:

(a) Postmarked no later than midnight February 28, 1994, if mailed;

(b) Received in the Agency office no later than the close of business February 28, 1994, if hand delivered.

(9) Appeals

Appeals of administrative actions by the Bureau of Indian Affairs on training/technical assistance grant applications are governed by part 2 of 25 CFR.

C. Planning Grant Program

(1) Purpose of the grant program

To allow tribes to assume more control over programs designed to serve tribal populations, generally diminishing federal domination over programs serving Indians.

A planning grant may be used by a tribe to centralize or consolidate all of its administrative functions, to consolidate or integrate federal programs serving the tribe, as well as formulate short and long-range plans for reservation resources development.

(2) Eligibility criteria

Tribes receiving planning grants must not only be capable of developing plans, they must also be capable of successfully implementing the plans.

(a) To receive a planning grant a tribe must:

(i) Survey or inform its reservation or community population that the tribe wishes to plan, and carry out such plans as may be developed, to make significant changes in its programs and its service delivery to Indian beneficiaries;

(ii) Have no significant or material audit exceptions noted in any and all current cost audits and/or the current OMB Circular A–128 organization-wide single audit report;

(iii) Administer mostly "mature" contracts; i.e., those meeting the definitions of "mature" as found in Public Law 93–638, as amended;

(iv) Have a history of operating or administering federal programs and services in a sound manner;

(v) Have a stable tribal government as evidenced by a tribe's not having made radical, unplanned changes in program direction which have resulted in the diminishment of services to Indian beneficiaries and resulted in significant audit exceptions under criteria (ii), above;

(b) When a tribe is requesting a planning grant which encompasses activities identified as reservation resources development, the tribe must also satisfy one (1) or more of the following additional conditions:

(i) The tribe has successfully administered other developmental projects and has done so without governmental or political interference;

(ii) The tribe's plan reflects its willingness to accept guidance and assistance for the modification, if necessary, of its comprehensive development plans from subject matter experts; and/or

(iii) The tribe's plan reflects its willingness to accept monitoring and technical assistance as may be arranged by subject matter experts to ensure the best opportunity for success of the grant activity.

(3) Continuation grants

In cases where a continuation grant is requested, documentation of the prior year's performance is an additional requirement. A continuation grant Application must document that the applicant tribe has accomplished, or is able to demonstrate that it has made substantial progress toward accomplishing, its prior year's grant objectives in order to receive consideration for approval of a continuation grant. Prior year quarterly and annual progress and/or accomplishment reports must be submitted with the application for a continuation grant.

(4) Application content

Applications for a planning grant must:

(a) Follow the application requirements set forth in Office of Management and Budget Circular A–102, Uniform Requirements for Assistance to State and Local Governments (The Common Rule), as implemented within the Department of the Interior in 43 CFR part 12. Under Part IV of Standard Form 424, Program Narrative Statement, the grant application must:

(i) Contain a current tribal council resolution which specifically authorizes the preparation of an application for a planning grant;

(ii) Contain a clear statement of the goals and objectives to be achieved through the proposed grant along with the rationale to support the goals and objectives proposed;

(iii) Contain a program narrative which describes, step-by-step how and by whom the goals and objectives of the grant project will be satisfied;

(iv) Contain the vitae or resumes of project staff and/or third party technical assistance providers or, if project staff and/or third party technical assistance providers have not been selected, a description of the qualifications and experience necessary for project staff and/or third party technical assistance providers to accomplish the grant objectives; and,

(v) A line item budget, with narrative justification, to demonstrate that costs associated with the grant application are reasonable, allowable and allocable to the program in terms of the cost principles found in OMB Circular A–87, Cost Principles for State and Local Governments.

(b) Contain a schedule for the start and projected completion dates for actions or efforts to be taken to meet the goals and objectives identified under the proposed grant.

(c) A description of the personnel required, if any, to carry out grant activities and/or objectives and provide position descriptions which include qualifications for education and experience.

(d) A detailed description of how grant funds will be used, if applicable, in coordination with, or to supplement, other Bureau grants and/or contracts or other capacity building grants from other agencies.

(e) The applicant must certify that no elected tribal official will receive a salary or any other form of compensation from a grant under this Announcement.

(f) If a tribe's application is prepared by an outside consultant, the application must indicate the role of the grant preparer to the tribe during the grant period; e. g., will the preparer be funded through the proceeds of the grant as a consultant, full-time employee, part-time employee, etc.

(g) The grantee must agree in its application to submit quarterly financial status and progress reports.

(h) Progress and accomplishment reports for a prior year grant must be submitted with an application for a continuation grant which will be used for rating of the continuation grant applications, appropriations permitting, since subsequent grants will include performance as a criteria for grant renewal.

(i) The applicant must complete a Certification regarding drug-free workplace requirements.

(j) No indirect cost funds shall be provided for grants under this Announcement.

(5) Other Conditions

(a) A tribe's application for the purpose of planning must clearly outline a monitoring schedule for planning activities and clearly indicate the person(s) responsible for carrying out each of the grant activities;

(b) Deviation or non-adherence to the planning schedule by a technical assistance provider can result in nonpayment to the provider;

(c) The funds awarded under this Announcement may be used as matching shares for any other federal or non-federal grant programs which contribute to the purposes for which these grants are made.

(6) Review, Rating and Approval of Application for Planning Grants

An original and two (2) copies of the planning grant application are to be submitted to the local Agency Office. Applications submitted in response to this Announcement will be received, reviewed, and rated as follows:

(a) Application Review Process

(i) Agency office responsibility. Applications shall be submitted to the appropriate Agency Superintendent for review to determine if the application is consistent with the conditions set forth in sections C(1) through C(5) of this Announcement. The Superintendent upon receipt of the application shall:

(A) Acknowledge, in writing, receipt of the application within five (5) calendar days of its arrival at the Agency office.

(B) Review the application for completeness of information and, within ten (10) calendar days of its arrival at the Agency office, request any additional information which may be required to conduct a review of the application.

(C) If the application is sufficiently complete, forward it to the Area Director with comments and recommendations for approval or disapproval within fifteen (15) calendar days of its receipt.

(D) In instances where disapproval of an application is recommended, the Superintendent shall provide detailed reasons for the recommendation.

(ii) Area office responsibility. Upon receipt of the application the Area Director shall within fifteen (15) calendar days, conduct a review of each application for consistency with sections C(1) through C(5) of this Announcement. In this review the Area Director shall utilize the comments and recommendations from the Agency Superintendent.

(b) Application Rating Process

(i) Upon completion of the application review process the Area Director shall rate each application based on the criteria set forth in Sections C(1) through C(5) of this Announcement.

(ii) Applications shall be rated in accordance with the following guidelines:

(A) *Criteria—Work statement:* the application work plan describes in detail how it will achieve the goals and objectives specified in the proposed Planning Grant. The work plan also contains a schedule of activities, which if executed properly, will accomplish the objectives and/or goals of the proposed Planning Grant. *Points* (0–40)

(B) *Criteria—Applicant capability:* (1) The applicant must furnish documentation of operating mostly mature contracts and an A–128 Audit Report; (2) application contains the vitae or resumes of project staff and/or third party technical assistance providers or, if project staff and/or third party technical assistance providers have not been selected, a description of the qualifications and experience of project staff and/or third party technical assistance providers necessary to accomplish the grant objectives. *Points* (0–25)

(C) *Criteria—Budget justification:* the application contains a line item budget with a separate narrative explaining each cost item and how such costs are reasonable. *Points* (0–15)

(D) *Criteria—Management or self-monitoring system:* the application indicates how the grantee will monitor progress in achieving grant objectives and how corrective action will be taken, if necessary. *Points* (0–20)

(c) Application approval process

Upon completion of the application review and rating process the Area Director shall, within fifteen (15) calendar days, initiate one of the following actions:

(i) Approve the application for funding based on the Superintendent's recommendation and the Area Office review and rating process.

(ii) Disapprove the application based on the Area Office review and rating process. Notify the applicant by letter of the specific reasons for the decision to disapprove the application, advising the applicant of its appeal rights.

(d) Within thirty (30) calendar days of notification of approval of a grant, the Area Director shall award the grant funds to the successful tribal applicant.

(7) Schedule for the Receipt of Planning Grant Applications

Area Offices are to formally notify Agency Offices and tribes that this program exists in FY 1994, immediately upon the receipt of this Announcement. Area Offices shall provide copies of the grant criteria and all other pertinent information to all Agency Offices and tribes in an Area Office's jurisdiction.

(8) Submission of Applications for Planning Grants

Applications submitted in response to this Announcement must be:

(a) Postmarked no later than midnight February 28, 1994, if mailed;

(b) Received in the Agency office no later than the close of business February 28, 1994, if hand delivered.

Appeals: Appeals of Administrative actions by the Bureau of Indian Affairs on planning grant applications are governed by part 2 of 25 CFR.

Dated: December 17, 1993.

Marshall M. Cutsforth,

Acting Assistant Secretary—Indian Affairs.

Title 3—

The President

Executive Order 12886 of December 23, 1993

Adjustments of Rates of Pay and Allowances for the Uniformed Services

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 601 of Public Law 103–160, it is hereby ordered as follows:

Section 1. The rates of monthly basic pay (37 U.S.C. 203(a)), the rates of basic allowances for subsistence (37 U.S.C. 402), and the rates of basic allowances for quarters (37 U.S.C. 403(a)) for members of the uniformed services are adjusted as set forth on the schedule attached hereto and made a part hereof.

Sec. 2. The adjustments in rates of monthly basic pay and allowances for subsistence and quarters set forth on the attached schedule are effective on January 1, 1994.

Sec. 3. Section 4 and Schedule 8 of Executive Order No. 12826 of December 30, 1992, are superseded.

William J. Clinton

LIST OF PUBLIC LAWS

Note: The list of Public Laws for the first session of the 103d Congress has been completed and will resume when bills are enacted into law during the second session of the 103d Congress, which convenes on January 25, 1994.

Last List December 23, 1993

VOL 58 ISS 247 DEC 28 1993 UMI

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

SUPPLEMENT: Revised January 1, 1993

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

(TWO BRIEFINGS)

WHEN: January 13 at 9:00 am and 1:30 pm

WHERE: Office of the Federal Register, 7th Floor Conference Room, 800 North Capitol Street NW, Washington, DC (3 blocks north of Union Station Metro)

RESERVATIONS: 202–523–4538

Printed on recycled paper containing 100% post consumer waste

Rules and Regulations

Federal Register
Vol. 58, No. 248
Wednesday, December 29, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206–AF73

Prevailing Rate Systems; Definition of Santa Clara, CA, Wage Area to Alameda-Contra Costa, CA, Wage Area

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management (OPM) is issuing an interim regulation to abolish the Santa Clara, California, Nonappropriated Fund (NAF) wage area for pay-setting purposes. The Santa Clara wage area is composed of Santa Clara County (survey area) and San Mateo County (area of application). The current host activity for the Santa Clara wage area survey, Naval Air Station (NAS) Moffett Field, will close on July 1, 1994, and does not have the capability to carry out the local wage survey scheduled to begin in the Santa Clara wage area in September 1993. No other installation in the Santa Clara wage area has the capability to conduct a wage survey. This regulation redefines Santa Clara and San Mateo Counties to the area of application of the Alameda-Contra Costa, California, wage area.

DATES: This interim rule is effective on September 1, 1993. Comments must be received on or before January 28, 1994.

ADDRESSES: Send or deliver comments to Barbara L. Fiss, Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, room 6H31, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Mark Allen (202) 606–2848.

SUPPLEMENTARY INFORMATION: The Santa Clara, California, wage area is currently defined as a separate wage area for FWS pay-setting purposes. The Department of Defense notified OPM that the facilities of the host activity for the Santa Clara wage area, NAS Moffett Field, will be transferred to the National Aeronautics and Space Administration on July 1, 1994. Downsizing is underway and NAS Moffett Field, with 27 or fewer NAF employees, does not have the capability to conduct the wage survey required to begin in the Santa Clara wage area in September 1993 in accordance with appendix B to subpart B of part 532, title 5, Code of Federal Regulations. No other Federal activity in the Santa Clara wage area has the capability to conduct a local wage survey. The two counties currently constituting the Santa Clara wage area, Santa Clara and San Mateo, must therefore be combined with another wage area for pay-setting purposes.

The following criteria are taken into consideration when two or more counties are combined to constitute a single wage area:

(1) Proximity of largest activity in each county;

(2) Transportation facilities and commuting patterns; and

(3) Similarities of the counties in:

(i) Overall Population;

(ii) Private employment in major industry categories; and

(iii) Kinds and sizes of private industrial establishments.

Geographically, NAS Moffett Field in Santa Clara County if about the same distance from the Oakland Army Base, host installation for the Alameda-Contra Costa wage area (approximately 68 km (42 miles)), and the Presidio of San Francisco, host installation for the San Francisco, California, wage area (approximately 69 km (43 miles)). Transportation facilities do not favor redefining Santa Clara to one wage area over any other. Commuting patterns for both out-commuters and in-commuters favor the Alameda-Contra Costa wage area. Santa Clara County, population 1,497,577, is more similar in overall population to the Alameda-Contra Costa wage area (2,082,905) than to the San Francisco wage are (723,959). Santa Clara County is also most similar to the Alameda-Contra Costa wage area in terms of kinds and sizes of private industrial establishments. In summary, the regulatory criteria favor redefining Santa Clara County to the Alameda-Contra Costa wage area.

Geographically, the Menlo Park Department of Veterans Affairs (VA) Medical Center in San Mateo County is about the same distance from the Oakland Army Base in the Alameda-Contra Costa wage area (approximately 58 km (36 (miles)) and the Presidio of San Francisco in the San Francisco wage area (approximately 56 km (35 miles)). Transportation facilities do not favor either wage area over the other. Commuting patterns for out-commuters favor the San Francisco wage area, while commuting patterns for in-commuters only slightly favor the San Francisco wage area. San Mateo County, population 649,623, is more similar in overall population to the San Francisco wage area (723,959) than to the Alameda-Contra Costa wage area (2,082,905). San Mateo County is also most similar to the San Francisco wage area in terms of kinds and sizes of private industrial establishments.

Although this examination of regulatory criteria slightly favors redefining San Mateo County to the San Francisco wage area, an important additional consideration also applies in this case. The sole NAF employer in San Mateo County, the VA Medical Center near Menlo Park (psychiatric hospital), is an administrative division of the Palo Alto VA Medical Center (general hospital) in Santa Clara County. Only about five kilometers (3 miles) separate the two hospitals and the Menlo Park hospital is located only 1 kilometer (about one-half mile) inside the San Mateo County line.

All NAF employees at the two hospitals work in similar occupations in hospital canteens and are currently paid from the same wage schedule. Given the organizational relationship and minimal distance between the two VA facilities, changing the historic uniformity of pay treatment could be disruptive to personnel management in the two hospitals. These additional considerations indicate that San Mateo County should be redefined to the Alameda-Contra Costa wage area.

Based on this review of the criteria for establishing and combining wage areas, we find that the Santa Clara, California, wage area should be abolished as of September 1, 1993. As requested by the Department of Defense and Department

of Veterans Affairs, employees paid from the current Santa Clara, California, wage schedule will remain on their current schedule until the next wage schedule for the Alameda-Contra Costa wage area becomes effective on the first day of the first pay period beginning on or after January 1, 1994.

The Federal Prevailing Rate Advisory Committee reviewed this request and recommended approval by consensus.

Pursuant to sections 553(b)(3)(B) of title 5, United States Code, I find that good cause exists for waiving the general notice of proposed rulemaking to accommodate changes necessitated by Department of Defense downsizing and expedite this wage area redefinition. Also, pursuant to section 553(d)(3) of title 5, United States Code, I find that good cause exists for making this rule effective in less than 30 days. The notice is being waived and the regulation is being made effective in less than 30 days to avoid the expenditure of resources needed to prepare for the required September 1993 survey of the Santa Clara, California, wage area. NAS Moffett Field is unable to function as the host activity for the survey and no other activity within the Santa Clara wage area has the capability to conduct the survey.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Lorraine A. Green,

Deputy Director

Accordingly, OPM is amending 5 CFR part 532 as follows:

PART 532—PREVAILING RATES SYSTEMS

1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 is also issued under 5 U.S.C. 552.

Appendix B to Subpart B—[Amended]

2. In appendix B to subpart B, the listing for the Santa Clara, California, wage area is removed.

3. Appendix D to subpart B is amended by removing the listing for the Santa Clara, California, wage area and by revising the wage area listing for the Alameda-Contra Costa, California, wage area to read as follows:

Appendix D to Subpart B of Part 532—Non-Appropriated Fund Wage and Survey Areas

* * * * *

BILLING CODE 6325–01–M

---

5 CFR Part 532

RIN 3206–AF72

Prevailing Rate Systems; Clark-Hardin-Jefferson, KY, NAF Wage Area

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management (OPM) is issuing an interim regulation to delete Clark County, Indiana, from the survey area of the Clark-Hardin-Jefferson, Kentucky, Federal Wage System (FWS) Nonappropriated Fund (NAF) wage area for pay-setting purposes. The wage area will be renamed Hardin-Jefferson, Kentucky. OPM recently learned that there are no longer any NAF wage employees in Clark County. Because by law FWS NAF wage areas consist only of areas having NAF employees, Clark County must be dropped from this wage area.

DATES: This interim rule becomes effective on December 29, 1993. Comments must be received by January 28, 1994.

ADDRESSES: Send or deliver comments to Barbara L. Fiss, Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, room 6H31, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Paul Shields, (202) 606–2848.

[1] Effective date January 1, 1994.

SUPPLEMENTARY INFORMATION: The Department of Defense notified OPM that the only NAF wage employees in Clark County, Indiana, were those employed by the Army and Air Force Exchange Service activity located at the Indiana Army Ammunition Plant, an activity that closed in July 1991.

Dropping Clark County from the survey area will not have a significant impact on the results of future wage surveys. Ft. Knox in Hardin County, Kentucky, employs 96 percent of the 676 NAF wage employees in the wage area. In the 1992 full-scale wage survey, only 176 (4.3 percent of the total) weighted matches were from firms in Clark County, Indiana. The remaining 2-county survey area will still meet the criteria in 5 CFR 532.219(b) for the establishment of NAF wage areas. There are far more than the minimum of 26 NAF wage employees in the survey area and local activities have the capability to do the survey. Within the survey area, there are more than the required minimum of 1,800 private enterprise employees in establishments within survey specifications.

The full-scale surveys will continue to be ordered in February of even numbered fiscal years, e.g. in February 1994. The Federal Prevailing Rate Advisory Committee (FPRAC) reviewed this request and by consensus recommended approval.

Pursuant to 5 U.S.C. 553(b)(3)(B), I find that good cause exists for waiving the general notice of proposed rulemaking. Also, pursuant to section 553(d)(3) of title 5, United States Code, I find that good cause exists for making this rule effective in less than 30 days. The notice is being waived and the regulation is being made effective in less than 30 days because the wage survey for the Hardin-Jefferson, Kentucky, wage area will be conducted in February 1994, requiring the drawing of survey establishment lists in December 1993.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Lorraine A. Green,

Deputy Director.

Accordingly, OPM is amending 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552.

Appendix B to Subpart B—[Amended]

2. Appendix B to subpart B is amended for Clark-Hardin-Jefferson, Kentucky, by revising the wage area listing from "Clark-Hardin-Jefferson" to "Hardin-Jefferson."

3. Appendix D to subpart B is amended by removing the wage area listing for Clark-Hardin-Jefferson and by adding in its place a listing for Hardin-Jefferson to read as follows:

Appendix D to Subpart B of Part 532—Nonappropriated Fund Wage and Survey Area

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1910 and 1980

RIN 0575–AB56

Receiving and Processing Applications for Farmer Programs Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to conform to provisions of the Agricultural Credit Improvement Act of 1992. This action will modify regulations governing the processing of Farmer Programs direct and guaranteed loan applications. The intended effect is to reduce application processing times.

DATES: Interim rule effective December 29, 1993. Written comments must be submitted on or before January 28, 1994.

ADDRESSES: Submit written comments, in duplicate, to the Office of the Chief, Regulations Analysis and Control Branch, FmHA, USDA, room 6348–S, 14th Street and Independence Avenue, SW., Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mark A. Falcone, Deputy Director, Farmer Programs Loan Making Division, Farmers Home Administration, U.S. Department of Agriculture, South Building, 14th Street and Independence Avenue, SW., Washington, DC 20250, Telephone (202) 690–4019.

SUPPLEMENTARY INFORMATION:

Classification

We are issuing this interim rule in conformance with Executive Order 12866, and we have determined that it is not a "significant regulatory action." Based on information compiled by the Department, we have determined that this interim rule:

(1) Will have an effect on the economy of less than $100 million;

(2) Will not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(3) Will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(4) Will not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and

(5) Will not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

Intergovernmental Consultation

For the reasons set forth in the final rule related to Notice 7 CFR part 3015 subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940–J, "Intergovernmental Review of FmHA Programs and Activities" (December 23, 1983), Emergency Loans, Farm Ownership Loans, and Farm Operating Loans are excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials. The Soil and Water Loan Program, however, is subject to the provisions of Executive Order 12372.

Programs Affected

These changes affect the following FmHA programs, as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.416—Soil and Water Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, Subpart G, "Environmental Program." The FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Civil Justice Reform

This document has been reviewed in accordance with Executive Order (E.O.) 12778. It is the determination of FmHA that this action does not unduly burden the Federal Court System in that it meets all applicable standards provided in section 2 of the E.O.

Paperwork Reduction Act

The information collection requirements contained in these regulations have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB control numbers 0575–0134 and 0575–0079 in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). The interim final rule does not revise or impose any new information collection or recordkeeping requirement from those approved by OMB.

Discussion of Interim Rule

The Agricultural Credit Improvement Act of 1992 (Public Law 102–554) (Act) required a number of changes to FmHA regulations governing the approval of Farmer Programs loans made and guaranteed by the Agency. The purpose of this interim rule is to conform FmHA regulations to the requirements of sections 332 and 333A of the Consolidated Farm and Rural Development Act (CONACT), as amended by sections 11 and 13 of the Act. Other changes have been made that are administrative and are not required

by the Act. These internal changes are for clarification purposes. There is no need for public comment on these changes.

It is the policy of the Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption of 5 U.S.C. 553 with respect to such rules. This revision, however, is not published for proposed rulemaking because section 23 of the Act requires that interim regulations be issued to implement provisions of this Act. Therefore, this regulation is published as an interim rule with a 30-day comment period.

This interim rule deals with the following requirements of the Act:

Section 11—Time Period Within Which County Committee Is Required To Meet To Consider Applications for Farm Ownership and Operating Loans and Guarantees and Beginning Farmer Plans

Previous regulations required County Committees to review applications for direct and guaranteed loans, but did not set deadlines in all cases. CONACT section 332(e) requires the County Committee to make an eligibility determination on all direct and guaranteed farm ownership and operating loan applications, as well as the farm plans for those applying under FmHA's special operating loan program for beginning farmers. The County Committee must act on the application or farm plan not later than 5 days after receipt in the County Office when there is more than one other application or plan pending, and not later than 15 days when there are no other applications or plans pending. The Agency has amended 7 CFR part 1910, subpart A, § 1910.4(h) and 7 CFR part 1980, subpart B, § 1980.115(a) accordingly. It has clarified that these timeframes will be 5/15 "calendar" days, and are based upon County Offices receiving all information needed for the County Committee review.

Section 13—Processing of Applications for Farm Operating Loans

7 CFR part 1910, subpart A, § 1910.4 (c) and (i), and 7 CFR part 1980, subpart B, § 1980.114, implement requirements of this section.

CONACT Section 333A(a)(2)(B) requires FmHA to notify direct and guaranteed farm operating loan applicants in writing within 10 calendar days of receipt of their application in the County Office of any additional information needed to make the application complete. If the information is not received within 20 calendar days of the date of the first letter, the Agency must again notify the applicant, as well as the Agency's District Office, of the information still needed. The Agency has added language that applicants (and lenders for guaranteed applications) will be notified that their application will be withdrawn if information is not received within the established due dates. The Agency believes these timeframes are sufficient. An applicant always has the option to submit another application at any time.

CONACT Section 333A(a)(2)(B) also requires other USDA Agencies to provide information to FmHA within 15 calendar days of a request when an FmHA direct or guaranteed operating loan application is involved. The Agency has entered into Memorandums of Understanding with the Agricultural Stabilization and Conservation Service and the Soil Conservation Service stating information will be provided to FmHA within the required timeframe, whenever possible.

FmHA County Offices further are required by statute to notify the District Office of operating loan applications pending more than 45 days after receipt. The District Office must ensure that final actions are taken no later than 15 days after such notification. District Offices must notify the State Offices of applications pending more than 45 days after its receipt and provide the reasons they are pending. The Agency has clarified "applications" to mean "complete applications" and 45/15 days to mean 45/15 "calendar" days. CONACT Section 333A(a)(1) requires the Agency to approve or disapprove each application not later than 60 days after it is considered complete.

The statute also requires FmHA, on a monthly basis, to notify the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate, of operating loan applications on which final action has not been taken within 60 days of its receipt. Once again, the Agency has clarified this to mean "complete" applications. "Final action" means approval, denial, or withdrawal of the application. FmHA's FOCUS Ad-Hoc Reporting System, a nation-wide computerized information network, already provides the State and National Offices electronic access to such data. The Agency has set up a monthly procedure under which the required information will be gathered and collated using the FOCUS system.

For direct loans, the Agency has made revisions in 7 CFR part 1910, subpart A, § 1910.4(b) to clarify the applicant and FmHA's responsibilities in completing an application. This was done to reduce confusion and expedite processing. Forms FmHA 1945–22, "Certification of Disaster Losses," and FmHA 1940–38, "Request for Lender's Verification of Loan Application," are needed when an applicant is applying for an emergency loan. These forms, previously shown as FmHA's responsibilities, are now shown as the applicant's responsibilities. It was misleading to have these listed under FmHA's responsibilities as the applicant has always had to supply information on these forms. No additional burden has been placed on applicants.

7 CFR part 1910, subpart A, § 1910.4(b) also has been clarified to state that several items are needed from certain applicants only. Now only new applicants must provide a brief written description of their farm training and/or experience. Only new applicants and existing borrowers with significant changes in their operations must provide a brief written description of their proposed operations. These clarifications reflect FmHA's desire to impose procedural requirements only as needed. In addition, several FmHA responsibilities previously needed to consider the application complete are no longer part of what is needed for a "complete application," but must be completed before loan approval is determined. When an application becomes complete, the 60-day time period for loan approval or rejection begins. Amendatory language also instructs County Supervisors to provide assistance as necessary to help applicants complete their applications.

Section 11 of the Act refers to direct and guaranteed farm operating and farm ownership loan applications, and section 13 refers to direct and guaranteed farm operating loan applications. However, FmHA has decided to make the provisions of these sections apply to all Farmer Programs loans, including Soil and Water loans and Emergency loans. This procedural change will maintain consistency for all farm loans, avoid complication and possible confusion in interpreting Agency instructions, and expedite the processing of loan requests.

In 7 CFR part 1980, subpart B, § 1980.114, notification procedures for incomplete loan guarantee applications have been tightened beyond the strict requirements of the Act. Lenders are notified that an application is incomplete no later than 5 (versus 10) calendar days after the application has been received in the County Office. Formerly, this notification requirement was contingent on the availability of a County Supervisor and employment ceilings affecting FmHA. The Agency approval timeframe for guaranteed

Farmer Programs loan applications is currently 30 days (14 days under the Certified Lender Program). Regulations now will require the District Office to ensure completion of processing on guarantee applications on which final action is not taken within this timeframe. FmHA instituted this change in response to concerns expressed by lenders regarding guaranteed processing times, and recommendations resulting from studies carried out by the Agency. Additional notification requirements previously discussed also have been adopted for guaranteed loan processing.

7 CFR part 1910, Exhibit A to subpart A has been removed from the Code of Federal Regulations, as everything in the Exhibit is contained in the body of the regulation (7 CFR part 1910, subpart A, § 1910.4(b)).

Finally, portions of § 1910.4 of subpart A of part 1910, and § 1980.116 of subpart B of part 1980 have been revised for clarification.

List of Subjects

7 CFR Part 1910

Applications, Credit, Loan programs—housing and community development, Low and moderate income housing, Marital status discrimination, Sex discrimination.

7 CFR Part 1980

Agriculture, Loan programs—agriculture.

Therefore, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1910—GENERAL

1. The authority citation for part 1910 continues to read as follows:

Authority: 7 U.S.C 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—Receiving and Processing Applications

2. Section 1910.4 is amended by revising paragraphs (b), (c), (d), (h), (i), and (k) to read as follows:

§ 1910.4 Processing applications.

* * * * *

(b) *Complete Farmer Programs applications and additional FmHA responsibilities.* All persons requesting an application will be provided Exhibit A (available in any FmHA office). The County Supervisor will provide assistance as necessary to help applicants complete their applications. Complete applications will be processed in the order of date received, except as outlined in § 1910.10 of this subpart. If the application is complete when it is first received, a County Office official will stamp the filing date on the front of Form FmHA 410–1 and enter the date in the "Application Received" and "Application Completed" fields in the Application Processing Module of the Management Records System (MRS). On the date all information necessary to process an application is received, a County Office official will send the applicant FmHA Guide Letter 1910–A–3 (available in any FmHA office) notifying the applicant that the application is considered complete. The date entered in the "Application Completed" field in the Application Processing Module of MRS will establish the 30-day and 60-day timeframes for determining eligibility and loan approval/disapproval, respectively. The County Supervisor will verify the information furnished by the applicant, and record and assemble additional information needed to properly evaluate the applicant's qualifications and credit needs. Additional information may be obtained and verified by County Office records, personal contacts, and visits to the applicant's operation. A complete Farmer Programs application requires fulfillment of both the applicant and FmHA's responsibilities. Once this information is received and the application is considered complete, FmHA has additional responsibilities before loan approval is determined. The various responsibilities are as follows:

Applicant's Responsibilities for a Complete Application

(1) Completed Form FmHA 410–1, "Application for FmHA Services," including a signed Form FmHA 410–9, "Statement Required by the Privacy Act."

(2) If the applicant is a cooperative, corporation, partnership, or joint operation:

(i) A complete list of members, stockholders, partners or joint operators showing the address, citizenship, principal occupation, and the number of shares and percentage of ownership or of stock held in the cooperative or corporation, by each, or the percentage of interest held in the partnership or joint operation, by each.

(ii) A current personal financial statement from each of the members of a cooperative, stockholders of a corporation, partners of a partnership, or joint operators of a joint operation.

(iii) A current financial statement from the cooperative, corporation, partnership, or joint operation itself.

(iv) A copy of the cooperative's or corporation's charter, or any partnership or joint operation agreement, any articles of incorporation and bylaws, any certificate or evidence of current registration (good standing), and a resolution(s) adopted by the Board of Directors or members or stockholders authorizing specified officers of the cooperative, corporation, partnership, or joint operation to apply for and obtain the desired loan and execute required debt, security, and other instruments and agreements.

(3) A brief written description as to the farm training and/or experience of the applicant and the individual members of an entity applicant (new applicants only).

(4) Supporting and documented verification that the applicant (and all members of an entity applicant) cannot obtain credit elsewhere, including a guaranteed loan.

(5) Financial records for the past five years. Income tax records may be provided by the applicant when other financial records are not available.

(6) Five years of production history immediately preceding the year of application, unless the applicant has been farming less than 5 years.

(7) A brief written description of the proposed operation and the proposed size of the operation (required for new applicants and existing borrowers with significant changes in their operations).

(8) Verification of off-farm employment, if any. This will be used only when the applicant is relying on off-farm income to pay part of the applicant's expenses.

(9) Projected production, income and expenses, and loan repayment plan, which may be submitted on Form FmHA 431–2, "Farm and Home Plan," or other similar plans of operation acceptable to FmHA.

(10) Applicable items required in Exhibit M of subpart G of part 1940 of this chapter including SCS Form CPA–026, "Highly Erodible Land and Wetland Conservation Determination," Form AD–1026, "Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification," and Form FmHA 1940–20, as required by subpart G of part 1940 of this chapter.

(11) A legal description of farm, real estate property and/or (if applicable) a copy of any lease, contract, option or agreement entered into by the applicant which may be pertinent to consideration of the application, or when a written lease is not obtainable, a statement setting forth the terms and conditions of the agreement.

(12) Form FmHA 440–32, "Request for Statement of Debts and Collateral," when applicable.

(13) Forms FmHA 1945–22, "Certification of Disaster Losses," and FmHA 1940–38, "Request for Lender's Verification of Loan Application," (EM loans only).

FmHA's Responsibilities for a Complete Application

(14) Send Form FmHA 410–7, "Notification to Applicant on Use of Financial Information from Financial Institution," to the applicant when applicable.

(15) Form FmHA 1945–26, "Calculation of Actual Losses" (EM loans only).

(16) Credit reports as provided in subparts B and C of this part.

(17) Form FmHA 1945–29, "ASCS Verification of Farm Acreages, Production and Benefits," (EM loans only).

(18) The Current/Past Debt Inquiry and Borrower Cross-Reference Systems. The Current/Past Debt Inquiry System must be reviewed for each application and copies of the screens must be attached to the applicant's file.

(19) For special beginning farmer or rancher operating (OL) loan assistance, a plan of operation will be developed for each of the first 5 years for which such assistance is requested. A projection of the financial status of the operation showing financial viability within the commitment period will also be developed. The 5-year plan and projection will be developed as described in § 1941.15 of subpart A of part 1941 of this chapter. This information will be presented on reports generated on the FmHA automated Farm and Home Plan system, or in other plans or documents consistent and acceptable to FmHA.

Additional FmHA Responsibilities

(20) Form FmHA 1924–1, "Development Plan," if necessary.

(21) Form FmHA 1940–22, "Environmental Checklist for Categorical Exclusions," or Class I or Class II assessment, whichever is applicable.

(22) Real estate and/or chattel appraisal, when applicable.

(c) *Incomplete Farmer Programs applications.* (1) When an incomplete application is received, a County Office official will stamp the filing date on the front of Form FmHA 410–1, and enter the date in the "Application Received" and "Incomplete Application" fields in the Application Processing Module of MRS.

(2) When an application that was received incomplete is completed, the date will be entered in the "Application Completed" field in the Application Processing Module of MRS. The County Supervisor will follow the requirements of paragraph (b) of this section.

(3) Applicants who do not submit necessary information for complete applications, as described in paragraph (b) of this section, for EM, FO, OL and SW loans, will be handled as follows:

(i) No later than 10 calendar days after receipt of the application, the County Supervisor will send the applicant a letter similar to FmHA Guide Letter 1910–A–1 (available in any FmHA office). The letter will:

(A) List the additional information needed.

(B) State that the application cannot be processed until all required information is received in the FmHA County Office.

(C) Set a specific due date for the information. This date will be 20 calendar days after the date of the letter.

(ii) When information is needed from other USDA Agencies, the County Supervisor will inform those Agencies and the applicant of the information needed, and note the date of the request in the running record. For operating loan applications, the County Supervisor will request that the Agencies return the information to the County Office within 15 calendar days of the date of receipt of the request.

(iii) If the necessary information has not been received from the applicant 20 calendar days after the date of the first written notification of an incomplete application, the County Supervisor will immediately send the applicant a letter similar to FmHA Guide Letter 1910–A–2 (available in any FmHA office).

(A) The letter will again list the additional information needed, and state that the application cannot be processed until all the required information is received.

(B) The letter will set a due date of 10 calendar days from the date of the letter. It will further state that unless the applicant supplies the required information or contacts the County Office by that date, the application will be withdrawn without further notice.

(C) This letter will contain the Equal Credit Opportunity Act (ECOA) statement set forth in § 1910.6 (b)(1) of this subpart.

(D) A copy of this letter must be sent to the District Office at the same time it is sent to the applicant.

(iv) If the applicant has not contacted the County Office by the due date set in the second notification letter, the County Supervisor will then withdraw the application.

(v) All applications withdrawn will be handled in accordance with § 2033.7 of FmHA Instruction 2033–A (available in any FmHA office).

(d) *Notifying applicants (including presently indebted borrowers) about Limited Resource loans.* Immediately after an application for OL, FO, SW, or EM assistance is received, and prior to County Committee action, the County Supervisor will send a letter similar to FmHA Guide Letter 1924–B–1 (available in any FmHA office) to the applicant telling the applicant about Limited Resource loans.

* * * * *

(h) *County Committee actions.* All actions by the committee regarding applicant eligibility will be taken in committee meetings attended by at least two committee members.

(1) When the County Office receives an application consisting of all pertinent information relative to the eligibility decision, including a plan required under § 1941.15 (e) of subpart A of part 1941 of this chapter in the case of special beginning farmer OL applicants, the County Committee will meet not later than:

(i) Five calendar days after the application's receipt by the County Office if there is more than one application pending needing County Committee action.

(ii) Fifteen calendar days after the application's receipt by the County Office if there are no other applications pending.

(2) County Committee action will be taken in the absence of the applicant. If the County Committee is unable to reach a decision based on the information available, it may request a personal interview with the applicant.

(3) County Committee members are required to adhere to all applicable provisions of this regulation when determining eligibility of applicants. Applicants may not be interviewed for reasons unrelated to proper eligibility considerations.

(i) *Timeliness.* Processing requirements for each program area are as follows:

(1) *Farmer Programs applications.* Each application must be approved or disapproved and the applicant notified in writing of the action taken, not later than 60 days after receipt of a complete application. The District Director will monitor the processing of all applications to ensure that each is processed in a timely manner and receives a final disposition (i.e. approval, rejection, or withdrawal) within the timeframes outlined in this section.

(i) Receipt by the applicant of a signed copy of Form FmHA 1940–1, "Request for Obligation of Funds," will be considered written notice of loan approval.

(ii) If a complete application is not approved or disapproved 45 calendar days after all necessary information is received, the following steps will be taken:

(A) The County Supervisor will make sure that the data in the County Office MRS data base regarding the application are up-to-date, and that the reason it remains pending is noted. A selection of reasons is listed in MRS.

(B) Every week the District Director will generate a report, using the FmHA FOCUS Ad-Hoc Reporting System, based on the weekly upload of information from each County Office MRS data base. The District Director will note each complete application pending more than 45 calendar days, and immediately take steps to ensure that final disposition on the application is taken no later than 60 calendar days after receipt of the complete application.

(C) The Administrator will utilize MRS data and any other information available to comply with any statutory reporting requirements concerning the status of applications.

(2) *Single Family Housing (SFH) loans.* Written notice of eligibility or ineligibility will be sent to each applicant not later than 30 days after receipt of a complete application. If a determination of eligibility cannot be made within 30 days from the date of receipt of the complete application, the applicant will be notified in writing of the circumstances causing the delay and the approximate time needed to make a decision.

(3) *Labor Housing (LH) preapplications.* Preapplications must be determined eligible and feasible and the applicant notified in writing in accordance with applicable program regulations not later than 45 days after receipt of a complete preapplication. This eligibility determination will be made regardless of funding levels.

(4) *LH applications.* If a determination of eligibility cannot be made within 30 days from the date of receipt of a complete application, the applicant will be notified in writing of the circumstances causing the delay and the approximate time needed to make a decision.

(5) *Adverse decisions.* If an applicant is given an adverse decision, the applicant will be given appeal rights as provided in subpart B of part 1900 of this chapter. The letter will contain the ECOA statement set forth in § 1910.6 (b)(1) of this subpart.

* * * * *

(k) *Active applications.* An applicant may voluntarily withdraw an application at any time. Except for incomplete Farmer Programs applications, when an applicant has been determined eligible, but further processing is delayed due to an apparent lack of interest, the applicant will be advised by letter that the application will be considered withdrawn unless the County Office receives a written request within 30 days that further consideration is desired. The letter to the borrower will contain the ECOA statement set forth in § 1910.6(b)(1) of this subpart.

(1) Applications for RH, RHS, and LH loans (posted on Form FmHA 1905–4, "Application and Processing Card—Individual," or inputted in the Application Processing Module of MRS) received during any fiscal year will remain active during the remainder of that fiscal year in which they were received, plus the subsequent fiscal year, unless withdrawn or disapproved, or unless the loan is closed.

(2) Applications received for FO, SW, OL, EM, and persons applying for RH loans on farms or nonfarm tracts who derive a major portion of their income from farming (inputted in the Application Processing Module of MRS), will remain active for 12 months from the date a complete application is received, unless withdrawn or disapproved, or unless the loan is closed.

(3) See paragraph (c) of this section for procedures for incomplete Farmer Programs applications.

(4) All applications which are withdrawn or rejected will be handled in accordance with § 2033.7 of FmHA Instruction 2033–A (available in any FmHA office). If notice has been received by FmHA that an adverse action is under investigation or in litigation, that application and all related material will be retained until final disposition of the matter.

(5) When an application has been approved and funds are not available, and the steps outlined in § 1910.6(g) of this subpart have been taken, the following provisions apply:

(i) The County Supervisor will, during the 11th month following loan approval, notify the applicant that the application will expire 12 months from the date of loan approval.

(ii) If the applicant wants the application to remain active, the applicant must provide the County Office with a written request within 30 days, requesting that the application remain active.

(iii) The applications retained at the applicant's request will be extended for only one additional 12-month period.

(iv) If the applicant fails to respond to the County Supervisor's written request, the application will be withdrawn.

Subpart A—[Amended]

3. Exhibit A to subpart A is removed and reserved.

PART 1980—GENERAL

4. The authority citation for part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70

Subpart B—Farmer Program Loans

§ 1980.113 [Amended]

5. Section 1980.113 is amended by revising "Form AD–1026, 'Highly Erodible Land and Wetland Conservation Certification,'" to read "Form AD–1026, 'Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification,'" in paragraph (a)(10).

6. Section 1980.114 is amended by removing ADMINISTRATIVE paragraphs A. and F. and redesignating ADMINISTRATIVE paragraphs B. through E. as A. through D. respectively; by redesignating paragraphs (a) and (b) as paragraphs (c) and (d), respectively; by revising the introductory text; by revising the word "working" to read "calendar" in the first sentence of newly redesignated paragraph (c), and by adding new paragraphs (a) and (b) to read as follows:

§ 1980.114 FmHA evaluation of applications.

When the County Supervisor receives an application, the proper independent investigations, inspections, and appraisal reviews will be made to determine whether the loan applicant is eligible, whether the proposed loan/line of credit is for authorized purposes, whether there is reasonable assurance of a positive cash flow projection, and whether there is sufficient collateral and equity. The determinations will be recorded on Form FmHA 449–23, "Guaranteed Loan Evaluation (Farmer Programs)." This evaluation is for the benefit of FmHA, not the lender.

(a) *Incomplete applications.* (1) When an incomplete application is received, a County Office official will stamp the filing date on the front of Form FmHA 1980–25, and enter the date in the "Application Received" and "Incomplete Application" fields in the Application Processing Module of the Management Records System (MRS).

(2) When an application that was received incomplete is completed, the date will be entered in the "Application Completed" field in the Application Processing Module of MRS. The County Supervisor will follow the requirements of paragraphs (b)(2) and (b)(3) of this section.

(3) Lenders who omit from an application necessary information as described in § 1980.113 will be notified as follows:

(i) No later than 5 calendar days after the receipt of the application, the County Supervisor will send to the lender a letter similar to FmHA Guide Letter 1980–B–1 (available in any FmHA office). The letter will:

(A) List the additional information needed.

(B) State that the application cannot be processed until all required information is received in the County Office.

(C) Set a specific due date for the information. This date will be 20 calendar days after the date of the letter.

(ii) When information is needed from other USDA Agencies, the County Supervisor will inform those Agencies and the lender of the information needed, and note the date of the request in the running record. For operating loan guarantee applications, the County Supervisor will request that the information be returned to the County Office within 15 calendar days of the date of receipt of the request.

(iii) If the necessary information has not been received from the lender 20 calendar days after the date of the first written notification of an incomplete application, the County Supervisor will immediately send to the lender a letter similar to FmHA Guide Letter 1980–B–2 (available in any FmHA office).

(A) The letter will again list the additional information needed, and state that the application cannot be processed until all the required information is received.

(B) The letter will set a due date of 10 calendar days from the date of the letter. It will further state that unless the lender supplies the required information or contacts the County Office by that date, the application will be withdrawn without further notice.

(C) A copy of this letter will be sent to the District Office at the same time.

(iv) If the lender has not contacted the County Office by the due date set in the second notification letter, the County Supervisor will then withdraw the application.

(v) All applications withdrawn will be handled in accordance with § 2033.7 of FmHA Instruction 2033–A (available in any FmHA office).

(b) *Complete applications.* (1) If the application is complete when it is first received, a County Office official will stamp the filing date on the front of Form 1980–25 and enter the date in the "Application Received" and "Application Completed" fields in the Application Processing Module of MRS.

(2) On the date all information necessary to process an application is received, a County Office official will send the lender FmHA Guide Letter 1980–B–3 (available in any FmHA office) notifying the lender that the application is considered complete.

(3) The date entered in the "Application Completed" field of MRS will establish the timeframes for eligibility and loan approval/disapproval.

* * * * *

7. Section 1980.115 is amended by redesignating paragraphs (a) and (b) as paragraphs (c) and (d) respectively; adding new paragraphs (a) and (b) and ADMINISTRATIVE paragraph C., and revising the introductory text to read as follows:

§ 1980.115 County Committee Review.

The County Committee will review loan applications to determine whether the loan applicants meet FmHA eligibility requirements and meet the definition of "beginning farmer or rancher," as defined in § 1980.106 of this subpart. See § 1980.176(k) for County Committee actions relative to special OL assistance to beginning farmers or ranchers. Applications do not need to be complete before they are reviewed by the County Committee; however, all information relating to the eligibility must be received.

(a) *County Committee timeframes.* When the County Office receives an application consisting of all information relative to the eligibility decision, the County Committee will meet not later than:

(1) Five calendar days after the application's receipt by the County Office if there is more than one application pending needing County Committee action.

(2) Fifteen calendar days after the application's receipt by the County Office if there are no other applications pending.

(b) *Notification of eligibility determination.* The County Supervisor will promptly notify both the lender and loan applicant in writing within 5 calendar days of the County Committee's determination.

* * * * *

Administrative

* * * * *

C. *Approval timeframes.* The District Director will monitor the processing of all applications to ensure that each is processed in a timely manner and receives a final disposition (i.e., approval, rejection, or withdrawal) within 30 calendar days. If an application is not approved or disapproved 30 calendar days after all necessary information is received, the following steps will be taken:

(1) The County Supervisor will make sure that the data in the County Office MRS data base regarding the application are up-to-date, and that the reason it remains pending is noted. A selection of reasons is listed in MRS.

(2) Every week the District Director will generate a report, using the FmHA FOCUS Ad-Hoc Reporting System, based on the weekly upload of information from each County Office MRS data base. The District Director will note each complete application pending more than 30 calendar days, and immediately take steps to ensure that final disposition on the application is taken no later than 60 calendar days after receipt of the complete application.

(3) The Administrator will utilize MRS data and any other information available to comply with any statutory reporting requirements concerning the status of applications.

§ 1980.116 [Amended]

8. Section 1980.116 is amended by removing the words "as set out in subpart A of part 1910 of this chapter," from the last sentence.

Dated: November 8, 1993.

Bob J. Nash,

Under Secretary for Small Community and Rural Development.

BILLING CODE 3410–07–U

---

7 CFR Part 1955

RIN 0575–AB63

Providing Additional Notice to Indian Tribes and Tribal Members; Lease With Option To Purchase Farmer Program Farm Real Estate Properties

AGENCY: Farmers Home Administration, USDA.

ACTION: Interim rule with request for comments.

SUMMARY: The Farmers Home Administration (FmHA) is amending its regulations to allow additional notification and bidding instructions when dealing with the acquisition of real estate which is located on a federally recognized Indian Reservation. It also deals with the manner in which FmHA is allowed to dispose of inventory farm property through the use of lease with an option to purchase.

This action is necessary due to provisions in the Agricultural Credit Improvement Act of 1992 dated October 28, 1992, that requires the Agency to take certain actions when it becomes apparent that the Native American borrower owner/operator is unable to continue their operation. The intended effect is to ensure that timely and effective notification is made in order to allow real estate to be acquired either by the former owner/operator or the tribe in which the real estate is located.

DATES: Interim rule effective on December 19, 1993. Written comments must be submitted on or before January 28, 1994.

ADDRESSES: Submit written comments, in duplicate, to the Office of the Chief, Regulations, Analysis and Control Branch (RACB), Farmers Home Administration, USDA, room 6348, South Agricultural Building, 14th Street and Independence Avenue, SW., Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: Gary West, Senior Loan Officer, Farmer Programs Loan Servicing and Property Management Division, Farmers Home Administration, USDA, Room 5437, South Agricultural Building, 14th and Independence Avenue, SW., Washington, DC 20250, Telephone (202) 690–4008.

SUPPLEMENTARY INFORMATION:

Classification

We are issuing this interim rule in conformance with Executive Order 12866, and we have determined that it is not a "significant regulatory action." Based on information compiled by the Department, we have determined that this interim rule:

(1) Would have an effect on the economy of less than $100 million;

(2) Would not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(3) Would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(4) Would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations of recipients thereof; and

(5) Would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or principles set forth in Executive Order 12866.

Intergovernmental Consultation

1. For the reasons set forth in the final rule related to Notice 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23 1983), Emergency Loans, Farm Operating Loans, and Farm Ownership Loans are excluded with the exception of nonfarm enterprise activity from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

2. The Soil and Water Loans Program is subject to the provisions of Executive Order 12372 and FmHA Instruction 1940–J.

Programs Affected

These changes affect the following FmHA programs as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.416—Soil and Water Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Discussion of Interim Rule

The purpose of this interim rule is to initiate the process of implementing provisions of the Agricultural Credit Improvement Act of 1992. Several sections of the Bill refer to the disposal of farm real estate. Section 16 states that if a farm has been classified as surplus and FmHA has been unable to sell the property, it would be permissible to offer the property for lease with an option to purchase to any party who may meet the requirements for FmHA assistance. Section 17 of the above mentioned Act requires that FmHA provide additional notice to those Native American borrowers who are unable to resolve their financial difficulties through present FmHA servicing action, that they could convey their property to FmHA and that FmHA will accept their offer under certain conditions. This section also provides that the tribe which has jurisdiction over the reservation on which the real estate is located will receive notification prior to acquisition by FmHA. This notice will inform the tribe that FmHA has offered the borrower an opportunity to convey the property to the government, and if action is not taken to convey the property, FmHA will foreclose the account and the Agency will bid either the market value or the debt owed to FmHA, whichever is greater, at the foreclosure sale. The only deviation from the amount of the authorized bid will be for an allowance related to the investigation and clean-up of environmental hazards, such as hazardous waste. Other changes of an editorial nature may also be included.

List of Subjects in 7 CFR Part 1955

Foreclosure, Government acquired property, Sale of government acquired property, Surplus government property.

Accordingly, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1955—PROPERTY MANAGEMENT

1. The authority citation for part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—Liquidation of Loans Secured by Real Estate and Acquisition of Real and Chattel Property

2. Section 1955.3 is amended by adding, alphabetically, a definition for "Loans to Native Americans" to read as follows:

§ 1955.3 Definitions.

* * * * *

Loans to Native Americans. Farmer Program loans secured by real estate located within the boundaries of a federally recognized Indian reservation. The Native American borrower-owner is defined as the party who pledged real estate as collateral for an FP loan and is the tribe or a member of the tribe with control over the reservation.

* * * * *

3. Section 1955.9 is added to read as follows:

§ 1955.9 Requirements for voluntary conveyance of real property located within a federally recognized Indian Reservation and owned by a Native American borrower-owner.

(a) The borrower-owner is a member of the tribe that has jurisdiction over the reservation in which the real property is located. An Indian tribe may also meet

the Native American borrower-owner criterion if it is indebted for FP loans.

(b) A voluntary conveyance will only be accepted after all preacquisition primary and preservation servicing actions have been considered in accordance with subpart S of part 1951 of this chapter.

(c) When all servicing actions have been considered under subpart S of part 51 of this chapter and a positive outcome cannot be achieved, the following additional actions are to be taken:

(1) The County Supervisor will notify the Native American borrower-owner and the tribe by certified mail, return receipt requested, and by regular mail if the certified mail is not received, that:

(i) The borrower-owner may convey the real estate security to FmHA and FmHA will consider acceptance of the property into inventory in accordance with paragraph (d) of this section;

(ii) The borrower-owner must inform FmHA within 60 days from receipt of this notice of the borrower-owner's decision to deed the property to FmHA;

(iii) FmHA must inform the borrower-owner and the borrower-owner's spouse and children of leaseback/buyback rights;

(iv) A wetlands conservation easement may be placed on the real estate security which the borrower-owner deeds to FmHA and which FmHA leases or conveys back to the borrower-owner;

(v) The borrower-owner has the opportunity to consult with the Indian tribe that has jurisdiction over the reservation in which the real property is located, or counsel, to determine if State or tribal law provides rights and protections that are more beneficial than those provided the borrower-owner under FmHA regulations;

(vi) If the borrower-owner does not voluntarily deed the property to FmHA,

(A) The Government may foreclose on the property;

(B) In the event of foreclosure, the property will be offered for sale;

(C) At the foreclosure sale, FmHA must offer a bid for the property that is equal to the fair market value of the property, or the outstanding principal and interest of the loan, whichever is higher;

(D) At the foreclosure sale, the property may be purchased by someone other than the Government; and

(E) If the property is purchased by another party, the property will not be placed in FmHA inventory and the borrower-owner will forfeit the rights and protections under FmHA regulations.

(vii) FmHA shall accept the offer of voluntary conveyance of the property unless a hazardous substance as defined in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, is located on the property and will require FmHA to take remedial action to protect human health or the environment if the property is taken into inventory. In this case, a voluntary conveyance will be accepted only if FmHA determines that it is in the best interests of the Government to acquire title to the property.

(2) *Reserved.*

(d) When determining whether to accept a voluntary conveyance of a Native American borrower-owner's real property, the County Supervisor must consider:

(1) The cost of cleaning or mitigating the effects if a hazardous substance contamination is found on the property. A deduction equal to the amount of the cost of hazardous waste clean-up will be made to the fair market value of the property to determine if it is in the best interest of the Government to accept title to the property. FmHA will accept the property if clear title can be obtained and if the value of the property after removal of hazardous substances exceeds the cost of the hazardous waste clean-up.

(2) If the property is located within the boundaries of a federally recognized Indian reservation, and is owned by a member of the tribe with jurisdiction over the reservation, FmHA will credit the Native American borrower-owner's account based on the fair market value of the property or the FmHA debt against the property, whichever is greater.

4. Section 1955.10 is amended by removing the words ", 'Worksheet for Accepting a Voluntary Conveyance of Farmer Program Security Property into Inventory,'" from the ninth sentence of the introductory paragraph; by revising the reference "§ 1955.10(h)" to read "§ 1955.10(g)" in the last sentence of paragraph (f)(1) (iii); by redesignating paragraphs (f)(2) (i) and (ii) as paragraphs (f)(2) (iv) and (v) respectively; by adding new paragraphs (f)(2) (i), (ii), and (iii); and by revising the introductory text of paragraph (f)(2), and paragraphs (f)(3)(i)(M), (f)(3)(ii)(F), and (g)(1) to read as follows:

§ 1955.10 Voluntary conveyance of real property by the borrower to the Government.

* * * * *

(f) * * *

(2) *Consolidated Farm and Rural Development Act (CONACT) loans to individuals.* For CONACT loans to individuals, as defined in § 1955.3 of this subpart, where the FmHA indebtedness plus any prior liens exceeds the market value of the property, the County Committee must take certain action if it is to recommend that the borrower and any cosigner be released from liability.

(i) *Release from liability.* The County Committee must determine that the borrower(s) and any cosigner do not have reasonable ability to pay all or a substantial part of the balance of the debt owed after the voluntary conveyance, taking into consideration their assets and income at the time of the conveyance; and that the borrower and any cosigner have cooperated in good faith, used due diligence to maintain the security against loss, and have otherwise fulfilled the covenants incident to the loan to the best of their ability; and they must recommend that the borrower and any cosigner be released from personal liability for any balance due on the secured indebtedness upon conveyance of the property to the Government. This action will be documented by checking the appropriate block on Form FmHA 440–2, "County Committee Certification or Recommendation," as specified in the Forms Manual Insert (FMI).

(ii) *Unsatisfied indebtedness.* If the County Committee does not recommend release from liability, the borrower must be informed that the indebtedness cannot be satisfied but a credit can be given equal to the market value less prior lien(s) (if any) and the borrower will determine if the borrower wishes to make a new offer on that basis. If a new offer is made and accepted, the account will be handled as an unsatisfied account as outlined in § 1955.18(f) of this subpart. When the FmHA debt less the market value and prior lien(s) exceeds $150,000, release of liability must be approved or disapproved by the Administrator or designee; otherwise, the State Director must approve or disapprove the release of liability. All cases requiring a release of liability will be submitted for review in accordance with Exhibit A (available in any FmHA office).

(iii) *Crediting accounts.* FmHA will credit the account of a Native American borrower-owner whose real property secured an FP loan with the fair market value or the FmHA debt against the property, whichever is greater. To receive such credit, the real property must be located within the boundaries of a federally recognized Indian reservation and the County Committee must certify that:

(A) The borrower-owner is a member of a tribe or the tribe.

(B) The property is located within the confines of a federally recognized Indian reservation.

* * * * *

(3) * * *

(i) * * *

(M) Form FmHA 440–2, executed in accordance with the FMI, when applicable.

(ii) * * *

(F) Form FmHA 442–3;

* * * * * *

(g) *Closing of conveyance.*

(1) The conveyance to the Government will be considered closed when the recorded deed has been returned to FmHA, a certification of title is received from the closing agent that title is vested in the Government with no outstanding encumbrances other than the FmHA lien(s) or previously approved prior liens, and the borrower is notified of the acceptance of the conveyance. For loans to organizations, OGC will be requested to review the case to verify that it was closed properly. The property will be assigned an ID number and entered into the Acquired Property Tracking System through the Automated Discrepancy Processing System (ADPS) terminal in the County Office.

* * * * *

5. Section 1955.15 is amended by adding the words "or tribal" after the first occurrence of the word "State" in the second sentence of the introductory text of paragraph (d)(3)(i); by adding a sentence to the end of the introductory paragraph and paragraph (d)(1); and by revising the introductory text of paragraph (d)(3)(i)(A) and paragraphs (f)(1), (3), and (6) to read as follows:

§ 1955.15 Foreclosure by the Government of loans secured by real estate.

* * * For real property located within the confines of a federally recognized Indian reservation and owned by a Native American borrower, proper notice of voluntary conveyance must be given as outlined in § 1955.9 (c)(1) of this subpart.

* * * * * *

(d) * * *

(1) * * * For real property located within the confines of a federally recognized Indian reservation owned by a Native American borrower-owner, an analysis of whether FmHA should acquire title must include facts which demonstrate the fair market value after considering the cost of clean-up of hazardous substances on the property.

* * * * * *

(3) * * *

(i) * * *

(A) Payment in full [see Exhibit D of this subpart (available in any FmHA office)] may consist of the following means of fully satisfying the debt.

* * * * * *

(f) *Completion of foreclosure*—(1) *Foreclosure advertisement for organization loans subject to title VI of the Civil Rights Act of 1964.*—(i) The advertisement for foreclosure sale of property subject to title VI of the Civil Rights Act of 1964 will contain a statement substantially similar to the following: "The property described herein was purchased or improved with Federal financial assistance and is subject to the nondiscrimination provisions of title VI of the Civil Rights Act of 1964, section 504 of the Rehabilitation Act of 1973 and other similarly worded Federal statutes and regulations issued pursuant thereto that prohibit discrimination on the basis of race, color, national origin, handicap, religion, age or sex in programs or activities receiving Federal financial assistance, for as long as the property continues to be used for the same or similar purposes for which the Federal assistance was extended or for so long as the purchaser owns it, whichever is later." At least 30 days before the foreclosure sale, the County Supervisor will notify, in writing, the Indian tribe which has jurisdiction over the reservation, and in which the real property is owned by a Native American member of said tribe that a foreclosure sale will be conducted to resolve this account, and will provide:

(A) Projected sale date and location;

(B) Fair market value of property;

(C) Amount FmHA will bid on the property; and

(D) Amount of FmHA debt against the property.

(ii) The purchaser will be required to sign Form FmHA 400–4, "Assurance Agreement," if the property will be used for its original or similar purposes.

* * * * * *

(3) *Expenses.* Expenses which are incurred in connection with foreclosure, including legal fees, will be paid at the time recommended by OGC by processing the necessary documents as outlined in § 1955.5 (d) of this subpart. Costs will be charged as outlined in FmHA Instruction 2024–A (available in any FmHA office).

* * * * * *

(6) *Amount of Government's bid.* Except for FP loans and as modified by paragraph (f)(7)(ii) of this section, the Government's bid will be the amount of FmHA's gross investment or the market value of the security, whichever is less. For real property located within the confines of a federally recognized Indian reservation and which is owned by an FmHA borrower who is a member of the tribe with jurisdiction over the reservation, the Government's bid will be the greater of the fair market value or the FmHA debt against the property, unless FmHA determines that, because of the presence of hazardous substances on the property, it is not in the best interest of the Government to bid such amount, in which case there may be a deduction from the bid for the costs for hazardous material assessment and/or mitigation. For FP loans, except as modified by paragraph (f)(7)(ii) of this section, the Government's bid will be the amount of FmHA's gross investment or the amount determined by use of Exhibit G–1 of this subpart, whichever is less. When the foreclosure sale is imminent, the State Director must request the servicing official to submit a current appraisal (in existing condition) as a basis for determining the Government's bid. Except for MFH properties, if an FmHA appraiser is not available, the State Director may authorize an appraisal to be obtained by contract from a source outside FmHA in accordance with FmHA Instruction 2024–A (available in any FmHA office). For MFH properties, prior approval of the Assistant Administrator, Housing, is necessary to procure an outside appraisal.

* * * * * *

6. Section 1955.18 is amended by revising the words "Part 1955 of this chapter" to the words "this part" in the last sentences of the introductory text of paragraph (b) and paragraph (c), and by revising the sixth sentence of paragraph (a) and paragraph (d) to read as follows:

§ 1955.18 Actions required after acquisition of property.

* * * * * *

(a) * * * For MFH projects with rental assistance, Form FmHA 1944–55 must be attached to Form FmHA 1965–19 indicating the status of the rental assistance while the property is in inventory. * * *

* * * * * *

(d) *Inventory account.* The Finance Office will establish an inventory account under the Property ID Number assigned. The value of the property entered into the inventory account will be the market value as of the date acquired.

* * * * * *

Subpart C—Disposal of Inventory Property

7. Section 1955.107 is amended by adding the words ",'County Committee Certification or Recommendation,'" following "Form FmHA 440–2" in

paragraph (d)(2) and by revising paragraph (a) to read as follows:

§ 1955.107 Sale of suitable property (CONACT).

* * * * *

(a) *Sale by FmHA.* When possible, the sale of suitable CONACT property should be handled by County Supervisors and District Directors. The date Form FmHA 1955–40, "Notice of Real Property for Sale," is posted is the date the property is offered for sale. Farm property will be advertised for sale by publishing, as a minimum, three consecutive weekly announcements at least twice annually, in at least one newspaper that is widely circulated in the county in which the farm is located. Also, either Form FmHA 1955–40 or Form FmHA 1955–41, "Notice of Sale," will be posted in a prominent place in the County Office. If a program applicant is not available locally, the official with responsibility for the property will advise other FmHA District and County Offices in the market area of the availability of the property. The second advertisement will contain a paragraph that indicates that if no party purchases the property, FmHA will consider leasing the property with or without an option to purchase to any party that would be able to meet the eligibility and priority criteria established to purchase inventory farm property. When requested by the County Supervisor, State Office Farmer Programs staff will assist in publicizing property for sale or lease by informing other FmHA County, District, and/or State Offices. Maximum publicity should be given to the sale under guidance provided by § 1955.146 of this subpart and care should be taken to spell out eligibility criteria. Tribal Councils or other recognized Indian governing bodies having jurisdiction over Indian reservations as defined in § 1955.103 of this subpart shall be responsible for notifying those parties listed in § 1955.66 (d)(2) of subpart B of this part.

* * * * *

Dated: October 26, 1993.

BILLING CODE 3410–07–U

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 40, 50, 70, 72

RIN 3150–AE16

Self-Guarantee as an Additional Financial Assurance Mechanism

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations for decommissioning licensed facilities to allow certain non-electric utility licensees to use self-guarantee as a means of financial assurance. The rule reduces the cost burden of financial assurance while providing NRC with sufficient assurance that decommissioning costs will be funded. This rule grants a petition for rulemaking (PRM–30–59) from General Electric Company and Westinghouse Electric Corporation and completes action on the petition.

EFFECTIVE DATE: January 28, 1994.

FOR FURTHER INFORMATION CONTACT: Clark Prichard, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington DC 20555, telephone (301) 492–3734.

SUPPLEMENTARY INFORMATION:

Background

On January 11, 1993 (58 FR 3515), the NRC published a notice of proposed rulemaking that would allow self-guarantee as an additional mechanism for complying with the regulations on financial assurance for decommissioning. This action was in response to a petition for rulemaking (PRM–30–59) from the General Electric Company (GE) and the Westinghouse Electric Corporation (Westinghouse). The notice of receipt of the petition was published on September 25, 1991 (56 FR 48445). The petitioners requested that the NRC amend its decommissioning regulations contained in 10 CFR parts 30, 40, 50, 70, and 72 to provide a means for self-guarantee of decommissioning funding costs by certain NRC licensees who meet stringent financial standards and related reporting and oversight requirements. The petitioners proposed that electric utility reactor licensees under 10 CFR part 50 not be affected by the proposals in the petition.

Under the original decommissioning regulations (53 FR 24018; June 27, 1988), licensees were permitted to provide financial assurance for decommissioning funding through prepayment, insurance, surety bond, letter of credit, or parent company guarantee. Electric utilities were also allowed to establish an external sinking fund. The proposed rule sought public comments on amendments to parts 30, 40, 50, 70, and 72 to allow self-guarantee as an additional method of complying with the decommissioning requirements in those parts.

The objective of this rule is to reduce the licensee's cost burden without causing adverse effects on public health and safety. The regulatory analysis developed for this rule estimates that the annual industry cost savings would be approximately $730,000 if all licensees meeting the criteria use the self-guarantee. This estimate is based on rather conservative assumptions (i.e., $750,000 total decommissioning cost per license); the actual cost savings may be considerably greater.

The cost savings would result from the elimination of the cost of third party financial assurance for licensees qualifying to use the self-guarantee. Annual fees for letters of credit, surety bonds, and other forms of third party financial assurance typically are approximately 1.5 percent of the amount of financial assurance provided.

A. Proposed Criteria

The proposed criteria for corporate self-guarantee included these financial criteria:

(1) Tangible net worth of at least $1 billion;

(2) Tangible net worth at least 10 times the current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor;

(3) Assets located in the United States amounting to at least 90 percent of total assets or at least 10 times the current decommissioning cost estimate (or the current amount required if certification is used); for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor;

(4) A current bond rating of AAA, AA, or A as issued by Standard and Poors (S&P), or Aaa, Aa, or A as issued by Moodys.

Procedural requirements proposed were:

(1) The company must have at least one class of equity securities registered under the Securities Exchange Act of 1934;

(2) The company shall provide the Commission with copies of all reports filed with the Securities and Exchange Commission under section 13 of the Securities Exchange Act of 1934;

(3) The company's independent certified public accountant must compare the data used by the company in the financial test with the company's independently audited yearend financial statements;

(4) The company must repeat passage of the test within 90 days after the close of each succeeding fiscal year; and

(5) The company must notify NRC within 90 days of any matters that may come to the attention of the auditor that may cause the auditor to believe that the data specified in the financial test should be adjusted and that the company no longer passes the test.

The self-guarantee would be available only for an applicant or licensee having no parent company holding majority control of its voting stock.

B. Alternative Criteria

Because a majority of commenters on the notice of receipt of the petition questioned the need for the financial criteria to be so stringent, the Commission offered an alternative set of criteria to that of the petition as contained in the proposed rule. The alternative was the same financial criteria presented in the proposed rule, without the $1 billion net worth requirement.

A company's tangible net worth is an important factor in determining its bond rating. The rating itself, combined with the other criteria, may be a sufficient indicator of financial stability. Because all firms qualifying would need an A or better bond rating, this alternative may not be riskier in terms of financial assurance than the proposed rule. The regulatory analysis examined the effects on availability of the self-guarantee to licensees of deleting the $1 billion tangible net worth requirement from the financial criteria in the proposed rule, all other criteria remaining constant. The conclusion was that this alternative, if adopted, would allow an additional 7 firms to use the proposed self-guarantee. (Approximately 20 firms would qualify with the $1 billion criterion included.) The additional availability would save industry an estimated $130,000 annually and, since all firms would need an A or better bond rating, would maintain a high level of assurance. An A or better bond rating indicates that a company has substantial net worth. A company which merits an A or better bond rating has passed a stringent review by the independent ratings agencies of its ability to meet its financial obligations. A report by Moody's gives the default rate associated with companies whose bonds are rated A or above in 1 of the 3 years prior to default as only 0.13 percent annually.[1] In addition, all companies, irrespective of their overall size, must demonstrate that they possess tangible net worth of at least 10 times the current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing license and as parent grantor.

The alternate criteria, as well as the criteria in the proposed rule, do not apply to electric utilities. Electric utilities would be excluded from using self-guarantee under either set of criteria. Public comments were requested on this alternative financial criteria—the criteria in the proposed rule without the $1 billion tangible net worth requirement.

Minor Wording Changes

The proposed rule deleted the phrase "should the licensee default" from §§ 30.35(f)(2), 40.36(e)(2), 50.75(e)(1)(iii), 70.25(f)(2), and 72.30(c)(2) to accommodate self-guarantee.

Summary of Public Comments

The Commission received fourteen comment letters in response to the publication of the notice of proposed rulemaking. All but one of the letters supported a revision of the Commission's regulations to allow self-guarantee. The following is a summary of significant public comments and the Commission's response. A more detailed analysis of public comments has been prepared. This analysis is available for inspection in the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington DC.

Opposition to Self-Guarantee

One commenter opposed the proposed self-guarantee mechanism on the grounds that current capabilities of electronically transferring funds make self-guarantee meaningless even if a firm has initially demonstrated that it has the required assets. The commenter argued that recent failures of pensions and health benefits assured by self-guarantee indicate that self-guarantees cannot be trusted.

Response: NRC does not agree that a well-designed self-guarantee mechanism cannot be trusted to provide financial assurance. Self-guarantees have been used in a number of applications without incurring the problems pointed out by the commenter. The Environmental Protection Agency currently allows self-guarantee as a means of financial assurance for cleanup of hazardous waste treatment, storage, and disposal facilities. Because the qualification to use self-guarantee is based in large part on a specified bond rating, the NRC believes that it is tying the self-guarantee to an accurate measure of the financial strength of the self-guarantor. By requiring annual recertification, and submission of SEC reports, the NRC believes that potential problem situations will be identified and addressed in a timely manner.

Use of Self-Guarantee by Electric Power Utility Licensees

One commenter indicated that electric utilities licensed under Part 50, which are prohibited from using the proposed self-guarantee, should be allowed to use that option. The commenter, pointing to the Regulatory Analysis, argued that NRC's stated reasons do not create a strong technical basis for not allowing nuclear power licensees to use self-guarantee.

Response: The objective of the rule is to reduce the licensee's cost burden without causing adverse effects on public health and safety. The Commission already allows electric utilities to accumulate decommissioning funds in an external sinking fund. Unlike other licensees who are subject to financial assurance for decommissioning, electric utilities do not have to provide the full amount of required financial assurance "up front" but can instead build up their sinking funds over time. Thus, electric utilities already are permitted a cost-reducing financial assurance mechanism.

Requirement That 90 Percent of Total Assets Be in the U.S.

One commenter suggested dropping what is described as the requirement that self-guarantors demonstrate that 90 percent of their total assets are located in the United States, because otherwise some large, multinational companies will be excluded from using the self-guarantee simply because a majority of their assets may be outside the U.S.

Response: The proposed self-guarantee financial test included a provision requiring the self-guarantor to show that it had assets located in the United States amounting to at least 90 percent of total assets or at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as a self-guaranteeing licensee and as parent-guarantor. A licensee using self-

[1] Corporate Bond Defaults and Default Rates, Moody's Special Report, January, 1991, p. 32.

guarantee does not have to show that 90 percent of its assets are in the United States. The licensee could show that it has assets in the U.S. amounting to at least 10 times decommissioning costs. A large, multinational corporation should readily be able to demonstrate that it has assets in the United States amounting to at least 10 times the decommissioning responsibilities.

Net Worth Criterion

Several commenters favored the self guarantee concept but argued for less stringent financial criteria.

Response: The Commission has considered various alternative financial criteria. It has decided to drop the $1 billion tangible net worth criterion. However, tangible net worth will be an important factor in the requirements for self-guarantee for several reasons:

(1) The financial criteria in the final rule contain the requirement that to qualify to use self-guarantee, a licensee must have tangible net worth at least 10 times decommissioning costs, and

(2) A company must have at least an A bond rating. The A or better bond rating indicates that a company has substantial net worth. Net worth is an important factor in comprising a bond rating.

Bond ratings are reviewed often, and changed in response to changes in the issuer's financial condition. A bond rating of A or better assures that the financial strength of a licensee offering a self-guarantee has been independently reviewed and affirmed. It provides an excellent guide to the ability of a company to meet its obligations. According to Moodys, default rates associated with companies whose bonds are rated A or above in 1 of the 3 years prior to default are 0.13 percent annually.[2]

The criteria for parent guarantee were given consideration as financial criteria for self-guarantee in the final rule. Under current NRC decommissioning regulations, the parent company of a licensee that meets the financial criteria in 10 CFR part 30, appendix A may guarantee that funds will be available to decommission the facility of its subsidiary licensee. The financial criteria for the NRC parent guarantee include a lower bond rating (BBB or Baa) requirement and a lower net worth times decommissioning cost requirement (6, rather than 10 times decommissioning costs) than the criteria in this rule.

The Commission has decided against using the criteria for parent guarantee in the rule. This is the first instance in which self-guarantee is being allowed under the Commission's decommissioning regulations. The Commission prefers that the more conservative criteria be used. At some future time, when the Commission has gained some experience with self-guarantee, it may consider an appropriate revision of the financial criteria.

Use of Self-Guarantee by Non-Profit Entities

Several commenters suggested that NRC should amend the proposed rule to allow universities and other non-profit entities to use self-guarantee. They argued that many non-profit entities have been in existence and been financially stable for long periods of time. These commenters proposed several alternative criteria, including size of endowments, that they said could be used to assess the financial strength of non-profit entities.

Response: NRC plans to begin shortly a study of extending the availability of cost-saving financial assurance alternatives to non-profit entities other than universities. A similar study for universities will be deferred until after planned rulemaking on fee recovery. However, including these non-profit entities in the self-guarantee program established by this rulemaking presents certain problems. The analysis which was prepared to evaluate the financial criteria in the proposed rule did not include non-profit entities. In order to extend the use of self-guarantees to non-profit entities, new criteria would have to be developed to assess the financial strength of the non-profit licensees. Development of financial criteria to assess the qualifications of a non-profit entity to provide a self-guarantee is likely to require detailed consideration of the different financial accounting methods used by medical institutions. The financial accounting and reporting of non-profit entities are unique and substantially different from the accounting and reporting of for-profit entities.

The financial reporting practices of public and private hospitals generally follow standards for these institutions established by the American Institute of Certified Public Accountants. Development of financial criteria for a self-guarantee for hospitals also would involve analysis of the various accounting funds utilized and establishment of adequate criteria.

NRC's review of decommissioning financial assurance submissions identified third-party financial mechanisms, such as surety bonds and letters of credit, as well as escrows and trusts, as the financial mechanisms used most often by private non-profit entities. In a few instances, private non-profit entities have sought to use parent company guarantees. Publicly owned non-profit entities, particularly public universities, have sought to use statements of intent (a financial assurance mechanism available only to government licensees). To the extent that non-profit entities have been able to make use of guarantees or statements of intent, cost saving financial assurance alternatives already exist for those licensees.

The Commission anticipates that in the future it will carry out a study of potential self-guarantee criteria for non-profit licensees other than universities. Because of the time required for such a study however, it cannot include non-profit entities in the self-guarantee program established by this rulemaking. The NRC will review the situation relative to universities after its planned rulemaking on fee recovery.

Requiring Additional Written Commitment by Self-Guarantors

One commenter recommended adding a requirement that self-guarantors execute a binding commitment to make the necessary funds available for decommissioning. Under this recommendation, in addition to submitting proof of the required financial strength, the self-guarantor would also have to submit a written agreement that, upon issuance of an order by the Commission to undertake decommissioning, the licensee will set up a trust fund in favor of the Commission, or obtain other surety accessible to the Commission.

Response: The addition of a written commitment is a useful suggestion. A provision is being included in the self-guarantee requirements calling for the licensee to provide the Commission with a written guarantee (a written commitment by a corporate officer) stating that the licensee will fund and carry out the required decommissioning activities, or, upon issuance of an order by the Commission, it will set up and fund a standby trust with sufficient funds to carry out the required decommissioning activities based on the current cost estimates.

Changes From the Proposed Rule

There are only three changes from the proposed rule. First, the specific $1 billion tangible net worth criterion has been deleted from the financial criteria required for a non-electric utility licensee to use self-guarantee. The financial criteria included in the final rule are:

(1) Tangible net worth at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor;

(2) Assets located in the United States amounting to at least 90 percent of total assets or at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor;

(3) A current rating for its most recent bond issuance of AAA, AA, or A as issued by Standard and Poors (S&P), or Aaa, Aa, or A as issued by Moodys.

As used by the ratings agencies, an A rating marks a discrete point on the ratings scale, different from A−. An A− or lower rating would not be acceptable.

The second change is the addition of the requirement for the licensee to provide the Commission with a written guarantee.

The third change is that additional language has been added to Appendix B to clarify procedural requirements for notification of the Commission and provision of alternate financial assurance if a licensee no longer meets the requirements for self-guarantee.

Agreement State Compatibility

Section 72.30 is assigned Division 4 compatibility, since regulation of independent storage of spent nuclear fuel and high-level radioactive waste are functions reserved to the NRC pursuant to the Atomic Energy Act.

Sections 30.35, 40.36, and 70.25 are currently considered Division 2 compatibility. The addition of the self-guarantee mechanism for providing the required financial guarantee does not change the division of compatibility. Division 2 compatibility allows the Agreement States flexibility to be more stringent. The agreement States must provide mechanisms in their regulations, but due to the specific State financial regulations, certain mechanisms may not be acceptable in their States. Limiting the mechanisms to a subset of those provided for in the NRC regulations is within the flexibility provided in Division 2 compatibility.

Environmental Impact: Categorical Exclusion

The NRC has determined that this regulation is the type of action described as a categorical exclusion in 10 CFR 51.22(c)(10)(i). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this regulation.

Paperwork Reduction Act Statement

This rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, *et seq.*). These requirements have been approved by the Office of Management and Budget, approval numbers: 3150–0017, –0020, and –0009.

The public reporting burden for this collection of information is estimated to average 19 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch (MNBB–7714), U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB–3019, (3150–0017, –0020, and –0009), Office of Management and Budget, Washington, DC 20503.

Regulatory Analysis

The Commission has prepared a regulatory analysis on this regulation. The analysis examines the costs and benefits of the alternatives considered by the Commission. The analysis is available for inspection in the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Single copies of the analysis may be obtained from Clark W. Prichard, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC, 20555 telephone (301) 492–3734.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Commission certifies that this rule will not have a significant economic impact upon a substantial number of small entities. The licensees affected by this rule do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the size standards of the NRC applicable to a small business (56 FR 56671; November 6, 1991).

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this rule and, therefore, that a backfit analysis is not required for this rule, because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects

10 CFR Part 30

Byproduct material, Criminal penalty, Government contracts, Intergovernmental relations, Isotopes, Nuclear material, Radiation protection, Reporting and recordkeeping requirements.

10 CFR Part 40

Criminal penalty, Government contracts, Hazardous materials transportation, Nuclear materials, Reporting and recordkeeping requirements, Source material, Uranium.

10 CFR Part 50

Antitrust, Classified information, Criminal penalty, Fire protection, Intergovernmental relations, Nuclear power plants and reactors, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

10 CFR Part 70

Criminal penalty, Hazardous materials transportation, Material control and accounting, Nuclear materials, Packaging and containers, Penalty, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment, Security measures, Special nuclear material.

10 CFR Part 72

Manpower training programs, Nuclear materials, Occupational safety and health, Reporting and recordkeeping requirements, Security measures, Spent fuel.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR parts 30, 40, 50, 70, and 72.

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

1. The authority citation for part 30 continues to read as follows:

[2] Corporate Bond Defaults and Default Rates, Moody's Special Report, January 1991, p. 32.

VOL 58 ISS 248 DE 29 1993 UMI

Authority: Secs. 81, 82, 161, 182, 183, 186, 68 Stat. 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2111, 2112, 2201, 2232, 2233, 2236, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 30.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 30.34(b) also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 30.61 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

2. In § 30.8 paragraph (b) is revised to read as follows:

§ 30.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 30.9, 30.11, 30.15, 30.19, 30.20, 30.32, 30.34, 30.35, 30.36, 30.37, 30.38, 30.50, 30.51, 30.55, 30.56, and appendix A and B to this part.

* * * * *

3. In § 30.35, the introductory text of paragraph (f)(2) is revised to read as follows:

§ 30.35 Financial assurance and recordkeeping for decommissioning.

* * * * *

(f) * * *

(1) * * *

(2) A surety method, insurance, or other guarantee method. These methods guarantee that decommissioning costs will be paid. A surety method may be in the form of a surety bond, letter of credit, or line of credit. A parent company guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix A of this part. A parent company guarantee may not be used in combination with other financial methods to satisfy the requirements of this section. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix B of this part. A guarantee by the applicant or licensee may not be used in combination with any other financial methods to satisfy the requirements of this section or in any situation where the applicant or licensee has a parent company holding majority control of the voting stock of the company. Any surety method or insurance used to provide financial assurance for decommissioning must contain the following conditions:

* * * * *

4. A new appendix B is added to part 30 to read as follows:

Appendix B to Part 30—Criteria Relating to Use of Financial Tests and Self Guarantees for Providing Reasonable Assurance of Funds for Decommissioning

I. Introduction

An applicant or licensee may provide reasonable assurance of the availability of funds for decommissioning based on furnishing its own guarantee that funds will be available for decommissioning costs and on a demonstration that the company passes the financial test of Section II of this appendix. The terms of the self-guarantee are in Section III of this appendix. This appendix establishes criteria for passing the financial test for the self guarantee and establishes the terms for a self-guarantee.

II. Financial Test

A. To pass the financial test, a company must meet all of the following criteria:

(1) Tangible net worth at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor.

(2) Assets located in the United States amounting to at least 90 percent of total assets or at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor.

(3) A current rating for its most recent bond issuance of AAA, AA, or A as issued by Standard and Poors (S&P), or Aaa, Aa, or A as issued by Moodys.

B. To pass the financial test, a company must meet all of the following additional requirements:

(1) The company must have at least one class of equity securities registered under the Securities Exchange Act of 1934.

(2) The company's independent certified public accountant must have compared the data used by the company in the financial test which is derived from the independently audited, yearend financial statements for the latest fiscal year, with the amounts in such financial statement. In connection with that procedure, the licensee shall inform NRC within 90 days of any matters coming to the attention of the auditor that cause the auditor to believe that the data specified in the financial test should be adjusted and that the company no longer passes the test.

(3) After the initial financial test, the company must repeat passage of the test within 90 days after the close of each succeeding fiscal year.

C. If the licensee no longer meets the requirements of Section II.A. of this appendix, the licensee must send immediate notice to the Commission of its intent to establish alternate financial assurance as specified in the Commission's regulations within 120 days of such notice.

III. Company Self-Guarantee

The terms of a self-guarantee which an applicant or licensee furnishes must provide that:

A. The guarantee will remain in force unless the licensee sends notice of cancellation by certified mail to the Commission. Cancellation may not occur, however, during the 120 days beginning on the date of receipt of the notice of cancellation by the Commission, as evidenced by the return receipt.

B. The licensee shall provide alternative financial assurance as specified in the Commission's regulations within 90 days following receipt by the Commission of a notice of cancellation of the guarantee.

C. The guarantee and financial test provisions must remain in effect until the Commission has terminated the license or until another financial assurance method acceptable to the Commission has been put in effect by the licensee.

D. The licensee will promptly forward to the Commission and the licensee's independent auditor all reports covering the latest fiscal year filed by the licensee with the Securities and Exchange Commission pursuant to the requirements of section 13 of the Securities and Exchange Act of 1934.

E. If, at any time, the licensee's most recent bond issuance ceases to be rated in any category of "A" or above by either Standard and Poors or Moodys, the licensee will provide notice in writing of such fact to the Commission within 20 days after publication of the change by the rating service. If the licensee's most recent bond issuance ceases to be rated in any category of A or above by both Standard and Poors and Moodys, the licensee no longer meets the requirements of Section II.A. of this appendix.

F. The applicant or licensee must provide to the Commission a written guarantee (a written commitment by a corporate officer) which states that the licensee will fund and carry out the required decommissioning activities or, upon issuance of an order by the Commission, the licensee will set up and fund a trust in the amount of the current cost estimates for decommissioning.

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

5. The authority citation for part 40 continues to read as follows:

Authority: Secs. 62, 63, 64, 65, 81, 161, 182, 183, 186, 68 Stat. 932, 933, 935, 948, 953, 954, 955, as amended, secs. 11e(2), 83, 84, Pub. L. 95–604, 92 Stat. 3033, as amended, 3039, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2014(e)(2), 2092, 2093, 2094, 2095, 2111, 2113, 2114, 2201, 2232, 2233, 2236, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688 (42 U.S.C. 2021); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); sec. 275, 92 Stat. 3021, as amended by Pub. L. 97–415, 96 Stat. 2067 (42 U.S.C. 2022).

Section 40.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 40.31(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 40.46 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 40.71 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

6. In § 40.8 paragraph (b) is revised to read as follows:

§ 40.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 40.25, 40.26, 40.31, 40.35, 40.36, 40.42, 40.43, 40.44, 40.60, 40.61, 40.64, 40.65, and appendix A to this part.

* * * * *

7. In § 40.36 the introductory text of paragraph (e)(2) is revised to read as follows:

§ 40.36 Financial assurance and recordkeeping for decommissioning.

* * * * * *

(e) * * *

(2) A surety method, insurance, or other guarantee method. These methods guarantee that decommissioning costs will be paid. A surety method may be in the form of a surety bond, letter of credit, or line of credit. A parent company guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test are as contained jn appendix A of 10 CFR part 30. A parent company guarantee may not be used in combination with other financial methods to satisfy the requirements of this section. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix B of 10 CFR part 30. A guarantee by the applicant or licensee may not be used in combination with any other financial methods to satisfy the requirements of this section or in any situation where the applicant or licensee has a parent company holding majority control of the voting stock of the company. Any surety method or insurance used to provide financial assurance for decommissioning must contain the following conditions:

* * * * *

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

8. The authority citation for part 50 continues to read as follows:

Authority: Secs. 102, 103, 104, 105, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 938, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 50.10 also issued under secs. 101, 185, 68 Stat. 936, 955, as amended (42 U.S.C. 2131, 2235); sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332). Sections 50.13, 50.54(dd), and 50.103 also issued under sec. 108, 68 Stat. 939, as amended (42 U.S.C. 2138). Sections 50.23, 50.35, 50.55, and 50.56 also issued under sec. 185, 68 Stat. 955 (42 U.S.C. 2235). Sections 50.33a, 50.55a and Appendix Q also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332). Sections 50.34 and 50.54 also issued under sec. 204, 88 Stat. 1245 (42 U.S.C. 5844). Sections 50.58, 50.91, and 50.92 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80 - 50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Appendix F also issued under sec. 187, 68 Stat. 955 (42 U.S.C 2237).

9. In § 50.8 paragraph (b) is revised to read as follows:

§ 50.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in § § 50.30, 50.33, 50.33a, 50.34, 50.34a, 50.35, 50.36, 50.36a, 50.48, 50.49, 50.54, 50.55, 50.55a, 50.59, 50.60, 50.61, 50.63, 50.64, 50.65, 50.71, 50.72, 50.75, 50.80, 50.82, 50.90, 50.91, and appendices A, B, E, G, H, I, J, K, M, N, O, Q, and R to this part.

10. In § 50.75 the introductory text of paragraph (e)(1)(iii) and paragraph (e)(2)(iii) are revised to read as follows:

§ 50.75 Reporting and recordkeeping for decommissioning planning.

* * * * *

(e) * * *

(1) * * *

(iii) A surety method, insurance, or other guarantee method. These methods guarantee that decommissioning costs will be paid. A surety method may be in the form of a surety bond, letter of credit, or line of credit. Any surety method or insurance used to provide financial assurance for decommissioning must contain the following conditions:

* * * * *

(2) * * *

(iii) A surety method, insurance, or other guarantee method. A parent company guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix A of 10 CFR part 30. A parent company guarantee may not be used in combination with other financial methods to satisfy the requirements of this section. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix B of 10 CFR part 30. A guarantee by the applicant or the licensee may not be used in combination with any other financial methods to satisfy the requirements of this section or in any situation where the applicant or licensee has a parent company holding majority control of the voting stock of the company.

* * * * *

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

11. The authority citation for part 70 continues to read as follows:

Authority: Secs. 51, 53, 161, 182, 183, 68 Stat. 929, 930, 948, 953, 954, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2201, 2232, 2233, 2282); secs. 201, as amended, 202, 204, 206, 88 Stat. 1242, as amended, 1244, 1245, 1246 (42 U.S.C. 5841, 5842, 5845, 5846).

Sections 70.1(c) and 70.20a(b) also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 70.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 70.21(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 70.31 also issued under sec. 57d, Pub. L. 93–377, 88 Stat. 475 (42 U.S.C. 2077). Sections 70.36 and 70.44 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 70.61 also issued under secs. 186, 187, 68 Stat. 955 (42 U.S.C. 2236, 2237). Section 70.62 also issued under sec. 108, 68 Stat. 939, as amended (42 U.S.C. 2138).

12. In § 70.25, the introductory text of paragraph (f)(2) is revised to read as follows:

§ 70.25 Financial assurance and recordkeeping for decommissioning.

* * * * *

(f) * * *

(2) A surety method, insurance, or other guarantee method. These methods guarantee that decommissioning costs will be paid. A surety method may be in the form of a surety bond, letter of credit, or line of credit. A parent company guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix A of 10 CFR part 30. A parent company guarantee may not be used in combination with other financial methods to satisfy the requirements of this section. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix B of 10 CFR part 30. A

VOL 58 ISS 248 DEC 29 1993 UMI

guarantee by the applicant or the licensee may not be used in combination with any other financial methods to satisfy the requirements of this section or in any situation where the applicant or licensee has a parent company holding majority control of the voting stock of the company. Any surety method or insurance used to provide financial assurance for decommissioning must contain the following conditions:

* * * * *

PART 72—LICENSING REQUIREMENTS FOR THE INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL AND HIGH-LEVEL RADIOACTIVE WASTE

13. The authority citation for part 72 continues to read as follows:

Authority: Secs. 51, 53, 57, 62, 63, 65, 69, 81, 161, 182, 183, 184, 186, 187, 189, 68 Stat. 929, 930, 932, 933, 934, 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2077, 2092, 2093, 2095, 2099, 2111, 2201, 2232, 2233, 2234, 2236, 2237, 2238, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688, as amended (42 U.S.C. 2021); sec. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851); sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332); Secs. 131, 132, 133, 135, 137, 141, Pub. L. 97–425, 96 Stat. 2229, 2230, 2232, 2241, sec. 148, Pub. L. 100–203, 101 Stat. 1330–235 (42 U.S.C. 10151, 10152, 10153, 10155, 10157, 10161, 10168).

Section 72.44(g) also issued under secs. 142(b) and 148(c), (d), Pub. L. 100–203, 101 Stat. 1330–232, 1330–236 (42 U.S.C. 10162(b), 10168(c), (d)). Section 72.46 also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134, Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Section 72.96(d) also issued under sec. 145(g), Pub. L. 100–203, 101 Stat. 1330–235 (42 U.S.C. 10165(g)). Subpart J also issued under secs. 2(2), 2(15), 2(19), 117(a), 141(h), Pub. L. 97–425, 96 Stat. 2202, 2203, 2204, 2222, 2244 (42 U.S.C. 10101, 10137(a), 10161(h)). Subparts K and L are also issued under sec. 133, 98 Stat. 2230 (42 U.S.C. 10153) and sec. 218(a), 96 Stat. 2252 (42 U.S.C. 10198).

15. In § 72.30 the introductory text of paragraph (c)(2) is revised to read as follows:

§ 72.30 Decommissioning planning including financing and recordkeeping.

* * * * *

(c) * * *

(2) A surety method, insurance, or other guarantee method. These methods guarantee that decommissioning costs will be paid. A surety method may be in the form of a surety bond, letter of credit, or line of credit. A parent company guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix A of 10 CFR part 30. A parent company guarantee may not be used in combination with other financial methods to satisfy the requirements of this section. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in appendix B of 10 CFR part 30. A guarantee by the applicant or the licensee may not be used in combination with any other financial methods to satisfy the requirements of this section or in any situation where the applicant or licensee has a parent company holding majority control of the voting stock of the company. Any surety method or insurance used to provide financial assurance for decommissioning must contain the following conditions:

DEPARTMENT OF ENERGY

10 CFR Part 780

Patent Compensation Board Regulations

AGENCY: Department of Energy (DOE).

ACTION: Final Rulemaking.

SUMMARY: Today's rule amends the Department's Patent Compensation Board regulations to comply with the North American Free Trade Agreement, commonly referred to as "NAFTA," and its implementing legislation. These regulations are amended in response to the Statement of Administrative Action on NAFTA that was submitted to Congress under section 1103 of the Omnibus Trade and Competitiveness Act of 1988 (19 U.S.C. 2903) where the Administration expressed its intent to amend regulations as required to implement U.S. obligations under the agreement at the time NAFTA enters into force. House Document 103–159, vol. 1.

EFFECTIVE DATE: January 1, 1994.

FOR FURTHER INFORMATION CONTACT: Sue Hagarman, Office of the Assistant General Counsel for Intellectual Property (GC–42), U.S. Department of Energy, Washington, DC 20585, (202) 586–3499.

SUPPLEMENTARY INFORMATION:

E. Review Under Executive Order 12612.
F. Review Under the National Environmental Policy Act.
G. General.

I. Background

A. Discussion

The effect of Article 1709(10) of NAFTA is to limit the extent to which a government that is a party to NAFTA may allow the use of a patent without the patent owner's permission, i.e., compulsorily license a patent.

Section 104(b) of the North American Free Trade Agreement Implementation Act (Act), Pub. L. 103–182, provides that appropriate officers of the United States may issue necessary regulations to ensure that a provision of NAFTA, such as Article 1709(10), is fully effective on the date that NAFTA enters into force, subject to the restriction that the effective date of such regulations is no earlier than the date of entry into force. Section 101(b) of the Act authorizes the President to exchange notes with the Government of Canada or Mexico, providing for entry into force, on or after January 1, 1994. On page 14 of the Statement of Administrative Action on NAFTA that was submitted to Congress under section 1103 of Omnibus Trade and Competitiveness Act of 1988 (19 U.S.C. 2903), there is an expression of the Administration's intent to amend regulations as required to implement U.S. obligations under the agreement at the time NAFTA enters into force. House Document 103–159, vol. 1.

Section 153 of the Atomic Energy Act authorizes the Department of Energy (DOE) to issue compulsory licenses under certain conditions, 42 U.S.C. 2183. The DOE regulations (10 CFR part 780), which implement section 153, set forth the procedures to be followed when compulsorily licensing a patent. The DOE regulations include the requirements of paragraphs (a) and (i)–(l) of Article 1709(10). 10 CFR 780.10 and 780.30. However, all of the requirements of each of paragraphs (b)–(h) of Article 1709(10) are not so included.

Article 1709(10) of NAFTA reads as follows:

Where the law of a Party allows for use of the subject matter of a patent, other than that

use allowed under paragraph 6, without the authorization of the right holder, including use by the government or other persons authorized by the government, the Party shall respect the following provisions:

(a) Authorization of such use shall be considered on its individual merits;

(b) Such use may only be permitted if, prior to such use, the proposed user has made efforts to obtain authorization from the right holder on reasonable commercial terms and conditions and such efforts have not been successful within a reasonable period of time. The requirement to make such efforts may be waived by a Party in the case of a national emergency or other circumstances of extreme urgency or in cases of public non-commercial use. In situations of national emergency or other circumstances of extreme urgency, the right holder shall, nevertheless, be notified as soon as reasonably practicable. In the case of public non-commercial use, where the government or contractor, without making a patent search, knows or has demonstrable grounds to know that a valid patent is or will be used by or for the government, the right holder shall be informed promptly;

(c) The scope and duration of such use shall be limited to the purpose for which it was authorized;

(d) Such use shall be non-exclusive;

(e) Such use shall be non-assignable, except with that part of the enterprise or goodwill that enjoys such use;

(f) Any such use shall be authorized predominantly for the supply of the Party's domestic market;

(g) Authorization for such use shall be liable, subject to adequate protection of the legitimate interests of the persons so authorized, to be terminated if and when the circumstances that led to it cease to exist and are unlikely to recur. The competent authority shall have the authority to review, on motivated request, the continued existence of these circumstances;

(h) The right holder shall be paid adequate remuneration in the circumstances of each case, taking into account the economic value of the authorization;

(i) The legal validity of any decision relating to the authorization shall be subject to judicial or other independent review by a distinct higher authority;

(j) Any decision relating to the remuneration provided in respect of such use shall be subject to judicial or other independent review by a distinct higher authority;

(k) The Party shall not be obliged to apply the conditions set out in subparagraphs (b) and (f) where such use is permitted to remedy a practice determined after judicial or administrative process to be anti-competitive. The need to correct anti-competitive practices may be taken into account in determining the amount of remuneration in such cases. Competent authorities shall have the authority to refuse termination of authorization if and when the conditions that led to such authorization are likely to recur;

(l) The Party shall not authorize the use of the subject matter of a patent to permit the exploitation of another patent except as a remedy for an adjudicated violation of domestic laws regarding anti-competitive practices.

Paragraphs (b)–(h) of Article 1709(10) are not inconsistent with any of the specific requirements of section 153. Furthermore, the provisions of paragraphs (b)–(h) are either very specific or capable of implementation on a case-by-case basis. Accordingly, the regulations at 10 CFR part 780 can be conformed to paragraphs (b)–(h) by issuing final interpretive regulatory amendments that closely follow the language of those paragraphs.

Consistent with DOE's obligations and authority under NAFTA, the implementing Act, and the Atomic Energy Act, and pursuant to the above-described expression of intent in the Statement of Administrative Action which accompanied NAFTA, DOE is today amending 10 CFR part 780 to incorporate the requirements of paragraphs (b)–(h) of Article 1709(10) of NAFTA. The requirements of paragraph (b) are repeated in the amendments to 10 CFR 780.34(b) and 780.45(d). The requirements of paragraphs (c)–(g) are repeated in the amendments to 10 CFR 780.36 and 780.47. The requirements of paragraph (h) are reflected in the amendment of 10 CFR 780.53. In compliance with the above-described restriction in section 104(b) of the implementing Act regarding the "effective date," and consistent with the Administrative Procedure Act, 5 U.S.C. 553(d)(2), today's regulatory amendments take effect on January 1, 1994.

II. Procedural Requirements

A. Review Under Executive Order 12866

It has been determined that today's regulatory action is not a "significant regulatory action" under Executive Order 12866, "Regulatory Planning and Review," (58 FR 51735, October 4, 1993). Accordingly, this action was not subject to review under that executive order by the Office of Information and Regulatory Affairs of the Office of Management and Budget (OMB).

B. Review Under Executive Order 12778

Section 2 of Executive Order 12778 instructs each agency subject to Executive Order 12291 to adhere to certain requirements in promulgating new regulations and reviewing existing regulations. These requirements, set forth in sections 2(a) and (b), include eliminating drafting errors and needless ambiguity, drafting the regulations to minimize litigation, providing clear and certain legal standards for affected conduct, and promoting simplification and burden reduction. Agencies are also instructed to make every reasonable effort to ensure that the regulation: Specifies clearly any preemptive effect, effect on existing Federal law or regulation, and retroactive effect; describes any administrative proceedings to be available prior to judicial review and any provisions for the exhaustion of such administrative proceedings; and defines key terms. This final rule will have no preemptive effect; will not have any effect on existing Federal laws; and will only clarify the existing regulations on this subject. The revised regulations will apply only to compulsory licenses granted after the effective date of this rule, January 1, 1994, and, thus, will have no retroactive effect. Therefore, DOE certifies that this final rule meets the requirements of sections 2(a) and (b) of Executive Order 12778.

C. Review Under the Regulatory Flexibility Act

This final rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. DOE certifies that this rule will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

D. Review Under the Paperwork Reduction Act

This rule will require only an insignificant addition to the data collection required for the Standard Forms 294 and 295. Accordingly, no OMB clearance is required by the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, *et seq.*).

E. Review Under Executive Order 12612

Executive Order 12612, 52 FR 41685 (October 30, 1987), requires that regulations, rules, legislation, and any other policy actions be reviewed for any substantial direct effects on States, on the relationship between the national government and the States, and in the distribution of power and responsibilities among various levels of government. If there are sufficient substantial direct effects, then the Executive Order requires preparation of a federalism assessment to be used in all decisions involved in promulgating and implementing a policy action.

Today's final rule will only add detail to certain policy and procedural requirements. However, DOE has determined that none of the revisions

VOL 58 ISS 248 DE 29 1993 UMI

will have a substantial direct effect on the institutional interests or traditional functions of States.

F. Review Under the National Environmental Policy Act

The DOE has determined that this rule is covered under the Categorical Exclusions codified at 10 CFR part 1021 that apply to rulemakings that are strictly procedural or to the amendment of existing regulation that does not change the environmental effect of the regulation being amended. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

G. General

The DOE has not provided for a public comment period because today's regulatory amendments are an interpretative rule which is exempt from the requirement to propose rules for public comment under the Administrative Procedure Act, 5 U.S.C. 553.

Ordinarily, final rules take effect 30 days from the date of publication. However, today's regulatory amendments take effect on January 1, 1994, pursuant to section 104(a) of the implementing Act for NAFTA and the exception from the 30-day effective date requirement in 5 U.S.C. 553(d)(2).

List of Subjects in 10 CFR Part 780

Inventions, Patents, Licenses and Patent Compensation Board.

Issued in Washington, DC, on December 23, 1993.

Eric Fygi,

Acting General Counsel.

For the reasons stated in the preamble, DOE hereby amends 10 CFR part 780 as follows:

PART 780—PATENT COMPENSATION BOARD REGULATIONS

1. The citation for authority for part 780 is revised as follows:

Authority: 42 U.S.C. 7151, 7254; 42 U.S.C. 5814, 5815; 42 U.S.C. 2183, 2187, 2223; 35 U.S.C. 183; North American Free Trade Agreement, Article 1709(10), as implemented by the North American Free Trade Agreement Implementing Act, Pub. L. 103–182.

2. Section 780.34 is amended by revising paragraph (b) to read as follows:

§ 780.34 Criteria for decision to issue a license.

* * * * *

(b) The applicant has made efforts to obtain reasonable commercial terms and conditions and such efforts have not been successful within a reasonable period of time. The requirement to make such efforts may be waived by the Board in the case of a national emergency or other circumstances of extreme urgency or in cases of public non-commercial use. Where this requirement is waived due to national emergency or other circumstances of extreme urgency, the owner of the patent shall be notified as soon as reasonably practicable. Where this requirement is waived for a public non-commercial use, the owner of the patent shall be notified promptly.

3. Section 780.36 is revised to read as follows:

§ 780.36 Conditions and issuance of license.

(a) Upon receipt of the Board's decision and instruction to issue a patent license, the General Counsel shall issue a license which complies with the following:

(1) The scope and durations of such use shall be limited to the purpose for which it was authorized;

(2) Such use shall be non-exclusive;

(3) Such use shall be non-assignable, except with that part of the enterprise or goodwill that enjoys such use;

(4) Any such use shall be authorized predominantly for the supply of the U.S. market; and,

(5) Authorization for such use shall be liable, subject to adequate protection of the legitimate interests of the persons so authorized, to be terminated if and when the circumstances that led to it cease to exist and are unlikely to recur.

(b) The Board shall have the authority to review, on motivated request, the continued existence of these circumstances. The parties will propose and agree on a reasonable royalty fee within a reasonable time as determined by the General Counsel. A reasonable royalty shall provide adequate remuneration for the circumstances of each case, taking into account the economic value of the authorization. If a party does not agree with the terms and conditions of the license as determined by the General Counsel or if a royalty fee cannot be agreed upon within the reasonable time period established by the General Counsel, any party may, within 30 days after the expiration of such time period, initiate a proceeding before the Board, in accordance with subpart E of this part, for a reconsideration of the General Counsel's determination. After the proceeding under subpart E of this part is completed, the General Counsel shall modify the patent license in accordance with the Board's determination.

4. Section 780.45 is amended by revising paragraph (d) to read as follows:

§ 780.45 Criteria for decision to issue a license.

* * * * *

(d) The applicant has made efforts to obtain reasonable commercial terms and conditions and such efforts have not been successful within a reasonable period of time. The requirement to make such efforts may be waived by the Board in the case of a national emergency or other circumstances of extreme urgency or in cases of public non-commercial use. Where this requirement is waived due to national emergency or other circumstances of extreme urgency, the owner of the patent shall be notified as soon as reasonably practicable. Where this requirement is waived for a public non-commercial use, the owner of the patent shall be notified promptly.

* * * * *

5. Section 780.47 is revised to read as follows:

§ 780.47 Condition and issuance of license.

(a) Upon receipt of the Board's decision and instruction to issue a patent license, the General Counsel shall issue a license which complies with the following:

(1) The scope and durations of such use shall be limited to the purpose for which it was authorized;

(2) Such use shall be non-exclusive;

(3) Such use shall be non-assignable, except with that part of the enterprise or goodwill that enjoys such use;

(4) Any such use shall be authorized predominantly for the supply of the U.S. market; and,

(5) Authorization for such use shall be liable, subject to adequate protection of the legitimate interests of the persons so authorized, to be terminated if and when the circumstances that led to it cease to exist and are unlikely to recur.

(b) The Board shall have the authority to review, on motivated request, the continued existence of these circumstances. The parties will propose and agree on a reasonable royalty fee within a reasonable time as determined by the General Counsel. A reasonable royalty shall provide adequate remuneration for the circumstances of each case, taking into account the economic value of the authorization. If a party does not agree with the terms and conditions of the license as determined by the General Counsel or if a royalty fee cannot be agreed upon within the reasonable time period established by the General Counsel, any party may, within 30 days after the expiration of such time period, initiate a proceeding before the Board, in accordance with subpart E of this part, for a reconsideration of the General Counsel's determination. After the proceeding under subpart E of this part is completed, the General Counsel shall modify the patent license in accordance with the Board's determination.

6. Section 780.53 is amended by redesignating paragraphs (a)(1)–(a)(4) as (a)(2)–(a)(5) and adding a new paragraph (a)(1) to read as follows:

§ 780.53 Criteria for decisions for royalties, awards and compensation.

(a) * * *

(1) The economic value of the compulsory license and the Board shall strive to provide adequate remuneration for the circumstances of each case.

* * * * *

FEDERAL RESERVE SYSTEM

12 CFR Part 202

[Regulation B; Docket No. R-0782]

Equal Credit Opportunity; Appraisals and Enforcement; Correction

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; correction.

SUMMARY: This document contains a correction to the final rule (Docket No. R-0782) which was published Thursday, December 16, 1993 (58 FR 65657). The amendments to Regulation B concerned providing credit applicants with a right to receive copies of appraisal reports.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: Michael Bylsma, Senior Attorney, or Jane Ahrens, Jane Gell or Mary Jane Seebach, Staff Attorneys (202/452-3667), Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System. For the hearing impaired *only*, Telecommunications Device for the Deaf (TDD), Dorothea Thompson (202/452-3544), Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551.

In the issue of December 16, 1993, on page 65657, in the third column, second paragraph, five lines down from the top of the paragraph, the date "June 6, 1994" is corrected to read "June 14, 1994".

Board of Governors of the Federal Reserve System, December 22, 1993.

[Regulations H and Y; Docket No. R-0756]

Capital; Capital Adequacy Guidelines

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors of the Federal Reserve System is amending its risk-based capital guidelines for state member banks and bank holding companies. This final rule implements section 618(b) of the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991 and section 305(b)(1)(B) of the Federal Deposit Insurance Corporation Improvement Act of 1991. The effect of the final rule will be to permit state member banks and bank holding companies to lower from 100 percent to 50 percent the risk weight assigned to certain multifamily housing loans.

EFFECTIVE DATE: This final rule is effective as of December 31, 1993.

FOR FURTHER INFORMATION CONTACT: Rhoger H. Pugh, Assistant Director (202/728–5883), Norah M. Barger, Manager (202/452–2402), Robert E. Motyka, Supervisory Financial Analyst (202/452–3621), or Barbara J. Bouchard, Senior Financial Analyst (202/452–3072), Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551. SUPPLEMENTARY INFORMATION:

Background

On April 10, 1992, the Federal Reserve Board (Board) issued for public comment a proposal to amend its risk-based capital guidelines that would lower the risk weight from 100 percent to 50 percent for certain multifamily housing loans meeting specified criteria. This proposal was made to satisfy the requirements of section 618(b) of the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991 (RTCRRIA). In addition, this proposal would implement section 305(b)(1)(B) of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) which requires the Federal banking agencies [1] to revise their risk-based capital guidelines to reflect the actual performance and expected risk of loss of multifamily housing loans.

Section 618(b) of RTCRRIA mandates that a 50 percent risk weight be accorded to loans for multifamily housing meeting certain criteria. These statutory criteria were incorporated into the Board's proposal and include the following:

(1) The loan is secured by a first lien;

(2) The ratio of the principal obligation to the appraised value of the property, that is, the loan-to-value (LTV) ratio does not exceed 80 percent (75 percent if the loan is based on a floating interest rate);

(3) The annual net operating income generated by the property (before debt service) is not less than 120 percent of the annual debt service on the loan (115 percent if the loan is based on a floating interest rate);

(4) Amortization of principal and interest is over a period of not more than 30 years and the minimum maturity for repayment of principal is not less than 7 years; and

(5) All principal and interest payments have been made on the loan on time for a period of not less than one year prior to placement in the 50 percent risk category.

Section 618(b) also provides that the appropriate Federal banking agencies may establish additional criteria that a multifamily housing loan must meet before being accorded a 50 percent risk weight. In this regard, and in agreement with the other Federal banking agencies, the Board's proposed amendment set forth the following four additional criteria to ensure that only those multifamily housing loans that expose an institution to minimal levels of credit risk would receive a 50 percent risk weight:

(1) The loan-to-value ratio used for the purpose of the statutory criterion cited above is based upon the most current appraised value of the property (which normally would be the appraised value at the time the loan was originated, unless a more recent evaluation or appraisal has been performed);

(2) The loan is performing in accordance with its original terms and is not more than 90 days past due or carried in nonaccrual status;

(3) The average annual occupancy for the property securing the loan has been

[1] The three other Federal banking agencies have also issued for public comment similar proposals to lower the risk weight for multifamily housing loans meeting the specified criteria. The Office of Thrift Supervision (OTS) currently permits certain multifamily loans to be included in the 50 percent risk weight category. The proposal issued by the OTS would modify its existing criteria for such loans to qualify for a 50 percent risk weight.

at least 80 percent for the preceding year; and

(4) The loan has been made in accordance with prudent underwriting standards.

The existing risk-based capital guidelines provide that loans secured by mortgages on 1- to 4-family residential properties must meet the first, second, and fourth additional criteria in order to be assigned a 50 percent risk weight. The third proposed criterion is a requirement under the OTS guidelines for loans for multifamily housing accorded a 50 percent risk weight.

Under the proposed revision to the risk-based capital guidelines, privately-issued securities backed by multifamily housing loans that meet the above cited criteria at the time the securities are originated would also qualify for inclusion in the 50 percent risk category provided that the structure of the security meets certain technical criteria set forth in the guidelines. This treatment would parallel the treatment for privately-issued securities backed by loans for 1- to 4-family residential properties under the risk-based capital guidelines. Application of this treatment to a security backed by multifamily housing loans means that the security would not qualify for inclusion in the 50 percent risk category unless all the underlying mortgages have been outstanding and performing for at least one year prior to origination of the security.

Section 618(b)(2) of RTCRRIA requires the agencies to amend their capital regulations and guidelines to provide that any loan fully secured by a first lien on a multifamily housing property that is sold subject to a pro rata loss sharing arrangement should be treated as sold to the extent that loss is incurred by the purchaser of the loan. Section 618(b)(3) of RTCRRIA directs the agencies to take into account other loss sharing arrangements, in connection with the sale of any loan that is fully secured by a first lien on multifamily housing property, to determine the extent to which such loans should be treated as sold.

The Board's existing guidelines set forth guidance on the treatment of assets sold with recourse, including those sold subject to loss sharing arrangements.

The risk-based capital guidelines for state member banks state that the risk-based capital definition of the sale of assets with recourse, including assets sold subject to loss sharing arrangements, is the same as the definition contained in the instructions to the commercial bank Consolidated Reports of Condition and Income (Call Report) glossary entry for "sales of assets." Those instructions set out conditions that must be met in order for a bank to treat a sale of assets as a true sale and, thus, to remove from its balance sheet assets it has sold. Assets that have been sold and removed from a bank's balance sheet in accordance with the Call Report instructions are excluded from the calculation of risk-weighted assets.

Specifically with regard to the sale of assets, the Call Report instructions provide:

if the risk retained by the seller is limited to some fixed percentage of any losses that might be incurred and there are no other provisions resulting in retention of risk, either directly or indirectly, by the seller, the maximum amount of possible loss for which the selling bank is at risk (the stated percentage times the sale proceeds) shall be reported as a borrowing and the remaining amount of the assets transferred reported as a sale.

This treatment, which applies to sales of multifamily housing loans subject to pro rata loss sharing arrangements, is consistent with the language of section 618(b)(2) of RTCRRIA.

The Call Report instructions also provide that other transfers of assets, including the sale of assets subject to other loss sharing arrangements, generally are reported as sales only if the selling institution:

(1) Retains no risk of loss from assets transferred resulting from any cause, and

(2) Has no obligation to any party for the payment of principal or interest on the assets transferred resulting from any cause. This treatment, which applies to sales of multifamily housing loans subject to other loss sharing arrangements, is consistent with the language of section 618(b)(3) of RTCRRIA.

Bank holding companies generally file their regulatory reports in accordance with generally accepted accounting principles (GAAP). Under GAAP, bank holding companies are permitted to treat some asset sales with recourse, including those sold subject to loss sharing arrangements, as "true" sales and, thus, may remove the assets from the balance sheet. The risk-based capital guidelines for bank holding companies state that where such transactions have been removed from the balance sheet but meet the definition of assets sold with recourse contained in the instructions to the Call Report, the assets sold must be included in the calculation of risk-weighted assets. For this purpose the assets that are sold are treated as an off-balance sheet exposure and are converted at 100 percent to a credit equivalent amount and assigned to the appropriate risk weight. This existing treatment, which applies to sales of multifamily housing loans subject to pro rata and other loss sharing arrangements, is consistent with the requirements of RTCRRIA sections 618(b) (2) and (3).

Comments Received

Public comments were received from twenty-three respondents: ten banking organizations, three savings institutions, nine trade associations, and one law firm. Of the twenty-three commenters, eighteen favored lowering the risk weight for qualifying multifamily mortgages from 100 percent to 50 percent; one opposed the lower risk weight; and four gave no overall opinion on the proposal. Commenters responding favorably to the proposal generally agreed that, although loans for multifamily residential properties could be riskier than loans for 1- to 4-family properties, the combination of the criteria required by section 618(b) of RTCRRIA and the additional criteria proposed by the Board should assure that only high quality multifamily housing loans would be included in the 50 percent risk weight category. The one commenter that did not support the proposal expressed the view that certain multifamily loans should stay in the 100 percent risk category because of the historically higher charge-off rates associated with these assets.

Several commenters requested clarification as to whether the qualifying criteria would be applied only once at the time of loan origination or on a continuous basis. Three respondents addressed the application of the annual net operating income-to-debt service ratio as applied to loans to finance multifamily buildings owned by cooperative housing corporations. They noted that since this type of property is generally operated as a not-for-profit enterprise, it would not meet the proposed annual net operating income-to-debt service coverage standard and thus, loans to finance acquisition of such properties could not qualify for the 50 percent risk weight category. Two commenters discussed the treatment of securities backed by multifamily housing loans. One of these commenters expressed the view that the requirement that a multifamily housing loan must perform in accordance with its terms for at least one year before it could qualify for a 50 percent risk weight would prevent securitization of multifamily loans at origination. This commenter also noted that it would be difficult to monitor each underlying loan in a security for continuous compliance with the qualifying criteria.

Final Rule

After review of the public comments, and in agreement with the other Federal banking agencies, the Board is adopting a final rule amending the risk-based capital guidelines to lower the risk weight from 100 percent to 50 percent for loans secured by mortgages on multifamily residential properties meeting certain conditions as well as for securities backed by such qualifying mortgages. This final rule implements section 618(b) of RTCRRIA and section 305(b)(1)(B) of FDICIA. The criteria a multifamily housing loan must meet to be included in the 50 percent risk category are the same as those proposed, except that the 80 percent average annual occupancy requirement has been eliminated and clarification has been made with regard to other criteria.

Following consultations with the other agencies, the Board has decided to eliminate the requirement that the property financed must have maintained an average annual occupancy rate of at least 80 percent for the previous year. Comments received by the other agencies indicated that the additional safeguards this occupancy criterion might provide would be minimal in comparison to the increased record-keeping burden it would create. The Board believes that the remaining criteria should be sufficient to satisfy concerns related to safety and soundness of loans secured by multifamily residential property that are assigned a 50 percent risk weight.

Several commenters noted that certain cooperative properties and other not-for-profit multifamily residential properties may not be able to generate sufficient cash flow to satisfy the annual net operating income-to-debt service ratio required in the qualifying criteria. In light of these comments, the final rule specifies that cooperative and other not-for-profit multifamily residential properties may be deemed to satisfy the annual net operating income-to-debt service ratio requirement if they generate sufficient cash flow to provide comparable protection to the institution. Sufficient cash flow to provide comparable protection may be generated in a variety of ways, for example, through additions to special operating reserve accounts or special subsidies provided by Federal, state, local, or private sources. This comparable protection accommodation could allow low- and moderate-income not-for-profit multifamily housing projects to qualify for the 50 percent risk category, provided that they meet the other criteria.

The Board notes that the annual debt service ratio requirements must be satisfied on an on-going basis for a multifamily housing loan to continue to receive a 50 percent risk weight.

In addition, the final rule states that for purposes of satisfying the one year's timely performance criterion in the case where the existing owner of a multifamily residential property is refinancing a loan on that property, all principal and interest payments on the loan being refinanced must have been made on a timely basis in accordance with the terms of the loan for at least the preceding year.

The existing risk-based capital guidelines specify that prudent underwriting standards include a conservative loan-to-value ratio, and the proposed rule stated that, in the case of a loan secured by multifamily residential property, the loan-to-value ratio would not be deemed conservative if it exceeded 80 percent (75 percent if the loan is based on a floating interest rate). The final rule notes that prudent underwriting standards dictate that a loan-to-value ratio used in the case of a loan to acquire a property would not be deemed conservative unless the value is based on the lower of the purchase price of the property or the value as determined by the most current appraisal or, if appropriate, the most current evaluation. Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal or, if appropriate, the most current evaluation. Subsequent appraisals (or evaluations) of a multifamily property will not be required for the purpose of continuing to include the loan secured by such property in the 50 percent risk category. However, if a subsequent appraisal (or evaluation) is obtained and it indicates that the loan-to-value ratio exceeds the statutory requirements, the loan would have to be reassigned to the 100 percent risk category.

In connection with the loan-to-value ratio criterion, the Board also notes that under the agencies' 1992 real estate lending standards regulations and guidelines, as a general matter, institutions may extend loans to improved property, which includes existing multifamily residential property, with loan-to-value ratios of up to 85 percent. These guidelines, which implement section 304 of FDICIA, became effective on March 19, 1993. While these guidelines permit institutions to make loans secured by existing multifamily property with loan-to-value ratios that exceed 80 percent, such loans would not qualify for the 50 percent risk category. Rather, they should be assigned to the 100 percent risk category.

The final rule provides that securities backed by mortgages on multifamily residential properties may be accorded a 50 percent risk weight if each underlying mortgage satisfies all the criteria for eligibility for the 50 percent risk weight at the time the pool is originated and the structure of the security meets certain technical criteria set forth in the guidelines. This treatment parallels that accorded to securities backed by mortgages on 1- to 4-family residential properties that qualify for a 50 percent risk weight. In light of issues raised by commenters, the Board is clarifying that the final rule does not require monitoring of each loan that has been pooled into a security for continuous compliance with all the qualifying criteria. As a safeguard against deterioration in the underlying assets, however, the final rule stipulates that a security backed by multifamily mortgage loans may be accorded a 50 percent risk weight only as long as principal and interest payments on the security are not more than 30 days past due.

Finally, in order to conform the Board's regulatory language to that of the other agencies, the final rule amends the risk-based capital guidelines for state member banks by clarifying in a footnote that a multifamily housing loan that is sold subject to a pro rata loss sharing arrangement is to be treated by the selling bank as sold (and excluded from the balance sheet assets), to the extent that the sales agreement provides for the purchaser of the loan to share in any loss incurred on the loan on a pro rata basis with the selling bank. This means that, in such a transaction, the portion of the loan that is treated as sold by the selling bank is excluded from the calculation of the risk-based capital ratio.

With regard to bank holding companies, a footnote in the final rule clarifies that multifamily housing loans sold subject to such pro rata loss sharing arrangements, may be treated as sold, for risk-based capital purposes, to the same extent as for banks. The portion that is sold would not be subject to the 100 percent conversion factor normally applied to assets sold with recourse but rather would be excluded from the calculation of the risk-based capital ratio.

The clarifying footnotes also provide guidance on the risk-based capital treatment of sales of multifamily housing loans in which the purchaser of

a loan shares in any loss incurred on the loan with the selling institution on other than a pro rata basis. These other loss sharing arrangements are taken into account, for purposes of determining the extent to which such loans are treated by the selling banking organization as sold for risk-based capital purposes, and excluded from a bank's balance sheet assets or the credit equivalent amount of a bank holding company's off-balance sheet items, in the same manner as prescribed in the instructions to the Call Report. As noted earlier, these footnotes reflect the existing Call Report and risk-based capital treatment with respect to such assets sold subject to loss sharing arrangements.

In addition, the Board notes that the Board and the other banking agencies, under the auspices of the Federal Financial Institutions Examination Counsel (FFIEC), have been working together to develop revisions to the agencies' risk-based capital standards that will better distinguish between the degrees of risk in loss sharing arrangements involving asset sales in general. In this regard, on December 16, 1993, the Board approved a recommendation from the Federal Financial Institution Examination Council to seek public comment on a Notice of Proposed Rulemaking and an Advanced Notice of Proposed Rulemaking concerning the regulatory treatment of assets sold subject to loss sharing arrangements. To the extent these proposals apply to multifamily housing loans, they would, if adopted, also satisfy the requirements of section 618(b)(3) of RTCRRIA.

Finally, the Board finds, for good cause, that an immediate effective date is necessary in order to serve the public interest, avoid confusion, and expedite the reporting of a capital charge that is commensurate with the risks associated with multifamily housing loans that meet the specified criteria. A December 31, 1993 effective date will enable banking organizations to use the reduced risk weight for multifamily housing loans in their end-of-year regulatory reports. In addition, the Board believes this effective date is appropriate because the revision would reduce, rather than expand, regulatory burden.

Regulatory Flexibility Act Analysis

The Federal Reserve Board does not believe adoption of this final rule would have a significant economic impact on a substantial number of small business entities (in this case, small banking organizations), in accord with the spirit and purposes of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). In this regard, the final rule would reduce certain regulatory burdens on bank holding companies as it would reduce the capital charge on certain transactions. In addition, because the risk-based capital guidelines generally do not apply to bank holding companies with consolidated assets of less than $150 million, this proposal will not affect such companies.

List of Subjects

12 CFR Part 208

Accounting, Agriculture, Banks, banking, Confidential business information, Currency, Reporting and recordkeeping requirements, Securities.

12 CFR Part 225

Administrative practice and procedure, Banks, banking, Holding companies, Reporting and recordkeeping requirements, Securities.

For the reasons set forth in the preamble the Board is amending 12 CFR parts 208 and 225 to read as follows:

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (REGULATION H)

1. The authority citation for part 208 continues to read as follows:

Authority: 12 U.S.C. 36, 248(a) and (c), 321–338, 461, 481–486, 601, 611, 1814, 1823(j), 1831o, 1831p–1, 3906–3909, 3310, 3331–3351; 15 U.S.C. 78b, 78o–4(c)(5), 78q, 78q–1, 78w, 781(b), 781(i), and 1781(g).

2. Appendix A to part 208 is amended by revising the first paragraph of section III.C.3., and Category 3 Item 1. of Attachment III to read as follows:

Appendix A to Part 208—Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure

* * * * *

III. Procedures for Computing Weighted Risk Assets and Off-Balance Sheet Items

* * * * *

C. Risk Weights

* * * * *

3. *Category 3: 50 percent.* This category includes loans fully secured by first liens [34] on 1- to 4-family residential properties, either owner-occupied or rented, or on multifamily residential properties,[35] that meet certain criteria.[36] Loans included in this category must have been made in accordance with prudent underwriting standards;[37] be performing in accordance with their original terms; and not be 90 days or more past due or carried in nonaccrual status. The following additional criteria must also be applied to a loan secured by a multifamily residential property that is included in this category: all principal and interest payments on the loan must have been made on time for at least the year preceding placement in this category, or in the case where the existing property owner is refinancing a loan on that property, all principal and interest payments on the loan being refinanced must have been made on time for at least the year preceding placement in this category; amortization of the principal and interest must occur over a period of not more than 30 years and the minimum original maturity for repayment of principal must not be less than 7 years; and the annual net operating income (before debt service) generated by the property during its most recent fiscal year must not be less than 120 percent of the loan's current annual debt service (115 percent if the loan is based on a floating interest rate) or, in the case of a cooperative or other not-for-profit housing project, the property must generate sufficient cash flow to provide comparable protection to the institution. Also included in this category are privately-issued mortgage-backed securities provided that

(1) The structure of the security meets the criteria described in section III(B)(3) above;

(2) If the security is backed by a pool of conventional mortgages, on 1- to 4-family residential or multifamily residential properties each underlying mortgage meets the criteria described above in this section for eligibility for the 50 percent risk category at the time the pool is originated;

(3) If the security is backed by privately-issued mortgage-backed securities, *each* underlying security qualifies for the 50 percent risk category; and

(4) If the security is backed by a pool of multifamily residential mortgages, principal and interest payments on the security are not 30 days or more past due.

Privately-issued mortgage-backed securities that do not meet these criteria or that do not qualify for a lower risk weight are generally assigned to the 100 percent risk category.

Attachment III—Summary of Risk Weights and Risk Categories for State Member Banks

* * * * *

Category 3: 50 Percent

1. Loans fully secured by first liens on 1- to 4-family residential properties or on multifamily residential properties that have been made in accordance with prudent underwriting standards, that are performing in accordance with their original terms, that are not past due or in nonaccrual status, and that meet other qualifying criteria, and certain privately-issued mortgage-backed securities representing indirect ownership of such loans. (Loans made for speculative purposes are excluded.)

* * * * *

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

1. The authority citation for part 225 continues to read as follows:

Authority: 12 U.S.C. 1817(j)(13), 1818, 1831i, 1831p–1, 1843(c)(8), 1844(b), 1972(l), 3106, 3108, 3907, 3909, 3310, and 3331–3351.

2. Appendix A to part 225 is amended by revising the first paragraph of section III.C.3., footnote 48 in section III.D.1., and Category 3 Item 1. of Attachment III to read as follows:

Appendix A to Part 225—Capital Adequacy Guidelines for Bank Holding Companies: Risk-Based Measure

* * * * *

III. Procedures for Computing Weighted Risk Assets and Off-Balance Sheet Items

* * * * *

C. Risk Weights

* * * * *

3. *Category 3: 50 percent.* This category includes loans fully secured by first liens [37] on 1- to 4-family residential properties, either owner-occupied or rented, or on multifamily residential properties,[38] that meet certain criteria.[39] Loans included in this category must have been made in accordance with prudent underwriting standards;[40] be performing in accordance with their original terms; and not be 90 days or more past due or carried in nonaccrual status. The following additional criteria must also be applied to a loan secured by a multifamily residential property that is included in this category: all principal and interest payments on the loan must have been made on time for at least the year preceding placement in this category, or in the case where the existing property owner is refinancing a loan on that property, all principal and interest payments on the loan being refinanced must have been made on time for at least the year preceding placement in this category; amortization of the principal and interest must occur over a period of not more than 30 years and the minimum original maturity for repayment of principal must not be less than 7 years; and the annual net operating income (before debt service) generated by the property during its most recent fiscal year must not be less than 120 percent of the loan's current annual debt service (115 percent if the loan is based on a floating interest rate) or, in the case of a cooperative or other not-for-profit housing project, the property must generate sufficient cash flow to provide comparable protection to the institution. Also included in this category are privately-issued mortgage-backed securities provided that:

(1) The structure of the security meets the criteria described in section III(B)(3) above;

(2) if the security is backed by a pool of conventional mortgages, on 1- to 4-family residential or multifamily residential properties, each underlying mortgage meets the criteria described above in this section for eligibility for the 50 percent risk category at the time the pool is originated;

(3) If the security is backed by privately-issued mortgage-backed securities, each underlying security qualifies for the 50 percent risk category; and

(4) If the security is backed by a pool of multifamily residential mortgages, principal and interest payments on the security are not 30 days or more past due. Privately-issued mortgage-backed securities that do not meet these criteria or that do not qualify for a lower risk weight are generally assigned to the 100 percent risk category.

* * * * *

D. Off-Balance Sheet Items

* * * * *

1. * * * [48]

* * * * *

Attachment III—Summary of Risk Weights and Risk Categories for Bank Holding Companies

* * * * *

Category 3: 50 Percent

1. Loans fully secured by first liens on 1- to 4-family residential properties or on multifamily residential properties that have been made in accordance with prudent underwriting standards, that are performing in accordance with their original terms, that are not past due or in nonaccrual status, and that meet other qualifying criteria, and certain privately-issued mortgage-backed securities representing indirect ownership of

---

builders with substantial project equity for the construction of 1- to 4-family residences that have been presold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgage loans and have made substantial earnest money deposits.

The instructions to the Call Report also discuss the treatment of loans, including multifamily housing loans, that are sold subject to a pro rata loss sharing arrangement. Such an arrangement should be treated by the selling bank as sold (and excluded from balance sheet assets) to the extent that the sales agreement provides for the purchaser of the loan to share in any loss incurred on the loan on a pro rata basis with the selling bank. In such a transaction, from the standpoint of the selling bank, the portion of the loan that is treated as sold is not subject to the risk-based capital standards. In connection with sales of multifamily housing loans in which the purchaser of a loan shares in any loss incurred on the loan with the selling institution on other than a pro rata basis, these other loss sharing arrangements are taken into account for purposes of determining the extent to which such loans are treated by the selling bank as sold (and excluded from balance sheet assets) under the risk-based capital framework in the same manner as prescribed for reporting purposes in the instructions to the Call Report.

[34] Residential property loans that do not meet all the specified criteria or that are made for the purpose of speculative property development are placed in the 100 percent risk category.

[35] Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on the lower of the acquisition cost of the property or appraised (or if appropriate, evaluated) value. Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the most current evaluation. All appraisals must be made in a manner consistent with the Federal banking agencies' real estate appraisal regulations and guidelines and with the bank's own appraisal guidelines.

[36] If a bank holds the first and junior liens(s) on a residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purpose of determining the loan-to-value ratio.

[37] Loans that qualify as loans secured by 1- to 4-family residential properties or multifamily residential properties are listed in the instructions to the commercial bank Call Report. In addition, for risk-based capital purposes, loans secured by 1- to 4-family residential properties include loans to

---

[37] If a banking organization holds the first and junior lien(s) on a residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purpose of determining the loan-to-value ratio.

[38] Loans that qualify as loans secured by 1- to 4-family residential properties or multifamily residential properties are listed in the instructions to the FR Y–9C Report. In addition, for risk-based capital purposes, loans secured by 1- to 4-family residential properties include loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been presold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgage loans and have made substantial earnest money deposits.

[39] Residential property loans that do not meet all the specified criteria or that are made for the purpose of speculative property development are placed in the 100 percent risk category.

[40] Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on the lower of the acquisition cost of the property or appraised (or if appropriate, evaluated) value. Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the most current evaluation. All appraisals must be made in a manner consistent with the Federal banking agencies' real estate appraisal regulations and guidelines and with the banking organization's own appraisal guidelines.

[48] In regulatory reports and under GAAP, bank holding companies are permitted to treat some asset sales with recourse as "true" sales. For risk-based capital purposes, however, such assets sold with recourse and reported as "true" sales by bank holding companies are converted at 100 percent and assigned to the risk category appropriate to the underlying obligor or, if relevant the guarantor or nature of the collateral, provided that the transactions meet the definition of assets sold with recourse (including assets sold subject to pro rata and other loss sharing arrangements), that is contained in the instructions to the commercial bank Consolidated Reports of Condition and Income (Call Report). This treatment applies to any assets, including the sale of 1- to 4-family and multifamily residential mortgages, sold with recourse. Accordingly, the entire amount of any assets transferred with recourse that are not already included on the balance sheet, including pools of 1- to 4-family residential mortgages, are to be converted at 100 percent and assigned to the risk category appropriate to the obligor, or if relevant, the nature of any collateral or guarantees. The only exception involves transfers of pools of residential mortgages that have been made with insignificant recourse for which a liability or specific non-capital reserve has been established and is maintained for the maximum amount of possible loss under the recourse provision.

VOL 58 ISS 248 DEC 29 1993 UMI

such loans. (Loans made for speculative purposes are excluded.)

BILLING CODE 6210–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 93–ANM–12]

Amendment of Class E Airspace; Wenatchee, WA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This document contains corrections to the final rule published on September 28, 1993. This final rule amended the Wenatchee, Washington, Class E airspace to provide controlled airspace extending upward from 700 feet above ground level for aircraft executing a revised instrument approach procedure at Pangborn Memorial Airport. The airspace description erroneously specified the airspace distance as 4.2 miles northeast of the VOR/DME. This distance should be a 4.3-mile radius northwest of the VOR/DME.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: James E. Riley, ANM–537, Federal Aviation Administration, Docket No. 93–ANM–12, 1601 Lind Avenue SW., Renton, Washington 98055–4056, Telephone: (206) 227–2537.

SUPPLEMENTARY INFORMATION: On September 28, 1993, the Federal Aviation Administration (FAA) published a final rule that amended the Wenatchee, Washington, Class E airspace to provide controlled airspace extending upward from 700 feet above ground level for aircraft executing a revised instrument approach procedure at Pangborn Memorial Airport, Wenatchee, Washington (58 FR 50514). The airspace description erroneously specified the airspace distance at 4.2 miles northeast of the VOR/DME. This distance should be a 4.3-mile radius northwest of the VOR/DME.

Correction to Final Rule

Accordingly, pursuant to the authority delegated to me, the publication on September 28, 1993 (58 FR 50514), and the description in FAA Order 7400.9A, which is incorporated by reference in 14 CFR 71.1, are corrected as follows:

§ 71.1 [Corrected]

On page 50515, in the second column, the description for the Wenatchee, Washington, Class E airspace is corrected by removing "4.2-mile to 13.4 miles northeast" and inserting in its place "4.3-mile radius to 13.4 miles northwest."

Issued in Seattle, Washington, on December 21, 1993.

Temple H. Johnsen, Jr.

Manager, Air Traffic Division.

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Parts 770, 773, and 785

[Docket No. 931074–3274]

Revisions to the Export Administration Regulations; Clarifications

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration is amending the Export Administration Regulations (EAR), to make certain editorial clarifications and corrections and, in some cases, insert material inadvertently omitted from earlier amendments.

EFFECTIVE DATE: This rule is effective December 29, 1993.

FOR FURTHER INFORMATION CONTACT: Patricia Muldonian, Office of Technology and Policy Analysis, Bureau of Export Administration, U.S. Department of Commerce, telephone: (202) 482–2440.

SUPPLEMENTARY INFORMATION: Specifically, this rule makes the following corrections and clarifications:

(1) For the sake of clarity, this rule provides a definition of "cooperating country" and identifies the countries currently cooperating with the Coordinating Committee for Multilateral Export Controls (COCOM) in § 770.2;

(2) Revises § 773.2(e)(2) to clarify the amendment procedures when adding (additional) Export Control Classification Numbers (ECCNs) under the Project License procedure;

(3) Revises § 773.9(a)(2) to accurately reflect eligible chemical and biological equipment under the Special Chemical License procedure; and

(4) Revises § 785.2 to clarify that Cambodia and Laos are not Coordinating Committee (COCOM) proscribed countries and applications to export or reexport commodities and technical data to these countries do not require review by COCOM.

Rulemaking Requirements

1. This rule involves collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), approved by the Office of Management and Budget under control numbers 0694–0005, 0694–0006, 0694–0007, and 0694–0067.

2. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under section 3(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. The provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a foreign and military affairs function of the United States. Section 13(b) of the EAA does not require that this rule be published in proposed form because this rule does not impose a new control. No other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

Accordingly, it is issued in final form. However, comments from the public are always welcome. Comments should be submitted to Patricia Muldonian, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects

Accordingly, parts 770, 773, and 785 of the Export Administration Regulations (15 CFR parts 730–799) are amended as follows:

1. The authority citations for 15 CFR Part 770 continues to read as follows:

Authority: Pub. L. 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; sec. 101, Pub. L. 93–153, 87 Stat. 576 (30 U.S.C. 185), as amended; sec. 103, Pub. L. 94–163, 89 Stat. 877 (42 U.S.C. 6212), as amended; secs. 201 and 201(11)(e), Pub. L. 94–258, 90 Stat. 309 (10 U.S.C. 7420 and 7430(e)), as amended; Pub. L. 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Pub. L. 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); sec. 208, Pub. L. 95–372, 92 Stat. 668 (43 U.S.C. 1354); Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended (extended by Pub. L. 103–10, 107 Stat. 40) ; sec. 125, Pub. L. 99–64, 99 Stat. 156 (46 U.S.C. 466c); E.O. 11912 of April 13, 1976 (41 FR 15825, April 15, 1976); E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978); E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 25, 1992 (57 FR 44649, September 28, 1992); and E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990), as continued by Notice of November 11, 1992 (57 FR 53979, November 13, 1992).

2. The authority citations for 15 CFR parts 773 and 785 continue to read as follows:

Authority: Pub. L. 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; Pub. L. 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Pub. L. 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended (extended by Pub. L. 103–10, 107 Stat. 40); E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978); E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 25, 1992 (57 FR 44649, September 28, 1992); and E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990), as continued by Notice of November 11, 1992 (57 FR 53979, November 13, 1992).

PART 770—[AMENDED]

3. Section 770.2 is amended by adding a definition for "Cooperating country" immediately after the definition for "Controlled country", to read as follows:

§ 770.2 Definition of terms.

* * * * *

Controlled country. * * *

Cooperating country. A country that cooperates fully with the COCOM member countries in restricting strategic exports to controlled countries in accordance with COCOM standards. The "Cooperating Countries" are: Austria, Finland, Hong Kong, Ireland, New Zealand, Sweden, and Switzerland.

* * * * *

PART 773—[AMENDED]

4. Section 773.2 is amended, as follows:

(a) By revising paragraph (a)(1),

(b) By redesignating paragraph (e)(2)(v) as paragraph (e)(2)(vi), and adding a new paragraph (e)(2)(v);

(c) By removing paragraph (e)(3); and

(d) By redesignating paragraph (e)(4) as paragraph (e)(3).

The revision and addition read as follows:

§ 773.2 Project license.

* * * * *

(a) * * *

(1) The items to be exported are covered by entries in the Commerce Control List under at least two different categories and licensed by two of the branches (for example, Categories 4 and 6, licensed by the Computer Systems Branch and the Capital Goods Branch);

* * * * *

(e) * * *

(2) * * *

(v) *Adding an ECCN by amendment.* A license holder must submit Form BXA–685P (Request for Amendment Action) to request the addition of an ECCN not covered by the commodity description on the approved application.

* * * * *

5. Section 773.9 is amended by revising paragraph (a)(2) to read as follows:

§ 773.9 Special Chemical License.

* * * * *

(a) * * *

(2) Chemical and biological equipment controlled under ECCNs 1B70E and 1B71E.

* * * * *

PART 785—[AMENDED]

6. Section 785.2 is amended by revising the section heading and paragraph (a)(3) to read as follows:

§ 785.2 Country Groups Q, W, and Y[1]; Geographic area of the former U.S.S.R., Eastern Europe, Mongolian People's Republic, Cambodia, and Laos.

(a) * * *

(3) Applications covering certain commodities and technical data that are controlled by the United States and certain other nations that cooperate in an international export control system and are proposed for export or reexport to Country Groups Q, W, or Y (excluding Cambodia and Laos) may have to be forwarded to the Coordinating Committee (COCOM) of the international export control system for consideration in accordance with established COCOM procedures.

* * * * *

Dated: December 21, 1993.

Sue E. Eckert,

Assistant Secretary for Export Administration.

Customs Service

19 CFR Part 10

RIN 1515–AB29

[T.D. 94–3]

Declarations Required To Be Filed With Certain Imported Works of Art Entered Free of Duty

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The Customs Regulations require that works of art entered free of duty under certain provisions of the Harmonized Tariff Schedule of the United States shall have either a declaration filed with the entry by the artist who produced the articles showing whether the articles are originals, replicas, reproductions or copies, or a declaration by the seller or shipper with the same information if the declaration by the artist is not available. This document amends 19 CFR 10.48 to make it easier for importers to satisfy the declaration requirements and to reduce the instances in which a declaration will be required.

EFFECTIVE DATE: January 28, 1994.

FOR FURTHER INFORMATION CONTACT: Norman W. King, Commercial Rulings Division, Office of Regulations and Rulings, (202–482–7020).

SUPPLEMENTARY INFORMATION:

Background

The Harmonized Tariff Schedule of the United States (HTSUS), 19 U.S.C. 1202, provides in subheadings 9701.90.00, 9702.00.00 and 9703.00.00, for the classification of various "works of art" which are entitled to duty-free entry if classified therein. Section 10.48, Customs Regulations (19 CFR 10.48), sets forth procedures to assist Customs

VOL 58 ISS 248 DEC 29 1993 UMI

in making the determination whether merchandise so claimed is actually a "work of art" and thus properly classified in the above cited provisions. Section 10.48 states that Customs field personnel may require that a declaration be filed with an entry by the artist who produced the articles showing whether the articles are originals, replicas, reproductions, or copies; or a declaration by the seller or shipper with the same information if the declaration by the artist is not available. The regulation also states that, whereas the declarations of these parties may be waived upon a showing of impossibility, the declaration of the importer shall be required in all cases.

On October 7, 1992, the Customs Service published a notice in the **Federal Register** (57 FR 46112) proposing to amend § 10.48. The reason for the proposed amendment was to facilitate the movement of merchandise and save importers time and money by making it easier to provide the declaration, when one is deemed necessary by Customs, and by providing Customs with greater flexibility not to require a declaration. Another reason for the proposed amendment was to eliminate inconsistencies that exist between the regulation and the provisions of the HTSUS (and applicable interpretative notes) which the regulation was intended to help implement. The elimination of inconsistencies in this instance would have the effect of further reducing requirements placed on importers by eliminating an entire series of merchandise, i.e., merchandise classified in subheading 9701.90.00, HTSUS, from the merchandise for which Customs may require such declaration.

Analysis of Comments

No comments were received in response to the published notice of proposed rulemaking to amend § 10.48.

Conclusion

After careful review, the Customs Service has concluded that the amendments should be adopted as proposed, with one modification. Customs has eliminated the clause in the declaration in § 10.48(b) referring to mosaics because mosaics are not required to be originals to be classifiable under subheading 9701.90.00, HTSUS.

Explanation of Other Amendments

1. The section heading change is necessary because "drawings" are specifically provided for in subheading 9701.10.00, HTSUS; 19 CFR 10.48 does not apply to subheading 9701.10.00.

2. The change to § 10.48(a) is based on the fact that subheading 9701.90.00, HTSUS, is the provision in which "collages and similar decorative plaques" are classified. There is no requirement that these items be original works of art (see Explanatory Note 97.01 (B)); the declaration in the revised § 10.48(b) will not be required when an item is entered under subheading 9701.90.00.

3. The changes to § 10.48(b) are intended to accomplish two goals. First, the language is changed to make it easier for the parties involved in the importation, i.e., the importer, artist, seller and shipper, to provide a declaration, if required, by providing each of the parties with equal authority to make and provide the declaration. Secondly, the regulation is harmonized with Additional U.S. Note 1 to Chapter 97, HTSUS, and the Explanatory Notes to Chapter 97. Those interpretative notes refer to the first twelve (12) castings, replicas or reproductions as being classifiable in heading 9703 rather than the first ten (10) as presently required in the regulation.

4. Section 10.48(c) is changed to provide Customs personnel with greater flexibility to waive the requirement of a declaration.

5. The removal of paragraph (e) is necessitated by the change (in number 2, above) which removes subheading 9701.90.00 merchandise from the impact of 19 CFR 10.48.

Regulatory Flexibility Act

For the reasons set forth in the preamble and pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is hereby certified that the amendments set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, the amendments are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12866

This document does not meet the criteria for a "significant regulatory action" as specified in E.O. 12866.

Drafting Information

The principal author of this document was Norman W. King, Commercial Rulings Division, Office of Regulations and Rulings. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 10

Amendments to the Regulations

Part 10, Customs Regulations (19 CFR part 10), is amended as set forth below.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority citation for part 10 continues to read as follows:

Authority: 19 U.S.C. 66, 1202, 1481, 1484, 1498, 1508, 1623, 1624;

* * * * *

2. Section 10.48 and is revised to read as follows:

§ 10.48 Engravings, sculptures, etc.

(a) Invoices covering works of art claimed to be free of duty under subheadings 9702.00.00 and 9703.00.00, HTSUS, shall show whether they are originals, replicas, reproductions, or copies, and also the name of the artist who produced them, unless upon examination the Customs officer is satisfied that such statement is not necessary to a proper determination of the facts.

(b) The following evidence shall be filed in connection with the entry: A declaration in the following form by the artist who produced the article, or by the seller, shipper or importer, showing whether it is original, or in the case of sculpture, the original work or model, or one of the first twelve castings, replicas, or reproductions made from the original work or model; and in the case of etchings, engravings, woodcuts, lithographs, or prints made by other hand-transfer processes, that they were printed by hand from hand-etched, hand-drawn, or hand-engraved plates, stones, or blocks:

I, _____, do hereby declare that I am the producer, seller, shipper or importer of certain works of art, namely _____ covered by the annexed invoice dated _____; that any sculptures or statuary included in that invoice are the original works or models or one of the first twelve castings, replicas, or reproductions made from the sculptor's original work or model; and that any etchings, engravings, woodcuts, lithographs, or prints made by other hand-transfer processes included in that invoice were printed by hand from hand-etched, hand-drawn, or hand-engraved plates, stones, or blocks.

(c) The district director may waive the declaration requirement set forth in paragraph (b) of this section.

(d) Artists' proof etchings, engravings, woodcuts, lithographs, or prints made by other hand-transfer processes should bear the genuine signature or mark of the artist as evidence of their authenticity. In the absence of such a signature or mark, other evidence shall be required which will establish the authenticity of the work to the satisfaction of the district director.

Samuel H. Banks,

Acting Commissioner of Customs.

Approved: December 6, 1993.

John P. Simpson,

Deputy Assistant Secretary of the Treasury.

BILLING CODE 4820-02-P

19 CFR Part 175

[T.D. 94-5]

Decision Following Petition by Domestic Interested Party—Location of Country of Origin Marking for Frozen Produce Packages

AGENCY: Customs Service, Department of the Treasury.

ACTION: Final interpretive rule.

SUMMARY: This document gives notice that Customs has made a determination pursuant to a petition filed by a domestic interested party that packages of frozen produce subject to the requirements of section 304, Tariff Act of 1930, as amended, shall show the country of origin marking on the front side of the package to be considered as marked in a conspicuous place. Further, this document sets forth specifications for such marking.

EFFECTIVE DATE: The marking requirements set forth in this decision for frozen produce articles shall become effective as to merchandise entered, or withdrawn from warehouse, for consumption, on or after February 11, 1993. However, parties adversely affected by compliance obligations shall have until May 8, 1994, to bring their frozen produce packaging into conformity with these requirements. After that date, all packaged frozen produce articles entered for consumption or withdrawn from warehouse for consumption and not marked to indicate the country of origin in accordance with this decision and other marking requirements of the Tariff Act and Customs Regulations shall be assessed marking duties.

FOR FURTHER INFORMATION CONTACT: Robert Cascardo, Value and Marking Branch, Office of Regulations and Rulings, U.S. Customs Service, (202) 482-7010.

SUPPLEMENTARY INFORMATION:

Background

Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), provides that, unless excepted, every article of foreign origin (or its container) imported into the U.S. shall be marked in a conspicuous place as legibly, indelibly, and permanently as the nature of the article (or its container) will permit, in such a manner as to indicate to the ultimate purchaser in the U.S. the English name of the country of origin of the article. Failure to mark an article in accordance with the requirements of 19 U.S.C. 1304 shall result in the levy of a duty of ten percent *ad valorem*.

Part 134, Customs Regulations (19 CFR part 134), implements the country of origin marking requirements and exceptions of 19 U.S.C. 1304.

Counsel for the domestic petitioners, packers of produce grown domestically, first raised the question of whether the front or the back side of a frozen produce package was a conspicuous place for country of origin marking by seeking a ruling from Customs in 1988. A ruling was requested to the effect that packaged frozen produce was not marked in a conspicuous place unless the marking appeared on the front side of such packaging in prominent lettering. Customs responded by issuing a determination that the sample packages of imported produce submitted by the domestic packers as insufficiently marked were legally marked by names and words which appeared on the back side of the packaging in close proximity to nutritional and other information. HRL 731830 (November 21, 1988).

The packers appealed this determination to the Court of International Trade. In *Norcal/Crosetti Foods, Inc. et al.* v. *U.S. Customs Service*, 758 F. Supp. 729 (1991)(*Norcal I*), the CIT (Musgrave, J.) ruled that frozen produce is not marked in a conspicuous place unless marked on the front side of the package. At the direction of the CIT, Customs issued T.D. 91-48 (56 FR 24115, May 28, 1991), requiring that packages of frozen produce be so marked.

On appeal by the government, the Court of Appeals for the Federal Circuit ruled on procedural grounds in *Norcal II*, 963 F. 2d 356 (1992), that the packers' claims were not properly before the lower court and ordered the complaint dismissed for lack of jurisdiction. The appellate court indicated that a proper course would have been for the packers to initiate a proceeding before Customs under section 516 of the Tariff Act of 1930, as amended (19 U.S.C. 1516), as they now have done.

Because the petition asks Customs to reconsider the position stated in HRL 731830, and to adopt the findings of the Court of International Trade, we summarize at length that court's findings. It is noted that Customs did not contest the court's substantive findings, its appeal having been based only upon various procedural points.

The Court of International Trade found that the only consistency in the country of origin marking practices for imported frozen produce was the inconsistency of where the manufacturer may choose to place the marking. Most often, the marking is lost among the various small typeface information which appears on the back or side panels. The court stated that producers are reluctant to display conspicuously the source of the food. The result of these inconsistencies, it found, was that a customer could not be assured of easily finding the country of origin marking, even if he or she were to casually inspect the package within a reasonable time frame. This is at cross-purposes with Congress' attempt to provide the country of origin to consumers before they decide to purchase.

The court took judicial notice of the common method of displaying the merchandise in shelved freezers or frozen food bins with the front panel in view and the rear panel obscured and found that frozen vegetables are commonly marketed in long, low freezers with open tops, or wall-mounted freezers with glass doors. The court also took judicial notice that access to frozen produce is limited and sometimes awkward, given that the produce must not defrost. It found that the packages are usually displayed so that only the front panel is clearly visible. Customers are unable to scan the labels on frozen produce as easily as they can for those on dry goods or other produce that is not frozen. The court noted, firstly, that the product is actually frozen and cold to the touch and secondly that, at least in upright freezers, the freezer door must be held open. The court found that these factors prevent the consumer from having the opportunity to see the country of origin marking that is secluded among the small print on the back of the package.

The Court of International Trade found the analogy in the ruling to the placement of nutritional information on packages unconvincing, because that information was not required information at all. In contrast, it found a more persuasive analogy in the Food and Drug Administration (FDA) requirement that packages disclose the weight of their contents on the principal display panel. Such quantity of contents disclosure must be a certain size, located on the front, or most prominent

panel, of the package. However, the court cautioned that Customs cannot interpret the marking statute according to requirements set forth in FDA Regulations, and should analogize "hesitantly and perspicaciously" to these Regulations.

The court also observed that certain packages of frozen produce listed the name and U.S. address of the manufacturer, and failed to indicate the country of origin in close proximity as required under the Customs Regulations. Applying 19 CFR 134.46, the court held that if the words "U.S.," or "America," or a United States address appear on those labels, the article would have to be marked to indicate the country of origin in lettering of at least a comparable size.

The court concluded by finding that although Customs has routinely interpreted "conspicuous" through 19 CFR 134.41(b), it failed in its issuance of HRL 731830 to follow the clear meaning of the statute or the regulation. Section 134.41(b) of the Customs Regulations provides, among other things, that a country of origin marking shall be easily found by the ultimate purchaser and read without strain. For imported frozen produce, country of origin marking requirements were not met by the present practice of indicating the country of origin marking on the rear or side panel of frozen produce.

The Petition

The instant petition was initiated by letters dated January 13 and January 29, 1993, and filed with Customs under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516) and part 175, Customs Regulations (19 CFR part 175). The petitioners are Norcal Crosetti Foods, Inc. and Patterson Frozen Foods, Inc., California packers of produce grown domestically. The International Brotherhood of Teamsters, on behalf of its Local 912, submitted a letter dated March 1, 1993, supporting the Norcal and Patterson petition. The petitioners contend that imported frozen produce is not marked in accordance with the requirement of 19 U.S.C. 1304 that the country of origin shall appear in a conspicuous place; under a correct application of 19 U.S.C. 1304 the indication of country must appear on front side of a package to be considered as marked in a conspicuous place. These domestic producers argue further that Customs standards for the size and prominence of such markings are not in conformity with 19 U.S.C. 1304.

The petition and other supporting materials include numerous samples of current frozen produce packages which are alleged to be defective for the various reasons stated above, and for others. The presently claimed defects in the permitted marking for these articles closely mirror the findings of the Court of International Trade: Current marking is found "buried in a sea of cooking instructions" on the back panel in a manner that cannot be noticed; as displayed for retail sale, only the front side of the package is visible, and it is not likely or practical for the consumer to turn it over to look for country of origin marking; imported produce is sold in the same type of packaging used previously for domestic products; and various products are marked illegibly, confusingly, or misleadingly.

Customs published a notice in the **Federal Register** on September 9, 1993 (58 FR 47413), advising the public of the petitioners' contentions and providing opportunity for public comments on the issues raised in the petition.

Discussion of Comments and Issuers

Twenty-three comments were submitted. The commenters include a number of trade organizations, companies in the business of manufacturing, processing, and distributing produce; an organization representing a group of domestic farmers; an import/export organization; a sales and marketing company; two members of the U.S. House of Representatives; the Canadian government; a Canadian trade organization; private U.S. citizens; members and officials of the International Brotherhood of Teamsters; the California Department of Justice; District Attorneys in California; and the petitioners.

Approximately half of the public comments expressed support of the Norcal petition to require the country of origin marking of imported frozen produce to appear on the front panel of the packaging.

These commenters presented extensive data and argument concerning the nature of frozen produce and the manner of its storage and presentation for sale, contending mainly that the inherent coldness of frozen produce makes the packaging more cumbersome to handle than other food products. These commenters believe accordingly that the ultimate purchaser is likely to examine the produce in haste, and is not likely to see country of origin marking which appears on the back or side of the packaging.

Some respondents also expressed concern that frozen produce packaging tends to accumulate frost while being stored in refrigerators, such that the country of origin marking often becomes obscured in a way that is unique to frozen produce. In view of these factors, it is argued, country of origin marking which does not appear on the front of these frozen produce packages cannot be considered in a conspicuous place, and cannot meet the standard stated at 19 CFR 134.41(b) that marking must be easily found and read without strain.

Commenters opposed to the petition tend to dismiss these contentions as unfounded. They see no reason to establish a different marking location for frozen produce packages as opposed to other imported articles. They see coldness as no fundamental obstacle to handling a frozen produce package and turning it over to find country of origin marking. They assert that even the information appearing on the front panel probably cannot be read without picking up the package.

Customs believes it is appropriate to consider the nature of an imported article, and in particular, the manner of its presentation to ultimate purchasers in the U.S., in determining the acceptable location for country of origin marking. In this instance the coldness of the article, and its manner of presentation, are factors to be given some weight. The opponents of the petition have not shown any established consumer expectation of marking which appears exclusively or customarily on the back or side panels, and we find credible the petitioners claims of a reduced likelihood that ultimate purchasers will examine the back or side panels of packaged frozen produce to find marking. Moreover, the specific findings of the Court of International Trade on these points will be given appropriate deference by the Customs Service.

The petitioners, as well as several subsequent commenters, submitted for consideration numerous samples of frozen produce packaging as evidence of common marking practices which were said to be short of the statutory standards for permanence, legibility, and conspicuousness. All the markings shown on the sample packages appear on the back panel.

One major category of sample packages consisted of rectangular packages on which all the printed information, except the country of origin marking, is pre-printed. The latter instead is evidently stamped after the package is filled with frozen produce. The quality of this marking tends to be poor, and for the most part does not satisfy existing standards for permanence and legibility. The location is quite inconsistent between various packages in the same batch. Sometimes the lettering is stamped over pre-printed information; sometimes it is sideways or crooked; and sometimes it is smudged. These stamped-on markings are insufficient under all three of the principal criteria of 19 U.S.C. 1304—legibility, permanence, and conspicuous placement.

Commenters opposed to the petition believe that these defects should be remedied by enforcement under the regulations of current standards governing legibility, permanence, and conspicuous placement, and that there is no compelling evidence that the current regulations are inadequate.

While some of the packages with stamped-on markings are in compliance with the requirements of section 304, this seems to have occurred by happenstance and not by consistently following any pattern of marking. Customs believes that the petitioners and other respondents have identified a marking practice for which one obvious remedy is a requirement for a single location for marking these products. A marking which is not consistently placed, on an article which may be bought repeatedly by the same ultimate purchaser, tends to be a marking which is not easily found. This problem is compounded, in the case of frozen produce, by the fact that supplies may change on short notice between domestic and foreign and among foreign sources. The petitioners and other commenters have made a credible showing that present marking practices for these products tend to minimize disclosure of country of origin.

Other sample packages submitted by the petitioners and other commenters, while marked permanently and legibly under current standards (on the back panel), showed geographic markings or names which could create confusion or be misleading as to the country of origin of the frozen produce. Some such names or markings were part of the distributors' trade marks, while others used generic names for vegetable products in potentially confusing ways. The petitioners and other commenters argue that the remedy for these potentially confusing or misleading markings is country of origin marking which appears uniformly on the front panel of the package. They believe the ultimate purchaser is less likely to inspect frozen produce on its back panel to ascertain its country of origin when the front panel of the packaging indicates in print a reference to a locale in a country other than the country of origin.

Commenters opposed to the petition do not believe that ultimate purchasers are deceived by such references. One opponent indicated that while in some cases marking on the front panel of the package may be needed, it is not generally necessary if the current regulations were enforced in all cases.

One of the sample packages already has been the subject of corrective action and a ruling by Customs. See HQ 735085 (June 4, 1993) (Mixed frozen vegetables sold as "American Mixtures" required to have country of origin marking on front of package to be considered conspicuously marked; Customs indicated at that time, however, that marking on the back could be permissible in the absence of potentially confusing words or marks).

Customs is of the view that while it could continue, on a case-by-case basis, to correct the types of marking problems identified by the petitioners, and will do so as necessary, a more comprehensive solution is needed to assure proper marking of frozen produce articles. More restricted remedies might include specifying, in rulings and other decisions, all the circumstances in which the requirements of 19 CFR 134.46 are to apply. That provision of the Customs Regulations requires the name of an article's country of origin to appear "in close proximity" and in lettering of comparable size to any reference to a place other than the country of origin which appears on an imported article. Customs is electing, however, to adopt instead a blanket requirement that marking appear on the front of the frozen produce package in the lettering and placement specified below. This will afford a definitive solution to a problem which the petitioners have shown to be extensive.

Much of the imported frozen produce sold in the U.S. is packaged after importation. As such, the marking of the packages is not subject to physical supervision by Customs, but is performed under importers' certifications for the marking of repacked articles tendered in accordance with 19 CFR 134.25. The administrative burden of enforcing the marking of such repacked articles case by case is an additional reason for setting out instead uniform specifications for the marking of frozen produce. Such specifications will reduce ambiguity and interpretive questions, thus facilitating broad-based compliance by importers, packagers and distributors.

Finally, the petitioners and other commenters claim that country of origin markings which appear on the back sides of packages are obscured, or as they put it, "buried", by their placement among numerous items of printed information. Some of this information is nutritional statements, some is recipe material, and some is general distribution information.

The commenters in favor of retaining Customs' current standards of conspicuousness, i.e., that the back or side panels of frozen produce packages are conspicuous places for marking, do not believe that frozen produce presents any unique circumstances which would necessitate implementing a separate standard of marking. In support of their position against changing the current standard, they point out that the back panel of a produce package is considered conspicuous for listing nutritional information under food labeling regulations administered by the Food and Drug Administration. They maintain that the ultimate purchaser interested in knowing the country of origin will look at the back panel for the country of origin marking as well. To date, this also has been the basis for the Customs position that marking the country of origin on the back of the package is acceptable. See HRL 731830 (November 21, 1988).

The petitioners and their supporters point to the same lack of consistency in the placement of marking noted by the CIT. They argue that Customs was mistaken in supposing that because FDA regulations for nutritional information allowed it to be placed on the back panel, country of origin marking on the back panel was also conspicuous; nutritional information was not required food labeling information at the time of the Customs ruling in 1988. A number of commenters endorse the court's finding that if the food labeling requirements of the Food and Drug Administration are to serve as guidance, the requirements to be consulted are those for the declaration of a food article's net quantity of contents. For this information, bold lettering in specified type sizes, appearing on the front panel, is the standard. The adoption of this FDA standard for country of origin marking would be facilitated by the familiarity of packaging designers with FDA printing requirements.

One commenter states that in recent years there has been a proliferation of statements appearing on the back panels of frozen produce, such that back panels no longer are conspicuous places for the location of country of origin marking. One commenter submitted a survey of California consumers in which 60 percent of those asked could not find the country of origin marking on the "American Mixtures" packaging within two minutes. Another commenter argued that permitting country of origin marking to appear near nutritional information on the back side of the

VOL 58 ISS 248 DE 29 1993 UMI

VOL 58 ISS 248 DEC 29 1993 UMI

package allows it to appear in one of the least conspicuous places on the package.

Customs agrees with the petitioners and with the court that marking of frozen produce on the front panel is needed to place the marking in the conspicuous place required under 19 U.S.C. 1304. While marking on the front side is obviously conspicuous, the nature of the back panels of these packages is such that country of origin marking appearing there cannot be reliably found easily and read without strain by the ultimate purchaser. 19 CFR 134.41(b). The likelihood that the marking will be "buried" has been suffiently demonstrated by the petitioners and other commenters to make this requirement necessary to give effect to the intent of the drafters of 19 U.S.C. 1304.

Further, taking account of the the court's admonition against analogizing without due care to regulations of another agency, Customs agrees with the petitioners and others that standards and specifications based upon the Food Labeling Regulations of the Food and Drug Administration are useful models. Here, the statutory standard of prominence and conspicuousness for food labeling, embodied in 21 U.S.C. 343(f), is sufficiently similar to the Tariff Act requirement of conspicuousness as to make these specifications serviceable for Tariff Act purposes. We are adopting specifications for the marking of frozen produce articles, as set forth below, closely modeled upon the Food Labeling requirements for the declaration of net quantity of contents.

Customs Decision on the Petition

Customs has determined, after review of all the comments and upon consideration of the legal and policy factors, that the arguments presented in the petition have merit. The correct administration of the country of origin marking statute and regulations with respect to frozen produce requires a reversal of the previous Customs position. Customs has given full weight and consideration to the views and findings of the Court of International Trade in *Norcal I*. We find that the nature of frozen produce and its typical retail presentation makes marking on the back panel insufficient; that there are numerous examples of insufficient and potentially misleading marking practices based on marking the back side; that marking appearing on the back panels of frozen produce packages is not easily found and read without strain; and that consequently, a uniform standard of conspicuousness is needed for these products to assure proper marking under 19 U.S.C. 1304. The standards for the declaration of net quantity of contents under the Food Labeling regulations are, again, useful models for marking which is conspicuous. standards for country of origin marking on packaged frozen produce.

Customs is for these reasons exercising its authority under 19 U.S.C. 1304(a)(1) to prescribe "* * * any reasonable method of marking * * * and a conspicuous place on the article (or container) where the marking shall appear." The effect of such a determination, as effected under § 134.42, Customs Regulations (19 CFR 134.42), is to remove any option on the part of an importer or other person to select from marking locations and methods which satisfy the general criteria of section 304 of the Tariff Act; a limited number of locations or methods will be acceptable for the marking of frozen produce.

Implementation of Front Panel Marking

Customs recognizes that manufacturers, distributors, and packers of imported frozen produce will need to consider revisions in their current packaging which may be needed to comply with this decision. Recognizing the potential burdens, Customs has determined that the usual 30-day period for implementing a correction in valuation, classification, or rate of duty set forth at 19 CFR 175.22(a) is not sufficient. The legally effective date of this change in practice or position is on or after the 30th day after the date of this decision. However, to minimize the burden of this new requirement upon affected persons, the date for compliance with this decision will be May 8, 1994. This date coincides with the date established by the U.S. Food and Drug Administration for compliance with its new labeling requirements under the Nutrition Labeling and Education Act of 1990, Public Law 101–535. See 58 FR 2065 *et seq.* (January 6, 1993) for the regulatory requirements for food labeling which will take effect on that date.

Inasmuch as companies already are engaged in extensive revisions of labeling on food packaging, any burdens caused by this decision should be incremental. Food manufacturers and packagers, including foreign concerns already importing into the U.S., are intimately familiar with the Food Labeling Regulations administered by the Food and Drug Administration. It will be less burdensome for them to comply with requirements modeled after existing standards affecting the frozen produce industry than to meet separate, uncoordinated standards for country of origin marking.

In general, and for all practical purposes, the front side of frozen produce packaging corresponds with the area of a package designated as the "principal display panel" under § 101.1 of the Federal Food Labeling Regulations (21 CFR 101.1). The principal display panel is defined as the part of a label that is most likely to be displayed, presented, shown, or examined under customary conditions of display for retail sale. *id.* For purposes of country of origin marking under 19 U.S.C. 1304 and part 134, Customs Regulations, the front side of a frozen produce package shall be the principal display panel as defined above.

The Food Labeling Regulations provide further that all information appearing on the principal display panel shall appear prominently and conspicuously, and in no case may the letters or numbers be less than one-sixteenth inch in height. See 21 CFR 101.2(c). Under the Food, Drug, and Cosmetic Act, information that is required to appear on the food label must appear with adequate prominence and conspicuousness to assure that it will be read and understood by consumers. 21 U.S.C. 343(f). The presentation of the required information may lack the requisite conspicuousness and prominence if the label fails to provide sufficient label space; there is interference from non-required words, statements, designs or devices; or if the information is rendered in small or illegible type, with insufficient background contrast, or with crowding. These considerations, enumerated at 21 CFR 101.15, closely parallel the factors usually considered by Customs in defining conspicuousness and legibility for purposes of 19 U.S.C. 1304.

To further insure the conspicuousness and legibility of the indication of country of origin, and in recognition of the expertise of the Food and Drug Administration with respect to food labeling, we are modeling Customs requirements on certain of the specifications set forth under § 101.105 of the Food Labeling Regulations which apply to the required declaration of net quantity of contents as the specification for the indication of origin. Like our new requirement for marking on the front of the package, the declaration of net quantity of contents is required to appear on the principal display panel In its new labeling regulations the Food and Drug Administration itself relied upon the net quantity of content

provisions in setting new type size requirements.

Particular Specifications

The following specifications, modeled after 21 CFR 101.105, are needed for the enforcement of uniform standards of conspicuousness and legibility, and are to be followed in marking packages of frozen produce under 19 U.S.C. 1304.

1. The indication of origin shall appear as a distinct item on the principal display panel, separated by a space at least equal to the height of the lettering used in the indication. It is not required that the indication of origin appear within the bottom 30 percent of the area of the panel, but the lettering must be in lines generally parallel to the base on which the package rests as it is designed to be displayed. (Reference: 21 CFR 101.105(f)).

2. The indication shall appear in conspicuous and easily legible boldface upper case Roman or san serif print or type which shall be in distinct contrast (by typography, layout, or color) to its background. Condensed or compressed typefaces or arrangements shall not be used. (Reference: 21 CFR 101.105(h)).

3. The ratio of height to width of a letter shall not exceed a differential of 3 units to 1 unit (no more than three times as high as it is wide). (Reference: 21 CFR 101.105(h)(1)).

4. The indication shall be in letters and numerals in a type size established in relationship to the area of the principal display panel of the package and shall be uniform for all packages of substantially the same size by complying with the following type specifications:

(a) Not less than one-sixteenth inch in height on packages the principal display panel of which has an area of 5 square inches or less.

(b) Not less than one-eighth inch in height on packages the principal display panel of which has an area of more than 5 but not more than 25 square inches.

(c) Not less than three-sixteenths inch in height on packages the principal display panel of which has an area of more than 25 but not more than 100 square inches.

(d) Not less than one-fourth inch in height on packages the principal display panel of which has an area of more than 100 square inches, except not less than 1/2 inch in height if the area is more than 400 square inches. (Reference: 21 CFR 101.105(i)).

Country of origin marking meeting the foregoing minimum specifications will be required to appear beginning on May 8, 1994, on all packages of frozen produce which are subject to the requirements of 19 U.S.C. 1304 and Part 134, Customs Regulations. Equally, this marking will be required for all such articles imported into the U.S. which are subject to the certification and post-importation packaging and marking requirements of 19 CFR 134.25 and 19 CFR 134.26.

Compliance Advisory

Affected persons are reminded of Customs position that the mere combining or mixing of frozen produce prior to retail packaging does not relieve any person of the obligation to mark the packaged article in accordance with Customs requirements. Thus, if foreign origin produce is mixed with domestic produce, the package is subject to marking in accordance with this decision. Packages containing produce from a variety of sources are required to be marked to indicate all the foreign countries of origin of the produce they contain. See HQ 735085 (June 4, 1993)(Green Giant "American Mixtures" decision). Any interested person who believes that a particular form of processing excepts an article from marking may seek confirmation from Customs by applying for a ruling in accordance with 19 CFR part 177.

Previous Decisions Affected

HRL 731830 (November 21, 1988), is revoked. T.D. 91–48 (May 28, 1991), is modified. Conspicuous marking within the meaning of T.D. 91–48 shall be limited to marking which complies with the specifications set forth in this decision.

Authority

This notice is published in accordance with section 175.22(a), Customs Regulations (19 CFR 175.22(a)).

Drafting Information

Internal Revenue Service

26 CFR Parts 1 and 602

[TD 8505]

RIN 1545–AS31

Mark to Market for Dealers in Securities

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations providing guidance to enable taxpayers to comply with the mark-to-market requirements of section 475. The temporary regulations provide guidance concerning the meaning of the statutory terms "dealer in securities," "held for investment," and "security." The text of these temporary regulations also serves as the text of the proposed regulations set forth in the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the Federal Register.

DATES: These temporary regulations are effective December 29, 1993.

For dates of applicability, see § 1.475(e)–1T.

FOR FURTHER INFORMATION CONTACT: Robert B. Williams at (202) 622–3960 or Jo Lynn Ricks at (202) 622–3920 (not toll-free calls).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

These regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collection of information contained in these regulations has been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget under control number 1545–1422. The estimated annual burden per recordkeeper varies from .25 to 3 hours, depending on individual circumstances, with an estimated average of 1 hour.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the IRS. Individual recordkeepers may require greater or less time, depending on their particular circumstances.

For further information concerning this collection of information and where to submit comments on this collection of information, the accuracy of the estimated burden, and suggestions for reducing this burden. please refer to the

preamble to the cross-referencing notice of proposed rulemaking published in the Proposed Rules section of this issue of the Federal Register.

Background

This document contains temporary regulations under section 475 (relating to mark-to-market accounting for dealers in securities). Section 475 was added by section 13223 of the Revenue Reconciliation Act of 1993, Pub. L. 103–66, 107 Stat. 481, and is effective for all taxable years ending on or after December 31, 1993.

On October 25, 1993, the IRS issued a revenue ruling that began the process of providing substantive guidance under the mark-to-market rules. The ruling was published as Rev. Rul. 93–76, 1993–35 I.R.B. 11 (November 8, 1993). These temporary regulations clarify several issues that were addressed in that ruling, including the meaning of the statutory terms "dealer in securities" and "held for investment."

Explanation of Provisions

Section 475(b) exempts certain securities from mark-to-market accounting under section 475(a). Among the exempted securities are those held for investment and debt securities not held for sale. The regulations clarify that held for investment, within the meaning of section 475(b)(1)(A), and not held for sale, within the meaning of section 475(b)(1)(B), have the same meaning. The regulations provide that both terms refer to a security that is not held by a taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

By providing that a security is held for investment if it is not held primarily for sale to customers in the ordinary course of a trade or business, the regulations adopt the concept of held for investment in section 1236(a). Thus, under these regulations, a dealer in securities may identify as held for investment a security that it holds primarily for sale to non-customers (e.g., a trading security). The IRS believes that providing a single standard for purposes of sections 475 and 1236 is consistent with the purpose of section 475. Comments are requested regarding other ways to simplify the task of identification.

Holding 5 of Rev. Rul. 93–76 suggested that some securities properly identified as held for investment under section 1236(a) may not be identified as held for investment under section 475(b). Accordingly, Holding 5 of Rev. Rul. 93–76 is modified.

The regulations identify certain assets that are inherently investments and, thus, may not be marked to market under section 475. Under the regulations, the following assets held by a dealer in securities are deemed to be properly identified as held for investment: (1) Stock in a corporation that the taxpayer controls; (2) a partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust that the taxpayer controls; and (3) an annuity, endowment, or life insurance contract. The regulations define control for these purposes. Comments are requested as to other *per se* investments that should be deemed identified as held for investment.

Under the authority of section 475(b)(4), the regulations provide that certain notional principal contracts and derivative securities (described in section 475(c)(2)(D) or (E)) that are held by a dealer in those securities are generally not eligible to be exempted from mark-to-market treatment as held for investment. This rule does not apply, however, if the taxpayer establishes unambiguously that the security was acquired other than in the taxpayer's capacity as a dealer in such securities. It is anticipated that this exception will apply only in rare instances.

The regulations provide rules regarding a security held by a taxpayer as of the close of the last taxable year ending before December 31, 1993. If the security was identified under section 1236 as a security held for investment, the security is treated as being identified as held for investment for purposes of section 475(b). If the security was not identified under section 1236, the regulations provide that the security is treated as having been properly identified under section 475(b)(2) if the information in the dealer's records as of the close of that year supports the identification. If there is any ambiguity in those records, the taxpayer must, no later than January 31, 1994, place in its records a statement unambiguously indicating which securities are to be treated as properly identified. Any information that supports treating a security as having been properly identified under section 475(b)(2) must be applied consistently from one security to another. For purposes of identifying the position under section 475(c)(2)(F)(iii), these rules also apply to a position that is a security by virtue of section 475(c)(2)(F).

Holding 9 of Rev. Rul. 93–76 established certain standards that a dealer in securities must apply in determining which of its securities must be marked to market at the beginning of its first taxable year that ends on or after December 31, 1993. This determination also controls the amount of the taxpayer's net section 481(a) adjustment. The regulations provide rules that are slightly different from the standards set forth in Holding 9. Consistent with the regulatory interpretation of "held for investment" (discussed above), the regulations clarify whether certain securities are treated as having been properly identified for purposes of being exempted from mark to market. Accordingly, Holding 9 of Rev. Rul. 93–76 is modified.

Because the regulations provide new rules concerning the permissibility of certain identifications, a taxpayer has until January 31, 1994, to add or remove these identifications. For example, the regulations provide rules for adding identifications so that securities that were held for sale but were not held for sale to customers may be identified as being described in section 475(b)(1)(A) or (B). This identification may be added only if, prior to December 28, 1993, the taxpayer identified none of these securities as being described in section 475(b)(1)(A) or (B) and only if the retroactive identification is added for all of these securities. A security is not subject to the consistency provision in the preceding sentence if it may be timely identified after the date on which the retroactive identification is added. Thus, a taxpayer gains additional flexibility by making the retroactive identification early. In addition, any taxpayer that is a dealer in notional principal contracts or derivatives described in section 475(c)(2)(D) or (E) that had identified any such securities as held for investment may remove the identification.

If a taxpayer adds or removes an identification discussed above, the regulations provide that the addition is timely for purposes of section 475(b)(2) and that the removal does not subject the taxpayer to the provisions of section 475(d)(2), regarding improper identifications. Similar relief is provided to a taxpayer that corrects identifications of securities held as of the close of the taxpayer's last taxable year ending before December 31, 1993.

In general, the regulations provide that a taxpayer that sells nonfinancial goods or provides nonfinancial services (e.g., a consumer products retailer or an accountant) does not become a dealer in securities within the meaning of section 475(c)(1) by virtue of extending credit for the purchase of its goods or services, even if the taxpayer subsequently sells the evidences of indebtedness so acquired.

The regulations provide that a taxpayer that regularly purchases securities from customers in the ordinary course of a trade or business (including regularly making loans to customers in the ordinary course of a trade or business of making loans) is not thereby a dealer in securities provided that the taxpayer does not sell more than a negligible portion of the securities so acquired. Whether the portion sold is negligible is generally determined without regard to certain extraordinary sales and certain sales of loans that declined in quality after the taxpayer acquired them. The regulations provide examples to illustrate the meaning of the term "negligible portion."

Under the regulations, certain items are not securities within the meaning of section 475(c)(2). These items include: stock of the taxpayer or options to buy or sell the taxpayer's stock; liabilities of the taxpayer; REMIC residual interests that economically represent a liability at the time their basis is determined; and other REMIC residual interests or arrangements that the Commissioner determines have substantially the same economic effect (e.g., a widely held partnership that holds noneconomic REMIC residual interests). Marking these items to market would not carry out the purposes of section 475 and certain other Code sections (e.g., sections 1032 and 860E). Comments are requested as to other items that should similarly be excluded from the definition of a security.

Comments are requested regarding whether additional rules are needed to carry out the purposes of section 475 for taxpayers that hold economic REMIC residual interests or interests in other passthrough entities (including subchapter S corporations or widely held partnerships).

The regulations clarify that marking to market a security that is not held in connection with a taxpayer's activities as a dealer in securities does not affect the character of gain or loss from that security.

These temporary regulations generally apply to taxable years ending on or after December 31, 1993.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these temporary regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these regulations are Robert B. Williams and Jo Lynn Ricks, Office of Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

Paragraph 1. The authority citation for part 1 is amended by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.475(b)–1T also issued under 26 U.S.C. 475(b)(4) and 26 U.S.C. 475(e).

Section 1.475(b)–2T also issued under 26 U.S.C. 475(b)(2), 26 U.S.C. 475(e), and 26 U.S.C. 6001.

Section 1.475(c)–1T also issued under 26 U.S.C. 475(e).

Section 1.475(c)–2T also issued under 26 U.S.C. 475(e) and 26 U.S.C. 860G(e).

Section 1.475(d)–1T also issued under 26 U.S.C. 475(e).

Section 1.475(e)–1T also issued under 26 U.S.C. 475(e). * * *

Par. 2. Sections 1.475(b)–1T, 1.475(b)–2T, 1.475(c)–1T, 1.475(c)–2T, 1.475(d)–1T, and 1.475(e)–1T are added under the heading "Inventories" to read as follows:

§ 1.475(b)–1T Scope of exemptions from mark-to-market requirement (temporary).

(a) Securities held for investment or not held for sale. Except as provided by paragraph (c) of this section, a security is held for investment (within the meaning of section 475(b)(1)(A)) or not held for sale (within the meaning of section 475(b)(1)(B)) if it is not held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(b) *Securities deemed identified as held for investment*—(1) *In general.* The following items held by a dealer in securities are *per se* held for investment within the meaning of section 475(b)(1)(A) and are deemed to be properly identified as such for purposes of section 475(b)(2)—

(i) Stock in a corporation that the taxpayer controls (within the meaning of paragraph (b)(2)(i) of this section);

(ii) A partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust that the taxpayer controls (within the meaning of paragraph (b)(2)(ii) of this section); or

(iii) A contract that is treated for Federal income tax purposes as an annuity, endowment, or life insurance contract (see sections 817 and 7702).

(2) *Control defined.* Control means the ownership, directly or indirectly through persons described in section 267(b) (taking into account section 267(c)), of—

(i) 50 percent or more of the total combined voting power of all classes of stock entitled to vote; or

(ii) 50 percent or more of the capital interest, the profits interest, or the beneficial ownership interest in the widely held or publicly traded partnership or trust.

(c) *Securities deemed not held for investment—(1) General rule for dealers in notional principal contracts and derivatives.* Section 475(b)(1)(A) (exempting certain securities from mark-to-market accounting) does not apply to a security if—

(i) The security is described in subparagraph (D) or (E) of section 475(c)(2) (describing certain notional principal contracts and derivative securities); and

(ii) The taxpayer is a dealer in such securities.

(2) *Exception for securities not acquired in dealer capacity.* Paragraph (c)(1) of this section does not apply if the taxpayer establishes unambiguously that the security was not acquired in the taxpayer's capacity as a dealer in such securities.

§ 1.475(b)–2T Exemptions—Transitional issues (temporary).

(a) *Transitional identification*—(1) *Certain securities previously identified under section 1236.* If, as of the close of the last taxable year ending before December 31, 1993, a security was identified under section 1236 as a security held for investment, the security is treated as being identified as held for investment for purposes of section 475(b).

(2) *Consistency requirement for other securities.* In the case of a security (including a security described in

VOL 58 ISS 248 DE 29 1993 UMI

section 475(c)(2)(F)) that is not described in paragraph (a)(1) of this section and that was held by the taxpayer as of the close of the last taxable year ending before December 31, 1993, the security is treated as having been properly identified under section 475(b)(2) or section 475(c)(2)(F)(iii) if the information contained in the dealer's books and records as of the close of that year supports the identification. If there is any ambiguity in those records, the taxpayer must, no later than January 31, 1994, place in its records a statement resolving this ambiguity and indicating unambiguously which securities are to be treated as properly identified. Any information that supports treating a security as having been properly identified under section 475(b)(2) or section 475(c)(2)(F)(iii) must be applied consistently from one security to another.

(b) *Corrections on or before January 31, 1994*—(1) *Purpose.* This paragraph (b) allows a taxpayer to add or remove certain identifications covered by § 1.475(b)–1T.

(2) *To conform to § 1.475(b)–1T(a)*—(i) *Added identifications.* To the extent permitted by paragraph (b)(2)(ii) of this section, a taxpayer may identify as being described in section 475(b)(1) (A) or (B)—

(A) A security that was held for immediate sale but was not held primarily for sale to customers in the ordinary course of the taxpayer's trade or business (e.g., a trading security); or

(B) An evidence of indebtedness that was not held for sale to customers in the ordinary course of the taxpayer's trade or business and that the taxpayer intended to hold for less than one year.

(ii) *Limitations.* An identification described in paragraph (b)(2)(i) of this section is permitted only if—

(A) Prior to December 28, 1993, the taxpayer did not identify as being described in section 475(b)(1) (A) or (B) any of the securities described in paragraph (b)(2)(i) of this section;

(B) The taxpayer identifies every security described in paragraph (b)(2)(i) for which a timely identification of the security under section 475(b)(2) cannot be made after the date on which the taxpayer makes these added identifications; and

(C) The identification is made on or before January 31, 1994.

(3) *To conform to § 1.475(b)–1T(c).* On or before January 31, 1994, a taxpayer described in § 1.475(b)–1T(c)(1)(ii) may remove an identification under section 475(b)(1)(A) of a security described in § 1.475(b)–1T(c)(1)(i).

(c) *Effect of corrections.* An identification added under paragraph (a)(2) or (b)(2) of this section is timely for purposes of section 475(b)(2) or section 475(c)(2)(F)(iii). An identification removed under paragraph (a)(2) or (b)(3) of this section does not subject the taxpayer to the provisions of section 475(d)(2).

§ 1.475(c)–1T Definitions—Dealers in securities (temporary).

(a) *Sellers of nonfinancial goods and services.* If the principal activity of a taxpayer is selling nonfinancial goods or providing nonfinancial services, the fact that the taxpayer extends credit to the purchasers of its nonfinancial goods or services does not make the taxpayer a dealer in securities within the meaning of section 475(c)(1), even if the taxpayer sells the evidences of indebtedness so acquired. The preceding sentence does not apply if, for purposes of section 471, the taxpayer claims to be a dealer in those evidences of indebtedness.

(b) *Taxpayers that purchase securities but do not sell more than a negligible portion of the securities*—(1) *Exemption from dealer status.* A taxpayer that regularly purchases securities from customers in the ordinary course of a trade or business (including regularly making loans to customers in the ordinary course of a trade or business of making loans) is not thereby a dealer in securities for purposes of section 475(c)(1) if the taxpayer does not sell more than a negligible portion of the securities so acquired. The preceding sentence does not apply if, for purposes of section 471, the taxpayer claims to be a dealer in those securities.

(2) *Negligible portion.* The meaning of negligible portion is illustrated by the following examples:

(i) *Example 1. A* regularly acquires loans (both by making loans to customers and by otherwise purchasing loans) in the ordinary course of its business. *A* retains almost all of the loans that it acquires. In 1993, *A* sells fewer than 60 loans. Accordingly, in 1993 *A* does not sell more than a negligible portion of the securities it acquired.

(ii) *Example 2. B* regularly acquires loans (both by making loans to customers and by otherwise purchasing loans) in the ordinary course of its business. In 1993, *B* sells more than 60 loans, but the total adjusted basis of the loans that *B* sells in 1993 is less than 5% of the total basis, immediately after acquisition, of the loans that it acquires in that year. Accordingly, in 1993 *B* does not sell more than a negligible portion of the securities it acquired.

(3) *Special rules.* Whether the portion of securities sold is negligible is determined without regard to—

(i) Sales of evidences of indebtedness that decline in quality while in the taxpayer's hands and that are sold pursuant to an established policy of the taxpayer to dispose of evidences of indebtedness below a certain quality; or

(ii) Sales that are necessitated by exceptional circumstances and that are not undertaken as recurring business activities.

§ 1.475(c)–2T Definitions—Items that are not securities (temporary).

(a) *In general.* The following items held by a dealer in securities are not securities within the meaning of section 475(c)(2) and, therefore, are not subject to section 475—

(1) Stock (including treasury stock) of the taxpayer and any option to buy or sell its stock (including treasury stock);

(2) A liability of the taxpayer; or

(3) A REMIC residual interest that is described in paragraph (b) of this section or an interest or arrangement that is determined by the Commissioner to have substantially the same economic effect.

(b) *Negative value REMIC residuals.* A residual interest in a REMIC is described in this paragraph (b) if, on the date the taxpayer acquires the residual interest, the present value of the anticipated tax liabilities associated with holding the interest exceeds the sum of—

(1) The present value of the expected future distributions on the interest; and

(2) The present value of the anticipated tax savings associated with holding the interest as the REMIC generates losses.

(c) *Special rules.* Solely for purposes of paragraphs (a)(3) and (b) of this section—

(1) If a transferee taxpayer acquires a residual interest with a basis determined by reference to the transferor's basis, then the transferee is deemed to acquire the interest on the date the transferor acquired it (or is deemed to acquire it under this paragraph (c)(1)).

(2) Anticipated tax liabilities, expected future distributions, and anticipated tax savings are determined under the rules in § 1.860E–2(a)(3) and without regard to the operation of section 475.

(3) Present values are determined under the rules in § 1.860E–2(a)(4).

§ 1.475(d)–1T Character of gain or loss (temporary).

If a security is never held in connection with the taxpayer's activities as a dealer in securities, section 475(d)(3)(A) does not affect the character of gain or loss from the security, even if the taxpayer fails to identify the security under section 475(b)(2).

§ 1.475(e)–1T Effective dates (temporary).

Sections 1.475(b)–1T, 1.475(b)–2T, 1.475(c)–1T, 1.475(c)–2T, and 1.475(d)–1T generally apply to taxable years ending on or after December 31, 1993.

Par. 3. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 602.101(c) is amended by adding an entry in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

Information Reporting for Reimbursements of Interest on Qualified Mortgages

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations under section 6050H of the Internal Revenue Code relating to the information reporting requirements for reimbursements of interest paid in connection with a qualified mortgage. This information is required by the Internal Revenue Service to encourage compliance with the tax laws relating to the deductibility of payments of mortgage interest. The information will be used to determine whether mortgage interest reimbursements have been correctly reported on the return of the taxpayer who receives the reimbursement.

EFFECTIVE DATE: These regulations are effective December 29, 1993.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545–1339. The collection of information requirement in these regulations is satisfied by including the additional information on a Form 1098 filed with the Service and on a statement furnished to the payor of record (a substitute Form 1098). The estimated burden for filing Form 1098 and the statement to the payor of record (substitute Form 1098) is reflected in the burden estimates for Form 1098.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer PC:FP, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

This document provides final regulations amending the Income Tax Regulations (26 CFR part 1) under section 6050H of the Internal Revenue Code of 1986 (Code). On October 16, 1992, the IRS published in the **Federal Register** a Notice of Proposed Rulemaking (57 FR 47428) relating to the information reporting requirements for reimbursements of interest paid on qualified mortgages. Before adopting the final regulations, the IRS solicited comments and held a public hearing on the proposed regulations. The IRS received eighteen written comments. In addition, three persons provided oral comments at the public hearing held on November 30, 1992. The amendments to the regulations contained in this document are adopted after consideration of the written comments and the testimony at the public hearing.

Comments on Proposed Regulations

A. Effective Date

Under section 6050H, interest recipients must (1) file an information return (Form 1098) with the IRS, and (2) furnish a statement to the payor of record on the mortgage. Under the proposed regulations, Forms 1098 filed with the IRS after December 31, 1993, were required to include the information relating to the reimbursement of mortgage interest. However, mortgage interest reimbursements were to be reported on statements required to be furnished to payors of record after December 31, 1992 (i.e., for statements relating to 1992 reimbursements).

Commentators argued that compliance with this effective date would be unduly burdensome and, in some cases, impossible. The commentators noted that the data processing systems of the interest recipients had not been programmed to identify reimbursements of interest made in 1992 and, thus, compliance with the regulations would require a very costly manual search of records and preparation of statements. Commentators requested that the effective date for statements furnished to payors of record be after December 31, 1993, consistent with the effective date for Forms 1098 filed with the IRS.

The final regulations, therefore, provide that reimbursements of interest on a qualified mortgage made in 1993 and subsequent calendar years must be reported on both Forms 1098 filed with the IRS and statements furnished to payors of record. This change was first announced in Notice 92–60, 1992–2 C.B. 387. In addition, for reimbursements made in 1993, no penalties will be imposed under sections 6721 through 6724 for failure to comply with the reporting requirements of these regulations. Reimbursements made prior to 1993 are not required to be reported.

B. Information Reported to Payors of Record

The proposed regulations provided that, on the statement furnished to payors of record under § 1.6050H–2(b), the year or years in which the interest overpayments were made and the portion of the reimbursement attributable to each year must be reported. Commentators recommended that this requirement not be included in the final regulations. The commentators argued that compliance would impose data processing difficulties. Further, the commentators noted that reporting the year or years of overpayment is important to only a small minority of payors of record—those that deducted all of their mortgage interest in some years but not in other years. Because the information is relevant to only a small number of payors of record, the commentators argued that it should not be required to be reported. Rather, if a payor of record needs to know the year(s) of overpayment, the payor of

record can contact the interest recipient directly to obtain the information.

Therefore, the requirement in the proposed regulations that interest recipients report to the payor of record the year or years in which the interest overpayments were made and the portion of the reimbursement attributable to each year has been excluded from the final regulations. Under the final regulations, with respect to mortgage interest reimbursements, the reimbursement amount reported on Form 1098 to the Internal Revenue is the only amount required to be reported on statements furnished to payors of record. This change was first announced in Notice 92–60.

C. Information Reporting Threshold

The proposed regulations required any reimbursement of prior year overpayments of interest to be reported if the reimbursement relates to an amount of interest required to be reported on a Form 1098 in such prior year. Commentators stated that the regulations should provide a de minimis rule relating to the amount of reimbursement that must be reported. Some commentators recommended a $600 threshold for the reporting of reimbursements, consistent with the threshold for reporting mortgage interest received.

In response to those comments, the final regulations provide that, with respect to reimbursements of interest on a qualified mortgage in a calendar year, (a) reimbursements aggregating $600 or more must be reported, and (b) reimbursements aggregating less than $600 must be reported only in instances where $600 or more of interest on the qualified mortgage is received in the calendar year of the reimbursement from the payor of record. Thus, under the regulations, reimbursements aggregating $600 or more in a calendar year must be reported. However, reimbursements aggregating less than $600 must be reported only if a Form 1098 is otherwise required to be filed for the payor of record that received the reimbursement because at least $600 of mortgage interest is received in the calendar year from the payor of record.

D. Reporting Reimbursements on Form 1098

Some commentators contended that reimbursements of interest on a qualified mortgage are reportable under section 6041 of the Code and thus should be reported on Form 1099–MISC. The proposed regulations make clear that the reimbursements are reportable under section 6050H on Form 1098.

The final regulations maintain the position prescribed in the proposed regulations that reimbursements of interest on a qualified mortgage must be reported on Form 1098. The Internal Revenue explored the possibility of requiring the reporting of mortgage interest reimbursements on Form 1099–MISC under section 6041. It was decided, however, that section 6050H was the more appropriate reporting section because the reporting of reimbursements of mortgage interest clearly comes within section 6050H(b)(2)(D), which allows the Secretary to require other information to be reported under section 6050H in addition to the name and address of the taxpayer and the amount of mortgage interest received during the calendar year. A reimbursement of mortgage interest relates to an amount that in all likelihood was previously deducted by the borrower. The inclusion of the reimbursed amount in gross income effectively reverses part of the mortgage interest previously deducted. Thus, the requirement to report the interest reimbursement under section 6050H is in keeping with the statutory intent of that section, which is to encourage compliance with the tax laws relating to the deduction for mortgage interest. See H.R. Rep. No. 432, 98th Cong., 2d Sess. 1353 (1984). Finally, the Internal Revenue wishes to clarify that reimbursements of mortgage interest are not subject to Form 1099 reporting under section 6041.

E. Reporting of Interest on Reimbursements

Commentators requested more guidance on the reporting of interest paid with respect to reimbursed amounts (i.e., the amount paid to the borrower, in addition to the refund of an overpayment, that constitutes interest for the use of the borrower's funds). The proposed regulations provide only that Form 1098 and the statement furnished to the payor of record must not include any amount that constitutes interest on the reimbursement paid to the payor of record.

The final regulations provide that, in the case of a person carrying on the banking business (or a middleman, as defined in § 1.6049–4(f)(4), of a person carrying on the banking business), rules relating to the reporting of interest on a reimbursement of mortgage interest are provided in section 6049 and the regulations thereunder. Persons subject to section 6049 must report payments of interest aggregating $10 or more to a payor of record during the calendar year.

The final regulations also provide that, for persons not subject to section 6049 reporting for the payment of interest on a reimbursement of mortgage interest, rules relating to the reporting of such interest payments are provided in section 6041 and the regulations thereunder. Because section 6041 provides a $600 threshold amount, persons not subject to section 6049 reporting for the payment of interest on a reimbursement of mortgage interest would be required to report only those payments of interest aggregating $600 or more to a payor of record.

F. Other Comments

The IRS received a number of comments in addition to those summarized above. Some of the suggestions contained in the comments have been adopted in the final regulations. Other suggested changes were not adopted primarily because those suggestions were inconsistent with the purpose of the regulations.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking for the regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Stephen J. Toomey of the Office of Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *. Section 1.6050H–2 is also issued under 26 U.S.C. 6050H. * * *

Par. 2. Section 1.6050H–2 is amended as follows:

1. The word "and" at the end of paragraph (a)(2)(iii) is removed.
2. Paragraph (a)(2)(iv) is redesignated as paragraph (a)(2)(v).
3. A new paragraph (a)(2)(iv) is added.
4. Paragraphs (a)(3) and (a)(4) are redesignated as paragraphs (a)(4) and (a)(5), respectively, and a new paragraph (a)(3) is added.
5. Newly designated paragraph (a)(4) is revised.
6. Paragraph (b)(2)(ii) is revised.
7. At the end of paragraph (b)(2)(iii), "." is removed and "; and" is added in its place.
8. Paragraph (b)(2)(iv) is added.
9. Paragraph (b)(6) is revised.
10. The added and revised provisions read as follows:

§ 1.6050H–2 Time, form, and manner of reporting interest received on qualified mortgage.

(a) * * *

(2) * * *

(iv) With respect to reimbursements of interest on a qualified mortgage (as discussed in paragraph (a)(3) of this section) made to the payor of record in the calendar year—

(A) Reimbursements aggregating $600 or more; and

(B) Reimbursements aggregating less than $600, but only if $600 or more of interest on the qualified mortgage is received in the calendar year from the payor of record; and

* * * * *

(3) *Reimbursements of interest on a qualified mortgage.* For purposes of paragraph (a)(2)(iv) of this section, a reimbursement of interest on a qualified mortgage is a reimbursement of an amount received in a prior year that was required to be reported for that prior year under paragraph (a)(2)(iii) of this section by any interest recipient. Only the interest recipient that makes the reimbursement is required to report the reimbursement under this section. Form 1098 and the statement furnished to the payor of record under paragraph (b) of this section must not include any amount that constitutes interest on the reimbursement paid to the payor of record. Rules relating to the requirement to report interest on a reimbursement are, in the case of a person carrying on the banking business (or a middleman, as defined in § 1.6049–4(f)(4), of a person carrying on the banking business), provided in section 6049 and the regulations thereunder, and, for other persons, provided in section 6041 and the regulations thereunder. Reimbursements of interest on a qualified mortgage (as described in this section) made in 1993 and subsequent calendar years must be reported on Form 1098 and statements furnished to payors of record. Reimbursements made prior to 1993 are not required to be reported.

(4) *Time and place for filing return.* An interest recipient must file a return required by paragraph (a) of this section on or before February 28 of the year following the calendar year for which it receives the mortgage interest. If no interest is required to be reported for the calendar year, but a reimbursement of interest on a qualified mortgage is required to be reported for the calendar year, then a return required by paragraph (a) of this section must be filed on or before February 28 of the year following the calendar year in which the reimbursement was made. An interest recipient must file the return required by paragraph (a) of this section with the IRS office designated in the instructions for Form 1098.

* * * * *

(b) * * *

(2) * * *

(ii) A legend that—

(A) Identifies the statement as important tax information that is being furnished to the IRS; and

(B) Notifies the payor of record that if the payor of record is required to file a return, a negligence penalty or other sanction may be imposed on the payor of record if the IRS determines that an underpayment of tax results because the payor of record overstated a deduction for this mortgage interest (if any) or understated income from this mortgage interest reimbursement (if any) on the payor of record's return;

* * * * *

(iv) With respect to any information required to be reported under paragraph (a)(2)(iv) of this section, an instruction providing that the amount of the reimbursement is not to be deducted and that the amount must be included in the gross income of the payor of record if the reimbursed interest was deducted by the payor of record in a prior year so as to reduce income tax.

* * * * *

(6) *Time and place for furnishing statement.* An interest recipient must furnish a statement required by paragraph (b)(1) of this section to a payor of record on or before January 31 of the year following the calendar year for which it receives the mortgage interest. If no mortgage interest is required to be reported for the calendar year, but a reimbursement of interest on a qualified mortgage is required to be reported for the calendar year, then the statement required by paragraph (b)(1) of this section must be furnished on or before January 31 of the year following the calendar year in which the reimbursement was made. The interest recipient will be considered to have furnished the statement to the payor of record if it mails the statement to the payor of record's last known address.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par 4. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par 5. In § 602.101(c), the table is amended by revising the entry for § 1.6050H–2 to read: "1.6050H–2 * * * 1545–0901, 1545–1339".

Margaret Milner Richardson,
Commissioner of Internal Revenue.

Approved: December 16, 1993.

Samuel Y. Sessions,
Acting Assistant Secretary of the Treasury.

Bad Debt Reserves of Banks

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final income tax regulations relating to bad debt reserves of large banks. These regulations are necessary because the Tax Reform Act of 1986 repealed bad debt reserves for large banks. The regulations implement this repeal.

EFFECTIVE DATE: The regulations are effective for taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: Craig Wojay, (202) 622–3920 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has

been reviewed and approved by the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545–1290. The estimated annual burden per respondent varies from 10 minutes to 20 minutes, depending on individual circumstances, with an estimated average of 15 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the IRS. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer PC:FP, Washington, DC. 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC. 20503.

Background

This document provides final regulations on the repeal, for large banks, of the reserve method of accounting for bad debts that is allowed by section 585 of the Internal Revenue Code (Code). These regulations reflect Code section 585(c), which was added by section 901 of the Tax Reform Act of 1986, Public Law 99–514, 100 Stat. 2085, 2375–2380 (1986), and amended by section 1009(a) of the Technical and Miscellaneous Revenue Act of 1988, Public Law 100–647, 102 Stat. 3342, 3445 (1988). These final regulations supersede related portions of 26 CFR 301.9100–7T (formerly 26 CFR 5h.5), which provides temporary regulations on the time and manner of making various elections under the Tax Reform Act of 1986.

Proposed regulations under Code section 585(c) were published in the **Federal Register** on December 12, 1990 (55 FR 51124). No public hearing on these regulations was requested or held, but a number of written comments were received. After consideration of the comments, the proposed regulations are adopted as modified by this Treasury decision.

Explanation of Provisions

Code section 585(c) provides that large banks may not use the reserve method of section 585 for taxable years beginning after December 31, 1986. After this date, large banks must use the specific charge-off method of accounting for bad debts. Section 585(c) also provides procedures for large banks to use in changing from the reserve method of section 585 to the specific charge-off method. Section 585(c)(3) provides a recapture method of change, and section 585(c)(4) provides an elective cut-off method of change.

The final regulations contained in this document implement section 585(c) by adding new §§ 1.585–5 through 1.585–8 and by making conforming amendments to §§ 1.585–1,1.585–2 and 1.585–3. Section 1.585–5 states the general rule of denial of bad debt reserves for large banks. Section 1.585–6 provides guidance on the recapture method of change; § 1.585–7, on the cut-off method of change; and § 1.585–8, on making and revoking elections allowed under the regulations.

The extent to which this Treasury decision reflects the comments received on the proposed regulations is discussed below.

Section 1.585–5: Denial of Bad Debt Reserves for Large Banks

Section 1.585–5(a) requires a large bank to change to the specific charge-off method in the first taxable year beginning after 1986 for which it is a large bank (the disqualification year). Section 1.585–5(b) explains how to determine whether an institution is a large bank, and § 1.585–5(c) explains how to determine a bank's average total assets for purposes of applying the $500 million test of large bank status.

Section 1.585–5(a): Thrift Institutions

Several commentators on the proposed regulations objected to a provision in proposed § 1.585–5(a) that prohibited an institution from following the rules of § 1.585–6 or § 1.585–7 if it had maintained a reserve under Code section 593, rather than section 585. Proposed regulations under section 593 (57 FR 1232 (1992)) address this issue, and § 1.585–5(a) has been modified to reflect the fact that those regulations, when finalized, will provide guidance. Final § 1.585–5(a) prohibits these institutions from following §§ 1.585–6 and 1.585–7, "except as may be provided otherwise in regulations prescribed under section 593."

Section 1.585–5(b)(1): Once a Large Bank

A commentator on the proposed regulations objected to the "once a large bank, always a large bank" rule that is provided by § 1.585–5(b)(1)'s reference to any preceding taxable year after 1986. However, Code section 585(c)(2) specifically requires this reference. Moreover, the Conference Committee on the Technical and Miscellaneous Revenue Act of 1988 rejected a proposed exception to this rule. H.R. Conf. Rep. No. 1104, 100th Cong., 2d Sess., Vol. II, at 243–244 (1988). For these reasons, the final regulations retain the "once a large bank" rule.

Section 1.585–5(b)(1): Section 338 Elections

To clarify the application of the "once a large bank" rule, the final regulations provide guidance on the treatment of section 338 elections in determining large bank status. New Example 4 of § 1.585–5(b)(3) involves a corporation that purchases the stock of a bank and elects under section 338 to treat the purchase as an asset acquisition. Under section 338, the acquired bank is treated as a new corporation for purposes of subtitle A. Accordingly, the bank's prior status as a large bank does not cause it to be considered a large bank after its sale.

Section 1.585–5(b)(2): Transfer of Large Bank's Assets

Several commentators focused on proposed § 1.585–5(b)(3), which applied the "once a large bank" rule to certain acquisitions of substantially all of a large bank's assets. In response to the comments, final § 1.585–5(b)(2)(iii) limits this provision primarily to acquisitions to which section 381(a) applies. Under final § 1.585–5(b)(2)(iv), other acquisitions of substantially all of a large bank's assets result in large bank treatment only if a principal purpose of the acquisition is to avoid treating the acquired assets as those of a large bank and the acquiror is related to the large bank whose assets are acquired, as specified in the regulations.

Section 1.585–5(c)(2): Dates for Determining Average Total Assets

The final regulations also modify § 1.585–5(c), which defines a bank's average total assets for purposes of applying the $500 million test. As requested by a commentator, the final regulations give banks the option of determining their average total assets on a more frequent basis than quarterly. Under new § 1.585–5(c)(2)(i)(B), a bank may compute its average total assets for a year on the basis of its adjusted tax bases of assets held at the end of any regular interval more frequent than quarterly, such as bi-monthly, monthly, or weekly. A more frequent determination of assets generally produces a more accurate average for the year.

Section 1.585–5(c)(3): Foreign Corporation's Assets

Final § 1.585–5(c)(3)(ii) makes it clear that in determining the amount of a foreign corporation's total assets, all of its assets are taken into account, including those that are not effectively connected with the conduct of a banking business within the United States. Section 585(c)(2) applies the $500 million test to "all assets" of a bank or its parent-subsidiary controlled group, and § 1.585–6(d)(3)(i) provides the equivalent clarification for purposes of determining a bank's nonperforming loan percentage.

Section 1.585–5(d): Disqualification Year

In response to a comment, the final regulations also clarify the definition of the term *disqualification year*. A new example in § 1.585–5(d)(3) makes it clear that if a small bank becomes large because its stock is acquired by a large bank, the disqualification year of the acquired bank is its first taxable year ending after the acquisition date. Pursuant to § 1.585–8(d), the acquired bank is then entitled to make its own election regarding use of the recapture or cut-off method of change.

Section 1.585–6: Recapture Method of Change

Under the recapture method of change, a bank includes the balance of its bad debt reserve in income over a four-year period, and recapture is suspended for any taxable year in which the bank is financially troubled. Commentators on the proposed regulations focused on § 1.585–6(c), which explains the effects of a disposition of loans by a large bank that is using the recapture method, and § 1.585–6(d), which provides guidance for financially troubled banks.

Section 1.585–6(c)(2): Cessation of Business

Proposed § 1.585–6(c)(2) provided that a large bank that ceases to engage in the banking business before completing recapture of its reserve must include in income the remainder of its section 481(a) adjustment in the taxable year of the cessation. Proposed § 1.585–6(c)(2) also provided that a bank would not be considered to have ceased to engage in the banking business if the cessation was the result of a section 381 transaction. Since the issuance of the proposed regulations, the Service, pursuant to section 446(e) and § 1.446–1(e), published uniform standards for accounting method changes that include guidance on when a taxpayer is considered to have ceased to engage in business for section 481(a) purposes. See Rev. Proc. 92–20, 1992–1 C.B. 685, 701. To be consistent with this uniform approach, final § 1.585–6(c)(2)(i) provides that whether a bank ceases to engage in the banking business generally is determined under the principles of § 1.446–1(e)(3)(ii) and its administrative procedures. In addition, final § 1.585–6(c)(2)(ii) provides a transition rule for section 381 transactions that occur, or for which a binding written commitment is entered into, on or before March 29, 1994. Under the transition rule, a bank that ceases to engage in the banking business as the result of such a transaction is not treated as ceasing to engage in this business. In response to comments, the final regulations also expand the examples in § 1.585–6(c)(4) to provide additional guidance on the tax consequences of section 381 transactions to which the transition rule applies.

Section 1.585–6(d)(3)(ii): Nonperforming Loan Percentage of Group

Section 1.585–6(d)(3) provides rules for computing a bank's nonperforming loan percentage, which determines whether the bank is considered financially troubled. The numerator of this percentage is the amount of the bank's nonperforming loans, and the denominator is the amount of its equity. Under § 1.585–6(d)(3)(ii), if a bank is a member of a parent-subsidiary controlled group, the nonperforming loans and the equity of all members of the group that are financial institutions are treated as those of the bank. In response to a comment, the final regulations permit a bank to count the loans and equity of all members of the parent-subsidiary controlled group of which the bank is a member. A bank that computes its nonperforming loan percentage on this basis must do so for all taxable years, and any other bank member of the group must do the same.

Section 1.585–6(d)(3) (iii) and (iv): Amount Reported to Regulator

Proposed § 1.585–6(d)(3)(iii) defined a nonperforming loan essentially as any loan that is considered to be nonperforming by the holder's primary Federal regulatory agency. Similarly, proposed § 1.585–6(d)(3)(iv) defined a bank's equity as its equity (i.e., assets minus liabilities) as determined by the bank's primary Federal regulatory agency. In response to a comment, these sections have been revised to make it clear that the amount of a bank's nonperforming loans or equity is not determined by reference to the adjusted Federal income tax bases of assets, but rather by reference to amounts that are required to be reported to the primary Federal regulator.

Section 1.585–6(d)(3)(iii)(A): Types of Nonperforming Loans

The final regulations also clarify the definition of a nonperforming loan by identifying specific types of loans that are considered nonperforming. As requested by commentators, and in accordance with the Conference Committee report on the Tax Reform Act of 1986 (page II–329), final § 1.585–6(d)(3)(iii)(A) provides that nonperforming loans include the following types of loans as defined by the Federal Financial Institutions Examination Council (FFIEC): Loans that are past due 90 days or more and still accruing; loans that are in nonaccrual status; and loans that are restructured troubled debt. A loan is not considered to be nonperforming merely because it is past due, if it is past due less than 90 days.

Section 1.585–6(d)(3)(iii)(B): Definition of Loan

The final regulations also provide a definition of the term *loan*. This definition reflects the standards prescribed by the FFIEC. Accordingly, a troubled debt restructuring that is in substance a foreclosure or repossession is not considered a loan. The FFIEC treats "in substance" foreclosures and repossessions the same as formal foreclosures and repossessions; collateral that is considered foreclosed or repossessed is treated as an asset other than a loan. The final regulations provide a special rule for certain securities and bank deposits that are an integral part of a restructuring of troubled loans to a foreign government.

Section 1.585–6(d)(3)(iii): Accrual of Interest

A commentator suggested that the definition of a nonperforming loan that is contained in § 1.585–6(d)(3)(iii) should be used to determine whether interest income on a loan must continue to be accrued under Code section 451. This issue is outside the scope of section 585(c) and therefore is not addressed in these final regulations.

Section 1.585–6(d)(4): Estimated Tax of Financially Troubled Banks

Section 1.585–6(d)(4) provides relief from certain penalties for failure to pay estimated tax. Essentially, this section waives the penalty for failure to pay estimated tax in cases where a bank that is financially troubled in one quarter (and therefore does not pay quarterly estimated tax attributable to recapture of

its reserve) is not financially troubled for the year as a whole (and thus has underpaid its estimated tax). In response to comments, § 1.585–6(d)(4) has been revised to provide that the determination of whether a bank is financially troubled, for purposes of waiving the penalty for failure to pay an installment of estimated tax, is to be based on the bank's nonperforming loan percentage at the time the installment is due. In effect, final § 1.585–6(d)(4) allows a bank to obtain relief from penalties on the basis of its financial status as of the end of the most recent period for which it is required to report to its primary Federal regulator. New Example 3 in § 1.585–6(d)(5) illustrates the operation of this provision.

Section 1.585–7: Elective Cut-off Method of Change

Under the cut-off method of change, a bank continues to maintain its bad debt reserve for loans that it held when it became a large bank (pre-disqualification loans), but it may not deduct new additions to the reserve. If the reserve balance at the end of any taxable year exceeds the amount of the bank's outstanding pre-disqualification loans, the bank must include the amount of the excess in income for that year. Commentators on the proposed regulations focused on § 1.585–7(b), which provides guidance on maintaining a reserve for pre-disqualification loans, and § 1.585–7(d), which explains the effects of a disposition of loans by a large bank that is using the cut-off method.

Section 1.585–7(b)(1): Losses From Sale of Loans

Section 1.585–7(b)(1) requires a bank to charge against its cut-off reserve any losses resulting from its pre-disqualification loans, including losses resulting from the sale or other disposition of these loans. A commentator objected to applying this requirement to losses from the disposition of loans. However, Code section 585(c)(4)(B) specifically requires that "any losses" resulting from pre-disqualification loans be charged against the reserve. Removing this requirement for losses resulting from a disposition of loans would allow banks using the cut-off method to obtain current deductions for pre-disqualification loans that become partially or wholly worthless by selling or otherwise disposing of the loans without charging the losses against the reserve. For these reasons, the requirement is retained.

Section 1.585–7(b)(2): Post-disqualification Increase in Loan Balance

Another commentator suggested that § 1.585–7(b)(2), which defines a pre-disqualification loan, should be expanded to provide that if the balance of such a loan is increased during or after the disqualification year, the amount of the increase is treated as a pre-disqualification loan. However, neither section 585(c) nor its legislative history provides support for this approach. For this reason, the final regulations do not take the approach suggested by the commentator. Instead, § 1.585–7(b)(2) has been clarified by providing that if the amount of a pre-disqualification loan is increased during or after the disqualification year, the amount of the increase is not treated as a pre-disqualification loan.

Section 1.585–7(d)(2): Small Bank's Acquisition of Large Bank's Assets

Another commentator requested guidance on the consequences of a section 381 transaction in which a small bank that maintains a bad debt reserve acquires the assets of a large bank that is using the cut-off method of change, if the acquiror remains small after the acquisition and continues to use the reserve method. New § 1.585–7(d)(2)(ii) and new Example 5 in § 1.585–7(e) explain these consequences. In this case, the large bank's reserve immediately before the section 381 transaction carries over to the acquiror, but the acquiror does not continue the cut-off procedure begun by the large bank. If the six-year moving average amount for all of the newly acquired loans exceeds the balance of the reserve that carries over, the acquiror increases this balance by the amount of the excess. Any such increase in the reserve results in a negative section 481(a) adjustment that must be taken into account as required under section 381.

Section 1.585–7(d)(3): Dispositions Intended to Change Status

Section 1.585–7(d)(3) provides a special rule for dispositions of pre-disqualification loans that are intended to change the status of the loans. The rule applies only if a bank disposes of a "significant amount" of loans, and a commentator suggested that a significant amount be defined. However, a significant amount of loans varies from bank to bank. No fixed dollar amount or percentage is an appropriate measure of significance for all banks. Therefore, the final regulations do not define this term.

Section 1.585–8: Making and Revoking Elections

Certain elections are allowed under §§ 1.585–6 and 1.585–7. A bank may elect to use the cut-off method of change instead of the recapture method, and a bank that uses the recapture method may elect to recapture more than 10 percent of its reserve in its first year of recapture. Commentators on the proposed regulations focused on the time for making and revoking these elections.

Section 1.585–8 (a) and (c): Time for Making and Revoking Elections

Section 1.585–8(a) requires any election to be made by the later of the date that is 60 days after these final regulations are published, or the due date (taking extensions into account) of the electing bank's tax return for the year for which the election is made. Section 1.585–8(c) does not allow an election to be freely revoked after the final date for making the election. Commentators suggested that this time period for making and revoking elections should be extended for banks that become large more than 60 days after these final regulations are published. However, the time period provided for these banks in the regulations is the time period ordinarily provided by the Service for making and revoking elections when final regulations are in effect. Taxpayers ordinarily are not permitted to change elections merely to reduce their tax liability. Therefore, the final regulations do not modify the time period for making and revoking elections.

Section 1.585–8(e): Certain Elections Made or Revoked by Amended Return

A new § 1.585–8(e) applies to elections that are sought to be made or revoked by amended return on or before February 28, 1994. To make or revoke such an election, amended returns must be filed for intervening taxable years if necessary to report tax liability in a manner consistent with the making or revoking of the election.

Special Analyses

It has been determined that this Treasury Decision is not a significant regulatory action as defined in Executive Order 12866. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for these regulations was submitted to the Small Business Administration for comment on its impact on small business.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1, 301, and 602 are amended as follows:

PART 1—INCOME TAX

Paragraph 1. The authority citation for part 1 is amended by adding a citation in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Sections 1.585–5 through 1.585–8 also issued under 26 U.S.C. 585(b)(3).

Par. 2. Section 1.585–1 is amended as follows:

1. The first sentence of paragraph (a) is amended by removing "166(c)" and adding in its place "585(a) (or, for taxable years beginning before January 1, 1987, section 166(c))".

2. The seventh sentence of paragraph (a) is amended by removing "166(c) and the regulations thereunder" and adding in its place "585 (or, for taxable years beginning before January 1, 1987, section 166(c)) and the regulations under section 166".

3. The tenth sentence of paragraph (a) is amended by removing "(a), (b), and (c)".

4. A sentence is added at the end of paragraph (a).

5. Paragraph (b) is revised.

6. The additions and revisions read as follows:

§ 1.585–1 Reserve for losses on loans of banks.

(a) * * * For rules relating to large banks, see §§ 1.585–5 through 1.585–8.

(b) *Application of section*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, section 585 and this section apply to the following financial institutions—

(i) Any bank (as defined in section 581 and the regulations thereunder) other than a mutual savings bank, domestic building and loan association, or cooperative bank, to which section 593 applies; and

(ii) Any corporation to which paragraph (b)(1)(i) of this section would apply except for the fact that it is a foreign corporation and in the case of any such foreign corporation, the rules provided by section 585(a) and (b), this section, §§ 1.585–2, 1.585–3, and 1.585–4 apply only with respect to loans outstanding the interest on which is effectively connected with the conduct of a banking business within the United States.

(2) *Exception.* For taxable years beginning after December 31, 1986, section 585(a) and (b) and this section do not apply to any large bank (as defined in § 1.585–5(b)). For these years, a large bank may not deduct any amount under section 585 or any other section nor an addition to a reserve for bad debts.

§ 1.585–2 [Amended]

Par. 3. In § 1.585–2, the last sentence of paragraph (d)(3) is amended by adding "585(a)(1) or former section" immediately before "166(c)".

§ 1.585–3 [Amended]

Par. 4. Section 1.585–3 is amended as follows:

1. The first sentence of paragraph (a) is amended by removing "166(c)" and adding in its place "585(a) (or, for taxable years beginning before January 1, 1987, section 166(c))".

2. The first sentence of paragraph (b) is amended by removing "166(c)" and adding in its place "585(a) (or, for taxable years beginning before January 1, 1987, section 166(c))".

3. The second and third sentences of paragraph (b) are amended by removing "166(c)" and adding in its place "585(a) (or former section 166(c))".

Par. 5. Sections 1.585–5, 1.585–6, 1.585–7 and 1.585–8 are added to read as follows:

§ 1.585–5 Denial of bad debt reserves for large banks.

(a) *General rule.* For taxable years beginning after December 31, 1986, a large bank (as defined in paragraph (b) of this section) may not deduct any amount under section 585 or any other section for an addition to a reserve for bad debts. However, for these years, except as provided in § 1.585–7, a large bank may deduct amounts allowed under section 166(a) for specific debts that become worthless in whole or in part. Any large bank that maintained a reserve for bad debts under section 585 for the taxable year immediately preceding its disqualification year (as defined in paragraph (d)(1) of this section) must follow the rules prescribed by § 1.585–6 or § 1.585–7 for changing from the reserve method of accounting for bad debts that is allowed by section 585, to the specific charge-off method of accounting for bad debts, in its disqualification year. However, except as may be provided otherwise in regulations prescribed under section 593, the rules prescribed by §§ 1.585–6 and 1.585–7 do not apply to a large bank that maintained a reserve for bad debts under section 593 for the taxable year immediately preceding its disqualification year.

(b) *Large bank*—(1) *General definition.* For purposes of this section, a large bank is any institution described in § 1.585–1(b)(1) (i) or (ii) if, for the taxable year (or for any preceding taxable year beginning after December 31, 1986)—

(i) The average total assets of the institution (determined under paragraph (c) of this section) exceed $500,000,000; or

(ii) The institution is a member of a parent-subsidiary controlled group (as defined in paragraph (d)(2) of this section) and the average total assets of the group exceed $500,000,000.

(2) *Large bank resulting from transfer by large bank*—(i) *In general.* If a corporation acquires the assets of a large bank (as defined in this paragraph (b)) in an acquisition to which paragraph (b)(2) (ii), (iii) or (iv) of this section applies, the acquiring corporation (the acquiror) is treated as a large bank for any taxable year ending after the date of the acquisition in which it is an institution described in § 1.585–1(b)(1) (i) or (ii).

(ii) *Transfer of significant portion of assets where control is retained.* This paragraph (b)(2)(ii) applies to any direct or indirect acquisition of a significant portion of a large bank's assets if, after the acquisition, the transferor large bank owns more than 50 percent (by vote or value) of the outstanding stock of the acquiror. For this purpose, stock of an acquiror is considered owned by a transferor bank if the stock is owned by any member of a parent-subsidiary controlled group (as defined in paragraph (d)(2) of this section) of which the bank is a member, by any related party within the meaning of section 267(b) or 707(b), or by any person that received the stock in a transaction to which section 355 applies.

(iii) *Transfer to which section 381 applies.* This paragraph (b)(2)(iii) applies to any acquisition to which section 381(a) applies if, immediately after the acquisition, the acquiror's principal method of accounting for bad

VOL 58 ISS 248 DE 29 1993 UMI

debts (determined under § 1.381(c)(4)–1(c)(2)) with respect to its banking business is the specific charge-off method. In applying § 1.381(c)(4)–1(c)(2) for this purpose, the following rules apply: A transferor large bank is considered to use the specific charge-off method for all of its loans immediately before the acquisition; an acquiror is considered to use a reserve method for all of its loans immediately before the acquisition; and all banking businesses of the acquiror immediately after the acquisition are treated as one integrated business. See §§ 1.585–6(c)(3) and 1.585–7(d)(2) for rules on the treatment of assets acquired from large banks in section 381(a) transactions.

(iv) *Transfer of substantially all assets to related party.* This paragraph (b)(2)(iv) applies to any direct or indirect acquisition of substantially all of a large bank's assets if the transferor large bank and the acquiror are related parties before or after the acquisition and a principal purpose of the acquisition is to avoid treating the acquired assets as those of a large bank. A transferor bank and an acquiror are considered to be related parties for this purpose if they are members of the same parent-subsidiary controlled group (as defined in paragraph (d)(2) of this section) or related parties within the meaning of section 267(b) or 707(b).

(3) *Examples.* The following examples illustrate the principles of this paragraph (b):

Example 1. Bank M, a calendar year taxpayer, is an institution described in § 1.585–1(b)(1)(i). For its taxable year beginning on January 1, 1987, M has average total assets of $600 million. Since M's average total assets for 1987 exceed $500 million, M is a large bank for that year. Pursuant to § 1.585–5(d)(1), 1987 is M's disqualification year. If M maintained a bad debt reserve under section 585 for its immediately preceding taxable year (1986), M must change in 1987 to the specific charge-off method of accounting for bad debts, in accordance with § 1.585–6 or § 1.585–7.

Example 2. Assume the same facts as in Example 1. Also assume that in 1988 M disposes of a portion of its assets and, as a result, M's average total assets for taxable year 1988 fall to $400 million. M remains a large bank for taxable year 1988 and succeeding taxable years, since its average total assets for a preceding taxable year (1987) beginning after December 31, 1986, exceeded $500 million.

Example 3. Bank P, a calendar year taxpayer, is an institution described in § 1.585–1(b)(1)(i). P has average total assets of $300 million for its taxable year beginning on January 1, 1988. For the same year, P is a member of a parent-subsidiary controlled group (within the meaning of § 1.585–5(d)(2)) that has average total assets of $800 million. In February 1989, the group sells its stock in P to several individual investors. P is a large bank for taxable year 1988 because it is a member of a group described in § 1.585–5(b)(1)(ii) for that year. P also is a large bank for taxable year 1989 and succeeding taxable years because it was a member of a group described in § 1.585–5(b)(1)(ii) for a preceding taxable year (1988) beginning after December 31, 1986.

Example 4. Assume the same facts as in Example 3, except that P's stock is purchased by a corporation that is not a large bank under § 1.585–5(b). Also assume that the purchasing corporation elects under section 338 to treat the stock purchase as an asset acquisition. Under section 338, P is considered to have sold all of its assets on the purchase date and is treated as a new corporation that purchased these assets on the next day. Since P is treated as a new corporation, its prior membership in a group described in § 1.585–5(b)(1)(ii) does not cause it to be treated as a large bank for taxable years ending after the date of its sale by the group. However, P may be treated as a large bank because of new membership in such a group or pursuant to § 1.585–5(b)(1)(i) or (b)(2).

Example 5. Bank Q is a large bank, within the meaning of § 1.585–5(b)(1), for its taxable year beginning on January 1, 1988, and hence for all later years. On March 1, 1989, Q transfers $200 million of its $600 million of assets to Bank R, a newly created subsidiary, in a transaction to which section 351 applies; these assets are R's only assets. On the same day, Q then spins off R in a transaction to which section 355 applies. After these transactions, the shareholders of Q own more than 50 percent of R's outstanding stock. Although R's average total assets do not exceed $500 million, R becomes a large bank on March 1, 1989, pursuant to § 1.585–5(b)(2)(ii). These transactions do not affect Q's status as a large bank.

Example 6. Bank S is a large bank, within the meaning of § 1.585–5(b)(1)(ii), for its taxable year beginning on January 1, 1987. As a result, S changes to the specific charge-off method of accounting for bad debts in that year. Bank T, which is not a large bank under § 1.585–5(b), uses the reserve method of accounting for bad debts. On June 30, 1988, T acquires substantially all of S's assets in a transaction to which section 381(a) applies. Immediately before the acquisition, S's banking business has total assets of $200 million, and T's has total assets of $250 million. To determine whether T is a large bank under § 1.585–5(b)(2)(iii) for taxable years ending after the acquisition, it is necessary to determine T's principal method of accounting for bad debts with respect to its banking business immediately after the acquisition. This determination requires an application of § 1.381(c)(4)–1(c)(2). For this purpose, T's original and acquired banking businesses are treated as an integrated business. Applying § 1.381(c)(4)–1(c)(2), it is determined that the business's principal method of accounting for bad debts immediately after the acquisition is the reserve method. Hence, the acquisition does not cause T to become a large bank under § 1.585–5(b)(2)(iii).

(c) *Average total assets*—(1) *In general.* For purposes of paragraph (b)(1) of this section, and except as otherwise provided in paragraph (c)(3)(ii) of this section, the average total assets of an institution or group for any taxable year are determined by—

(i) Computing, for each report date (as defined in paragraph (c)(2) of this section) within the taxable year, the amount of total assets (as defined in paragraph (c)(3) of this section) held by the institution or group as of the close of business on the report date;

(ii) Adding these amounts; and

(iii) Dividing the sum of these amounts by the number of report dates within the taxable year.

(2) *Report date*—(i) *Institutions*—(A) *In general.* A report date for an institution generally is the last day of the regular period for which the institution must report to its primary Federal regulatory agency. However, an institution that is required to report to its primary Federal regulatory agency more frequently than quarterly may choose the last day of the calendar quarter as its report date, and an institution that is required to report to its primary Federal regulatory agency less frequently than quarterly must choose the last day of the calendar quarter as its report date. If an institution does not have a Federal regulatory agency, its primary State regulatory agency is considered its primary Federal regulatory agency for purposes of this paragraph (c)(2)(i)(A). In the case of a short taxable year that does not otherwise include a report date, the first or last day of the taxable year is the institution's report date for the year.

(B) *Alternative report date.* In lieu of the report date prescribed by paragraph (c)(2)(i)(A) of this section, for any taxable year an institution may choose as its report date the last day of any regular interval in the taxable year that is more frequent than quarterly (such as bi-monthly, monthly, weekly, or daily).

(ii) *Groups.* If all members of a parent-subsidiary controlled group have the same taxable year, a report date for the group is the report date, determined under paragraph (c)(2)(i) of this section, for any one member of the group that is an institution described in § 1.585–1(b)(1) (i) or (ii). The same report date must be used in applying paragraph (b)(1)(ii) of this section to all members of the group for a taxable year. If all members of a parent-subsidiary controlled group do not have the same taxable year, a report date for the group must be determined under similar principles.

(iii) *Member of group for only part of taxable year.* If an institution is a member of a parent-subsidiary controlled group for only part of a taxable year, paragraph (b)(1)(ii) of this section is applied to the institution for that year on the basis of the group's average total assets for the portion of the year that the institution is a member of the group. Thus, only the group's report dates (as determined under paragraph (c)(2)(ii) of this section) that are included in that portion of the year are taken into account in determining the group's average total assets for purposes of applying paragraph (b)(1)(ii) of this section to the institution. If no report date of the group is included in that portion of the year, the first or last day of that portion of the year must be treated as the group's report date for purposes of this paragraph (c)(2)(iii).

(3) *Total assets*—(i) *All corporations.* The amount of total assets held by an institution or group is the amount of cash, plus the sum of the adjusted bases of all other assets, held by the institution or group. For this purpose, the adjusted basis of an asset generally is its basis for Federal income tax purposes, determined under sections 1012, 1016 and other applicable sections of the Internal Revenue Code. In determining the amount of total assets held by a group, any asset of a member of the group that is an interest in another member of the group is not to be counted.

(ii) *Foreign corporations.* In determining the amount of total assets held by a foreign corporation, all of the corporation's assets are taken into account, including those that are not effectively connected with the conduct of a banking business within the United States. In the case of a foreign corporation that is not engaged in a trade or business in the United States, the adjusted basis of an asset must be determined substantially in accordance with United States tax principles as provided in regulations under section 964. In the case of a foreign corporation that is engaged in a trade or business in the United States, the amount of its average total assets for a taxable year (within the meaning of paragraph (c)(1) of this section) is the amount of the corporation's average worldwide assets used for purposes of computing the interest expense deduction allowable under section 882 and § 1.882–5 for the taxable year.

(4) *Estimated adjusted tax bases*—(i) *In general.* The amount of the adjusted Federal income tax bases (tax bases) of assets held on a report date may be estimated, for purposes of applying paragraph (c)(3) of this section. This estimate must be based on the adjusted bases of the assets on that date as determined by reference to the asset holder's books and records maintained for financial reporting purposes (book bases). The estimate must reflect any change in the ratio between the asset holder's tax and book bases of assets that occurs during the taxable year, and the estimate must assume that this change occurs ratably. If an institution or group member estimates the tax bases of assets held on any report date during a taxable year, it must do so for all assets (other than cash) held on that report date, and it must do so for all other report dates during the year. However, the tax bases of assets may not be estimated for any report date that is the first or last day of the taxable year or that is determined under paragraph (c)(2)(i)(B) of this section.

(ii) *Formulas.* The estimated amount of the tax bases of assets held on any report date during a taxable year is based on the following variables: The total book bases of the assets on the report date (B); the asset holder's tax/book ratio as of the close of the preceding taxable year (R); and the result (whether positive or negative) obtained when R is subtracted from the asset holder's tax/book ratio as of the close of the current taxable year (Y). For purposes of determining R and Y, an asset holder's tax/book ratio is the ratio of the total tax bases of all of the holder's assets (other than cash), to the total book bases of those assets. If an asset holder's taxable year is the calendar year and its report date is the last day of the calendar quarter, its estimated tax bases of assets held on the first three report dates of the year are determined under the following formulas:

1st Report Date=B×(R+¼Y)
2nd Report Date=B×(R+½Y)
3rd Report Date=B×(R+¾Y)

(5) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. Bank U is a fiscal year taxpayer, and its fiscal year ends on January 31. U reports to its primary Federal regulatory agency as of the last day of the calendar quarter. U does not choose under § 1.585–5(c)(2)(i)(B) a report date more frequent than quarterly. Thus, U's report dates under § 1.585–5(c)(2)(i)(A) are March 31, June 30, September 30, and December 31. For its taxable year beginning on February 1, 1987, U has total assets (within the meaning of § 1.585–5(c)(3)) of $480 million on March 31, $490 million on June 30, $510 million on September 30, and $540 million on December 31. Thus, pursuant to § 1.585–5(c)(1), U's average total assets for its taxable year beginning on February 1, 1987, are $505 million.

Example 2. Bank W is a calendar year taxpayer, and its report date (within the meaning of § 1.585–5(c)(2)(i)(A)) is the last day of the calendar quarter. Pursuant to § 1.585–5(c)(4), W chooses to estimate the tax bases of its assets for 1990. Therefore, W must estimate the tax bases of all of its assets (other than cash) for its first three report dates in 1990. Since W's fourth report date (December 31) is the last day of its taxable year, the tax bases of its assets may not be estimated for this date. The adjusted tax bases of all of W's assets (other than cash) are $450z on December 31, 1989, and $480z on December 31, 1990. The book bases of those assets are $500z on December 31, 1989; $520z on March 31, 1990; $540z on June 30, 1990; $560z on September 30, 1990; and $600z on December 31, 1990. Applying the formulas provided in § 1.585–5(c)(4)(ii), W's tax/book ratio as of the close of 1989 (R), is 0.9 (450z/500z). W's tax/book ratio as of the close of 1990 is 0.8 (480z/600z). Thus, Y is −0.1. The estimated adjusted tax bases of all of W's assets (other than cash) on the first three report dates of 1990 are as follows:

1st = B×(R+¼Y)
= $520z×[0.9+¼(−0.1)]
= $455z
2nd = B×(R+½Y)
= $540z×[0.9+½(−0.1)]
= $459z
3rd = B×(R+¾Y)
= $560z×[0.9+¾(−0.1)]
= $462z

(d) *Definitions.* The following definitions apply for purposes of this section and §§ 1.585–6, 1.585–7 and 1.585–8:

(1) *Disqualification year.* A bank's disqualification year is its first taxable year beginning after December 31, 1986, for which the bank is a large bank within the meaning of paragraph (b) of this section.

(2) *Parent-subsidiary controlled group.* A parent-subsidiary controlled group includes all of the members of a controlled group of corporations described in section 1563(a)(1). The members of such a group are determined without regard to whether any member is an excluded member described in section 1563(b)(2), a foreign entity, or a commercial bank.

(3) *Example.* The following example illustrates the principles of this paragraph (d):

Example. Bank X is a large bank within the meaning of § 1.585–5(b)(1)(i). Bank Y is not a large bank under § 1.585–5(b), and it maintains a bad debt reserve under section 585. In 1988, X purchases all of the stock of Y. If the acquisition causes Y to become a member of a parent-subsidiary controlled group described in § 1.585–5(b)(1)(ii), Y is a large bank beginning in its first taxable year that ends after the date of the acquisition. Pursuant to § 1.585–5(d)(1), this year is Y's disqualification year. Y must change in this year to the specific charge-off method of accounting for bad debts, in accordance with § 1.585–6 or § 1.585–7.

§ 1.585–6 Recapture method of changing from the reserve method of section 585.

(a) *General rule.* This section applies to any large bank (as defined in § 1.585–5(b)) that maintained a reserve for bad debts under section 585 for the taxable year immediately preceding its disqualification year (as defined in § 1.585–5(d)(1)) and that does not elect the cut-off method set forth in § 1.585–7. Except as otherwise provided in paragraphs (c) and (d) of this section, any bank to which this section applies must include in income the amount of its net section 481(a) adjustment (as defined in paragraph (b)(3) of this section) over the four-year period beginning with the bank's disqualification year. If a bank follows the rules prescribed by this section, its change to the specific charge-off method of accounting for bad debts in its disqualification year will be treated as a change in accounting method that is made with the consent of the Commissioner. Paragraph (b) of this section specifies the portion of the net section 481(a) adjustment to be included in income in each year of the recapture period; paragraph (c) of this section provides rules on the effect of disposing of loans; and paragraph (d) of this section provides rules on the suspension of recapture by financially troubled banks.

(b) *Four-year spread of net section 481(a) adjustment*—(1) *In general.* If a bank to which this section applies does not make the election allowed by paragraph (b)(2) of this section, the bank must include in income the following portions of its net section 481(a) adjustment in each year of the four-year recapture period: 10 percent in the bank's disqualification year; 20 percent in its first taxable year after its disqualification year; 30 percent in its second taxable year after its disqualification year; and 40 percent in its third taxable year after its disqualification year.

(2) *Election to include more than 10 percent in disqualification year.* A bank to which this section applies may elect to include in income, in its disqualification year, any percentage of its net section 481(a) adjustment that is larger than 10 percent. Any such election must be made at the time and in the manner prescribed by § 1.585–8. If a bank makes such an election, the bank must include in income the remainder, if any, of its net section 481(a) adjustment in the following portions: 3/6 of the remainder in the bank's first taxable year after its disqualification year; 1/3 of the remainder in its second taxable year after its disqualification year; and 1/6 of the remainder in its third taxable year after its disqualification year. For this purpose, the remainder of a bank's net section 481(a) adjustment is any portion of the adjustment that the bank does not elect to include in income in its disqualification year.

(3) *Net section 481(a) adjustment.* For purposes of this section, the amount of a bank's net section 481(a) adjustment is the amount of the bank's reserve for bad debts as of the close of the taxable year immediately preceding its disqualification year. Since the change from the reserve method of section 585 is initiated by the taxpayer, the amount of the bank's bad debt reserve for this purpose is not reduced by amounts attributable to taxable years beginning before 1954.

(4) *Examples.* The following examples illustrate the principles of this paragraph (b):

Example 1. Bank M is a large bank within the meaning of § 1.585–5(b). M's disqualification year is its taxable year beginning on January 1, 1989, and M maintained a bad debt reserve under section 585 for the preceding taxable year. Pursuant to § 1.585–5(a), M must change from the reserve method of accounting for bad debts to the specific charge-off method in its disqualification year. M does not elect the cut-off method set forth in § 1.585–7. Thus, M must follow the recapture method set forth in this § 1.585–6. M's net section 481(a) adjustment, as defined in § 1.585–6(b)(3), is $2 million. M does not make the election allowed by § 1.585–6(b)(2). Pursuant to § 1.585–6(b)(1), M must include the following amounts in income: $200,000 in taxable year 1989; $400,000 in 1990; $600,000 in 1991; and $800,000 in 1992.

Example 2. Assume the same facts as in Example 1, except that M elects under § 1.585–6(b)(2) to recapture 55 percent of its net section 481(a) adjustment in its disqualification year. Pursuant to § 1.585–6(b)(2), M must include the following amounts in income: $1,100,000 in taxable year 1989; $200,000 in 1990; $300,000 in 1991; and $400,000 in 1992.

(c) *Effect of disposing of loans*—(1) *In general.* Except as provided in paragraphs (c)(2) and (c)(3) of this section, if a bank to which this section applies sells or otherwise disposes of any of its outstanding loans on or after the first day of its disqualification year, the disposition does not affect the bank's obligation under this section to include in income the amount of its net section 481(a) adjustment, and the disposition does not affect the amount of this adjustment.

(2) *Cessation of banking business*—(i) *In general.* If a bank to which this section applies ceases to engage in the business of banking before it is otherwise required to include in income the full amount of its net section 481(a) adjustment, the bank must include in income the remaining amount of the adjustment in the taxable year in which it ceases to engage in the business of banking. For this purpose, and except as provided in paragraph (c)(2)(ii) of this section, whether a bank ceases to engage in the business of banking is determined under the principles of § 1.446–1(e)(3)(ii) and its administrative procedures.

(ii) *Transition rule.* A bank that ceases to engage in the business of banking as the result of a transaction to which section 381(a) applies is not treated as ceasing to engage in the business of banking if, on or before March 29, 1994, either the transaction occurs or the bank enters into a binding written agreement to carry out the transaction.

(3) *Certain section 381 transactions.* This paragraph (c)(3) applies if a bank to which this section applies transfers outstanding loans to another corporation on or after the first day of the bank's disqualification year (and before it has included in income the full amount of its net section 481(a) adjustment) in a transaction to which section 381(a) applies, and under paragraph (c)(2) (i) or (ii) of this section the transferor bank is not treated as ceasing to engage in the business of banking as a result of the transaction. If this paragraph (c)(3) applies, the acquiring corporation (the acquiror) steps into the shoes of the transferor with respect to using the recapture method prescribed by this section and assumes all of the transferor's rights and obligations under paragraph (b) of this section. The unrecaptured balance of the transferor's net section 481(a) adjustment carries over in the transaction to the acquiror, and the acquiror must complete the four-year recapture procedure begun by the transferor. In applying this procedure, the transferor's taxable year that ends on or includes the date of the acquisition and the acquiror's first taxable year ending after the date of the acquisition represent two consecutive taxable years within the four-year recapture period.

(4) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. Bank P is a bank to which this § 1.585–6 applies. P's disqualification year is its taxable year beginning on January 1, 1989, and P recaptures 10 percent of its net section 481(a) adjustment in that year pursuant to § 1.585–6(b)(1). In July 1990 P disposes of a portion of its loan portfolio in a transaction to which section 381(a) does not apply, and P continues to engage in the business of banking. Pursuant to § 1.585–6(c)(1), the disposition does not affect P's obligation under § 1.585–6(b)(1) to recapture the remainder of its net section 481(a) adjustment in 1990, 1991 and 1992. Nor does the disposition affect the amount of the adjustment.

Example 2. Assume the same facts as in Example 1, except that P ceases to engage in the business of banking in 1990, as determined under the principles of § 1.446–1(e)(3)(ii) and its administrative procedures. Pursuant to § 1.585–6(c)(2)(i), in 1990 P must include in income the remaining 90 percent of its net section 481(a) adjustment.

Example 3. Assume the same facts as in Example 1, except that P's 1990 disposition of loans is a transaction to which section 381(a) applies, P ceases to engage in the business of banking as a result of the transaction, and P's taxable year ends on the date of the transaction. Thus, in the transaction, P transfers substantially all of its loans to an acquiring corporation (Q). Q is a calendar year taxpayer. Because the transaction occurred before March 29, 1994, the transition rule of § 1.585–6(c)(2)(ii) applies, and P is not treated as ceasing to engage in the business of banking. Pursuant to § 1.585–6(c)(3), Q steps into P's shoes with respect to using the recapture method prescribed by § 1.585–6. The unrecaptured balance of P's net section 481(a) adjustment carries over to Q in the section 381(a) transaction, and Q must complete the four-year recapture procedure begun by P. Pursuant to §§ 1.585–6(b) and 1.585–6(c)(3), P includes 20 percent of its net section 481(a) adjustment in income in its taxable year ending on the date of the section 381(a) transaction, and Q includes 30 percent of the adjustment in income in 1990 and 40 percent in 1991.

Example 4. Assume the same facts as in Example 3. Assume also that Q becomes a large bank under § 1.585–5(b) as a result of the transaction and maintained a bad debt reserve immediately before the transaction. Q must change to the specific charge-off method for all of its loans in the first taxable year that it is a large bank. Thus, Q not only completes the recapture procedure begun by P but also follows the rules prescribed by § 1.585–6 or § 1.585–7 with respect to its own reserve.

Example 5. Assume the same facts as in Example 3. Assume also that Q is not a large bank after the transaction and properly establishes a bad debt reserve for the loans it receives in the transaction. This establishment of the reserve results in a new negative section 481(a) adjustment. Thus, Q not only completes the recapture procedure begun by P but also takes into account the new negative adjustment as required under section 381.

(d) *Suspension of recapture by financially troubled banks*—(1) *In general.* Except as provided in paragraph (d)(2) of this section, a bank that is financially troubled (within the meaning of paragraph (d)(3) of this section) for any taxable year must not include any amount in income under paragraphs (a) and (b) of this section for that taxable year and must disregard that taxable year in applying paragraphs (a) and (b) of this section to other taxable years. See paragraph (d)(4) of this section for rules on determining estimated tax payments of financially troubled banks, and see paragraph (d)(5) of this section for examples illustrating this paragraph (d).

(2) *Election to recapture.* A bank that is financially troubled (within the meaning of paragraph (d)(3) of this section) for its disqualification year may elect to include in income, in one taxable year, any percentage of its net section 481(a) adjustment that is greater than 10 percent. This election may be made for the bank's disqualification year, for the first taxable year after the disqualification year in which the bank is not financially troubled (within the meaning of paragraph (d)(3) of this section), or for any intervening taxable year. Any such election must be made at the time and in the manner prescribed by § 1.585–8. A bank that makes this election must include an amount in income under paragraphs (a) and (b) of this section in the year for which the election is made (election year) and must not disregard this year in applying paragraphs (a) and (b) of this section to other taxable years. Such a bank must follow the rules of paragraph (b)(2) of this section in applying paragraph (b) of this section to later taxable years, treating the election year as the disqualification year for purposes of applying paragraph (b)(2) of this section. However, if the bank is financially troubled for any year after its election year, the bank must not include any amount in income under paragraphs (a) and (b) of this section for the later year and must disregard the later year in applying paragraphs (a) and (b) of this section to other taxable years.

(3) *Definition of financially troubled*—(i) *In general.* For purposes of this section, a bank is considered financially troubled for any taxable year if the bank's nonperforming loan percentage for that year exceeds 75 percent. For this purpose, a bank's nonperforming loan percentage is the percentage determined by dividing the sum of the outstanding balances of the bank's nonperforming loans (as defined in paragraph (d)(3)(iii) of this section) as of the close of each quarter of the taxable year, by the sum of the amounts of the bank's equity (as defined in paragraph (d)(3)(iv) of this section) as of the close of each such quarter. The quarters for a short taxable year of at least 3 months are the same as those of the bank's annual accounting period, except that quarters ending before or after the short year are disregarded. If a taxable year consists of less than 3 months, the first or last day of the taxable year is treated as the last day of its only quarter. In lieu of determining its nonperforming loan percentage on the basis of loans and equity as of the close of each quarter of the taxable year, a bank may, for all years, determine this percentage on the basis of loans and equity as of the close of each report date (as defined in § 1.585–5(c)(2), without regard to § 1.585–5(c)(2)(i)(B)). In the case of a bank that is a foreign corporation, all nonperforming loans and equity of the bank are taken into account, including loans and equity that are not effectively connected with the conduct of a banking business within the United States.

(ii) *Parent-subsidiary controlled groups*—(A) *In general.* If a bank is a member of a parent-subsidiary controlled group (as defined in § 1.585–5(d)(2)) for the taxable year, the nonperforming loans and the equity of all members of the bank's financial group (as determined under paragraph (d)(3)(ii)(B) of this section) are treated as the nonperforming loans and the equity of the bank for purposes of paragraph (d)(3)(i) of this section. However, any equity interest that a member of a bank's financial group holds in another member of this group is not to be counted in determining equity. Similarly, any loan that a member of a bank's financial group makes to another member of the group is not to be counted in determining nonperforming loans. All banks that are members of the same parent-subsidiary controlled group must (for all taxable years that they are members of this group) determine their nonperforming loan percentage on the basis of the close of each quarter of the taxable year, or all must (for all such taxable years) determine this percentage on the basis of the close of each report date (as determined under § 1.585–5(c)(2)(ii), applied without regard to § 1.585–5(c)(2)(i)(B)).

(B) *Financial group*—(*1*) *In general.* All banks that are members of the same parent-subsidiary controlled group must (for all taxable years that they are members of this group) determine their financial group under paragraph (d)(3)(ii)(B)(*2*) of this section, or all must (for all such taxable years) determine their financial group under paragraph (d)(3)(ii)(B)(*3*) of this section.

(*2*) *Financial institution members of parent-subsidiary controlled group.* A bank's financial group, determined under this paragraph (d)(3)(ii)(B)(*2*), consists of all financial institutions within the meaning of section 265(b)(5) (and comparable foreign financial institutions) that are members of the parent-subsidiary controlled group of which the bank is a member.

(3) *All members of parent-subsidiary controlled group.* A bank's financial group, determined under this paragraph (d)(3)(ii)(B)(*3*), consists of all members of the parent-subsidiary controlled group of which the bank is a member.

(iii) *Nonperforming loan*—(A) *In general.* For purposes of this section, a nonperforming loan is any loan (as defined in paragraph (d)(3)(iii)(B) of this section) that is considered to be nonperforming by the holder's primary Federal regulatory agency. Nonperforming loans include the following types of loans as defined by the Federal Financial Institutions Examination Council: Loans that are past due 90 days or more and still accruing; loans that are in nonaccrual status; and loans that are restructured troubled debt. A loan is not considered to be nonperforming merely because it is past due, if it is past due less than 90 days. The outstanding balances of nonperforming loans are determined on the basis of amounts that are required to be reported to the holder's primary Federal regulatory agency. For purposes of this paragraph (d)(3)(iii)(A), a holder that does not have a Federal regulatory agency is treated as Federally regulated under the standards prescribed by the Federal Financial Institutions Examination Council.

(B) *Loan.* For purposes of paragraph (d)(3)(iii)(A) of this section, a loan is any extension of credit that is defined and treated as a loan under the standards prescribed by the Federal Financial Institutions Examination Council. (Accordingly, a troubled debt restructuring that is in substance a foreclosure or repossession is not considered a loan.) In addition, a debt evidenced by a security issued by a foreign government is treated as a loan if the security is issued as an integral part of a restructuring of one or more troubled loans to the foreign government (or an agency or instrumentality thereof). Similarly, a deposit with the central bank of a foreign country is treated as a loan if the deposit is made under a deposit facility agreement that is entered into as an integral part of a restructuring of one or more troubled loans to the foreign country's government (or an agency or instrumentality thereof).

(iv) *Equity.* For purposes of this section, the equity of a bank or other financial institution is its equity (i.e., assets minus liabilities) as required to be reported to the institution's primary Federal regulatory agency (or, if the institution does not have a Federal regulatory agency, as required under the standards prescribed by the Federal Financial Institutions Examination Council). The balance in a reserve for bad debts is not treated as equity.

(4) *Estimated tax payments of financially troubled banks.* For purposes of applying section 6655(e)(2)(A)(i) with respect to any installment of estimated tax, a bank that is financially troubled as of the due date of the installment is treated as if no amount will be included in income under paragraphs (a) and (b) of this section for the taxable year. For this purpose, a bank is considered financially troubled as of the due date of an installment of estimated tax only if its nonperforming loan percentage (computed under paragraph (d)(3) of this section) would exceed 75 percent for a short taxable year ending on that date. For purposes of computing this nonperforming loan percentage, the ending of such a short taxable year would not cause the last day of that year to be treated as the last day of a quarter of the taxable year.

(5) *Examples.* The following examples illustrate the principles of this paragraph (d):

Example 1. Bank R is a bank to which this § 1.585–6 applies. R's disqualification year is its taxable year beginning on January 1, 1987. R is not financially troubled (within the meaning of § 1.585–6(d)(3)) for taxable year 1987 or for any taxable year after 1989, but it is financially troubled for taxable years 1988 and 1989. Since R is not financially troubled for its disqualification year, R must include an amount in income under § 1.585–6 (a) and (b) for that year (taxable year 1987). R may make the election allowed by § 1.585–6(b)(2) for that year. Since R is financially troubled for taxable years 1988 and 1989, pursuant to § 1.585–6(d)(1) R does not include any amount in income under § 1.585–6 (a) and (b) for these years, and it treats taxable years 1990, 1991 and 1992 as the first, second and third taxable years after its disqualification year for purposes of applying § 1.585–6 (a) and (b).

Example 2. Assume the same facts as in Example 1, except that R is financially troubled for taxable year 1987 (its disqualification year). R may make the election allowed by § 1.585–6(d)(2) for 1987 (the disqualification year), for 1990 (the first year after the disqualification year in which R is not financially troubled), or for 1988 or 1989 (the intervening years). R elects to include 60 percent of its net section 481(a) adjustment in income in 1987. Thus, the remainder of the adjustment, for purposes of applying the rules of § 1.585–6(b)(2), is 40 percent. R must include in income 2/9 of the remainder in 1990, 1/3 of the remainder in 1991, and 4/9 of the remainder in 1992.

Example 3. Bank S, which is not a member of a parent-subsidiary controlled group, is a bank to which this § 1.585–6 applies. S's disqualification year is its taxable year beginning on January 1, 1987. S determines its nonperforming loan percentage under § 1.585–6(d)(3) on a quarterly basis. S is not financially troubled for taxable year 1987 and includes 10 percent of its net section 481(a) adjustment in income in that year. S's outstanding balance of nonperforming loans (as defined in § 1.585–6(d)(3)(iii)) is $80 million on March 31, 1988; $68 million on June 30, 1988; and $59 million on September 30, 1988. The amount of S's equity (as defined in § 1.585–6(d)(3)(iv)) is $100 million on each of these three dates. Thus, S's nonperforming loan percentage, computed under § 1.585–6(d)(3), would be 80 percent (80/100) for a short taxable year ending on April 15 or June 15, 74 percent [(80+68) ÷ 200] for a short taxable year ending on September 15, and 69 percent [(80+68+59) ÷ 300] for a short taxable year ending on December 15. Since S's nonperforming loan percentage for a short taxable year ending on April 15 or June 15 would exceed 75 percent pursuant to § 1.585–6(d)(4) S is considered financially troubled as of these dates. Thus, S is treated as if no amount will be included in income under § 1.585–6 (a) and (b) for the year for purposes of applying section 6655(e)(2)(A)(i) with respect to the installments of estimated tax that are due on April 15, 1988, and June 15, 1988. However, since S's nonperforming loan percentage for a short taxable year ending on September 15 or December 15 would not exceed 75 percent S is not considered financially troubled as of these dates. Thus, S is treated as if 20 percent of its net section 481(a) adjustment will be included in income under § 1.585–6 (a) and (b) for the year for purposes of applying section 6655(e)(2)(A)(i) with respect to the installments of estimated tax that are due on September 15, 1988, and December 15, 1988

§ 1.585–7 Elective cut-off method of changing from the reserve method of section 585.

(a) *General rule.* Any large bank (as defined in § 1.585–5(b)) that maintained a reserve for bad debts under section 585 for the taxable year immediately preceding its disqualification year (as defined in § 1.585–5(d)(1)) may elect to use the cut-off method set forth in this section. Any such election must be made at the time and in the manner prescribed by § 1.585–8. If a bank makes this election, the bank must maintain its bad debt reserve for its pre-disqualification loans, as prescribed in paragraph (b) of this section, and the bank must include in income any excess balance in this reserve, as required by paragraph (c) of this section. The bank may not deduct, for its disqualification year or any subsequent taxable year, any amount allowed under section 166(a) for pre-disqualification loans (as defined in paragraph (b)(2) of this section) that become worthless in whole or in part, except as allowed by paragraph (b)(1) of this section. However, except as provided in paragraph (d)(3) of this section, the bank may deduct, for its disqualification year or any subsequent taxable year, amounts allowed under section 166(a) for loans that the bank originates or acquires on or after the first day of its disqualification year and that become worthless in whole or in part. If a bank makes the election allowed by this paragraph (a), its change to the specific charge-off method of accounting for bad debts in its disqualification year does not give rise to a section 481(a) adjustment.

(b) *Maintaining reserve for pre-disqualification loans*—(1) *In general.* A bank that makes the election allowed by paragraph (a) of this section must maintain its bad debt reserve for its pre-disqualification loans (as defined in paragraph (b)(2) of this section). Except as provided in paragraph (d)(3) of this section, the bank must charge against the reserve the amount of any losses resulting from these loans (including losses resulting from the sale or other disposition of these loans), and the bank must add to the reserve the amount of recoveries with respect to these loans. In general, the reserve must be maintained in the manner provided by former section 166(c) of the Internal Revenue Code and the regulations thereunder. However, after the balance in the reserve is reduced to zero, the bank is to account for any losses and recoveries with respect to outstanding pre-disqualification loans under the specific charge-off method of accounting for bad debts, as if the bank always had accounted for these loans under this method.

(2) *Definition of pre-disqualification loans.* For purposes of this section, a pre-disqualification loan of a bank is any loan that the bank held on the last day of its taxable year immediately preceding its disqualification year (as defined in § 1.585–5(d)(1)). If the amount of a pre-disqualification loan is increased during or after the disqualification year, the amount of the increase is not treated as a pre-disqualification loan.

(c) *Amount to be included in income when reserve balance exceeds loan balance.* If, as of the close of any taxable year, the balance in a bank's reserve that is maintained under paragraph (b) of this section exceeds the balance of the bank's outstanding pre-disqualification loans, the bank must include in income the amount of the excess for the taxable year. The balance in the reserve is then reduced by the amount of this excess. See paragraph (d) of this section for rules on the application of this paragraph (c) when a bank disposes of loans.

(d) *Effect of disposing of loans*—(1) *In general.* Except as provided in paragraphs (d)(2) and (d)(3) of this section, if a bank that makes the election allowed by paragraph (a) of this section sells or otherwise disposes of any of its outstanding pre-disqualification loans, the bank is to reduce the balance of its outstanding pre-disqualification loans by the amount of the loans disposed of, for purposes of applying paragraph (c) of this section.

(2) *Section 381 transactions.* If a bank that makes the election allowed by paragraph (a) of this section transfers outstanding pre-disqualification loans to another corporation in a transaction to which section 381(a) applies, the acquiring corporation (the acquiror) must follow the rules of paragraph (d)(2)(i) or (ii) of this section.

(i) *Acquiror completes cut-off method of change.* Except as provided in paragraph (d)(2)(ii) of this section, the acquiror steps into the shoes of the transferor in the section 381(a) transaction with respect to using the cut-off method of change. Thus, the transferor's bad debt reserve immediately before the section 381(a) transaction carries over to the acquiror, and the acquiror must complete the cut-off method begun by the transferor. For purposes of completing the transferor's cut-off method, the acquiror's balance of outstanding pre-disqualification loans immediately after the section 381(a) transaction is the balance of these loans that it receives in the transaction, and the acquiror assumes all of the transferor's rights and obligations under this section.

(ii) *Acquiror uses reserve method.* If the acquiror is not a large bank (within the meaning of § 1.585–5(b)) immediately after the section 381(a) transaction and uses a reserve method of accounting for bad debts attributable to the pre-disqualification loans (and any other loans) received in the transaction, the acquiror does not step into the shoes of the transferor with respect to using the cut-off method of change. The transferor's bad debt reserve immediately before the section 381(a) transaction carries over to the acquiror, but the acquiror does not continue the cut-off method begun by the transferor. If the six-year moving average amount (as defined in § 1.585–2(c)(1)(ii)) for all of the loans received in the transaction exceeds the balance of the reserve that carries over to the acquiror, the acquiror increases this balance by the amount of the excess. Any such increase in the reserve results in a negative section 481(a) adjustment that is taken into account as required under section 381.

(3) *Dispositions intended to change the status of pre-disqualification loans.* This paragraph (d)(3) applies if a bank that makes the election allowed by paragraph (a) of this section sells, exchanges, or otherwise disposes of a significant amount of its pre-disqualification loans (as defined in paragraph (b)(2) of this section) and a principal purpose of the transaction is to avoid the provisions of this section by increasing the amount of loans for which deductions are allowable under the specific charge-off method. If this paragraph (d)(3) applies, the District Director may disregard the disposition for purposes of paragraphs (b)(1) and (d)(1) of this section or treat the replacement loans as pre-disqualification loans. If loans are so treated as pre-disqualification loans, no deductions are allowable under the specific charge-off method for the loans, except as provided in paragraph (b)(1) of this section, and the disposition that causes the loans to be so treated may be disregarded for purposes of paragraphs (b)(1) and (d)(1) of this section. If a bank sells pre-disqualification loans and uses the proceeds of the sale to originate new loans, this paragraph (d)(3) does not apply to the transaction.

(e) *Examples.* The following examples illustrate the principles of this section:

Example 1. Bank M is a bank that properly elects to use the cut-off method set forth in this § 1.585–7. M's disqualification year is its taxable year beginning on January 1, 1987. On December 31, 1986, M had outstanding loans of $700 million (pre-disqualification loans), and the balance in its bad debt reserve was $10 million. M must maintain its reserve for its pre-disqualification loans in accordance with § 1.585–7(b), and it may not deduct any addition to this reserve for taxable year 1987 or any later year. For these years, M may deduct amounts allowed under section 166(a) for loans that it originates or acquires after December 31, 1986, and that become worthless in whole or in part.

Example 2. Assume the same facts as in Example 1. Also assume that in 1987 M collects $150 million of its pre-disqualification loans, M determines that $2 million of its pre-disqualification loans are worthless, and M recovers $1 million of pre-disqualification loans that it had previously charged against the reserve as worthless. On December 31, 1987, the balance in M's bad debt reserve is $9 million ($10 million − $2 million + $1 million), and the balance of its outstanding pre-disqualification loans is $548 million ($700 million − $150 million − $2 million).

Example 3. Assume the same facts as in Examples 1 and 2. Also assume that on December 31, 1990, the balance in M's bad debt reserve is $5 million and the balance of its outstanding pre-disqualification loans is $25 million. In 1991 M collects $21 million of its outstanding pre-disqualification loans and determines that $1 million of its outstanding pre-disqualification loans are worthless. Thus, on December 31, 1991, the balance in M's bad debt reserve is $4 million ($5 million − $1 million), and the balance of its outstanding pre-disqualification loans is $3 million ($25 million − $21 million − $1 million). Accordingly, M must include $1 million ($4 million − $3 million) in income in taxable year 1991, pursuant to § 1.585–

VOL 58 ISS 248 DEC 29 1993 UMI

7(c). On January 1, 1992, the balance in M's reserve is $3 million ($4 million − $1 million).

Example 4. Assume the same facts as in Examples 1 through 3. Also assume that in 1992 M transfers substantially all of its assets to another corporation (N) in a transaction to which section 381(a) applies, and N is treated as a large bank under § 1.585–5(b)(2) for taxable years ending after the date of the transaction. Pursuant to § 1.585–7(d)(2)(i), N steps into M's shoes with respect to using the cut-off method. M's bad debt reserve immediately before the section 381(a) transaction carries over to N, and N must complete the cut-off procedure begun by M. For this purpose, N's balance of outstanding pre-disqualification loans immediately after the section 381(a) transaction is the balance of these loans that it receives from M.

Example 5. Assume the same facts as in Examples 1 through 4, except that N is not treated as a large bank after the section 381(a) transaction. Also assume that N uses the reserve method of section 585 and plans to use this method for all of the loans it acquires from M (including loans that were not pre-disqualification loans). Pursuant to § 1.585–7(d)(2)(ii), M's bad debt reserve immediately before the section 381(a) transaction carries over to N in the transaction; however, N does not continue the cut-off procedure begun by M and does not treat any loan as a pre-disqualification loan. If the six-year moving average amount (as defined in § 1.585–2(c)(1)(ii)) for all of N's newly acquired loans exceeds the balance of the reserve that carries over to N, N increases this balance by the amount of the excess. Any such increase in the reserve results in a negative section 481(a) adjustment that is taken into account as required under section 381.

§ 1.585–8 Rules for making and revoking elections under §§ 1.585–6 and 1.585–7.

(a) *Time of making elections*—(1) *In general.* Any election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a) must be made on or before the later of—

(i) February 28, 1994; or

(ii) The due date (taking extensions into account) of the electing bank's original tax return for its disqualification year (as defined in § 1.585–5(d)(1)) or, for elections under § 1.585–6(d)(2), the year for which the election is made.

(2) *No extension of time for payment.* Payments of tax due must be made in accordance with chapter 62 of the Internal Revenue Code. However, if an election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a) is made or revoked on or before February 28, 1994 and the making or revoking of the election results in an underpayment of estimated tax (within the meaning of section 6655(a)) with respect to an installment of estimated tax due on or before the date the election was so made or revoked, no addition to tax will be imposed under section 6655(a) with respect to the amount of the underpayment attributable to the making or revoking of the election.

(b) *Manner of making elections*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, an electing bank must make any election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a) by attaching a statement to its tax return (or amended return) for its disqualification year or, for elections under § 1.585–6(d)(2), the year for which the election is made. This statement must contain the following information:

(i) The name, address and taxpayer identification number of the electing bank;

(ii) The nature of the election being made (i.e., whether the election is to include in income more than 10 percent of the bank's net section 481(a) adjustment under § 1.585–6 (b)(2) or (d)(2) or to use the cut-off method under § 1.585–7); and

(iii) If the election is under § 1.585–6(b)(2) or (d)(2), the percentage being elected.

(2) Certain tax returns filed before December 29, 1993. A bank is deemed to have made an election under § 1.585–6(b)(2) or (d)(2) if the bank evidences its intent to make an election under section 585(c)(3)(A)(iii)(I) or section 585(c)(3)(B)(ii) for its disqualification year (or, for elections under § 1.585–6(d)(2), the election year), by designating a specific recapture amount on its tax return or amended return for that year (or attaching a statement in accordance with § 301.9100–7T(a)(3)(i) of this chapter), and the return is filed before December 29, 1993. A bank is deemed to have made an election under § 1.585–7(a) if the bank evidences its intent to make an election under section 585(c)(4) for its disqualification year by attaching a statement in accordance with § 301.9100–7T(a)(3)(i) of this chapter to its tax return or amended return for that year, and the return is filed before December 29, 1993.

(c) *Revocation of elections*—(1) *On or before final date for making election.* An election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a) may be revoked without the consent of the Commissioner on or before the final date prescribed by paragraph (a)(1) of this section for making the election. To do so, the bank that made the election must file an amended tax return for its disqualification year (or, for elections under § 1.585–6(d)(2), the year for which the election was made) and attach a statement that—

(i) Includes the bank's name, address and taxpayer identification number;

(ii) Identifies and withdraws the previous election; and

(iii) If the bank is making a new election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a), contains the information described in paragraphs (b)(1)(ii) and (b)(1)(iii) of this section.

(2) *After final date for making election.* An election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a) may be revoked only with the consent of the Commissioner after the final date prescribed by paragraph (a)(1) of this section for making the election. The Commissioner will grant this consent only in extraordinary circumstances.

(d) *Elections by banks that are members of parent-subsidiary controlled groups.* In the case of a bank that is a member of a parent-subsidiary controlled group (as defined in § 1.585–5(d)(2)), any election under § 1.585–6(b)(2), § 1.585–6(d)(2) or § 1.585–7(a) with respect to the bank is to be made separately by the bank. An election made by one member of such a group is not binding on any other member of the group.

(e) *Elections made or revoked by amended return on or before February 28, 1994.* This paragraph (e) applies to any election that a bank seeks to make under paragraph (b) of this section, or revoke under paragraph (c) of this section, by means of an amended return that is filed on or before February 28, 1994. To make or revoke an election to which this paragraph (e) applies, a bank must file amended returns for all taxable years after the taxable year for which the election is made or revoked by amended return, to any extent necessary to report the bank's tax liability in a manner consistent with the making or revoking of the election by amended return.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 6. The authority citation for part 301 is amended by removing the first entry for "Section 301.9100–7T" and adding an entry to read as follows:

Authority: 26 U.S.C. 7805 * * * Section 301.9100–7T also issued under 26 U.S.C. 42(f)(1), 42(g)(1), 42(i)(2), 42(j)(5), 48(b)(2), 56(f)(3)(B), 83(c)(3), 141(b)(9), 142(d)(1), 142(d)(4)(B), 143(k)(9)(D)(iii), 145(d), 147(b)(4)(A), 165(l)(1), 168(b)(5), 168(f)(1), 168(g)(7), 168(h)(6)(F)(ii), 216(b)(3), 263(i), 263A(d)(3), 382(l)(5)(H), 448(d)(4), 453C(b)(2)(B), 453C(e)(4), 468B, 469(j)(9), 474, 616(d), 617(h), 1059(c)(4), 2632(b)(3), 2652(a)(3), 3121(w)(2), 4982(e)(4), and 7701(b). * * *

§ 301.9100–7T [Amended]

Par. 7. Section 301.9100–7T is amended as follows:

1. The table in paragraph (a)(1) is amended by removing the two entries for "901(a)".

2. The table in paragraph (a)(4)(ii) is amended by removing the entry for "901(a)".

PART 602—OMB CONTROL NUMBER UNDER THE PAPERWORK REDUCTION ACT

Par. 8. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 9. Section 602.101(c) is amended by adding the following entry to the table:

§ 602.101 OMB control numbers.

* * * * *

(c) * * *

CFR part or section where identified and described	Current OMB control number
. . .	. . .

BILLING CODE 4830–01–U

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 513

Control, Custody, Care, Treatment and Instruction of Inmates; Production or Disclosure of FBI/NCIC Information

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: In this document the Bureau of Prisons is amending its rule on Production or Disclosure of FBI/NCIC Information to conform to required procedures of the National Crime Information Center (NCIC). Under NCIC procedures, any request by an inmate for his or her National Crime Information Center Interstate Identification Index (NCIC/III) is to be made directly to the Federal Bureau of Investigation (FBI). This amendment is conforming in nature and is intended to provide for the continued efficient operation of the Bureau of Prisons.

EFFECTIVE DATE: December 29, 1993.

ADDRESSES: Office of General Counsel, Bureau of Prisons, Room 754, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 514–6655.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is amending its rule on Production or Disclosure of FBI/NCIC Information to conform to required procedures of the National Crime Information Center. A final rule on this subject was published in the **Federal Register** June 30, 1980 (45 FR 44228) and was amended March 12, 1990 (55 FR 9300).

The Bureau's rule on Production or Disclosure of FBI/NCIC Information had allowed for Bureau staff to provide to a requesting inmate a copy of his or her National Crime Information Center Interstate Identification Index (NCIC/III) record. The NCIC/III record is a computerized version of the FBI identification record which may contain additional information. Revised procedures of the NCIC restrict Bureau staff from directly releasing information from these files. According to NCIC procedures, any request from an inmate for this record must be made directly to the Federal Bureau of Investigation (FBI) under the procedures in 28 CFR 16.30 through 16.34. The Bureau is therefore amending its regulations in order to conform to NCIC procedures.

In making this conforming amendment, the Bureau has reorganized and reworded its rule for the sake of clarity and understandability.

Because these amendments are conforming or editorial in nature, the Bureau finds good cause for exempting the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public comment, and delay in effective date. Members of the public may submit comments concerning this rule by writing the previously cited address. These comments will be considered but will receive no response in the **Federal Register**.

The Bureau of Prisons has determined that this rule is not a significant regulatory action for the purpose of E.O. 12866, and accordingly was not reviewed by the Office of Management and Budget. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 513

Prisoners.

Kathleen M. Hawk,

Director, Bureau of Prisons

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(p), subchapter A of 28 CFR chapter V is amended as set forth below.

SUBCHAPTER A—GENERAL MANAGEMENT AND ADMINISTRATION

PART 513—ACCESS TO RECORDS

1. The authority citation for 28 CFR part 513 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

2. Subpart B, consisting of §§ 513.10 through 513.13, is revised to consist of §§ 513.10 through 513.12 as follows:

Subpart B—Production or Disclosure of FBI/NCIC Information

Sec.

513.10 Purpose and scope.

513.11 Procedures for requesting a FBI identification record or a NCIC/III record.

513.12 Inmate request for record clarification.

Subpart B—Production or Disclosure of FBI/NCIC Information

§ 513.10 Purpose and scope.

This subpart describes the procedures to be followed by an inmate who requests a copy of his or her FBI identification record or National Crime Information Center Interstate Identification Index (NCIC/III) record and references the procedures to follow in order to challenge the contents of such record.

§ 513.11 Procedures for requesting a FBI identification record or a NCIC/III record.

(a) *FBI identification record.* (1) An inmate may request a copy of his or her current FBI identification record directly from the FBI by following the procedure outlined in 28 CFR 16.30 through 16.34.

(i) Bureau of Prisons staff shall assist the inmate to obtain the fingerprint impressions required to be submitted with such an application.

(ii) The inmate may direct that funds be withdrawn from his or her institution account to pay the applicable fee.

(2) An inmate may request a copy of his or her FBI identification record from institution staff.

(i) If the requested FBI identification record is in the inmate's institution file, staff shall provide the inmate with a copy.

(ii) If the requested FBI identification record is not in the inmate's institution file, staff shall direct the inmate to the procedure referenced in paragraph (a)(1) of this section.

(b) *NCIC/III identification record.* An inmate who wishes to obtain a copy of his or her NCIC/III record must submit a written request to the FBI. The procedures outlined in 28 CFR 16.32, 16.33, and paragraphs (a)(1)(i) and (ii) of this section apply to such request.

§ 513.12 Inmate request for record clarification.

Where the inmate believes that his or her FBI identification record is incorrect or inaccurate, the inmate may follow procedures outlined in 28 CFR 16.34. The procedures in 28 CFR 16.34 also apply for the clarification of an inmate's NCIC/III record.

[FR Doc. 93-31847 Filed 12-28-93; 8:45 am]

BILLING CODE 4410-05-P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900-AF49

Updating Rehabilitation Criteria

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs is revising current provisions under which a service-disabled veteran who has been provided a program of rehabilitation services may be found rehabilitated. Under prior criteria, a determination of rehabilitation was generally limited to cases in which the veteran secured the type of employment specified in his or her rehabilitation plan or had achieved the goals of a program of rehabilitation services. The revision is more consistent with the statutory provisions by also declaring a veteran rehabilitated if he or she has overcome the employment handicap which necessitated the program of rehabilitation services, but may not have done so as stipulated in the rehabilitation plan. The intended effect of these regulatory changes is to make decisions regarding the determination of rehabilitation more consistent with statutory provisions.

DATES: These final rules are effective January 28, 1994.

FOR FURTHER INFORMATION CONTACT: Morris Triestman, (202) 233-6496, Rehabilitation Consultant, Policy and Program Development, Vocational Rehabilitation Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Ave., NW., Washington DC 20420.

SUPPLEMENTARY INFORMATION: VA is amending current provisions for determination of rehabilitation under the vocational rehabilitation program. A veteran may be found rehabilitated if he or she secures suitable employment which meets certain criteria or achieves a substantial increase in his or her independence in daily living. These amendments make substantive changes to criteria for determinations of rehabilitation through the achievement of suitable employment. Determinations of rehabilitation through increased independent living capacity are not substantively changed.

These amendments retain existing provisions under which a veteran is considered to be rehabilitated if he or she secures employment in the field for which training was furnished or in a closely related occupation. The amendments would also allow VA to declare a veteran rehabilitated if one of the following conditions is met.

1. An intensive search for employment in the occupational objective of the veteran's plan or in a closely related occupation or field is unsuccessful. The veteran subsequently secures employment in another occupation or field that also is consistent with his or her abilities, aptitudes, and interests. In addition, the employment must use some of the academic, technical or professional knowledge and skills which the veteran has obtained during his or her participation in the rehabilitation program. He or she must maintain this employment for at least 60 days.

2. A veteran completes the training and rehabilitation services authorized in his or her rehabilitation plan and then declines VA employment services, choosing instead to pursue further training beyond that which may be provided by VA under the rehabilitation program. The veteran may be declared rehabilitated if the additional training will enhance the veteran's ability to secure suitable employment.

3. The veteran does not complete all of the prescribed program of rehabilitation services and subsequently obtains employment which is not in the field or occupation specified in the plan or in a closely related field or occupation. The veteran may be declared rehabilitated if the employment which he or she has obtained makes substantial use of the services provided in the rehabilitation plan and is consistent with his or her abilities, aptitudes, and interests. The veteran must maintain this employment for at least 60 days.

On June 15, 1992, at pages 26632 through 26634, these proposed regulatory amendments revising criteria for determination of rehabilitation were published in the **Federal Register**.

Interested persons were given 30 days in which to submit their comments, suggestions, or objections to the proposed regulatory amendments. We received extensive comments from a veterans organization.

The veterans organization questioned the intent of the proposed changes, objected to their implementation, and suggested alternatives. These comments have been grouped in the following categories.

Intent of the Proposed Regulatory Changes

Comment. The proposed regulatory amendment is not more consistent with the statutory intent and liberal provisions of 38 U.S.C. chapter 31 than current provisions for determinations of rehabilitation.

Response. VA has established a case status system for administrative purposes to mark the progress of a veteran through the stages of a rehabilitation program. In this system, the "rehabilitated" status is reserved for the purpose of identifying cases in which rehabilitation or employment services goals contemplated by the statute are substantially achieved. However, the current regulation, unfortunately, indicates that administrative assignment of this case status occurs only when the veteran has obtained and maintained employment consistent with the veteran's Individualized Written Rehabilitation Plan (IWRP). Specifically, it does not, as currently worded, permit VA to include cases in which the individual has successfully surmounted an employment handicap through means that did not depend upon completion of the IWRP or elected to forego immediate pursuit of employment goals in order to pursue additional training for another personal objective.

For example, this provision fails to include those cases in which the veteran has overcome his or her employment handicap to the maximum extent feasible, as demonstrated by becoming successfully employed, but may not have done so in the field or occupation stipulated by the IWRP. Since this outcome is consistent with the statutory purpose of 38 U.S.C. 3100,. i.e., attainment of suitable employment, VA believes that for administrative purposes the individual may be considered to have reached the status of "rehabilitated." Thus, the new regulation would merely recognize this fact in describing cases of individuals deemed to have successfully reached the point of rehabilitation, provided that VA efforts substantially contributed to that result.

Comment. The proposed regulatory amendment is presented purely as a measure of fiscal control.

Response. The proposed changes do not have any effect upon the fiscal costs of administering the vocational rehabilitation program. They are merely descriptive of the facts found. VA will continue to expend the same resources in the cases in question regardless of the outcome, but will merely be recognizing that a successful outcome to which its efforts contributed in a material manner has in fact been reached. It should be noted that the law and regulations also provide for appropriate assistance to individuals previously found rehabilitated, but who, due to changed circumstances, are found to need further VA assistance. Those provisions remain and are in no way limited by the proposal. Thus, fiscal costs are not diminished or increased by the proposal, rather, they remain the same.

Comment. The commenter states that these changes "will have a deleterious effect on VA's Vocational Rehabilitation Program by severely limiting services and probably causing Vocational Rehabilitation Specialists to intentionally develop veterans cases to premature 'rehabilitated' status for case control purposes."

Resppnse. The proposed changes will not affect the services to which a veteran is entitled as a part of a rehabilitation program nor cause premature "rehabilitations." The basis for providing a program of rehabilitation services is a finding that an employment handicap exists which prevents the person from being employed in an occupation which is consistent with his or her abilities, aptitudes, and interests. The services which VA determines are necessary to overcome the employment handicap are provided to the extent that the individual is able and willing to receive them regardless of how that individual is administratively classified. The proposal only recognizes that, for the purposes of administrative classification, some individuals who do not choose to follow the full, original plan for rehabilitation and employment may, nonetheless, with the VA services provided, overcome their employment handicaps and, in fact, become fully rehabilitated.

Far from rushing to premature "rehabilitation", VA policy requires careful consideration of the programs and services needed for a successful outcome. For example, a veteran may have completed the training portion of a rehabilitation plan and be experiencing difficulty in becoming employed in the objective for which training has been provided. If VA determines that an additional period of training is needed, and any of the conditions for providing additional training under § 21.284(c) are met, the veteran can elect to receive the additional training needed for employment in the occupation specified in the plan.

However, if the veteran, without further assistance from VA, elects to broaden his or her employment search to include occupations to which the training already provided materially contributes, but which may not be in the field which was the original objective of the program, that is the individual's prerogative. If evaluation of the case then indicates that the veteran has successfully obtained employment which is consistent with his or her abilities, aptitudes, and interests, and requires no further VA assistance, VA should be able to consider that individual to have been successfully "rehabilitated." As noted, a case may be reopened if circumstances change and the individual then qualifies for additional assistance.

Comment. There is potential for abuse of entitlement for future veterans who experience worsening of their conditions to the point of acquiring an employment handicap, but who retain employment in "sheltered positions," e.g., family businesses and public service non-profit industries.

Response. The proposed changes do not affect the entitlement of service-disabled veterans who request assistance under the vocational rehabilitation program in the future. The criteria for entitlement to a program of rehabilitation services are statutory. Under these provisions, entitlement is the result of the existence of an employment handicap. Any individual who has such a handicap and is entitled by the law to receive vocational rehabilitation services will continue to receive these services to the same extent as at present. Being administratively declared to be "rehabilitated" is not necessarily a bar to future services. The conditions under which a veteran who has been declared "rehabilitated" may be provided additional services are prescribed in § 21.284. Further, successful employment in a sheltered environment does not conclusively and irrevocably lead to the classification "rehabilitated" on the basis of being suitably employed. If the individual is found to have capacities which are beyond that level and is otherwise eligible for further VA assistance, the assistance will be offered.

Comment. The following scenario is presented as an example of how veterans programs would be adversely affected. A service-disabled veteran whose condition is evaluated at 50 percent disabling is found entitled to a program of rehabilitation services. The rehabilitation plans calls for training in culinary arts to provide the veteran with the skills needed to qualify for suitable employment. To supplement his income, the veteran takes a part-time job as a helper at his brother's hamburger stand. Sixty days later, VA can determine that he is rehabilitated because he obtained and retained employment in a closely related occupation.

Response. This scenario would not take place under the proposed regulatory changes. A veteran for whom a program of training in the culinary arts has been established is expected to pursue that training and VA will assist the veteran in doing so. If, as in the example, the veteran works part-time for his brother or anyone else to secure additional income to help him meet living expenses while pursuing the rehabilitation plan, this does not in any way affect the veteran's right to continue to participate in a VA rehabilitation plan. Taking a job to supplement one's income to continue to pursue a program in culinary arts indicates the veteran's commitment to the course he has selected and is reason for VA's continuing the training program rather than for any adverse action. This is not the case of an individual dropping out of the training program to take the hamburger stand job as his or her permanent vacation. The commenter's reference to completion of 60 days of successful employment is intended to refer to employment consistent with an individual's abilities, aptitudes, and interests. The part-time incidental employment postulated by the commenter clearly would not meet those criteria.

Comment. VA ostensibly could withdraw a veteran from training under the proposed regulations, during a period when the veteran is unable to factually demonstrate overcoming the employment handicap as specified in the proposal.

Response. The commenter's point is not clear, but it should be noted that once a finding of employment handicap has been made, no redetermination of that finding is made unless there was a clear and unmistakable error of fact or law in the original finding or unless the facts demonstrate that the employment handicap no longer exists. The proposed regulation does not, either in purpose or effect, allow VA to withdraw an individual from a rehabilitation program but merely to properly classify the individual's status thereunder. Thus, one who, having successfully obtained employment of a suitable nature, no longer requires nor seeks vocational rehabilitation services is "rehabilitated." In other words, the individual has successfully overcome his or her employment handicap by becoming suitably employed for a reasonable time.

Alternatives to the Proposed Regulatory Change

Comment. This proposal ignores the fact that employers, including the United States Government, place newly hired employees on probationary status for a period of 30, 60 or 90 days or more during which employment may be terminated without cause, but due to service-connected employment handicap. VA should permit receipt of full benefit entitlement and at least a one-year trial period to determine the veteran's successful readjustment to employment prior to rendering a determination of "rehabilitation" in any sense of the word.

Response. We agree that the veteran should be provided necessary followup services during the post-employment phase of the program to assure that there is a sound, stable adjustment to the demands of the employment situation before a finding of rehabilitation is made. Existing law and implementing regulations already provide for services which accomplish this goal. The changes do not diminish these provisions.

Both current provisions and proposed changes state that the veteran must be found adjusted in suitable employment for a period of at least 60 days. This provision gives the case manager substantial latitude in determining if these requirements for a finding of rehabilitation are met after 60 days or if a longer period is needed to make this decision. Continuation of such flexibility is more appropriate than the mandatory 1 year limit the commenter prefers.

The comments, objections and suggestions submitted do not provide a basis for a change in the regulatory revisions which have been proposed. Consequently, these rules are adopted as final.

VA has determined that these amendments do not contain a major rule as that term is defined in Executive Order 12291, Federal Regulation. The amendments will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices, and will not have any other significant adverse effects on the economy.

These regulatory amendments are effective 30 days after the date of final publication in the **Federal Register**. The Secretary certifies that these amendments will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA) 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these rules are therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reasons for this certification are that the amendments only affect individual beneficiaries. No new regulatory burdens are imposed on small entities by these amendments.

The Catalog of Federal Domestic Assistance number is 64.116.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs, Loan programs, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: September 16, 1993.

Jesse Brown,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR, part 21, is amended as follows:

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

1. The authority citation for part 21, subpart A is revised to read as follows

Authority: 38 U.S.C. 501(a).

2. Section 21.194 is amended by revising paragraph (d) (1) and (2) to read as follows:

§ 21.194 "Employment services" status.

* * * * *

(d) *Termination of employment services status.* * * *

(1) He or she is determined to be rehabilitated under the provisions of § 21.283; or

(2) He or she is:

(i) Employed for at least 60 days in employment that does not meet the criteria for rehabilitation contained in § 21.283, if the veteran intends to maintain this employment and declines further assistance; and

(ii) Adjusted to the duties and responsibilities of the job.

* * * * *

3. Section 21.196 is amended by revising paragraph (b) and the authority citation to paragraph (b) to read as follows:

§ 21.196 "Rehabilitated" status.

* * * * *

(b) *Assignment to "rehabilitated" status.* A veteran's case shall be assigned to "rehabilitated" status when his or her case meets the criteria for rehabilitation contained in § 21.283.

(Authority: 38 U.S.C. 3102, 3107 and 3117)

* * * * *

4. In part 21, subpart A, § 21.283 is added to read as follows:

§ 21.283 Rehabilitated.

(a) *General.* For purposes of chapter 31 a veteran shall be declared rehabilitated when he or she has overcome the employment handicap to the maximum extent feasible as described in paragraph (c), (d) or (e) of this section.

(Authority: 38 U.S.C. 3101 (1), (2))

(b) *Definition.* The term "suitably employed" includes employment in the competitive labor market, sheltered situations, or on a nonpay basis which is consistent with the veteran's abilities, aptitudes and interests if the criteria contained in paragraph (c) (1) or (2) of this section are otherwise met.

(Authority: 38 U.S.C. 3100)

(c) *Rehabilitation to the point of employability has been achieved.* The veteran who has been found rehabilitated to the point of employability shall be declared rehabilitated if he or she:

(1) Is employed in the occupational objective for which a program of services was provided or in a closely related occupation for at least 60 continuous days;

(2) Is employed in an occupation unrelated to the occupational objective of the veteran's rehabilitation plan for at least 60 continuous days if the veteran concurs in the change and such employment:

(i) Follows intensive, yet unsuccessful, efforts to secure employment for the veteran in the occupation objective of a rehabilitation plan for a closely related occupation contained in the veteran's rehabilitation plan;

(ii) Is consistent with the veterans's aptitudes, interests and abilities; and

(iii) Utilizes some of the academic, technical or professional knowledge and skills obtained under the rehabilitation plan; or

(3) Pursues additional education or training, in lieu of obtaining employment, after completing his or her prescribed program of training and rehabilitation services if:

(i) The additional education or training is not approvable as part of the veteran's rehabilitation program under this chapter; and

(ii) Achievement of employment consistent with the veterans's aptitudes, interests, and abilities will be enhanced by the completion of the additional education or training.

(Authority: 38 U.S.C. 3101(1), 3107 and 3117)

(d) *Rehabilitation to the point of employability has not been completed.* A veteran under a rehabilitation plan who obtains employment without being declared rehabilitated to the point of employability as contemplated by the plan, including a veteran in a rehabilitation program consisting solely of employment services, is considered to be rehabilitated if the following conditions exist:

(1) The veteran obtains and retains employment substantially using the services and assistance provided under the plan for rehabilitation.

(2) The employment obtained is consistent with the veterans's abilities, aptitudes and interests.

(3) Maximum services feasible to assist the veteran to retain the employment obtained have been provided.

(4) The veteran has maintained the employment for at least 60 continuous days.

(Authority: 38 U.S.C. 3101(1), 3107 and 3117)

(e) *Independent living.* A veteran who has pursued a program of independent living services will be considered rehabilitated when all goals of the program have been achieved, or if not achieved, when:

(1) The veteran, nevertheless, has attained a substantial increase in the level of independence with the program assistance provided;

(2) The veteran has maintained the increased level of independence for at least 60 days; and

(3) Further assistance is unlikely to significantly increase the veteran's level of independence.

(Authority: 38 U.S.C 3101 (1), (2) 3107)

§ 21.284 [Amended]

5. In § 21.284, the introductory text to paragraph (a) is amended by removing the reference to "§ 21.196" and adding in its place "§ 21.283."

BILLING CODE 8320–01–M

NATIONAL SCIENCE FOUNDATION

45 CFR Part 607

Claims Collection; Salary Offset

AGENCY: National Science Foundation.

ACTION: Final rule.

SUMMARY: This regulation implements the Debt Collection Act of 1982, as amended, which authorizes the Federal government to collect debts owed by a Federal employee to the United States through salary offset.

DATES: This regulation will be effective on December 29, 1993.

ADDRESSES: For additional information contact Jesse E. Lasken, Assistant General Counsel, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230 (Telephone: 202–357–9435) or Amy Tsai, Division of Financial Management, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230 (Telephone: 703–306–1282).

FOR FURTHER INFORMATION CONTACT: Jesse E. Lasken or Amy Tsai at the addresses or phone numbers above.

SUPPLEMENTARY INFORMATION: Under the Debt Collection Act of 1982, when the head of a Federal agency or his or her designee determines that an employee of an agency is indebted to the United States or is notified by a head of another Federal agency that an agency employee is indebted to the United States, the employee's debt may be offset against his or her salary. Certain due process rights must be afforded to an employee before salary offset deductions begin. As is required by the Debt Collection Act of 1982, this regulation is consistent with salary offset regulations issued by the Office of Personnel Management, 5 CFR part 550, subpart K and was approved by the Office of Personnel Management pursuant to section 8(1) of Executive Order 12107.

No comments were received as a result of the notice of the proposed regulation published on September 2, 1993 at pages 46597–46600 of Volume 58, No. 169 of the **Federal Register** and no changes have been made to the proposed rule published there.

Paperwork Reduction Act

This regulation does not include provisions for information collection that require review and approval by the Office of Management and Budget under section 3518 of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., and 5 CFR part 1320.

Regulatory Flexibility Act

The Director of NSF certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule applies only to individual Federal employees. Accordingly, no regulatory flexibility analysis is required.

Executive Order 12291

This rule is not a "major rule" as defined under Executive Order 12291 and no regulatory impact analysis is required.

List of Subjects in 45 CFR Part 607

Administrative offset, Administrative practice and procedures, Claims, Debt collection, Government employees, Wages.

Authority: 5 U.S.C. 5514, E.O. 11809 (redesignated E.O. 12107), and 5 CFR part 550, subpart K.

Neal Lane,

Director.

For the reasons set out in the preamble, part 607 of title 45 of the Code of Federal Regulations is added to read as follows:

PART 607—SALARY OFFSET

607.1 Purpose and scope.
607.2 Definitions.
607.3 Applicability.
607.4 Notice requirements before offset.
607.5 Hearing.
607.6 Written decision.
607.7 Coordinating offset with another Federal agency.
607.8 Procedures for salary offset.
607.9 Refunds.
607.10 Statute of limitations.
607.11 Non-waiver of rights.
607.12 Interest, penalties, and administrative costs.

Authority: 5 U.S.C. 5514; E.O. 12107, 3 CFR, 1978 Comp., p. 264; 5 CFR part 550, subpart K.

§ 607.1 Purpose and scope.

(a) This part provides procedures for the collection by administrative offset of a federal employee's salary without his or her consent to satisfy certain debts owed to the Federal government. This part applies to all Federal employees who owe debts to the National Science Foundation (NSF) and to current employees of NSF who owe debts to other Federal agencies. This part does not apply when the employee consents to recovery from his or her current pay account.

(b) This part does not apply to debts or claims arising under: (1) The Internal Revenue Code of 1954, as amended, 26 U.S.C. 1 *et seq.*; (2) the Social Security Act, 42 U.S.C. 301 *et seq.*; (3) the tariff laws of the United States; or (4) any case where a collection of a debt by salary offset is explicitly provided for or prohibited by another statute.

(c) This part does not apply to any adjustment to pay arising out of an employee's selection of coverage or a change in coverage under a Federal benefits program requiring periodic deductions from pay if the amount to be recovered was accumulated over four pay periods or less.

(d) This part does not preclude the compromise, suspension, or termination of collection action where appropriate under the standards implementing the Federal Claims Collection Act, 31 U.S.C. 3711 *et seq.*, and 4 CFR parts 101 through 105.

(e) This part does not preclude an employee from requesting waiver of an overpayment under 5 U.S.C. 5584, 10 U.S.C. 2774, or 32 U.S.C. 716, or in any way questioning the amount or validity of the debt by submitting a subsequent claim to the General Accounting Office. This part does not preclude an employee from requesting a waiver pursuant to other statutory provisions applicable to the particular debt being collected.

(f) Matters not addressed in this part should be reviewed in accordance with the Federal Claims Collection Standards at 4 CFR 101.1 *et seq.*

§ 607.2 Definitions.

For the purposes of this part the following definitions will apply:

Agency means an executive agency as defined at 5 U.S.C. 105, including the U.S. Postal Service and the U.S. Postal Rate Commission; a military department as defined at 5 U.S.C. 102; an agency or court in the judicial branch; an agency of the legislative branch, including the U.S. Senate and House of Representatives; and other independent establishments that are entities of the Federal government.

Certification means a written debt claim received from a creditor agency which requests the paying agency to offset the salary of an employee.

Chief Financial Officer means the Chief Financial Officer of NSF or such other official of NSF who is designated by the Chief Financial Officer to determine whether an employee is indebted to the United States and to take action to collect such debts.

Creditor agency means an agency of the Federal Government to which the debt is owed.

Debt means an amount owed by a Federal employee to the United States from sources which include loans insured or guaranteed by the United States and all other amounts due the United States from fees, leases, rents, royalties, services, sales of real or personal property, overpayments, penalties, damages, interests, fines, forfeitures (except those arising under the Uniform Code of Military Justice), and all other similar sources.

Disposable pay means the amount that remains from an employee's Federal pay after required deductions for social security, Federal, State or local income tax, health insurance premiums, retirement contributions, life insurance premiums, Federal employment taxes, and any other deductions that are required to be withheld by law.

Hearing official means an individual responsible for conducting a hearing with respect to the existence or amount of a debt claimed, or the repayment schedule of a debt, and who renders a decision on the basis of such hearing. A hearing official may not be under the supervision or control of the Chief Financial Officer or of persons having supervision or control over the Chief Financial Officer.

NSF means the National Science Foundation.

Paying agency means the agency that employs the individual who owes the debt and authorizes the payment of his or her current pay.

Salary offset means an administrative offset to collect a debt pursuant to 5 U.S.C. 5514 by deduction(s) at one or more officially established pay intervals from the current pay account of an employee without his or her consent.

§ 607.3 Applicability.

The regulations in this part are to be followed when:

(a) NSF is owed a debt by an individual who is a current employee of the NSF; or

(b) NSF is owed a debt by an individual currently employed by another Federal agency; or

(c) NSF employs an individual who owes a debt to another Federal agency.

§ 607.4 Notice requirements before offset.

(a) Salary offset shall not be made against an employee's pay unless the employee is provided with written notice signed by the Chief Financial Officer of the debt at least 30 days before salary offset commences.

(b) The written notice shall contain:

(1) A statement that the debt is owed and an explanation of its nature and amount;

(2) The agency's intention to collect the debt by deducting from the employee's current disposable pay account;

(3) The amount, frequency, proposed beginning date, and duration of the intended deduction(s);

(4) An explanation of interest, penalties, and administrative charges, including a statement that such charges will be assessed unless excused in accordance with the Federal Claims Collections Standards at 4 CFR 101.1;

(5) The employee's right to inspect, request, and receive a copy of government records relating to the debt;

(6) The employee's opportunity to establish a written schedule for the voluntary repayment of the debt in lieu of offset;

(7) The employee's right to an oral hearing or a determination based on a review of the written record ("paper hearing") conducted by an impartial hearing official concerning the existence or the amount of the debt, or the terms of the repayment schedule;

(8) The procedures and time period for petitioning for a hearing,

(9) A statement that a timely filing of a petition for a hearing will stay the commencement of collection proceedings;

(10) A statement that a final decision on the hearing (if requested) will be issued by the hearing official not later than 60 days after the filing of the petition requesting the hearing unless the employee requests and the hearing official grants a delay in the proceedings;

(11) A statement that knowingly false or frivolous statements, representations, or evidence may subject the employee to appropriate disciplinary procedures and/or statutory penalties;

(12) A statement of other rights and remedies available to the employee under statutes or regulations governing the program for which the collection is being made;

(13) Unless there are contractual or statutory provisions to the contrary, a statement that amounts paid on or deducted for the debt which are later waived or found not owed to the United States will be promptly refunded to the employee; and

(14) A statement that the proceedings regarding such debt are governed by section 5 of the Debt Collection Act of 1982 (5 U.S.C. 5514).

§ 607.5 Hearing.

(a) *Request for hearing.* (1) An employee may file a petition for an oral or paper hearing in accordance with the instructions outlined in the agency's notice to offset.

(2) A hearing may be requested by filing a written petition addressed to the Chief Financial Officer stating why the employee disputes the existence or amount of the debt or, in the case of an individual whose repayment schedule has been established other than by a written agreement, concerning the terms of the repayment schedule. The petition for a hearing must be received by the Chief Financial Officer not later than fifteen (15) calendar days after the employee's receipt of the offset notice, or notice of the terms of the payment schedule, unless the employee can show good cause for failing to meet the filing deadline.

(b) *Hearing procedures.* (1) The hearing will be presided over by an impartial hearing official.

(2) The hearing shall conform to procedures contained in the Federal Claims Collection Standards, 4 CFR 102.3(c). The burden shall be on the employee to demonstrate that the existence or the amount of the debt is in error.

§ 607.6 Written decision.

(a) The hearing official shall issue a final written opinion no later than 60 days after the filing of the petition.

(b) The written opinion will include a statement of the facts presented to demonstrate the nature and origin of the alleged debt; the hearing official's analysis, findings, and conclusions; the amount and validity of the debt, if any; and the repayment schedule, if any.

§ 607.7 Coordinating offset with another Federal agency.

(a) When the NSF is the creditor agency and the Chief Financial Officer determines that an employee of another agency (i.e., the paying agency) owes a debt to the NSF, the Chief Financial Officer shall, as appropriate:

(1) Certify in writing to the paying agency that the employee owes the debt, the amount and basis of the debt, the date on which payment was due, and the date the Government's right to collect the debt accrued, and that this part 607 has been approved by the Office of Personnel Management.

(2) Unless the employee has consented to salary offset in writing or signed a statement acknowledging receipt of the required procedures, and the written consent is sent to the paying agency, the Chief Financial Officer must advise the paying agency of the action(s) taken under this part 607, and the date(s) they were taken.

(3) Request the paying agency to collect the debt by salary offset. If deductions must be made in installments, the Chief Financial Officer may recommend to the paying agency the amount or percentage of disposable pay to be collected in each installment;

(4) Arrange for a hearing upon the proper petitioning by the employee.

(b) When the NSF is the creditor agency and the employee is in the process of separating from the Federal service, the NSF must submit its debt claim to the paying agency as provided in this part. The paying agency must certify the total amount collected, give a copy of the certification to the employee, and send a copy of the certification and notice of the employee's separation to the NSF. If the paying agency is aware that the employee is entitled to Civil Service Retirement and Disability Fund or other similar payments, it must certify to the agency responsible for making such payments that the debtor owes a debt, including the amount of the debt, and that the provisions of 5 CFR 550.1108 have been followed.

(c) When the NSF is the creditor agency and the employee has already separated from Federal service and all payments due from the paying agency have been paid, the Chief Financial Officer may request, unless otherwise prohibited, that money payable to the employee from the Civil Service Retirement and Disability Fund or other similar funds be collected by administrative offset.

(d) When the NSF is the paying agency, upon receipt of a properly certified debt claim from another agency, deductions will be scheduled to begin at the next established pay interval. The employee must receive written notice that NSF has received a certified debt claim from the creditor agency, the amount of the debt, the date salary offset will begin, and the amount of the deduction(s). NSF shall not review the merits of the creditor agency's determination of the validity or the amount of the certified claim. If the employee transfers to another agency after the creditor agency has submitted its debt claim to NSF and before the debt is collected completely, NSF must certify the amount collected. One copy of the certification must be furnished to the employee. A copy must be furnished to the creditor agency with notice of the employee's transfer.

§ 607.8 Procedures for salary offset.

(a) Deductions to liquidate an employee's debt will be by the method and in the amount stated in the Chief Financial Officer's notice of intention to offset as provided in § 607.4. Debts will be collected in one lump sum where possible. If the employee is financially unable to pay in one lump sum, collection must be made in installments.

(b) Debts will be collected by deduction at officially established pay intervals from an employee's current pay account unless alternative arrangements for repayment are made.

(c) Installment deductions will be made over a period not greater than the anticipated period of employment. The size of installment deductions must bear a reasonable relationship to the size of the debt and the employee's ability to pay. The deduction for the pay intervals for any period must not exceed 15% of disposable pay unless the employee has agreed in writing to a deduction of a greater amount.

(d) Unliquidated debts may be offset against any financial payment due to a separated employee including but not limited to final salary or leave payment in accordance with 31 U.S.C. 3716.

§ 607.9 Refunds.

(a) NSF will promptly refund to an employee any amounts deducted to satisfy debts owed to NSF when the debt is waived, found not owed to NSF, or when directed by an administrative or judicial order.

(b) Another creditor agency will promptly return to NSF any amounts deducted by NSF to satisfy debts owed to the creditor agency when the debt is waived, found not owed, or when directed by an administrative or judicial order.

(c) Unless required by law, refunds under this section shall not bear interest.

§ 607.10 Statute of limitations.

If a debt has been outstanding for more than 10 years after NSF's right to collect the debt first accrued, the agency may not collect by salary offset unless facts material to the Government's right to collect were not known and could not reasonably have been known by the official or officials who were charged with the responsibility for discovery and collection of such debts.

§ 607.11 Non-waiver of rights.

An employee's involuntary payment of all or any part of a debt collected under the regulations in this part will not be construed as a waiver of any rights that the employee may have under 5 U.S.C. 5514 or any other provision of law.

§ 607.12 Interest, penalties, and administrative costs.

Charges may be assessed on a debt for interest, penalties, and administrative costs in accordance with 31 U.S.C. 3717

and the Federal Claims Collection Standards, 4 CFR 101.1.

BILLING CODE 7555–01–P

45 CFR Part 608

Claims Collection; Administrative Offset

AGENCY: National Science Foundation.

ACTION: Final rule.

SUMMARY: This regulation implements the claims and debt collection procedures of the Debt Collection Act of 1982. Subject to various limitations and due process requirements, the Act authorizes agencies to seek collection of claims, to report claims to consumer reporting agencies, to compromise claims, to administratively offset claims, and to offset claims against tax refunds.

DATES: This regulation will be effective on December 29, 1993.

ADDRESSES: For additional information contact Jesse E. Lasken, Assistant General Counsel, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230 (Telephone: 202–357–9435) or Amy Tsai, Division of Financial Management, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230 (Telephone: 703–306–1282).

FOR FURTHER INFORMATION CONTACT: Jesse E. Lasken or Amy Tsai at the addresses or phone numbers above.

SUPPLEMENTARY INFORMATION: This regulation and a related regulation at 45 CFR part 607 implementing the salary offset provisions at 5 U.S.C. 5514 provide a regulatory framework under which NSF can effectively utilize the authorities of 31 U.S.C. 3711, 3716, 3718 and 3720A and participate in various interagency cooperative programs designed to improve the ability of Federal agencies to collect debts owing to them with due regard to appropriate procedural safeguards. 31 U.S.C. 3711 and 3716 require agencies to issue regulations. The Department of the Treasury also requires agencies to issue a regulation in order to utilize the Federal Tax Refund Offset Program established pursuant to 31 U.S.C. 3720A. By this regulation and delegations under related statutes not covered by this regulation, the implementation of NSF's debt collection program and the exercise of the authority granted by the statutes will be delegated by the Director of NSF to its Chief Financial Officer.

No comments were received as a result of the notice of the proposed regulation published on September 2, 1993 at pages 46600–46602 of Volume 58, No. 169 of the **Federal Register** and no changes have been made to the proposed rule published there.

Paperwork Reduction Act

This regulation does not include provisions for information collection that require review and approval by the Office of Management and Budget Under section 3518 of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and 5 CFR part 1320.

Regulatory Flexibility Act

The Director of NSF certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. NSF data indicates that a very small debt is owed to NSF. Hence, this regulation will have no "significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Public Law 96–354, 5 U.S.C. 605(b). Accordingly, no regulatory flexibility analysis is required.

Executive Order 12291

This rule is not a "major rule" as defined under Executive Order 12291 and no regulatory impact analysis is required.

List of Subjects in 45 CFR Part 608

Administrative offset, Administrative practice and procedures, Claim collection, Debt collection, and Tax refund offset.

Authority: 31 U.S.C. 3711, 3716, 3718 and 3720A.

Neal Lane,

Director.

For the reasons set out in the preamble, part 608 of title 45 of the Code of Federal Regulations is added to read as follows:

PART 608—CLAIMS COLLECTION AND ADMINISTRATIVE OFFSET

608.1 Purpose and scope.
608.2 Collection, compromise, and use of consumer reporting agencies
608.3 Administrative offset
608.4 Reductions of tax refunds

Authority: 31 U.S.C. 3711, 3716, 3718 and 3720A.

§ 608.1 Purpose and scope.

(a) This part sets forth policies and procedures for the collection and compromise claims and the administrative offset of claims by the National Science Foundation (NSF) pursuant to 31 U.S.C. 3711, 3716, 3718 and 3720A. It is not intended to limit or govern the rights of the NSF or the United States to collect, compromise, or administratively offset debts or claims under other authority and procedures that may be legally available to it.

(b) Matters not addressed in this part should be reviewed and handled in accordance with applicable statutory provisions and the Federal Claims Collection Standards issued jointly by the Attorney General and the Comptroller General (4 CFR parts 101 through 105).

(c) Any action other than the issuance of regulations specifically required to be done by the head of the agency by any of the statutes or regulations referred to in paragraphs (a) and (b) of this section shall be done on behalf of NSF by its Chief Financial Officer or by those to whom the Chief Financial Officer delegates authority. This is not intended to prevent the Chief Financial Officer from issuing additional internal procedures and guidance consistent with this part.

§ 608.2 Collection, compromise, and use of consumer reporting agencies.

(a) Subject to the specific limitations and procedures of 31 U.S.C. 3711 and in accordance with the applicable provisions of the Federal Claims Collection Standards, NSF, acting through its Chief Financial Officer or those to whom he or she delegates authority or assigns responsibilities, shall try to collect claims of the United States Government for money or property arising out of the activities of NSF or that are referred to NSF and may compromise or suspend or end collection action of certain claims. In making demands for payment, NSF will follow the guidance set forth at 4 CFR 102.2. In appropriate cases, as authorized by and subject to 31 U.S.C. 3718 and 4 CFR 102.6, NSF may contract for collection services. Before compromising or suspending or ending the collection of a claim in excess of $5,000, the matter shall be referred to the NSF Office of General Counsel for legal review.

(b) When trying to collect a claim of the Government (except for claims under the Internal Revenue Code of 1986, 26 U.S.C. 1 *et seq.*), NSF may disclose to a consumer reporting agency information from a system of records that an individual is responsible for a claim if (1) a notice published pursuant to 5 U.S.C. 552a(3)(4) indicates that information in the system of records may be disclosed to a consumer reporting agency that an individual is responsible for a claim and (2) if the Chief Financial Officer of NSF decides that the claim is valid and overdue. Such disclosures to a consumer reporting agency will be done only under the conditions and procedures specified in 31 U.S.C. 3711(f) and in the Federal Claims Collections Standards. Specifically, before NSF provides the information to the consumer reporting agency, the individual will be given the notice required by 31 U.S.C. 3711(f)(1)(C); and in accordance with 4 CFR 102.5(c), the right of administrative review to be provided to the individual shall be consistent with the provisions of 4 CFR 102.3(c). If NSF does not have a current address for the individual in its files, it will take reasonable action to locate the individual, but if unsuccessful will mail the notice to the individual's last known address. NSF will disclose information only to a consumer reporting agency that gives satisfactory assurances that it is complying with all laws of the United States relating to providing consumer credit information. The information provided by NSF shall be limited to the type of information described in 31 U.S.C. 3711(f)(1)(F). Moreover, NSF will not provide such information until it has established internal procedures to disclose promptly to a consumer reporting agency to which disclosure is made of any substantial changes in the condition or amount of the claim and to verify or correct promptly information about the claim on request of a consumer reporting agency for verification of information disclosed.

(c) If in response to the notice referred to in paragraph (b) of this section, the individual repays or agrees in writing with NSF to a repayment plan, the information will not be disclosed to a consumer reporting agency. If in response to the notice referred to in paragraph (b) the individual requests a review or reconsideration of the claim, information shall not be disclosed to the consumer reporting agency until such a review is provided.

(d) The review referred to in paragraph (c) of this section shall be based only on the written documentation in the file, including any additional written information provided by the individual in response to the notice referred to in paragraph (b). A written summary briefly describing the nature of the review performed and the conclusion reached shall be made. The written summary and conclusion shall be referred to the NSF Office of General Counsel for legal review. After legal review, a copy of the written summary shall be sent to the individual.

§ 608.3 Administrative offset.

(a) If NSF is unable to collect a claim from a person after trying to do so in accordance with § 608.2, NSF may collect the claim by administrative offset subject to the procedures and limitations of 31 U.S.C. 3716 and the applicable provisions of the Federal Claims Collection Standards. Determinations to pursue administrative offset shall be made on a case-by-case basis taking into account the considerations specified at 31 U.S.C. 3716(b) and 4 CFR 102.3(a). Before employing administrative offset, NSF will comply with the notice, hearing, review, or other procedural requirements of 31 U.S.C. 3716(a) and 4 CFR 102.3(b) and (c). Furthermore, before an administrative offset is taken by NSF pursuant to the authority of this part 608, the matter shall be referred to the Office of General Counsel for legal review to ensure that the required procedures have been followed.

(b) When another agency requests NSF to administratively offset a claim owing to that agency, NSF will normally comply with such request if the requesting agency has provided the certification required by 4 CFR 102.3(f) and offset would not be contrary to law. Before imposing administrative offsets at the request of another agency under this part 608, the matter shall be referred to the NSF Office of General Counsel for legal review.

(c)(1) In appropriate cases, NSF may request another agency to administratively setoff a claim owed to NSF. Before making the certification to the other agency required by 4 CFR 102.3(f), the matter shall be referred to the NSF Office of General Counsel for legal review.

(2) Unless otherwise prohibited by law, NSF may request that moneys that are due and payable to a debtor from the Civil Service Retirement and Disability Fund, the Foreign Service Retirement Fund or any other Federal retirement fund be administratively offset in reasonable amounts in order to collect in one full payment or a minimal number of payments debts owed the United States by the debtor. Such requests shall be made to the appropriate officials of the respective fund servicing agency in accordance with such regulations as may be prescribed by that agency. The requests for administrative offset will certify in writing that (i) the debtor owes the United States a debt and the amount of the debt; (ii) NSF has complied with applicable regulations and procedures; and (iii) NSF has followed the requirements of the Federal Claims Collection Standards as made applicable by this section. Once NSF decides to request offset from a Federal retirement fund, it will make the request as soon as practical after completion of the applicable procedures in order that the fund servicing agency may identify and flag the debtor's account in anticipation of the time when the debtor requests or becomes eligible to receive payments from the fund and to ensure that offset will be initiated prior to the expiration of the statute of limitations.

(3) If NSF collects part or all of the debt by other means before deductions are made or completed pursuant to this paragraph (c), NSF shall act promptly to modify or terminate its request for offset.

(4) This paragraph (c) does not require or authorize the fund servicing agency to review the merits of (i) NSF's determination with respect to the amount and validity of the debt, (ii) NSF's determination as to waiver under an applicable statute, or (iii) NSF's determination to provide or not provide an oral hearing.

(d) No collection by administrative offset shall be made on any debt that has been outstanding for more than ten years unless facts material to the Government's right to collect the debt were not known, and reasonably could not have been known, by the official or officials responsible for discovering the debt.

(e) Administrative offset under this section will not be initiated against:

(1) A debt in which administrative offset of the type of debt involved is explicitly provided for or prohibited by a statutes other than 31 U.S.C. 3716, including debts subject to the Salary offset procedures at 45 CFR part 607;

(2) Debts owed by other agencies of the United States or by any State or local Government; or

(3) Debts arising under the Internal Revenue Code of 1954; the Social Security Act; or the tariff laws of the United States.

§ 608.4 Reductions of tax refunds.

(a) In accordance with regulations and guidance issued by the Secretary of the Treasury at 26 CFR 301.6402–6 and the requirements of 31 U.S.C. 3720A, NSF will participate in the Federal Tax Refund Offset Program for offset against income tax refunds of persons owing past due legally enforceable debts to NSF.

(b) For purposes of this section, a past-due legally enforceable debt referable to the IRS is a debt which is owed to the United States and:

(1) Except in the case of a judgment debt, has been delinquent for at least three months but has not been

delinquent for more than ten years at the time the offset is made;

(2) Cannot be currently collected pursuant to the salary offset provisions of 5 U.S.C. 5514(a)(1);

(3) Is ineligible for administrative offset under 31 U.S.C. 3716(a) by reason of 31 U.S.C. 3716(c)(2) or cannot be collected by administrative offset under 31 U.S.C. 3716(a) by NSF against amounts payable to or on behalf of the debtor by or on behalf of NSF;

(4) With respect to which NSF has notified or has made a reasonable attempt to notify the taxpayer that the debt is past-due and, unless repaid within 60 days thereafter, the debt will be referred to the IRS for offset against any overpayment of tax;

(5) With respect to which NSF has given the taxpayer at least 60 days from the date of notification to present evidence that all or part of the debt is not past-due or legally enforceable, has considered the evidence presented by such taxpayer, and has determined that an amount of such debt is past-due and legally enforceable;

(6) Has been disclosed by NSF to a consumer reporting agency as authorized by 31 U.S.C. 3711(f), unless a consumer reporting agency would be prohibited from using such information by 15 U.S.C. 1681c, or unless the amount of the debt does not exceed $100.00;

(7) Is at least $25.00;

(8) All other requirements of 31 U.S.C. 3720A and the Internal Revenue Service regulations at 26 CFR 301.6402–6 relating to the eligibility of a debt for tax return offset have been satisfied.

(c) NSF will make a request for reduction of an IRS tax refund only after the NSF determines that an amount is owed and past-due and provides the debtor with 60 days written notice. NSF's notice of intention to collect by IRS tax refund offset (Notice of Intent) will state:

(1) The amount of the debt;

(2) That unless the debt is repaid within 60 days from the date of the NSF's Notice of Intent, NSF intends to collect the debt by requesting the IRS to reduce any amounts payable to the debtor as refunds of Federal taxes paid by an amount equal to the amount of the debt and all accumulated interest and other charges;

(3) That the debtor has a right to present evidence that all or part of the debt is not past-due or legally enforceable; and

(4) A mailing address for forwarding any written correspondence and a contact name and phone number for any questions.

(d) A debtor who receives a Notice of Intent has the right to present evidence that all or part of the debt is not past-due or not legally enforceable. To exercise this right, the debtor must:

(1) Send a written request for a review of the evidence to the address provided in the notice.

(2) State in the request the amount disputed and the reasons why the debtor believes that the debt is not past-due or is not legally enforceable.

(3) Include with the request any documents which the debtor wishes to be considered or state that additional information will be submitted within the remainder of the 60-day period.

(e) The failure of a debtor to respond as provided in paragraph (d) of this section will result in an automatic referral of the debt to the IRS without further action by NSF. If the debtor responds, NSF will consider all available evidence related to the debt and issue a written determination, including supporting rationale, whether its prior determination that the debt is past-due and legally enforceable is sustained, amended, or canceled. Before this determination is made the matter shall be referred to the NSF Office of General Counsel for legal review. NSF will give prompt notification of this determination to the debtor.

BILLING CODE 7555–01–M

DEPARTMENT OF JUSTICE

48 CFR Parts 2801, 2802, 2806, and 2807

Justice Acquisition Circular 94–1; Amendment to the Justice Acquisition Regulations (JAR) Regarding: Contracting Authority and Responsibilities, Definitions, Competition Advocates, and Acquisition Planning

AGENCY: Office of the Procurement Executive, Justice Management Division, Justice.

ACTION: Final rule.

SUMMARY: This final rule amends the JAR by prescribing new policies and procedures for redelegation of authority for contractual actions of goods and services and acquisitions by lease or purchase of any interest in real property; removing regulations on modifying delegation documents; revising regulations to reflect new policies and procedures for reviews of contractual actions conducted by the Office of the Procurement Executive; revising regulations to set forth the Department of Justice system for selection, appointment, and termination of appointment of contracting officers; redefining an existing contracting activity and incorporating an additional contracting activity; incorporating existing agency policy and procedures concerning Competition Advocates; and incorporating existing agency policy and procedures regarding Acquisition Planning.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: W.L. Vann, Procurement Executive, Justice Management Division (202) 514–6868.

SUPPLEMENTARY INFORMATION: The determination is hereby made that this amendment must be issued as a final rule. This amendment was not published for public comment because it does not have an effect beyond the internal operating procedures of the agency. The Director, Office of Management and Budget, by memorandum dated December 14, 1984, exempted agency procurement regulations from review under Executive Order 12291, except for selected areas. The exception applies to this rule. The Department of Justice certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601–612) because the amendment sets forth, wholly, internal departmental procedures. No additional time or cost burden will be placed on contractors by the promulgation of this regulation.

List of Subjects in 48 CFR Part 2801, 2802, 2806, and 2807

Government procurement.

Stephen R. Colgate,
Assistant Attorney General for Administration.

1. The authority citation for 48 CFR part 2801, 2802, 2806, and 2807 continues to read as follows:

Authority: 28 U.S.C. 510; 40 U.S.C. 486(c); 28 CFR 0.75(j) and 28 CFR 0.76(j).

PART 2801—DEPARTMENT OF JUSTICE ACQUISITION REGULATIONS SYSTEM

2. Section 2801.601 is revised to read as follows:

2801.601 General.

(a) In accordance with Attorney General Order 1687–93, the authority vested in the Attorney General with respect to contractual actions, for goods and services, is delegated to the following officials:

(1) Assistant Attorney General for Administration (for the offices, boards, and divisions (OBDs);

(2) Director, Federal Bureau of Investigation;

(3) Director, Bureau of Prisons;

(4) Commissioner, Federal Prison Industries;

(5) Commissioner, Immigration and Naturalization Service;

(6) Administrator, Drug Enforcement Administration;

(7) Assistant Attorney General, Office of Justice Programs;

(8) Director, U.S. Marshals Service;

(9) Director, National Institute of Corrections; and

(10) Inspector General

(b) In accordance with Attorney General Order 1688–93, the authority vested in the Attorney General with respect to acquisition by lease or purchase of any interest in real property has been redelegated to the Assistant Attorney General for Administration.

(1) The following authorities have been redelegated to the Director, Facilities and Administrative Services Staff, JMD, for the efficient and proper administration of the Department's real property operations:

(i) Acquire by lease or purchase any interest in real property for all components of the Department of Justice.

(ii) Secure delegations of lease acquisition authority from GSA for all components of the Department.

(iii) Approve ratification requests of $5,000 or less with respect to interests in real property.

(iv) Only the authority contained in paragraph (b)(1)(i) of this section may be redelegated.

(2) Authority contained in paragraph (b)(1)(i) is redelegated to the heads of Bureaus, as defined in the Order as follows:

(i) Assistant Attorney General for Administration (for the offices, boards, divisions, United States Attorneys, and United States Trustees);

(ii) Director, Federal Bureau of Investigation;

(iii) Director, Bureau of Prisons;

(iv) Commissioner, Federal Prison Industries, Inc.;

(v) Commissioner, Immigration and Naturalization Service;

(vi) Administrator, Drug Enforcement Administration;

(vii) Assistant Attorney General, Office of Justice Programs;

(viii) Director, United States Marshals Service; and

(ix) Inspector General, Office of the Inspector General.

(c) The acquisition authority delegated to the officials in 2801.601 (a) and (b)(2) may be redelegated to subordinate officials as necessary for the efficient and proper administration of the Department's acquisition operations. Such redelegated authority shall expressly state whether it carries the power of redelegation and the limits, if any, of the redelegation of authority.

(d)(1) Contracting officer authority to other than those positions expressly identified in paragraphs (a)(1) through (a)(10) of this section for goods and services shall be redelegated only to subordinate individuals who:

(i) Are employed in the 1100 personnel classification series, have met the requirements of § 2801.603 and have been certified as competent by the Bureau Director or designee, in accordance with the Certification Program required by OFPP Policy Letter 92–3, Procurement Professionalism Program Policy—Training for Contracting Personnel; or,

(ii) Must function as contracting officers for goods and services in the performance of their duties, have met the requirements of § 2801.603 and have been certified as competent by the Bureau Director or designee, in accordance with the Certification Program required by OFPP Policy Letter 92–3, Procurement Professionalism Program Policy—Training for Contracting Personnel; except that,

(iii) Authority to make small purchases for goods and services may be redelegated to subordinate individuals not classified in the 1100 series provided,

(A) That the office(s) they serve would otherwise be without supply support for their immediate needs or the individuals are being authorized to place delivery orders or similar instruments against established DOJ or other agency contracts; and,

(B) The individuals have been adequately instructed in the regulations concerning small purchases and have been certified as competent by the Bureau Director or designee, in accordance with the Certification Program required by OFPP Policy Letter 92–3, Procurement Professionalism Program Policy—Training for Contracting Personnel.

(2) Real property contracting authority may be redelegated to individuals not in the 1100 series, provided that the qualification requirements stated in 2801.603–2(d)(2) are met.

(3) The redelegation of contracting authority directly to specific persons without regard for intermediate organizational levels only establishes authority to represent the Government in its commercial business dealings. It is not intended to affect the organizational relationship between the contracting officers and higher administrative and supervisory levels in the performance of their duties.

(e) When exercising delegated contracting officer authority, a designated employee shall be identified as the contracting officer and shall function within the limits prescribed by law, the FAR, the JAR, and his/her delegation of contracting authority. Additionally, real property contracting officers shall be subject to the GSAR and the JPMR.

(f) A contracting officer shall maintain evidence of his/her delegation of authority and while functioning as a contracting officer, shall make such evidence available upon request.

2801.601–70 [Removed]

3. Section 2801.601–70 is removed.

4. Section 2801.602–70 is revised to read as follows:

2801.602–70 Office of the Procurement Executive.

(a)(1) The contracting officer shall forward the proposed contract action to the Office of the Procurement Executive for review prior to execution of any contractual action which:

(i) Exceeds $50,000 and was solicited using other than full and open competition procedures, including amendments or modifications to these contracts which cause the total contract costs to exceed $50,000;

(ii) Exceeds $100,000, and was solicited using full and open competition procedures, including amendments or modifications to these contracts which cause the total contract costs to exceed $100,000; or

(iii) Is evaluated on the basis of system life costs and/or is evaluated on the basis of option pricing regardless of dollar value;

(2) For the purposes of this section contractual actions include all pre-award, award, and post-award contractual actions above the thresholds in paragraphs (a)(1) (i) through (iii) including, but not limited to modifications, ratifications, and options, but excluding orders from Federal Supply Schedules and orders from Basic Ordering Agreements. Review by the Office of the Procurement Executive is applicable to all organization elements in the Department, with the exception of the FBI as noted in this section. It is the responsibility of the FBI's Contract Review Board to ensure that procurement actions for goods and services are awarded in conformity with applicable statutes, regulations, and procedures. This exemption, however, does not exempt the FBI from the

review by the Office of the Procurement Executive of all real property procurement actions above the thresholds cited in paragraphs (a)(1) (i) through (iii) of this section, or from other oversight responsibilities of the Office of the Procurement Executive, including Procurement Executive review and approval of justifications for other than full and open competition on contracts over $10 million.

(b) Prior to submission to the Procurement Executive, the legal officer for each Bureau procurement activity is responsible for reviewing and approving all such procurement actions for legal sufficiency.

(c) The AAG/A and/or the Procurement Executive may waive any requirements for preaward contract review, except those imposed by statute. Requests for waivers shall be submitted to the Procurement Executive in accordance with paragraph (d) of this section.

(d) A request for a waiver must be submitted in writing by the head of the contracting activity and include a detailed explanation as to why a waiver is required, as well as information explaining reasons why a contract or class of contracts cannot be reviewed on a preaward basis. Oral waivers may be requested and granted under circumstances of compelling urgency, but written documentation of the waiver shall be made as soon as time permits. All contract documents that are available at the time a waiver request is made must accompany the request for review. All available documents will be reviewed to assure that the award is legally sufficient prior to the granting of a waiver. A postaward review of the completed contract file is required. Waivers will not be granted near the end of a fiscal year for the purpose of obligating year end funds.

(e) In accordance with Attorney General Orders 1687–93 and 1688–93, the head of a Bureau may appeal a decision of the Procurement Executive to the Contract Appeals Panel (Panel), in writing, within 15 calendar days after receipt of the decision of the Procurement Executive. The Panel shall be composed of the Deputy Attorney General who shall serve as chairperson, the Associate Attorney General and the Assistant Attorney General for Administration. The Panel shall meet on an ad hoc basis as necessary and determined by the chairperson. When appealing a decision of the Procurement Executive, the head of the Bureau shall follow the procedures described in paragraphs (e) (1) through (4) of this section.

(1) The appeal file shall be submitted through the Office of the Procurement Executive (OPE) to the Deputy Attorney General as Chairperson of the Contract Appeals Panel. Submission of the appeal through the OPE is required so that the Procurement Executive may provide a written response to the issues raised in the appeal and, due to the ad hoc nature of the Contract Appeals Panel, provide a location for the collection and maintenance of appeal documents and files. The Procurement Executive shall forward the appeal file to the Chairperson within five working days of receipt.

(2) *Content of the appeal file.* The appeal file must be complete in that it fully addresses the issue(s) being appealed. The file shall include a copy of the proposed contract or other award action, documents relied upon by the contracting officer in taking the action under dispute, the Procurement Executive's decision and a statement of facts setting forth the basis on which the appeal is made. The statement of facts shall cite, where applicable, procurement regulations, statutes, or decisions by other authorities, such as GAO decisions, that support or form the basis of the appeal. A summary shall be provided stating the resolution requested by the Bureau. An original and three copies of the appeal file shall be submitted.

(3) The head of the Bureau shall also submit to the OPE, with the appeal file, the original contract file as submitted to the OPE for review.

(4) The Contract Appeals Panel, following review and consideration of the appeal shall issue its decision in writing to the head of the Bureau through the Office of the Procurement Executive and return, with the decision, all documents submitted by the Bureau. Unless the Attorney General directs that the matter be referred to him/her, the decision of the Panel will be the final Department of Justice position as to whether a particular procurement action complies with the applicable statute, regulation, policy or procedure.

(f) The Procurement Executive is authorized to review any procurement actions, including real property procurement actions, throughout the Department and direct that such corrective action be taken as the Procurement Executive deems necessary, and to inspect at any time the procurement operations of any component of the Department.

5. Section 2801.603 is revised to read as follows:

2801.603 Selection, appointment and termination of appointment.

2801.603–2 Selection.

(a) *Policy.* It is the Department's objective in issuing contracting officer Certificates of Appointment, SF 1402s, to ensure that only those officials who are fully qualified to obligate the Government for the expenditure of public funds are appointed as contracting officers.

(b) *Appointment levels.* There are four levels of authority as follows:

(1) Level I: Applies to personnel who have been delegated contracting authority at or under the small purchases threshold, or with authority to place delivery orders at any dollar level.

(2) Level II: Applies to personnel who have been delegated contracting authority up to a maximum of $100,000.

(3) Level III: Applies to personnel who have been delegated contracting authority up to a maximum of $500,000.

(4) Level IV: Applies to all personnel who have been delegated contracting authority which exceeds $500,000.

(c) *Selection procedures.* (1) Once the organizational need is determined, the supervisor will nominate a contracting officer candidate. The supervisor shall submit, through appropriate bureau channels, a qualification statement to the bureau official authorized to grant the delegation of procurement authority. The qualification statement must include, as applicable, a copy of the employee's most recently completed Individual Development Plan (IDP), a Certificate of Competency, and an updated SF–171 or equivalent which contains the following information:

(i) Name;

(ii) Title, series, grade;

(iii) Office;

(iv) Education, including—

(A) Highest level completed;

(B) College or university name;

(C) Degree received;

(D) Chief undergraduate/graduate college subject;

(v) Experience.

(2) Upon review and determination that the applicant meets the required qualification standards set forth in 2801.603–2(d), the appointing official (refer to 2801.601(a), (b)(2), and (c) for identification of the appointing officials) shall issue a SF 1402, Certificate of Appointment, in accordance with 2801.603–3.

(d) *Required qualifications.* Qualification standards are listed, respectively, for goods and services and real property procurement authority. Additional qualification standards for each level may be established, as determined appropriate to support a bureau's mission.

(1) *Goods and services.* A contracting officer candidate must be certified as competent at the appropriate career level prior to receiving a delegation of procurement authority. The level of delegated procurement authority and corresponding career level certification requirements are listed below. The mandatory training requirements shall be met through attending courses that provide skill training in the units of instruction outlined in the Federal Acquisition Institute (FAI) Contract Specialist Workbook, as specified by OFPP Policy Letter 92–3. Courses may be taken from any institution as long as they provide the requisite skill training. For all in-house courses, i.e., courses that are conducted or sponsored by the bureaus or by the DOJ Training Center, the Procurement Executive will determine which courses meet the criteria. For all outside courses, i.e., courses that are conducted or sponsored by sources other than DOJ personnel or DOJ contractors, each bureau will be required to determine which courses qualify. The OJT units of instruction and related tasks for Level I contracting officers shall be completed as listed in the Department's Master Development Plan for purchasing personnel. The OJT units of instruction, related tasks and standards for Levels II, III, and IV, as mandated by OFPP Policy Letter 92–3, are contained in the Contract Specialist Workbook and shall be completed as listed in the Department's Master Development Plan (MDP) for all contracting personnel.

(i) *Level I.* Completion of the following course and related OJT units of instruction that are set forth in the Master Development Plan—Purchasing. (If the individual is not in the 1102 or 1105 occupational series, the OJT units of instruction are not required to be completed.):

Course	Hours
Small Purchase Basics	40

(ii) *Level II.* Completion of the following courses and applicable OJT units of instruction that are set forth in the Department's MDP—Contracting.

Courses	Hours
Introduction to Contracting	40
Procurement Planning	40
Contracting by Sealed Bidding	40
Price Analysis	40
Contracting By Negotiation	40
Cost Analysis	40
Total	240

(iii) *Level III.* In addition to completion of the courses and OJT units of instruction specified for Level II, the following courses and applicable OJT units of instruction that are set forth in the Department's MDP—Contracting must be completed.

Courses	Hours
Negotiation Techniques	40
Gov't Contract Administration	40
Gov't Contract Law	40
Types of Gov't Contracts	24
Total	144

(iv) *Level IV.* In addition to completion of the courses and OJT units of instruction specified for Levels II and III, the following courses and applicable OJT units of instruction that are set forth in the Department's MDP—Contracting must be completed.

Courses	Hours
Advanced Contract Administration	40
Advanced Cost and Price Analysis	40
Advanced Contract Negotiation	40
Termination	40
Total	160

(2) *Real property.*

(i) Training subject areas for real property procurement.

(A) It is understood that the following are meant to be general subject areas, which pertain to the authority to enter into real property acquisitions, not course titles. The bureau, in determining the acceptability of a particular course, will make a determination based on what is generally understood in the area of real property acquisition and related training.

(*1*) Federal Real Property Leasing or Basic Lease Contracting (40 hours);

(*2*) Real Estate Law or Federal Real Property Lease Law (40 hours);

(*3*) Pricing of Lease Proposal (40 hours);

(*4*) Real Estate Appraisal Principles or equivalent course (40 hours);

(*5*) Techniques of Negotiating Federal Real Property Leases (40 hours).

Total—200 Hours

(B) The Price and Cost Analysis courses and Negotiation Techniques course listed under 2801.603–2(d)(1) may be substituted for the required Pricing of Lease Proposal and Techniques of Negotiating Federal Real Property Leases courses, respectively.

(ii) The levels of delegated real property authority and the qualification requirements are listed below.

(A) *Level I.* Signatory authority to enter into real property contracts up to the small purchase threshold as set forth in FAR Part 13.

(*1*) Completion of the qualification standards cited in 2801.603–2(d)(1) and receipt of a Level I delegation of procurement authority for supplies and services, or for realty leasing and sales personnel, completion of one year of real estate experience that demonstrate the ability to perform at Level I; and

(*2*) Completion of 200 hours of training from the subject areas listed in 2801.603–2(d)(2)(i).

(B) *Level II.* Signatory authority to enter into real property contracts up to $100,000.

(*1*) Completion of the qualification standards cited in 2801.603–2(d)(1) and receipt of a Level II delegation of procurement authority for goods and services, or for realty leasing and sales personnel, completion of two years of real estate experience that demonstrate the ability to perform at Level II; and

(*2*) Completion of 200 hours of training from the subject areas listed in 2801.603–2(d)(2)(i).

(C) *Level III.* Signatory authority to enter into real property contracts up to $500,000.

(*1*) Completion of the qualification standards cited in 2801.603–2(d)(1) and receipt of a Level III delegation of procurement authority for goods and services, or for realty leasing and sales personnel, three years of real estate experience that demonstrate the ability to perform at Level II, including six months as a Real Property Contracting Officer equivalent to Level II responsibilities that demonstrate the ability to perform at Level III; and

(*2*) Completion of 200 hours of training from the subject areas listed in 2801.603–2(d)(2)(i).

(D) *Level IV.* Signatory authority to enter into real property contracts exceeding $500,000.

(*1*) Completion of the qualification standards cited in 2801.603–2(d)(1) and receipt of a Level IV delegation of procurement authority for goods and services, or for realty leasing and sales personnel, completion of four years of real estate experience that demonstrate the ability to perform at Level III, including one year as a Real Property Contracting Officer equivalent to the Level III responsibilities that demonstrated the ability to perform at Level IV; and

(*2*) Completion of 200 hours of training from the subject areas listed in 2801.603–2(d)(2)(i).

(3) The qualification standards cited under 2801.603–2(d) (1) and (2) are not applicable to management officials of

the Department and its components who have contracting officer authority for goods and services by virtue of their organizational placement at a level above the chief of the contracting office as defined in JAR 2802.102(f).

(e) *Equivalencies.*

(1) Prior procurement training and work experiences of senior and intermediate level personnel may be substituted for the mandatory training requirements for goods and services (both course work and units of instruction) if it is determined by the supervisor that the individual is already competent to perform applicable contracting officer's duties. The supervisor's determination shall be based on the results of an interview and review of the individual's prior education, procurement training, and work experiences. (The standard procurement career levels, which are applicable to individuals in the 1102 and 1105 series, as well as to those in other classification series who perform contracting duties more than 50 percent of the time, are: (i) Entry—GS–1102–5/8; (ii) Intermediate—GS–1102–9/12; (iii) Senior—GS/GM–1102–13/Above; and (iv) Purchasing—GS–1105 any grade.)

(2) Completion of an advanced degree in Government Contracting, completion of a certification program in Government Contracting, or passing an examination which is given by a nationally recognized professional contract management organization such as the National Contract Management Association, may be substituted for the mandatory training courses for procurement of goods and services, if these items have been completed prior to the effective date of Justice Acquisition Circular (JAC) 94–1. The individual shall, however, be required to complete all applicable on-the-job training units of instruction.

(3) Completion of courses towards an undergraduate or advanced degree may be taken into consideration, on a case-by-case basis, as a substitute for the mandatory training courses. The individual shall, however, be required to complete all applicable on-the-job training units of instruction for procurement of goods and services, and all applicable work experience for procurement of real property.

(4) Completion of a Juris Doctor (J.D.) degree from an American Bar Association accredited law school may be substituted for the following Level II mandatory training courses for procurement of goods and services: Introduction to Contracting; Procurement Planning; Contracting by Sealed Bidding; and Contracting by Negotiation. The individual shall, however, be required to complete all applicable on-the-job training units of instruction.

(5) Management of Defense Acquisition Contracts (Basic) course, if completed prior to the effective date of JAC 94–1, is equivalent to the following mandatory training courses for procurement of goods and services: 40 hours of Introduction to Contracting, 40 hours of Sealed Bidding, 40 hours of Contracting by Negotiation, 40 hours of Government Contract Administration, and 24 hours of Types of Government Contracts.

(6) Management of Defense Acquisition Contracts (Advanced course), if completed prior to the effective date of JAC 94–1, is equivalent to the following mandatory training courses for procurement of goods and services: 40 hours of Advanced Contract Administration and 40 hours of Advanced Contract Negotiation.

(7) All employees' IDPs shall be documented to reflect the substituted training and on-the-job training units of instruction, as applicable.

(f) *Implementation schedule and waivers.*

(1) Individuals holding existing delegations of authority may retain their delegations until October 1, 1995, while qualifying under the standards in this section. Existing delegations shall not be changed to increase or decrease the dollar authority, or remove other limitations until the individual is determined qualified under the prescribed standards. Effective October 1, 1995, only those individuals who meet the minimum standards set forth in the regulation in this section shall be delegated contracting officer's authority. If an individual holding an existing delegation of authority fails to qualify under the standards set forth in the regulation in this section, by October 1, 1995, the existing delegation of authority shall be terminated by the contracting activity. It is recognized that under certain circumstances, an unusual need might dictate delegation of a warrant to an individual who does not meet the standards in this section. In those rare circumstances where it is necessary to nominate a candidate who does not fully meet the standards, a written waiver request must be submitted, by the Head of the contracting activity, for approval of the Procurement Executive.

(2) All waiver requests must contain a complete justification for the action requested and, as applicable, a copy of the employee's IDP which specifies the action to be taken to meet the delegation of procurement authority requirements.

2801.603–3 Appointment.

(a) Delegations of authority to other than those positions expressly identified in section 2801.601 (a) and (b) shall be made only to individuals by name. The delegations shall be issued in writing on Standard Form 1402, Certificate of Appointment, and shall contain the following mandatory elements:

(1) Type of delegation, e.g., goods and services, lease contracting, real property.

(2) The dollar limit, if any, of the delegation.

(3) If the delegation of authority carries the power of redelegation and the limits of the redelegation of authority.

(4) Any limitations of the type of purchases, i.e., open market, GSA schedules, etc.

(b) Upon issuance, a copy of all SF 1402s, along with the individual's qualification statement shall be submitted to the Office of the Procurement Executive.

(c) A copy of the SF 1402 and qualification statement shall be maintained, in accordance with bureau procedures, for each contracting officer.

2801.603–4 Terminations.

When an appointing official determines to make a change in the delegation of authority, including increasing or decreasing the limitations, a new SF 1402, Certificate of Appointment shall be issued and the existing warrant shall be officially terminated.

PART 2802—DEFINITIONS OF WORDS AND TERMS

6. In section 2802.102, paragraph (a) is revised to read as follows:

2802.102 Definitions.

* * * * *

(a) *Contracting acitivity* means an office, board, division, or bureau within the Department which has been delegated procurement authority to manage contracting functions associated with its mission or, as is the case with the Office of Justice Programs, which must adhere to the procurement policy of the Attorney General. See 2801. 602 (a), (b)(1) and (b)(2).

* * * * *

PART 2806—COMPETITION REQUIREMENTS

7. Part 2806 is amended as set forth below:

a. In 2806.304(a) remove the words "bureau Procurement Chief" and add in their place the words "chief of the contracting activity" and also remove the words "bureau Competition Advocate" and "bureau competition advocate" and add, in their place the words "procuring activity competition advocate".

b. In section 2806.501 paragraph (b) is revised to read as follows:

2806.501 Requirement.

* * * * *

(b) The agency head will appoint in each bureau an official to be the procuring activity competition advocate. The procuring agency competition advocates shall be vested with the overall responsibility for competition activities within their respective procuring activity. No individual in the contracting office at or below the level of chief of the contracting office may serve as the procuring activity competition advocate. An individual at any level in the supervisory chain above the chief of the contracting office may serve as procuring activity competition advocate.

c. Section 2806.502 is revised to read as follows:

2806.502 Duties and responsibilities.

(a) The Procurement Executive shall:

(1) Provide guidance to competition advocates in formulating plans, goals, and procedures to achieve the goals of enhancing competition and challenging barriers to full and open competition; and,

(2) Review and approve justifications for other than full and open competition for contract requirements over $10 million in accordance with JAR 2806.303–2.

(b) The DOJ Competition Advocate is responsible for the duties and responsibilities described in FAR 6.502.

(c) The Procuring Activity Competition Advocate shall:

(1) Actively enforce the Department's Competition Advocacy Program within the procuring activity. Ensure that systems are established for the effective internal control of procuring activity functions and activities which implement the Department's Competition Advocacy Program.

(2) Review specifications for unnecessary detail and statements of need for undue restrictions which have not been successfully tested in the marketplace. Should the procuring activity competition advocate challenge that the specifications are not conducive to full and open competition or that the statement of need is unduly restrictive, corrective action shall be taken as the chief of the contracting office determines necessary.

(3) Review and approve justifications for other than full and open competition for contract requirements over $100,000 but not exceeding $1 million. Justifications submitted to the procuring activity competition advocate shall be prepared pursuant to FAR 6.303 and shall contain the concurrence of the chief of the contracting office before being forwarded to the competition advocate.

(4) Concur with justifications for other than full and open competition for contract requirements over $1 million but not exceeding $10 million which require the review and approval by the head of the contracting activity or designee. Such justifications shall be prepared pursuant to FAR 6.303 and the JAR 2806.303–2. In addition to obtaining the concurrence of the procuring activity competition advocate, the concurrence of the chief of the contracting office shall also be obtained before being forwarded for higher level review and approval.

(5) Identify and challenge barriers to full and open competition.

(6) Implement specific goals and objectives to enhance competition.

(7) Prepare and submit to the DOJ Competition Advocate, by November 30th of each year, an annual report of competition advocacy activities conducted during the prior fiscal year.

PART 2807—ACQUISITION PLANNING

8. Part 2807 is amended as set forth below:

a. In § 2807.102, paragraph (b) is revised to read as follows:

2807.102 Policy

* * * * *

(b) Acquisition planning shall be accomplished in accordance with the Department's Advance Procurement Planning Program Order. Approval for alterations of programs or DOJ forms must be obtained from the Office of the Procurement Executive.

b. In section 2807.103, paragraph (a) is revised to read as follows:

2807.103 Agency-head responsibilities.

(a) The Department's Advance Procurement Planning Program Order provides that heads of components (Offices, Boards, Divisions and Bureaus) shall appoint an acquisition planner for all programs and activities requiring contract actions estimated at $500,000 or more in any given contract year. Acquisition planners shall be responsible for developing and maintaining written advance procurement plans. The acquisition planner shall work with the component procurement representative in developing advance procurement plans.

* * * * *

2807.7001 [Amended]

c. In section 2807.7001, paragraph (b)(1), remove the words "Department's Advance Procurement Planning Order" and add, in their place, the words "Department's Advance Procurement Planning Program Order," and also remove the words "chiefs of procurement activities" and add, in their place "chiefs of the contracting offices".

BILLING CODE 4410–01–M

Proposed Rules

Federal Register
Vol. 58, No. 248
Wednesday, December 29, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

7 CFR Part 1735

Telephone Program Loan Policies, Types, and Requirements

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Rural Electrification Administration (REA) proposes to amend its regulation concerning general policies for telephone loans to make consistent for all telephone borrowers the adjusted net worth to assets requirement set forth in the mortgage between REA and its borrowers. The proposed rule would establish at 10 percent, the percentage of adjusted assets used in determining both the borrower's allowable distribution of capital, and certain reporting requirements. This percentage would be incorporated in new mortgages and would also apply to borrowers with outstanding loans regardless of the percentage stated in their existing mortgages.

DATES: Comments concerning this proposed rule must be received by REA or bear a postmark or its equivalent no later than February 28, 1994.

ADDRESSES: Submit written comments to Matthew P. Link, Director, Rural Telephone Bank Management Staff, U.S. Department of Agriculture, Rural Electrification Administration, 14th & Independence Avenue, SW., room 2832-S, Washington, DC 20250–1500. REA requests an original and three copies of all comments (7 CFR part 1700). All comments received will be made available for public inspection at room 2238-S, at the address listed above, between 8:30 a.m. and 5 p.m. (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Cheryl Gamboney, Management Analyst, Rural Telephone Bank Management Staff, at the address listed above, telephone number (202) 720–0530.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This proposed rule is issued in conformance with Executive Order 12866.

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. If adopted, this proposed rule will not:

(1) Preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule;

(2) Have any retroactive effect; and

(3) Require administrative proceedings before parties may file suit challenging the provisions of this rule.

Regulatory Flexibility Act Certification

REA has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The REA program provides loans to REA borrowers at interest rates and terms that are more favorable than those generally available from the private sector. REA borrowers, as a result of obtaining federal financing, receive economic benefits which exceed any direct economic costs associated with complying with REA regulations and requirements. Moreover, this proposed rule corrects inequities and establishes a more consistent standard.

Information Collection and Recordkeeping Requirements

In compliance with the Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and section 3504 of that Act, the information collection and recordkeeping requirements contained in this proposed rule have previously been approved by OMB under control number 0572–0031. Comments concerning these requirements should be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for USDA, room 3201, New Executive Office Building, Washington, DC 20503.

National Environmental Policy Act Certification

REA has determined that this proposed rule will not significantly affect the quality of the human environment as defined by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Therefore, this action does not require an environmental impact statement or assessment.

Catalog of Federal Domestic Assistance

The program described by this proposed rule is listed in the Catalog of Federal Domestic Assistance Programs under 10.851, Rural Telephone Loans and Loan Guarantees, and 10.852, Rural Telephone Bank Loans. This catalog is available on a subscription basis from the Superintendent of Documents, the United States Government Printing Office, Washington, DC 20402–9325.

Executive Order 12372

This proposed rule is excluded from the scope of Executive Order 12372, Intergovernmental Consultation. A Notice of Final rule entitled Department Programs and Activities Excluded from Executive Order 12372 (50 FR 47034) exempts REA and RTB loans and loan guarantees to governmental and nongovernmental entities from coverage under this Order.

Background

REA requires that mortgages and other documents securing REA telephone loans limit the borrower's authority to distribute its capital if the borrower does not have an adjusted net worth in excess of 40 percent of its adjusted assets. The standard form of mortgage also provides an alternative dividend limitation based upon an amount determined by a lower percentage of the borrower's adjusted net worth to adjusted assets together with certain adjustments provided in the borrower's mortgage. The lower percentage of adjusted net worth to adjusted assets is also used to specify when the borrower is subject to certain requirements set forth in the mortgage.

Prior to June 10, 1991, the alternative lower percentage was 20 percent for certain borrowers and 10 percent for all others. All mortgages associated with loans made after June 10, 1991, specify 10 percent. REA proposes to use 10 percent to determine whether a borrower that has not received a loan since June 10, 1991, is in compliance with REA's capital distributions policy and reporting requirements set forth in the standard form of mortgage. By applying the same alternative lower percentage to all borrowers, this proposed change corrects existing inequities and establishes a more consistent and reasonable policy.

List of Subjects in 7 CFR Part 1735

Accounting, Loan programs-communications, Reporting and recordkeeping requirements, Rural areas, Telephone.

For reasons set forth in the preamble, Chapter XVII of Title 7 of the Code of Federal Regulations is proposed to be amended as follows:

PART 1735—GENERAL POLICIES, TYPES OF LOANS, LOAN REQUIREMENTS—TELEPHONE PROGRAM

1. The authority citation for part 1735 continues to read as follows:

Authority: 7 U.S.C. 901 *et seq.*, 1921 *et seq.*

2. In § 1735.46, the undesignated paragraph is redesignated paragraph (a) and new paragraphs (b) through (h) are added to read as follows:

§ 1735.46 Loan security documents.

(a) * * *

(b) The standard form of mortgage or other security document required by REA to secure telephone loans prohibits the borrower from making certain investments or distributions of assets unless, after such action, the borrower's adjusted net worth is at least:

(1) Forty percent of its adjusted assets; or

(2) As an alternative, the sum of ten percent of its adjusted assets plus certain other adjustments specified in the mortgage.

(c) The standard form of telephone mortgage also states that if the borrower's adjusted net worth is at least ten percent of its adjusted assets, the borrower is not required to take or refrain from taking certain actions as set forth in the mortgage.

(d) REA will apply the ten percent requirement to all telephone borrowers regardless of whether the borrower's existing mortgage sets forth a higher percentage of adjusted net worth to assets for purposes of determining whether the borrower can:

(1) Use the alternative calculation described in paragraph (b)(2) of this section to determine if it can make investments or distributions; or

(2) Take advantage of the benefits described in paragraph (c) of this section.

(e) A borrower with an adjusted net worth of less than twenty percent of its adjusted assets shall continue to fulfill the requirements of the mortgage relating to reporting its ownership and transfers of its ownership, including capital stock, membership certificates and equity capital certificates.

(f) Any borrower meeting the standard forty percent limitation described in paragraph (b)(1) of this section shall continue to be able to pay dividends or make investments in accordance with the borrower's mortgage.

(g) References to a borrower's mortgage in this section include deeds of trust and any other loan document applying the same requirements to a borrower.

(h) This regulation does not limit the rights of any parties to the mortgage other than REA or RTB.

Dated: December 21, 1993.

Bob J. Nash,

Under Secretary, Small Community and Rural Development.

BILLING CODE 3410–15–F

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 325

RIN 3064–AB29

Capital Maintenance

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Proposed rule.

SUMMARY: The FDIC is proposing to amend its leverage and risk-based capital standards to conform with the recently-issued Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities" (FASB 115), which requires banks to explicitly recognize net unrealized holding gains and losses on available-for-sale securities in determining the amount of an institution's common stockholders' equity. Since Tier 1 capital is defined to include common stockholders' equity, this proposal, if adopted, would also affect the calculation of Tier 1 capital. The proposal is consistent with recent Call Report guidance issued by the Federal Financial Institutions Examination Council (FFIEC) that requires banks to adopt FASB 115 for Call Report purposes. In addition, the proposed changes would appear to be consistent with the intent of section 37 of the Federal Deposit Insurance Act, which provides that accounting principles applicable to depository institutions should be no less stringent than generally accepted accounting principles (GAAP). Because institutions must adopt FASB 115 for Call Report purposes, recognizing the FASB 115 adjustments for regulatory capital purposes will avoid a regulatory burden that would otherwise arise if the treatment of these unrealized gains and losses for regulatory capital purposes were to differ from the method required for GAAP and Call Report purposes.

DATES: Comments on the proposal must be received by January 28, 1994.

ADDRESSES: All comments should be submitted to Hoyle L. Robinson, Executive Secretary, Attention: Room F–400, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429 or delivered to room F–400, 1776 F Street, NW., between the hours of 9 a.m. and 5 p.m. on business days. Comments will be available for inspection in room 7118, 550 17th Street, NW., Washington, DC between 9 a.m. and 4:30 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: For supervisory purposes, Stephen G. Pfeifer, Examination Specialist (202/898–8904), or Robert F. Storch, Section Chief (202/898–8906), Accounting Section, Division of Supervision; for legal issues, Cristeena G. Naser, Attorney, Legal Division (202/898–3587).

SUPPLEMENTARY INFORMATION:

I. Background

The FDIC's leverage and risk-based capital standards (12 CFR part 325—subpart A and appendix A to part 325) set forth a definition of Tier 1 capital that includes common stockholders' equity. The capital definitions (12 CFR 325.2(d) and section 1.A.1. of appendix A) further explain that common stockholders' equity includes common stock and any related surplus, undivided profits, disclosed capital reserves that represent a segregation of undivided profits, and foreign currency translation adjustments, less unrealized losses on marketable equity securities.

In May 1993, the Financial Accounting Standards Board (FASB) issued FASB 115 which, in effect, changes the calculation of stockholders' equity in financial statements prepared in accordance with GAAP by including as a separate component of equity the amount of net unrealized holding gains and losses on debt and equity securities that are deemed to be available-for-sale.

In addition, in materials accompanying the September 1993 Call Report forms, the FFIEC notified all banks that they must adopt the new FASB 115 accounting standard as of January 1, 1994, or the beginning of their first fiscal year thereafter, if later. Early adoption of this standard is also permitted to the extent allowable under FASB 115.

Call Report instructions that apply prior to the adoption of FASB 115 require a separate capital component only for the net unrealized loss on marketable equity securities, consistent with the provisions of Statement of Financial Accounting Standards No. 12, "Accounting for Certain Marketable Securities" (FASB 12). FASB 115, which supersedes FASB 12, broadens the scope of this separate component of stockholders' equity in that the FASB 115 capital component will include unrealized gains and losses on all securities that are available-for-sale (debt as well as equity), rather than just the net unrealized losses on marketable equity securities.

This new GAAP accounting standard and the conforming Call Report guidance raise the question of how the FASB 115 capital component for unrealized gains and losses on available-for-sale securities should be treated in determining the amount of an institution's regulatory capital under part 325. As a result, the FDIC is proposing to amend its leverage and risk-based capital standards to explicitly recognize net unrealized holding gains and losses on available-for-sale securities in determining the amount of an institution's common stockholders' equity.

This proposed regulatory capital treatment is consistent with the manner in which the FASB 115 capital component will be handled for financial reporting purposes under GAAP and for regulatory reporting purposes in the Call Reports that are filed by banks in accordance with the instructions issued by the FFIEC. Since Tier 1 capital under the FDIC's capital standards is defined to include common stockholders' equity, this proposal, if adopted, would also affect the calculation of Tier 1 capital.

II. Summary of FASB 115 Accounting Requirements

Under the GAAP rules and the Call Report instructions that apply to banks prior to the adoption of FASB 115, the basis of accounting for securities differs, depending on whether the securities are held for investment, held for trading, or held for sale. FASB 115 revises the categories among which depository institutions must divide their securities holdings to held-to-maturity, trading, and available-for-sale, and provides a different accounting treatment for each category.

Held-to-Maturity

The held-to-maturity category supplants the current held-for-investment category, but the accounting basis (i.e., amortized cost) remains the same. FASB 115 permits an institution to include a security in the held-to-maturity category only if the institution has "the positive intent and ability to hold the security to maturity".

Trading Securities

The accounting treatment for trading securities remains unchanged. Trading securities are those debt and equity securities that an institution buys and holds principally for the purpose of selling in the near term. Trading securities will continue to be reported at fair value (i.e., generally market value) with unrealized changes in value (appreciation and depreciation) reported directly in the income statement as a part of the institution's earnings.

Available-for-Sale

Securities in the available-for-sale category are those securities for which the institution does not have the positive intent and ability to hold to maturity, yet does not intend to trade actively as part of its trading account. Under GAAP that exists prior to the adoption of FASB 115, debt securities held for sale have been carried at the lower of cost or fair value, with the offsetting entry reported directly in the income statement. However, securities meeting the new FASB 115 definition of available-for-sale will be reported at fair value, but any changes in the fair value of available-for-sale securities will not be included in the bank's income statement. Rather, the unrealized holding gains and losses on these securities, net of any applicable tax effect, will be reported directly as a separate component of stockholders' equity. Consequently, any unrealized appreciation or depreciation in the value of securities in the available-for-sale category, after adjusting for any applicable tax effects, will increase or decrease an institution's equity capital, respectively, but will have no immediate effect on the reported earnings of the institution.

The available-for-sale category is likely to include more securities than are included in the held-for-sale category it replaces. This is because institutions previously could include in the held-for-investment category securities that banks intended to hold for long-term investment purposes, but for which they may not necessarily have possessed the positive intent and ability to hold to maturity. Under FASB 115, however, a security should not be reported in the held-to-maturity category if, for example, the security may be sold in response to: (1) Changes in market interest rates and related changes in prepayment risk; (2) liquidity needs; (3) changes in the availability of and the yield on alternative investments; (4) changes in funding sources and terms; or (5) changes in foreign currency risk (FASB 115, ¶9).

FASB 115 indicates that certain changes in circumstances may cause an institution to sell or transfer a held-to-maturity security without necessarily calling into question the institution's intent to hold to maturity other securities carried in this category. Such changes in circumstances include, for example, evidence of a significant deterioration in the issuer's creditworthiness, a change in regulatory requirements significantly modifying what constitutes a permissible investment or the maximum level of investments in certain securities, a significant increase in the industry's capital requirements, and a significant increase in the risk weights of debt securities used for risk-based capital purposes. In addition, FASB 115 states that there may be other events that are "isolated, nonrecurring, and unusual" in nature that could not have been reasonably anticipated by management that may cause an institution to sell or transfer securities from the held-to-maturity category without tainting other securities that remain in that category (FASB 115, ¶8).

III. Impact of FASB 115 for Regulatory Capital Purposes

As discussed above, FASB 115 will restrict the circumstances under which securities may be reported at amortized cost. Thus, a greater proportion of an institution's securities may need to be carried at amounts that consider their fair value than in the past. Although the FDIC's proposal to adopt FASB 115 for part 325 capital purposes will not affect reported earnings, it may result in more volatility in the amount of regulatory capital as the net appreciation or depreciation figure for securities in the available-for-sale category changes over time.

Because of the interest rate environment over the past several years, the fair value of many institutions' securities portfolios may exceed book value. Consequently, this proposal, if adopted, would result in an immediate increase in Tier 1 capital for those institutions that have net appreciation in the securities they will designate as available-for-sale when FASB 115 is adopted.

Nonetheless, as the interest rate environment changes over time, some institutions may find that the impact of this proposal could result in lower regulatory capital and possibly additional regulatory restrictions under the prompt corrective action rules (12 CFR part 325—subpart B) and under various other laws and regulations that are based, in part, on the institutions' capital levels.[1]

The volatility arising from changes in the fair value of available-for-sale securities may be minimized if, for example, the institution employs effective asset/liability and interest rate risk management techniques that reduce a bank's exposure to movements in interest rates and related market risks. Further, many institutions maintain capital cushions over and above the minimum capital standards and therefore will be better able to absorb any adverse fluctuations in capital levels that may arise from FASB 115 fair value adjustments.

The proposed changes to the FDIC's capital standards would conform the part 325 capital definitions with the new FASB 115 accounting standard and with the recent notification to banks about the applicability of this standard for Call Report purposes. In addition, the proposed changes would appear to be consistent with the intent of section 37 of the Federal Deposit Insurance Act (12 U.S.C. 1831n), which provides that accounting principles applicable to depository institutions should be no less stringent than GAAP and should: (a) Result in financial statements and reports of condition that accurately reflect the capital of such institutions, (b) facilitate effective supervision of the institutions, and (c) facilitate prompt corrective action at the least cost to the insurance funds. Section 37 also promotes uniformity among the agencies in the accounting standards used to determine compliance with regulatory requirements applicable to depository institutions, including regulatory capital requirements. This proposal has been developed in consultation with the other federal banking agencies to ensure uniformity in the application of FASB 115 for regulatory capital purposes.

Since institutions must adopt FASB 115 for Call Report purposes, recognizing the FASB 115 adjustments for regulatory capital purposes will avoid a regulatory burden that would otherwise arise if the treatment of these unrealized gains and losses for regulatory capital purposes were to differ from the method required for GAAP and Call Report purposes.

The FDIC notes that the decision to propose the adoption of FASB 115 for regulatory capital purposes should not be viewed as an endorsement of a wider application of market value accounting. The FDIC's longstanding concerns that market valuations of many assets are highly subjective and that market value accounting could produce undesirable volatility in earnings are somewhat mitigated in the case of FASB 115, since this accounting standard applies only to certain investment securities having a readily discernible fair value and since unrealized holding gains and losses on available-for-sale securities are reflected directly in capital without affecting reported earnings.

If the proposed part 325 revisions are adopted, FDIC examiners will continue to consider the quality and not just the level of a bank's capital in evaluating capital adequacy. Institutions with available-for-sale securities possessing net unrealized holding gains that comprise a disproportionately large portion of Tier 1 capital may possibly be exposed to excessive levels of interest rate or market risk. These institutions will be expected to maintain capital levels above the minimum regulatory capital standards and commensurate with the institutions' particular risk profiles.

After the federal banking agencies take final action on this proposal, the FDIC intends to consult with the Office of the Comptroller of the Currency, the Federal Reserve Board, and the Conference of State Bank Supervisors concerning the need, if any, for revisions to the "Uniform Agreement on the Classification of Assets and Appraisal of Securities Held by Banks". The FDIC and the other federal and state bank supervisors last revised this joint statement in May 1979. The statement contains guidance on the appraisal of securities in bank examinations, including the effect of appreciation and depreciation in investment securities on regulatory capital.

IV. Issues for Specific Comment

The FDIC invites comments on all aspects of this proposed regulatory capital rule. In addition to other comments that respondents to this proposal may wish to provide, the FDIC requests specific comments on the following:

(1) *Recognition of FASB 115 Capital Adjustments for Regulatory Capital Purposes.* Given the provisions of section 37 of the FDI Act and the other issues discussed in this preamble, should the FASB 115 capital adjustments that institutions are required to reflect for GAAP and Call Report purposes also be taken into consideration for purposes of determining an institution's Tier 1 capital under the FDIC's leverage and risk-based capital standards? If not, what regulatory capital treatment should be applied?

(2) *Effect of FASB 115 Adjustments on Other Capital-Based Regulations.* If the FASB 115 capital adjustments are recognized for purposes of calculating an institution's leverage and risk-based capital ratios, these adjustments may also have an effect on certain other laws and regulations that are based, in part, on regulatory capital levels, including the prompt corrective action rules (12 CFR part 325—subpart B), the risk-related insurance premium system (12 CFR part 327), the brokered deposit restrictions (12 CFR 337.6), and the restrictions on activities and investments of insured state banks (12 CFR part 362), such as the limitations in § 362.3(d)(4) on the book value of certain equity investments as a percent of Tier 1 capital. If the FASB 115 capital adjustments are recognized in calculating an institution's compliance with the minimum leverage and risk-based capital standards, should these adjustments also be recognized for purposes of the other rules noted above that are based, in part, on an

[1] Some of the laws and regulations that may be affected if the proposed revisions are adopted include those dealing with the risk-related insurance premium system (12 CFR part 327), brokered deposit restrictions (12 CFR part 337.6), and restrictions on activities and investments of insured state banks (12 CFR part 362). For example, under § 362.3(d)(4) of the FDIC's regulations, certain equity investments are subject to a maximum permissible investment limitation as a percent of Tier 1 capital. If the FASB 115 adjustments for available-for-sale securities are recognized for regulatory capital purposes, as is being proposed, this would affect the calculation of the amount of additional investments, if any, an insured state bank can make under this limitation. The book value of equity investments and Tier 1 capital are used in computing this amount. The FDIC recognizes that banks whose equity investments under part 362 are already at the maximum may have to adjust their holdings if FASB 115 is adopted for regulatory capital purposes since any upward adjustment to the book value of these securities for unrealized holding gains will be based on the gross amount of unrealized appreciation before considering applicable tax effects whereas the actual increase in Tier 1 capital for this unrealized appreciation will be net of applicable tax effects. In addition, the FDIC notes that state-chartered banks will need to consult with their respective state banking authorities to determine the impact, if any, that FASB 115 may have on the application of state laws and regulations, including legal lending limits.

institution's regulatory capital levels? If not, what treatment should be used for these other regulations?

(3) *Appropriateness of Recognizing FASB 115 Net Appreciation for Regulatory Capital Purposes.* In determining the amount of any FASB 115 adjustment to stockholders' equity for changes in the fair value of available-for-sale securities, FASB 115 as well as the conforming Call Report guidance take into consideration all changes in the fair value of these securities, regardless of whether these changes represent net appreciation or net depreciation. Under the accounting rules that are applicable prior to the adoption of FASB 115, an institution's capital for GAAP and Call Report purposes could not be increased by the amount of any net unrealized appreciation on securities held for sale. Should the regulatory capital treatment for changes in the fair value of securities held in the FASB 115 available-for-sale category differ, depending upon whether the change represents net appreciation or net depreciation? If so, what treatment is appropriate?

V. Regulatory Flexibility Act Statement

The Board of Directors of the FDIC hereby certifies that these amendments to part 325 will not have a significant economic impact on a substantial number of small business entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 et seq). These amendments will not necessitate the development of sophisticated recordkeeping or reporting systems by small institutions nor will small institutions need to seek out the expertise of specialized accountants, lawyers or managers to comply with the regulation. In light of this certification, the Regulatory Flexibility Act requirements (at 5 U.S.C. 603, 604) to prepare initial and final regulatory flexibility analyses do not apply.

VI. Paperwork Reduction Act

No collections of information pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) are contained in this notice. Consequently, no information has been submitted to the Office of Management and Budget for review.

List of Subjects in 12 CFR Part 325

Bank deposit insurance, Banks, Banking, Capital adequacy, Reporting and recordkeeping requirements, State nonmember banks, Savings associations.

For the reasons set forth in the preamble, the Board of Directors of the Federal Deposit Insurance Corporation proposes to amend part 325 of title 12 of the Code of Federal Regulations as follows:

PART 325—CAPITAL MAINTENANCE

1. The authority citation for part 325 continues to read as follows:

Authority: 12 U.S.C. 1815(a), 1815(b), 1816, 1818(a), 1818(b), 1818(c), 1818(t), 1819(Tenth), 1828(c), 1828(d), 1828(i), 1828(n), 1828(o), 1831o, 3907, 3909; Public Law 102–233, 105 Stat. 1761, 1789, 1790 (12 U.S.C. 1831n note); Public Law 102–242, 105 Stat. 2236, 2355, 2386 (12 U.S.C. 1828 note).

2. Section 325.2(d) is revised to read as follows:

§ 325.2 Definitions.

* * * * *

(d) *Common stockholders' equity* means the sum of common stock and related surplus, undivided profits, disclosed capital reserves that represent a segregation of undivided profits, foreign currency translation adjustments, and net unrealized holding gains and losses on available-for-sale securities.

* * * * *

3. In appendix A to part 325, the definition of common stockholders' equity in section I.A.1. is revised to read as follows:

Appendix A to Part 325—Statement of Policy on Risk-Based Capital

I. * * *
A. * * *
1. * * *

—Common stockholders' equity capital (includes common stock and related surplus, undivided profits, disclosed capital reserves that represent a segregation of undivided profits, foreign currency translation adjustments, and net unrealized holding gains and losses on available-for-sale securities);

* * * * *

By order of the Board of Directors.

Dated at Washington, D.C. this 14th day of December, 1993.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 33

[Docket No. 93–ANE–68; Notice No. 33–ANE–07]

Special Conditions; Pratt & Whitney Model(s) PW4073, PW4084, and PW4088 Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for the Pratt & Whitney (PW) Model(s) PW4073, PW4084, and PW4088 turbofan engines. The applicable regulations do not contain adequate or appropriate safety standards for the protection of these systems from water and hail ingestion. This notice proposes the additional safety standards which the Administrator considers necessary to establish a level of safety equivalent to that established by the airworthiness standards of part 33 of the Federal Aviation Regulations (FAR).

DATES: Comments must be submitted on or before February 14, 1994.

ADDRESSES: Comments on this proposal may be submitted in triplicate to: Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attn: Rules Docket No. 93–ANE–68, 12 New England Executive Park, Burlington, Massachusetts 01803–5299. Comments must be marked: docket No. 93–ANE–68. Comments may be inspected at this location between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Thomas Boudreau, Engine and Propeller Standards Staff, ANE–110, Engine and Propeller Directorate, Aircraft Certification Service, FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803–5229; telephone (617) 238–7117; fax (617) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under "ADDRESSES." All communications received on or before the closing date for comments, specified under "DATES," will be considered by the Administrator before taking action on the proposal. The proposal contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed special conditions. all comments submitted will be available in the Rules Docket for examination by interested persons, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this proposal will be filed in the docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 93–ANE–68." The postcard will be date stamped and returned to the commenter.

Background

On December 10, 1990, Pratt & Whitney applied for type certification of Model(s) PW4073 and PW4084 turbofan engines. The Model PW4088 engine was added at a later date. The FAA has determined that the current water and hail ingestion requirements of § 33.77(c) of the FAR do not represent the inclement weather threat encountered in service.

A study of in-service inclement weather events has indicated a need to modify the water and hail ingestion requirements of this section to ensure design integrity and demonstrate an adequate level of safety. This study indicated that a potential flight safety threat existed for engines when operating in severe weather environments. Although current requirements provide adequate validation of the engine's resistance to mechanical damage due to hail impact and case contractions from water ingestion, the study showed that the current standards did not adequately address engine power loss anomalies, such as rollback and flameout at lower than takeoff rated power settings.

The FAA has concluded that additional safety standards must be applied to Pratt & Whitney Model(s) PW4073, PW4084, and PW4088 turbofan engines to demonstrate that they are capable of acceptable operation in severe weather environments.

Type Certification Basis

Under the provisions of § 21.101 of the FAR, Pratt & Whitney must show that Model(s) PW4073, PW4084, and PW4088 turbofan engines meet the requirements of the applicable regulations in effect on the date of the application. Those Federal Aviation Regulations are § 21.21 and part 33, effective February 1, 1965, as amended through August 10, 1990, Amendment 33–14.

The Administrator finds that the applicable airworthiness regulations in Part 33, as amended, do not contain adequate or appropriate safety standards for Pratt & Whitney Model(s) PW4073, PW4084, and PW4088 turbofan engines because of unique design criteria. Therefore, the Administrator proposes these special conditions under the provisions of § 21.16 to establish a level of safety equivalent to that established in the regulations.

Special conditions, as appropriate, are issued in accordance with § 11.49 of the FAR, after public notice and opportunity for comment, as required by §§ 11.28 and 11.29(b), and become part of the type certification basis in accordance with § 21.101(b)(2).

Conclusion

This action affects only Pratt & Whitney Model(s) PW4073, PW4084, and PW4088 turbofan engines. It is not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these new design criteria on the engine.

List of Subjects in 14 CFR Part 33

Air transportation, Aircraft, Aviation safety, Safety.

The authority citation for these special conditions continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421, 1423; and 49 U.S.C. 106(g).

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for the Pratt & Whitney Model(s) PW4073, PW4084, and PW4088 turbofan engines.

In addition to the requirements of FAR § 33.77, the following tests and analyses must be conducted, unless compliance can be shown by alternate methods acceptable to the Administrator.

(a) The most critical operating point(s) for water and hail ingestion must be determined by test, analysis, or other acceptable methods, and must be based on the threat levels defined in Table 1 and Table 2 of this proposal. The critical point(s) determination must address the entire operating envelope of the engine. The critical operating point(s) is defined as those operating conditions within the engine flight envelope at which an engine operability margin is reduced to a minimum level.

TABLE 1.—RAIN THREAT

Altitude (feet)	Liquid water content (LWC) (grams water per cubic meter air)
0	20.0
20,000	20.0
26,300	15.2
32,700	10.8
39,300	7.7
46,000	5.2

Note: LWC and HWC values at other altitudes may be determined by linear interpolation.

TABLE 2.—HAIL THREAT

Altitude (feet)	Hail water content (HWC) (grams water per cubic meter air)
0	8.9
7,300	8.9
8,500	9.4
10,000	9.8
11,000	9.9
12,000	10.0
15,000	10.0
16,000	8.9
17,700	7.8
19,300	6.6
21,500	5.6
24,300	4.4
29,000	3.3
46,000	3.3

Note: LWC and HWC values at other altitudes may be determined by linear interpolation.

(b) The engine will be shown to operate at an acceptable level for a minimum of three minutes when subjected to the critical point conditions for water ingestion. The percentage of water to airflow by weight, at the critical point, is to be reproduced during the engine test. The test method should adequately model the inflight water concentration effect at the primary flow (core) inlet. Water droplet size and velocity distributions must be representative of the critical water ingestion point. All variable systems, whose position could effect engine operation during water ingestion, must be scheduled for the most critical positions.

(c) The engine will be shown to operate at an acceptable level for a minimum of 30 seconds when subjected to the critical point conditions for hail

ingestion. The percentage of hail to airflow by weight, at the critical point, is to be reproduced during the engine test. The test should adequately model the inflight hail concentration effect at the primary flow (core) inlet. Hailstone size and velocity distributions must be representative of the critical hail ingestion point. All variable systems whose position could effect engine operation during hail ingestion, must be scheduled for the most critical positions.

(d) Acceptable engine operation, as noted in paragraphs (b) and (c) of the this special condition, must preclude rundown, flameout, surge, loss of acceleration capability, limit exceedance, or any other engine anomaly which would negatively affect the operability of the engine.

(e) The engine, as operated under the conditions defined in paragraphs (b) and (c) of this special condition, must show that it will operate acceptably if exposed to other probable factors associated with normal operations. These other probable factors include, but are not limited to, performance losses, installation effects, inlet distortion, and throttle transients.

Issued in Burlington, Massachusetts, on December 20, 1993.

Jay J. Pardee,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 93–NM–210–AD]

Airworthiness Directives; Airbus Industrie Model A320–111, –211, and –231 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Airbus Model A320–111, –211, and –231 airplanes. This proposal would require modification of the currently installed one-stage shock absorbers on the main landing gear to two-stage shock absorbers. This proposal is prompted by the results of an evaluation of the air-to-ground sensing logic relative to the operation of other airplane systems during landing in adverse weather conditions. The actions specified by the proposed AD are intended to prevent a delay in sensing by the air-to-ground logic system that the airplane is on the ground, which could prevent the airplane from achieving the landing distances specified in the FAA-approved Airplane Flight Manual (AFM).

DATES: Comments must be received by February 24, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–210–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Stephen Slotte, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2797; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–NM–210–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–210–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056

Discussion

Recently, the FAA conducted an evaluation of the air-to-ground sensing logic relative to the operation of other airplane systems while landing during adverse weather conditions. The results of this evaluation indicated that under certain landing conditions the extension of the ground spoilers (also the application of auto-brakes and thrust reverser deployment) may be delayed due to a delay by the air-to-ground logic system to sense that the airplane is on the ground.

One of the major components of the air-to-ground logic system is the Spoilers Elevator Computers (SEC). Model A320 series airplanes use SEC's to provide the signal that controls deployment and retraction of hydraulically actuated speed brakes (flight spoilers) and ground spoilers. The SEC's must receive input signals with specific characteristics that meet certain criteria, prior to commanding movement of the speed brakes or ground spoilers.

Three different SEC's control a total of five pairs of spoilers on the left- and right-hand wings. Ground spoilers utilize all five pairs of spoilers, while the speed brakes utilize only three pairs of spoilers. Prior to commanding the deployment of ground spoilers upon landing, the SEC's must properly sense a "flight to ground transition." The following logic criteria must be met: Both main landing gears (MLG) wheel speed must be greater than 72 knots; or the radio altimeter height must be less than 10 feet, and both the left- and right-hand MLG shock absorbers must be compressed by an amount equivalent to a specified weight on the landing gear. (There are other signals the SEC's must receive prior to ground spoiler deployment, but they are not pertinent to this discussion.) If wheel speed is less than 72 knots or if proper load is not sensed on the MLG shock absorbers, extension of the ground spoilers would be inhibited.

Model A320 series airplanes on which Airbus Modification No. 22150 (double chamber MLG oleo), described in Airbus Industrie Service Bulletin A320–32–1058, Revision 2, dated June 16, 1993, has not been installed, must have a load of 6.3 tons per oleo to trigger the ground signal.

Landing conditions exist where the SEC may inhibit extension of the grounds spoiler even though the ground spoilers are needed to achieve the landing distances specified in the FAA-approved Airplane Flight Manual (AFM). The reason for the inhibition can be traced to the input signals that the SEC's receive. During adverse weather, landing conditions could exist where wheel speed may not initially reach 72 knots and sufficient load on the MLG shock absorbers may not be present to trigger the ground signal. Thus, the ground spoilers would not be deployed until these conditions are met. If "CONFIG FULL" (flaps/slats fully deployed) is selected, the in-flight deployment of speed brakes (flight spoilers) would be inhibited due to current system design requirements. To deploy the speed brakes, the airplane must be in a configuration other than "CONFIG FULL."

This condition, if not corrected, could result in a delay of sensing by the air-to-ground logic system that the airplane is on the ground, which could prevent the airplane from achieving the landing distances specified in the FAA-approved AFM.

Airbus Industrie has issued Service Bulletin A320–32–1058, Revision 2, dated June 16, 1993, that describes procedures for modification of the currently installed one-stage shock absorbers on the MLG to two-stage shock absorbers. The two-stage shock absorbers significantly reduce the load on the MLG that is necessary to trigger the ground signal. After modification, a load of about 2 tons per oleo is needed to trigger the ground signal. Under certain landing conditions, this decrease in the MLG load that is necessary to trigger the ground signal could allow earlier deployment of the ground spoilers, and consequently allow the airplane to achieve the landing distances specified in the FAA-approved AFM.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. The FAA has reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require modification of the currently installed one-stage shock absorbers with two-stage shock absorbers. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 35 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 58 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would cost approximately $16,000 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $671,650, or $19,190 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 93–NM–210–AD.

Applicability: Model A320–111, –211, and –231 airplanes, as listed in Airbus Industrie Service Bulletin A320–32–1058, Revision 2, dated June 16, 1993, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent a delay in sensing by the air-to-ground logic system that the airplane is on the ground, which could prevent the airplane from achieving the landing distances specified in the FAA-approved Airplane Flight Manual (AFM), accomplish the following:

(a) Within 12 months after the effective date of this AD, modify the currently installed one-stage shock absorbers to two-stage shock absorbers in accordance with Airbus Industrie Service Bulletin A320–32–1058, Revision 2, dated June 16, 1993.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 22, 1993.

Ronald T. Wojnar,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93–31744 Filed 12–28–93; 8:45 am]

BILLING CODE 4910–13–P

14 CFR Part 39

[Docket No. 93–NM–170–AD]

Airworthiness Directives; Boeing Model 737–100, –200, and –200C Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to revise an existing airworthiness directive (AD), applicable to all Boeing Model 737–100, –200, and –200C series airplanes, that currently requires periodic inspections to detect missing nuts and/or damaged secondary support hardware adjacent to the engine aft mount, and replacement, if necessary. This action would provide for an optional terminating action, which, if accomplished, would eliminate the need for certain inspections. This proposal is prompted by the development of a modification that will prevent wearing of the secondary support. The actions specified by the proposed AD are intended to prevent failure of the secondary support to sustain engine loads, in the event of failure of the aft engine mount cone bolt, which could result in engine separation from the wing.

DATES: Comments must be received by February 24, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–170–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Thomas Rodriguez, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2779; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–NM–170–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–170–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On April 5, 1991, the FAA issued AD 91–09–14, Amendment 39–6972 (56 FR 18696, April 24, 1991), applicable to all Boeing Model 737–100, –200, and –200C series airplanes, to require periodic inspections to detect missing nuts and/or damaged secondary support hardware adjacent to the engine aft mount, and replacement, if necessary. That AD also allows certain worn secondary support load limiter through-bolts to continue to be used on the airplane, if alternative inspection techniques are used for the cone bolt itself. That action was originally prompted by reports of failure of aft engine mount cone bolts which, in one case, led to the separation of an engine from the airplane. The requirements of that AD are intended to prevent failure of the secondary support to sustain engine loads, in the event of failure of the aft engine mount cone bolt, which could result in engine separation from the wing.

Since the issuance of that AD, the manufacturer has developed design changes that will prevent wearing of the secondary support. Worn parts of the secondary support system could lead to failure of the secondary support system, if fatigue fracture should occur in the aft engine mount cone bolt. The FAA has reviewed and approved Boeing Service Bulletin 737–71–1289, dated August 19, 1993, that describes procedures for replacement of the currently-installed secondary support with a new, modified secondary support. The modified secondary support has been revised with the latest design configuration that will prevent wearing of the secondary support, in the event of failure of the aft engine mount cone bolt, which could result in engine separation from the wing.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would revise AD 91–09–14 to continue to require periodic inspections to detect missing nuts and/or damaged secondary support hardware, and replacement, if necessary. The proposed AD would also continue to allow certain worn secondary support load limiter through-bolts to continue to be used on the airplane, if alternative inspection techniques are used for the cone bolt itself. Additionally, the proposed AD would provide for replacement of the existing aft engine mount secondary support with a new, modified secondary support, as optional terminating action for certain requirements of this AD. If accomplished, such replacement would eliminate the need for the inspections currently required by the AD, with the exception of the inspections to detect broken aft cone bolts required by paragraph (a)(1). The replacement of the secondary support would be required to be accomplished in accordance with the service bulletin described previously.

The format of the proposed revised AD has been revised to be consistent with the **Federal Register** style.

There are approximately 1,144 Model 737 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 432 airplanes of U.S. registry would be affected by this proposed action.

The actions currently required by AD 91–09–14 take approximately 3 work hours per airplane to accomplish, at an average labor rate of $55 per work hour. Based on these figures, the total cost impact of the currently required actions on U.S. operators is estimated to be $71,280, or $165 per airplane

This proposed revision of AD 91–09–14 would add no new additional costs to operators, since it would merely provide for an optional installation that would provide terminating action for certain requirements. Should an operator elect to accomplish the installation, the associated modification would take approximately 30 work hours per airplane to accomplish The average labor rate is $55 per work hour

Required parts would cost approximately $6,818 per airplane. Based on these figures, the total cost of accomplishing the proposed optional installation is estimated to be $8,468 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–6972 (56 FR 18696, April 24, 1991), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 93–NM–170–AD. Revises AD 91–09–14, Amendment 39–6972.

Applicability: All Model 737–100, –200, and 200C series airplanes, certificated in any category

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the secondary support to sustain engine loads, in the event of failure of the aft engine mount cone bolt, which could result in engine separation from the wing, accomplish the following:

(a) Within the next 45 landings after May 20, 1991 (the effective date of AD 91–09–14, amendment 39–6972), accomplish the following:

(1) Inspect the aft mount cone bolt indicator for proper alignment. Improper alignment indicates a broken aft cone bolt. Broken cone bolts must be replaced, prior to further flight, with bolts that have been inspected in accordance with Boeing Alert Service Bulletin 737–71A1212, dated December 22, 1987, using magnetic particle inspection techniques. Repeat the inspection of the indicator at intervals thereafter not to exceed 45 landings.

(2) Unless previously accomplished within the last 255 landings, inspect the aft mount cone bolt improved secondary support for missing nuts, evidence of bolt wear, and disbonded honeycomb core in accordance with Boeing Service Bulletin 737–71–1250, dated June 14, 1990. Except as provided in paragraph (b) of this AD, missing nuts, bolts worn outside the limits specified in the service bulletin, or disbonded honeycomb core must be replaced, prior to further flight, with new or repaired identical parts. Repeat the inspection at intervals not to exceed 300 landings.

(b) Perform the following inspections if discrepant hardware is found during the inspections required by paragraph (a)(2) of this AD, and replacement hardware is not immediately available:

(1) Prior to further flight, and thereafter at intervals not to exceed 300 landings, inspect for cracks in the aft engine mount cone bolt, in accordance with Boeing Alert Service Bulletin 737–71A1212, dated December 22, 1987, using ultrasonic inspection techniques. Replace cracked cone bolts, prior to further flight, with bolts that have been inspected in accordance with the above service bulletin, using magnetic particle inspection techniques. Replacement (newly installed) cone bolts must be ultrasonically inspected for internal cracking in accordance with the provisions of this paragraph at intervals not to exceed 300 landings.

(2) At the next ultrasonic inspection, as required by paragraph (b)(1) of this AD, unless previously accomplished within 150 to 300 landings after cone bolt installation, accomplish a torque check to verify that the cone bolt is torqued to the proper torque limit specified in the appropriate Boeing maintenance manual. This check is to be accomplished without loosening the bolt. After every cone bolt installation, accomplish the torque check procedure required by this paragraph, between 150 landings and 300 landings following installation. Replacement of discrepant hardware in accordance with paragraph (a)(2) of this AD constitutes terminating action for the requirements of this paragraph.

(i) If the cone bolt torque is below one-half the specified torque, remove the cone bolt and replace it with a serviceable bolt.

(ii) If the cone bolt torque is equal to, or above one-half the specified torque, but below the specified torque, re-torque to the specified level and re-check the torque within the next 150 to 300 landings. If, at that time, the torque is below 90 percent of the specified torque, replace the cone bolt with a serviceable bolt.

(c) Replacement of the existing aft engine mount secondary support with a new, modified secondary support, Kit Number 65C37057–1, in accordance with Boeing Service Bulletin 737–71–1289, dated August 19, 1993, constitutes terminating action for the inspections required by paragraphs (a)(2) and (b), (b)(1), and (b)(2) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 22, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93–31745 Filed 12–28–93; 8:45 am]

BILLING CODE 4910–13–P

14 CFR Part 39

[Docket No. 93–NM–188–AD]

Airworthiness Directives; Canadair Model CL–600–2A12 (CL–601) and CL–600–2B16 (CL–601–3A) Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Canadair Model CL–600–2A12 and CL–600–2B16 series airplanes. This proposal would require a one-time visual inspection to verify proper installation of shoulder bolts and to detect damage of the adjacent flap actuator housings, and correction of discrepancies. This proposal is prompted by a report of failure of the flap actuator on the left wing inboard flap. The actions specified by the proposed AD are intended to prevent

asymmetric deployment or retraction (blow back) of the flaps, which could reduce controllability of the airplane.

DATES: Comments must be received by February 24, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–188–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Bombardier, Inc., Canadair, Aerospace Group, P.O. Box 6087, Station A, Montreal, Quebec H3C 3G9, Canada. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Danko Kramar, Aerospace Engineer, Systems and Equipment Branch, ANE–173, FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516) 791–6428; fax (516) 791–9024.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–NM–188–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–188–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

Transport Canada Aviation, which is the airworthiness authority for Canada, recently notified the FAA that an unsafe condition may exist on certain Canadair Model CL–600–2A12 (CL–601) and CL–600–2B16 (CL–601–3A) series airplanes. Transport Canada Aviation advises that a report has been received of failure of the flap actuator on the left wing inboard flap at Wing Station 76.50 on one of these airplanes. Subsequent investigation revealed that the ball screw assembly on the flap actuator broke into two pieces approximately ½ inch from the shoulder bolt and gearbox housing. The cause of the breakage apparently has been attributed to improper installation of the shoulder bolt that secures the flap actuator trunnion block to the wing trailing edge.

Improper installation of the shoulder bolt could also cause overloading of the ball screw assembly and damage of the gearbox housing, which could result in failure of both actuators on the same flap. If the actuators fail, possible asymmetric deployment or retraction (blow back) of the flaps could occur, which could reduce the controllability of the airplane.

Canadair has issued Alert Service Bulletin A601–0415, dated June 25, 1993, that describes procedures for:

1. Performing a one-time visual inspection to verify proper installation of shoulder bolts and to detect damage of adjacent flap actuator housings;
2. Reinstalling improperly installed shoulder bolts;
3. Performing an eddy current or dye penetrant inspection to detect cracking of the hinge fitting lugs on the flap actuator;
4. Replacing cracked lugs with new or serviceable parts; and
5. Replacing shoulder bolts and damaged flap actuators with new or serviceable parts.

Transport Canada Aviation classified this service bulletin as mandatory and issued Canadian Airworthiness Directive CF–93–18, dated July 23, 1993 in order to assure the continued airworthiness of these airplanes in Canada.

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, Transport Canada Aviation has kept the FAA informed of the situation described above. The FAA has examined the findings of Transport Canada Aviation, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require a one-time visual inspection to verify proper installation of shoulder bolts, and to detect damage of adjacent flap actuator housings. Correction of any discrepancy found would be required prior to further flight. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 196 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed visual inspection, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $10,780, or $55 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

If replacement of any hinge fitting lug, shoulder bolt, or flap actuator is necessary, accomplishment of such replacement would entail approximately 12 work hours, at an average labor rate of $55 per work hour Required parts would be provided by the manufacturer at no cost to the operator. Based on these figures, the total cost of any necessary replacement is estimated to be $660 per replaced item.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Canadair: Docket 93–NM–188–AD.

Applicability: Model CL–600–2A12 series airplanes, serial numbers 3002 through 3066, inclusive; and Model CL–600–2B16 series airplanes, serial numbers 5001 through 5131, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent asymmetric deployment or retraction (blow back) of the flaps, which could reduce the controllability of the airplane, accomplish the following:

(a) Within 30 days after the effective date of this AD, conduct a visual inspection to verify the proper installation of shoulder bolts, and to detect damage of adjacent flap actuator housings, in accordance with Canadair Alert Service Bulletin A601–0415, dated June 25, 1993 (hereafter referred to as "the alert service bulletin").

Note: Inspections accomplished prior to the effective date in accordance with Canadair Alert Service Wire TA601–0415–036, dated May 3, 1993, are considered to be in compliance with this paragraph.

(b) If all shoulder bolts are found to be installed properly and no flap actuator housings are found to be damaged, no further action is required by this AD.

(c) If any shoulder bolt is found to be improperly installed, but no flap actuator housing is found to be damaged, prior to further flight, remove the improperly installed shoulder bolt and reinstall it in accordance with the alert service bulletin.

(d) If any flap actuator housing is found to be damaged (as defined in the alert service bulletin), prior to further flight, accomplish the requirements of paragraphs (d)(1) and (d)(2) of this AD:

(1) Perform either an eddy current inspection or a dye penetrant inspection to detect cracking of the hinge fitting lugs on the flap actuator in accordance with the alert service bulletin. If any cracking is detected, prior to further flight, replace the hinge fitting lug with new or serviceable parts in accordance with the alert service bulletin.

(2) Replace the shoulder bolt and damaged flap actuator with new or serviceable parts in accordance with the service bulletin.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 22, 1993.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Food Labeling; Health Claims for Dietary Supplements; Correction

AGENCY: Food And Drug Administration, HHS.

ACTION: Proposed rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a proposed rule that appeared in the **Federal Register** of October 14, 1993 (58 FR 53296). The document proposed not to authorize health claims relating to an association between fiber and cancer, fiber and heart disease, antioxidant vitamins and cancer, *omega*-3 fatty acids and coronary heart disease, and zinc and immune function in the elderly on the label or in the labeling of dietary supplements of vitamins, minerals, herbs, or other similar nutritional substances. The document was published with some errors. This document corrects those errors.

DATES: Written comments by December 13, 1993.

FOR FURTHER INFORMATION CONTACT: LaJuana D. Caldwell, Office of Policy (HF–27), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–2994.

In FR Doc. 93–25029, appearing on page 53305, in the **Federal Register** of Thursday, October 14, 1993, the following corrections are made:

§ 101.71 [Corrected]

1. On page 53305, in the 3d column, beginning in line 2, amendatory instruction number 2, is corrected by removing the phrase "of paragraph (a)", and in line 7, the paragraph designation "(a)" is removed from § 101.71 introductory text.

Dated: December 22, 1993.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160–01–F

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 42

[Public Notice 1925]

Visas; Documentation of Immigrants Under the Immigration and Nationality Act, as Amended

AGENCY: Bureau of Consular Affairs, Department of State.

ACTION: Notice of proposed rule.

SUMMARY: This notice proposes regulations to implement sections 201(a)(3), 201(e), 203(c), 203(e)(2), and 204(a)(1)(G) of the Immigration and Nationality Act, as amended. These sections were added to the Act by Public Law 101–649, the Immigration Act of 1990, but with a delayed effective date. Taken together, these sections of

law establish, effective for Fiscal Year 1995 and thereafter, an annual numerical limitation of 55,000 for diversity immigrants. Aliens who are natives of countries determined by specified mathematical computations based upon population totals and totals of specified immigrant admissions over a five-year period will be able to compete for immigration under this limitation.

Selection of immigrants under this limitation will be at random from among those who submit petitions for consideration during application periods established by the Department and who meet certain requirements as to education or occupational qualification.

DATES: Written comments must be received on or before January 28, 1994.

ADDRESSES: Interested persons are invited to submit comments in duplicate to: Director, Office of Legislation, Regulations, and Advisory Assistance, Visa Office, Department of State, Washington, DC 20522–0113.

FOR FURTHER INFORMATION CONTACT: Cornelius D. Scully, III, Director, Office of Legislation, Regulations, and Advisory Assistance, (202) 663–1184.

SUPPLEMENTARY INFORMATION:

General

Among the major revisions to United States immigration law contained in the Immigration Act of 1990, Public Law 101–649, was the establishment of a permanent system for the selection of immigrants on an at-random basis from among aliens meeting certain requirements who petition for consideration during specified annual application periods. A comparison of the provisions applicable here with those of certain earlier temporary enactments—section 314 of Public Law 99–603 (the NP–5 program), section 3 of Public Law 100–658 (the OP–1 program) and section 132 of Public Law 101–649 (the AA–1 program)—indicates that, both conceptually and operationally, these provisions are modeled upon the earlier ones. There are, however, important differences as well. Where the statutory provisions applicable here track provisions in the earlier enactments, the regulatory provisions based upon them will generally track earlier regulatory provisions.

Numerical Limitations

Section 201(e) specifies that the annual limitation on immigration under section 203(c) shall be 55,000. Section 203(c)(1) establishes a very complex system for the apportionment of the total limitation. The world is divided into six regions for this purpose—Africa, Asia, Europe, North America (other than Mexico), Oceania, and South America (including Mexico, Central America and the Caribbean).

The Attorney General is required to determine total admissions of preference and immediate relative immigrants over the most recent five-year period for which statistics are available, world-wide, by region and by individual foreign state. Using these figures, the Attorney General is to identify both high admission regions and high admission foreign states. A region whose admissions total is greater than one-sixth of the world-wide total is a high admission region; a region whose admissions total is one-sixth or less of the world-wide total is a low admission region. A foreign state whose admissions total is greater than 50,000 is a high admission foreign state; a foreign state whose admissions total is 50,000 or less is a low admission foreign state.

The Attorney General is next required to determine (using available estimates) the population of each of the six regions (not including the population of any high admission foreign state located in that region) and to use those totals in determining the apportionment of the world-wide limitation of 55,000 among the six regions. The mathematical computations involved are rather complicated, but the underlying objective is to ensure that a greater share of the 55,000 total is apportioned to low admission regions than to high admission regions. In effect, there will be established quotas for each of the six regions and natives of each region will compete for that portion of the total established as the quota for that region. There is, in addition, however, a provision allowing for the unused portion (if any) of a regional quota to be distributed proportionally among the other regions.

Only two provisions specifically address the apportionment of the limitation among individual foreign states. First, high admission states are excluded entirely from the apportionment. Second, there is a limit of 7 percent of the world-wide total—3,850—on the use of visas by natives of any single foreign state.

The Department does not propose to include in its regulations detailed provisions regarding the determinations described above and does not intend to discuss them in greater detail than given above. Section 203(c) imposes upon the Attorney General, not the Secretary of State, the responsibility for making these calculations and determinations. The Department is informed that the Immigration and Naturalization Service has undertaken this task. That Service will transmit its determinations and calculations to the Department when they are completed. The Department envisions that they will have been received by the time the final rule is ready for promulgation and will include them in the Supplementary Information which will accompany the final rule, as well as giving them appropriate public dissemination through other established means.

Eligibility To Compete

As has been explained above, section 203(c) provides that the number of visas to be made available to natives of high admission countries is zero. For this reason, the Department proposes to prohibit natives of such countries from competing for selection.

It will be noted that the list of such countries may change from year to year since the basis for determining which countries are high admission countries is the total of immediate relative and preference immigrant admissions for the most recent five-year period for which statistics are available. Thus, the Service will have to make the determinations required by statute annually.

The Department is taking this occasion to incorporate the definition of "native" into its permanent regulations. For many years, there was no regulatory definition of this word. In 1991, the Department decided to include one in the regulations promulgated at part 43 of title 22, Code of Federal Regulations, to implement section 132 of Public Law 101–649—the AA–1 program. Those regulations are, however, temporary in character because section 132 is itself limited to a three-year period.

The definition was included in part 43 because of the great volume of questions about the word "native". Part 43 will be repealed in due course, once the final year of the AA–1 program has been completed, and the Department believes it is desirable to establish the definition of "native" on a permanent basis. Substantively, the proposed definition here is identical with that already promulgated in part 43.

Education or Work Experience

Section 203(c)(2) disqualifies from receiving a diversity visa any alien who does not have either a high school education or its equivalent or two years experience (within the five-year period immediately preceding the date of visa application) in an occupation requiring two years or more for qualification in the occupation.

The Department proposes to interpret the phrase "high school education or its equivalent" to apply only to courses of

study. As the Department sees it, the separate provision for qualification on the basis of work experience reflects an intent that this phrase be so interpreted. With respect to the question whether an alien's work experience meets the statutory requirement, the Department proposes to rely upon the "Dictionary of Occupational Titles", published by the Employment and Training Administration of the Department of Labor.

Operationally, the Department saw three possible ways to implement this requirement—(1) require competitors for selection to include documentation of their education or work experience with their applications for selection; (2) require applicants for selection to attest to their education or work experience when applying for selection but require corroborating documents only at the time of visa interview and, therefore, only for those selected; or (3) ignore the requirement entirely in the selection process and deal with the requirement only through the visa processing system and only for those selected.

While the first two alternatives have certain benefits, the operational burdens which would result from adoption of either of them made it necessary to turn to the third alternative. Accordingly, the Department is proposing that applicants for selection not be required to include any information as to their education or work experience in their petition for selection. That information and corroborating documents would be required only of those selected and submitted for review only as part of the formal application for an immigrant visa.

Location of Alien

The Department wishes to answer before it is asked a question which will undoubtedly arise in the minds of those having an interest in this program—whether competition in this program is limited to aliens in the United States or outside the United States. As was the case with the predecessor programs already mentioned above, there is no restriction in this respect on competition. Aliens who otherwise meet the requirements for competition may compete whether they are in the United States or in a foreign country. Moreover, an alien who is in the United States need not be in lawful status to compete.

Form of Application

Those familiar with the predecessors of this program—the NP–5, OP–1, and AA–1 programs—will recall that the Department did not create a formal application form for use by those wishing to compete for selection in those programs. After considering this question again in this connection, the Department has again concluded that a formal application form should not be created. While there are factors in this program which would support creation of a petition form, theologistical and other operational problems associated with the creation, printing and distribution world-wide of a petition form argued strongly against doing so.

Accordingly, the Department is proposing that the petition be, as has been the case in the predecessor programs, a blank sheet of paper on which the petitioner will type or legibly print, using the Roman alphabet, his or her name, date and place of birth, and current mailing address. A married petitioner will include the name and date and place of birth of the spouse and of any children.

Mail-in Periods

The Department contemplates that the annual application period will last about one month. The application period for selection for fiscal year 1995 will likely be held in the spring or early summer of 1994 in order to ensure time for the selection of applicants and their notification in time to permit the commencement of visa issuance in the first month of fiscal year 1995 (October 1994).

Mail-in and Selection Process and Requirements

The mail-in and selection processes will be very similar to those employed in the OP–1 program and the last two years of the AA–1 program, but with one important difference. To facilitate the automated processing of the envelopes, the Department is proposing to require that they be between 6 and 9 inches (15 cm to 24 cm) in length and between 3½ and 4½ inches (9 cm to 11 cm) in width, as has been done in the past. As was also the case with the OP–1 and AA–1 programs, envelopes received at the designated address during the mail-in period will be reviewed as received and those meeting the regulatory requirements will be numbered sequentially.

It is here that the procedure must vary from that followed in the OP–1 and AA–1 programs. Because of the establishment of regional quotas, there will have to be a separate numbering sequence for each region in order to ensure that natives of each region are competing only with each other and not with natives of other regions. The Department intends to use numbering sequences as follows—Africa 00,000,001—19,999,999; Asia 20,000,000 39,999,999; Europe 40,000,000—59,999,999; South America 60,000,000—79,999,999; Oceania 80,000,000—89,999,999; North America 90,000,000—99,999,999. The computer program to be used for the actual selection process will have to make six distinct selections, one for each region.

The Department wishes to emphasize the importance of one seemingly minor requirement—that the alien include on the mailing envelope the name of the country of which the alien is a native Because of the need to sort the envelopes into six groups according to region, identification of the country of which the alien is a native on the envelope becomes indispensable. Accordingly, the Department will set aside and give no further consideration to any envelope which does not bear this information.

Once the envelopes have been sorted and numbered, the computer program will be activated to generate at random the rank order for each region. Thereafter, an appropriate quantity of envelopes identified according to rank order will be opened. The petitions will be reviewed to ensure that each applicant has furnished the necessary information. Those who have not done so will receive no further consideration. For those who have, the processing of the selected applications will be similar to that carried out in the recent AA–1 program.

A notice of selection will be sent to each applicant at the mailing address specified. Instructions for further action will be included with the notice. As has been the case in the predecessor programs, applicants in the United States who meet the requirements for adjustment of status generally will have the option of applying for adjustment of status. Those outside the United States or who, although in the United States, are barred from adjustment of status will have to process their application through the consular office designated.

Also, the Department proposes to make technical amendments to 22 CFR 42.51(b), Allocation of numbers, and 22 CFR 42.54(a)(2), Order of consideration. The proposed technical amendments are designed solely to make the two sections conform more exactly to the statutory requirements for the administration of the numerical limitations applicable to Diversity Immigrants.

Finally, the Department proposes to add a new § 40.104 to part 40 in order to provide an appropriate regulatory basis for the refusal of an application under INA 203(c) because the applicant does not meet either the education or work experience requirement provided in INA 203(c)(2).

This final rule is not expected to have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. In addition, this rule does not impose information collection requirements under the provisions of the Paperwork Reduction Act of 1980. This rule has been reviewed as required by E.O. 12778 and certified to be in compliance therewith. It has also been reviewed under E.O. 12866 and determined to be consistent therewith.

List of Subjects in 22 CFR Parts 40 and 42

Aliens, Definitions, Documentation, Immigrants, Numerical limitations, Registration, Visas.

Accordingly, it is proposed to amend 22 CFR parts 40 and 42 as follows:

PART 40—[AMENDED]

1. The authority citation for part 40 would continue to read:

Authority: Sec. 104, 66 Stat. 174, 8 U.S.C. 1104; Sec. 109(b)(1), Sec. 131 of Public Law 101–649, 104 Stat. 4997

2. Sec. 40.1 is amended by redesignating paragraphs (l) through (r) as paragraphs (m) through (s), respectively, and by adding a new paragraph (l) to read as follows:

§ 40.1 Definitions.

* * * * *

(l) *Native* shall mean born within the territory of a foreign state, or entitled to be charged for immigration purposes to that foreign state pursuant to section 202(b) of the Immigration and Nationality Act, as amended."

3. Part 40 is further amended by adding a new § 40.104 to subpart K read as follows:

§ 40.104. Applicant for immigrant visa under INA 203(c).

An alien shall be ineligible to receive a visa under INA section 203(c) if the alien does not have a high school education or its equivalent, as defined in 22 CFR 42.33(a)(2), or does not have, within the five years preceding the date of application for such visa, at least two years of work experience in an occupation which requires at least 2 years of training or experience.

PART 42—[AMENDED]

3. The authority citation for part 42 is revised to read:

Authority: Sec. 104, 66 Stat. 174, 8 U.S.C. 1104; Sec. 109(b)(1); 91 Stat. 847; Sec. 131, 104 Stat. 4997, 8 U.S.C. 1153 note

4. Sec. 42.33 is added to read as follows:

§ 42.33 Diversity immigrants.

(a) *General.* (1) *Eligibility to compete for consideration under INA 203(c)* An alien shall be eligible to compete for consideration for visa issuance under INA 203(c) during a fiscal year only if he or she is a native of a low-admission foreign state, as determined by the Attorney General pursuant to INA 203(c)(1)(E)(i), with respect to the fiscal year in question; and if he or she has at least a high school education or its equivalent or, within the five years preceding the date of application for a visa, has two years of work experience in an occupation requiring at least two years training or experience.

(2) *Definition of "high school education or its equivalent."* For the purposes of this section, the phrase "high school education or its equivalent" shall mean successful completion of twelve years of elementary and secondary education in the United States or successful completion in another country of a formal course of elementary and secondary education comparable to completion of twelve years' elementary and secondary education in the United States.

(3) *Determinations of work experience.* The most recent edition of the "Dictionary of Occupational Titles" published by the Employment and Training Administration, United States Department of Labor, shall be controlling in determining whether a particular occupation is one "which requires at least 2 years of training or experience" as provided in INA 203(c)(2).

(4) *Limitation on number of petitions per year* No more than one petition may be submitted by, or on behalf of, any alien for consideration during any single fiscal year. If two or more petitions for any single fiscal year are submitted by, or on behalf of, any alien, all such petitions shall be void and the alien by or for whom submitted shall not be eligible for consideration for visa issuance during the fiscal year in question.

(5) *Northern Ireland.* For purposes of determining eligibility to file a petition for consideration under INA 203(c) for a fiscal year, the districts comprising that portion of the United Kingdom of Great Britain and Northern Ireland, known as "Northern Ireland" shall be treated as a separate foreign state. The districts comprising "Northern Ireland" are Antrim, Ards, Armagh, Ballymena, Ballymoney, Banbridge, Belfast, Carrickfergus, Castlereagh, Coleraine, Cookstown, Craigavon, Down, Dungannon, Fermanagh, Larne, Limavady, Lisburn, Londonderry, Magherafelt, Moyle, Newry and Mourne Newtownabbey, North Down, Omagh, and Strabane.

(b) *Petition for consideration*—(1) *Form of petition.* An alien claiming to be entitled to compete for consideration under INA 203(c) shall file a petition for such consideration. The petition shall consist of a sheet of paper on which shall be typed or legibly printed in the Roman alphabet the petitioner's name; date and place of birth (including city and county, province or other political subdivision, and country); name[s] and date[s] and place[s] of birth of spouse and child[ren], if any; and a current mailing address.

(2) *Submission of petition*—(i) *General.* A petition for consideration for visa issuance under INA 203(c) shall be submitted by mail to the address designated by the Department for that purpose. The Department shall establish a period of not less than thirty days during each fiscal year during which petitions for consideration during the next following fiscal year may be submitted. Each fiscal year, the Department shall give timely notice of both the mailing address and the exact dates of the application period, through publication in the **Federal Register** and such other methods as will ensure the widest possible dissemination of the information, both abroad and within the United States.

(ii) *Form of mailing.* Petitions for consideration under this section shall be submitted by normal surface or air mail only. Petitions submitted by hand, telegram, FAX, or by any means requiring any form of special handling or acknowledgement of receipt will not be given consideration. The petitioner shall type or print legibly, using the Roman alphabet, on the upper left-hand corner of the envelope in which the petition is mailed his or her full name and mailing address, and the name of the country of which the petitioner is a native, as shown on the petition itself. Envelopes shall be between 6 and 9 inches (15 cm to 24 cm) in length and between 3½ and 4½ inches (9 cm to 11 cm) in width. Envelopes not bearing this information and/or not conforming to the restrictions as to size shall not be processed for consideration.

(c) *Processing of petitions.* Envelopes received at the mailing address during the application period established for the fiscal year in question and meeting the requirements of paragraph (b) shall be assigned a number in a separate numerical sequence established for each regional area specified in INA 203(c)(1)(F). Upon completion of the numbering of all envelopes, all numbers assigned for each region shall be separately rank-ordered at random by a computer using standard computer software for this purpose. The Department shall then select in the rank orders determined by the computer program a quantity of envelopes for each region estimated to be sufficient to ensure, to the extent possible, usage of all immigrant visas authorized under INA 203(c) for the fiscal year in question.

(d) *Approval of petitions.* Envelopes selected pursuant to paragraph (c) of this section shall be opened and reviewed. Petitions which are legible and contain the information specified in subsection (b) of this section shall be approved for further consideration.

(e) *Validity of approved petitions.* A petition approved pursuant to subsection (d) of this section shall be valid for a period not to exceed Midnight of the last day of the fiscal year for which the petition was submitted.

(f) *Order of consideration.* Further consideration for visa issuance of aliens whose petitions have been approved pursuant to paragraph (d) of this section shall be in the regional rank orders established pursuant to subsection (c) of this section.

(g) *Further processing.* The Department shall inform applicants whose petitions have been approved pursuant to subsection (d) of this section of the steps necessary to meet the requirements of INA 222(b) in order to apply formally for an immigrant visa.

(h) *Maintenance of information concerning petitioners who are visa recipients.* (1) The Department shall compile and maintain the following information concerning petitioners to whom immigrant visas are issued under INA 203(c)—

(i) Age;
(ii) Country of birth;
(iii) Marital status;
(iv) Sex;
(v) Level of education; and
(vi) Occupation and level of occupational qualification.

(2) Names of visa recipients shall not be maintained in connection with this information and the information shall be compiled and maintained in such form that the identity of visa recipients cannot be determined therefrom.

5. Sec. 42.51(b) is revised to read as follows:

§ 42.51 Department control of numerical limitations.

* * * * *

(b) *Allocation of numbers.* Within the foregoing limitations, the Department shall allocate immigrant visa numbers for use in connection with the issuance of immigrant visas and adjustments based on the chronological order of the priority dates of visa applicants classified under INA 203(a) and (b) reported by consular officers pursuant to § 42.55(b) and of applicants for adjustment of status as reported by officers of the INS, taking into account the requirements of INA 202(e) in such allocations. In the case of applicants under INA 203(c), visa numbers shall be allocated within the limitation for each specified geographical region in the random order determined in accordance with § 42.33(c) of this part.

* * * * *

6. Sec. 42.54(a)(2) is revised to read as follows:

§ 42.54 Order of consideration.

(a) * * *

(2) Beginning with fiscal year 1995, in the random order established by the Secretary of State for each region for the fiscal year for applicants entitled to status under INA 203(c).

Dated: December 14, 1993.

David L. Hobbs,

Deputy Assistant Secretary for Consular Affairs.

BILLING CODE 4710–06–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 570

[Docket No. R–93–1684; FR–3415–P–01]

RIN 2506–AB60

Joint Community Development Program: Institutions of Higher Education and States/Units of General Local Government; Special Purpose Grants

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would establish the requirements and procedures for awarding and administering special purpose grants under Title I of the Housing and Community Development Act of 1974, as amended by the Housing and Community Development Act of 1992, to states and units of general local government and institutions of higher education with demonstrated capacity to carry out eligible activities, that jointly submit applications to HUD.

DATES: Comment due date: February 28, 1994.

ADDRESSES: Interested persons are invited to submit comments regarding the proposed rule the Rules Docket Clerk, Office of General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Comments should refer to the above docket number and title. Copies of all written comments received will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, at the address listed above.

FOR FURTHER INFORMATION CONTACT: Jerome B. Friedman, Technical Assistance Division, Office of Technical Assistance, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, (202) 708–3176. The Telecommunications Device for the Deaf (TDD) number is (202) 708–2565. (These are not toll free numbers.)

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

The information collection requirements contained in this proposed rule have been submitted to the Office of Management and Budget for review under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). No person may be subjected to a penalty for failure to comply with these information collection requirements until they have been approved and assigned an OMB control number. The OMB control number, when assigned, will be announced in the **Federal Register**. Information on these collection requirements is provided later in this preamble under Other Matters. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street, SW., room 10276, Washington, DC 20410; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for HUD, Washington, DC 20503.

II. Background

Section 801(c)(2) of the Housing and Community Development Act of 1992 (Pub. L. 102–550, approved October 28, 1992) amended section 107 of title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 *et seq.*) to add a new category of special purpose grants. This new

program authorizes grants to states and units of general local government and institutions of higher education with demonstrated capacity to carry out eligible activities under title I that jointly submit applications to HUD. This rule proposes implementation of this new grant authority. For ease of reference, this new program may be called the Joint Community Development (CD) Program.

III. Summary of Proposed Rule

Following are the highlights of the proposed rule that will govern the grants under the Joint CD Program:

1. A new § 570.411 is being added to Subpart E, Special Purpose Grants, of the Community Development Block Grant (CDBG) regulations to govern grants under this program. It should be noted that § 570.400, which contains general requirements for all special purpose grant programs, applies to this new program as well. Additionally, grantees will have to comply with the Americans with Disabilities Act of 1990.

2. Section 570.411(b) provides definitions for "demonstrated capacity" and "institutions of higher education."

3. Section 570.411(c) defines who the eligible applicants are. It indicates that an application must be filed jointly by an institution of higher education and a state or unit of general local government. This subsection also states that HUD will fund eligible applicants only once every two funding cycles.

4. Section 570.411(d) spells out the role of each participant in the joint applications.

5. Section 570.411(e) defines the eligible activities as those eligible under the basic CDBG regulations found in subpart C of part 570. It also makes clear that these activities may be designed to assist residents of colonias to improve living conditions and standards within colonias.

6. Section 570.411(f) indicates that the program will be run competitively through publication of a Notice of Funding Availability (NOFA).

7. Section 570.411(g) provides that when an institution of higher education or a state which is a joint applicant proposes to carry out an activity within the jurisdiction of one or more units of general local government, then such governments must approve the activity and indicate that it is not inconsistent with their community development plan or program.

8. Section 570.411(h) provides a general description of what will be contained in each NOFA.

9. Sections 570.411 (i) and (j) detail the selection criteria that HUD will use to evaluate applications under each NOFA competition.

10. Section 570.411(l) spells out that an applicant proposing housing activities will have to provide evidence of consistency with a Comprehensive Housing Affordability Strategy (CHAS) of the jurisdiction to be served.

11. Section 570.411(m) deals with the citizen participation requirement under the Joint CD Program. It is a modified version of the basic CDBG requirement and is similar to that used in other special purpose programs.

12. Section 570.411(n) provides details on environmental review responsibilities for this program.

Other Matters

Public Reporting Burden

The information collection requirements contained in this proposed rule have been submitted to the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). The Department has determined that the following provisions contain information collection requirements.

ANNUAL REPORTING BURDEN—24 CFR 570.411—JOINT COMMUNITY DEVELOPMENT

	Number of respondents	Number of responses per respondent	Total annual responses	Hours per response	Total hours
Application	200	1	200	40	8,000
Quarterly reports	20	4	80	7	560
Final reports	20	1	20	4	80
Recordkeeping	20	1	20	32	640
					9,280

Executive Order 12866

This proposed rule was reviewed by the Office of Management and Budget (OMB) under Executive Order 12866 on Regulatory Planning and Review, issued by the President on September 30, 1993. Any changes made in the proposed rule subsequent to its submission to OMB are identified in the docket file, which is available for public inspection in the Office of the Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410.

Executive Order 12612, Federalism

The General Counsel, as the designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies proposed in this proposed rule would not have Federalism implications when implemented and, thus, are not subject to review under the Order. Nothing in the proposed rule implies any preemption of State or local law, nor does any provision of the proposed rule disturb the existing relationship between the Federal Government and State and local governments.

Executive Order 12606, the Family

The General Counsel, as the designated Official under Executive Order 12606, has determined that this proposed rule would not have potential significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order.

Environmental Finding

A Finding of No Significant Impact with regard to the environment has been made in accordance with HUD regulations in 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4321. The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, room 10276, 451 Seventh Street, SW., Washington, DC 20410.

Regulatory Flexibility

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Undersigned hereby certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities inasmuch as the entities funded under this program will be relatively few in number. Consequently, HUD does not believe that a significant number of small entities will be affected by this program. The application requirements associated with funding under the program have been kept to the minimum necessary for administration of grant funds, and the Department does not believe it is necessary or appropriate to alter these requirements as they apply to small entities who may be prospective grantees.

Semiannual Agenda

This proposed rule was listed as item 1580 in the Department's Semiannual Agenda of Regulations published on October 25, 1993 (58 FR 56402, 56438) under Executive Order 12866 and the Regulatory Flexibility Act.

Catalog of Federal Domestic Assistance

The Joint Community Development Program is listed in the Catalog of Federal Domestic Assistance under number 14.242.

List of Subjects in 24 CFR Part 570

Administrative practice and procedure, American Samoa, Community development block grants, Grant programs—education, Grant programs—housing and community development, Guam, Indians, Lead poisoning, Loan programs—housing and community development, Low and moderate income housing, New communities, Northern Mariana Islands, Pacific Islands Trust Territory, Pockets of poverty, Puerto Rico, Reporting and recordkeeping requirements, Small cities, Student aid, Virgin Islands.

Accordingly, 24 CFR part 570 is proposed to be amended as follows:

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

1. The authority citation for 24 CFR part 570 would continue to read as follows:

Authority: 42 U.S.C. 3535(d) and 5300–5320.

2. Section 570.411 would be added to subpart E to read as follows:

§ 570.411 Joint Community Development Program.

(a) *General.* Grants under this section will be awarded to states and units of general local government and institutions of higher education having a demonstrated capacity to carry out activities under title I of the Housing and Community Development Act of 1974. For ease of reference, this program may be called the Joint Community Development Program.

(b) *Definitions.* (1) *Demonstrated capacity* to carry out eligible activities under title I means recent satisfactory activity by the institution of higher education's staff designated to work on the program, including subcontractors and consultants firmly committed to work on the proposed activities, in title I programs or similar programs without the need for oversight by a state or unit of general local government.

(2) *Institution of higher education* means a college or university granting 4-year degrees and accredited by a national or regional accrediting agency recognized by the Department of Education.

(c) *Eligible applicants.* States, units of general local government and institutions of higher education. Each application by a state or unit of general local government must be filed jointly in cooperation with an institution of higher education. For all such approved applications, the grant will be made to the state or unit of general local government. Each application by an institution of higher education must be filed by an institution with demonstrated capacity to carry out eligible activities under this part and filed jointly with a state or unit of general local government. For all such approved applications, the grant will be made to the institution of higher education. An eligible applicant will not be funded more frequently than once every other funding cycle. Thus, for the funding cycle after receiving funding, otherwise eligible applicants will not be deemed eligible. A state or unit of general local government will not be funded more frequently than once every other funding cycle even if filing jointly with a different institution of higher education in each cycle. An institution of higher education will not be funded in consecutive funding cycles even if funded one year directly and applying jointly with a state or unit of general local government in the next cycle. HUD may limit the type of eligible applicant to be funded. Any such limitations will be contained in the Notice of Funding Availability described below in paragraph (h) of this section.

(d) *Role of participants in joint applications.* A state, unit of general local government or institution of higher education may carry out eligible activities approved in the joint applications. Where a state or unit of general local government is the recipient, the institution of higher education will serve as a subrecipient. The state or unit of general local government will then be responsible for oversight of and compliance and performance by the institution of higher education and, if necessary, providing assistance to the institution of higher education. Where the institution of higher education is the recipient, it will be responsible for oversight and compliance and the state or unit of local government will serve as a subrecipient. The application will have to clearly delineate the role of each participant in the joint application. The recipient must have a subrecipient agreement with the subrecipient meeting the requirements of § 570.503. Any funding sanctions or other remedial actions by HUD for noncompliance or nonperformance, whether by the state or unit of general local government or by the institution of higher education, shall be taken against the grantee. The grantee may include appropriate provisions for its rights of recourse in the subrecipient agreement with the subrecipient.

(e) *Eligible activities.* Activities that may be funded under this section are those eligible under 24 CFR part 570—Community Development Block Grants, subpart C—Eligible Activities. These activities may be designed to assist residents of colonias, as defined in section 916(d) of the Cranston-Gonzalez National Affordable Housing Act (Pub. L. 101–625), to improve living conditions and standards within colonias. HUD may limit the activities to be funded. Any such limitations will be contained in the Notice of Funding Availability described in paragraph (h) of this section.

(f) *Applications.* Applications will only be accepted from eligible applicants in response to a publication of a Notice of Funding Availability (NOFA) published by HUD in the **Federal Register**.

(g) *Local approval.* (1) Where an institution of higher education is the applicant, each unit of general local government where an activity is to take place must approve the activity and state the activity is not inconsistent with its community development plan or program.

(2) Where a state is the joint applicant and it proposes to carry out an activity within the jurisdiction of one or more units of general local government, then each such unit must approve the activity and state that the activity is not inconsistent with its community development plan or program.

(3) These approvals and findings must accompany each application and may take the form of a letter by the chief executive officer of each unit of general local government affected or a resolution by the legislative body of each such unit of general local government.

from identifying some securities held as

written comments that are submitted

Section 1.475(d)–1 also issued under 26

(h) *NOFA contents.* The NOFA will describe any special objectives sought to be achieved by the funding to be provided, including any limitations on the type of activities to be funded to achieve the objectives of the selection criteria, any limitations on the type of eligible applicants, and points to be awarded to each of the selection criteria and any special factors to be evaluated in assigning points under the selection factors to achieve the stated objectives. The NOFA will also state the deadline for the submission of applications, the total funding available for the competition, the period of performance and the maximum and minimum amount of individual grants. The NOFA will also state if HUD will use the various possible levels of competition: National and/or regional; entitlement areas vs. non-entitlement areas; and states or units of general local government/institutions of higher education vs. institutions of higher education with a demonstrated capacity. The NOFA will include further information and instructions for the submission of acceptable applications to HUD.

(i) *Selection criteria.* Each application submitted under this section will be evaluated by HUD using the following criteria:

(1) The extent to which the applicant addresses the objectives published in the NOFA and demonstrates how the proposed activities will have a substantial impact in achieving the objectives.

(2) The extent of the needs to be addressed by the proposed activities, particularly with respect to benefiting low- and moderate-income persons and residents of colonias, where applicable.

(3) The feasibility of the proposed activities, i.e., their technical and financial feasibility, for achieving the stated objectives.

(4) The capability of the applicant to carry out satisfactorily the proposed activities in a timely fashion, including satisfactory performance in carrying out any previous HUD-assisted projects or activities.

(5) The fair housing and equal opportunity record of the community as indicated by previous HUD monitoring/compliance activity.

(j) *Selection discretion.* HUD retains the right to exercise discretion in selecting projects in a manner that would best serve the program objectives, with consideration given to the needs of States and units of general local government and institutions of higher education, types of activities proposed, an equitable geographical distribution, and program balance. The NOFA will state whether HUD will use this discretion in any specific competition.

(k) *Certifications.* (1) Certifications required to be submitted by applicants shall be as prescribed in the NOFA.

(2) In the absence of independent evidence which tends to challenge in a substantial manner the certifications made by the applicant, the required certifications will be accepted by HUD. If independent evidence is available to HUD, however, HUD may require further information or assurances to be submitted in order to determine whether the applicant's certifications are satisfactory.

(l) *Comprehensive Housing Affordability Strategy (CHAS).* An applicant that proposes any housing activities as part of its application will be required to submit a certification that these activities are consistent with the CHAS of the jurisdiction to be served.

(m) *Citizen participation.* The citizen participation requirements of §§ 570.301 and 570.431 are modified to require the following: The applicant must certify that citizens likely to be affected by the project regardless of race, color, creed, sex, national origin, familial status, or handicap, particularly low- and moderate-income persons, have been provided an opportunity to comment on the proposal or application.

(n) *Environmental and Intergovernmental Review.* The requirements for Intergovernmental Reviews do not apply to these awards. An environmental review in accordance with 24 CFR part 58 must be carried out by the state or unit of general local government when it is the applicant. HUD will conduct the required environmental review when an institution of higher education is the applicant.

Dated: December 1, 1993.

Mark Gordon,

Deputy Assistant Secretary for Community Planning and Development.

[FI–72–93]

RIN 1545–AS30

Mark to Market for Dealers in Securities

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations and notice of public hearing.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, the IRS is issuing temporary regulations to provide guidance concerning the meaning of the statutory terms "dealer in securities," "held for investment," and "security." This guidance will enable taxpayers to comply with the mark-to-market requirements of section 475. The text of the temporary regulations also serves as the text of these proposed regulations. This document also provides notice of a public hearing on these proposed regulations.

DATES: Written comments must be received by February 28, 1994. Outlines of oral comments to be presented at the public hearing scheduled for Tuesday, April 12, 1994, at 10 a.m. must be received by February 28, 1994.

ADDRESSES: Send submissions to: CC:DOM:CORP:T:R (FI–72–93), room 5228, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. In the alternative, submissions may be hand delivered to: CC:DOM:CORP:T:R (FI–72–93), Internal Revenue Service, room 5228, 1111 Constitution Avenue NW., Washington, DC 20224. The public hearing will be held in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Robert B. Williams at (202) 622–3960 or Jo Lynn Ricks at (202) 622–3920; concerning submissions and the hearing, Regulations Unit, (202) 622–7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act (44 U.S.C. 3504(h)). Comments on the collections of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, PC:FP, Washington, DC 20224.

The collections of information are in § 1.475(b)–2. This information is required by the IRS to prevent taxpayers from identifying some securities held as of the close of the last taxable year ending before December 31, 1993, as held for investment and inconsistently failing to identify other securities similarly held. This information will be used to determine whether securities have been properly excluded from mark-to-market treatment. The likely recordkeepers are business or other for-profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the IRS. Individual recordkeepers may require more or less time, depending on their particular circumstances.

Estimated total annual recordkeeping burden: 25,000 hours.

The estimated annual burden per recordkeeper varies from 15 minutes to 3 hours, depending on individual circumstances, with an estimated average of 1 hour.

Estimated number of recordkeepers: 25,000.

Background

Temporary regulations in the Rules and Regulations portion of this issue of the **Federal Register** amend the Income Tax Regulations (26 CFR part 1) relating to section 475 by adding new §§ 1.475(b)–1T, 1.475(b)–2T, 1.475(c)–1T, 1.475(c)–2T, 1.475(d)–1T, and 1.475(e)–1T. The temporary regulations contain rules relating to mark-to-market accounting for dealers in securities.

The text of those temporary regulations also serves as the text of these proposed regulations. The preamble to the temporary regulations explains the temporary regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the IRS. All comments will be available for public inspection and copying.

A public hearing has been scheduled for Tuesday, April 12, 1994, at 10 a.m. in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. Because of access restrictions, visitors will not be admitted beyond the building lobby more than 15 minutes before the hearing starts.

The rules of § 601.601(a)(3) apply to the hearing.

Persons who have submitted written comments by February 28, 1994, and want to present oral comments at the hearing must submit by February 28, 1994, an outline of the topics to be discussed and the time to be devoted to each topic. A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal authors of these regulations are Robert B. Williams and Jo Lynn Ricks, Office of Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, other personnel from the IRS and the Treasury Department participated in their development.

RIN 1545–AQ41

State Housing Credit Ceiling and Other Rules Relating to the Low-Income Housing Credit

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed Income Tax Regulations concerning the low-income housing

credit of section 42 of the Internal Revenue Code. The proposed regulations provide rules relating to the order in which housing credit dollar amounts are allocated from each State's housing credit ceiling under section 42(h)(3)(C) and the determination of which States qualify to receive credit from a national pool of credit under section 42(h)(3)(D). The proposed regulations affect State and local housing credit agencies and taxpayers receiving credit allocations, and provide them with guidance for complying with section 42.

DATES: Written comments must be received by February 28, 1994. Requests to appear at a public hearing scheduled for 10 a.m. on April 26, 1994, and outlines of oral comments must be received by April 5, 1994.

ADDRESSES: Send comments to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, (Attn: CC:DOM:CORP:T:R (PS–106–91), room 5228), Washington, DC 20044. Alternatively, comments, requests to appear at the public hearing, and outlines may be hand delivered to: CC:DOM:CORP:T:R (PS–106–91), Internal Revenue Service, room 5228, 1111 Constitution Ave. NW., Washington, DC 20044. The public hearing will be held in the Internal Revenue Service Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Ave., NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, contact Christopher J. Wilson 202–622–3040 (not a toll-free call); concerning the hearing, contact Micahel Slaughter, Regulations Unit, (202) 622–8543 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collection of information in this proposed regulation is contained in § 1.42–14(d)(3)(i). This information is required by the Internal Revenue Service in order to properly account for housing credit dollar amounts that are returned to the state and local housing credit agencies. The likely respondents are state and local housing credit agencies, individuals, business or other for-profit institutions, nonprofit institutions, and small businesses or organizations.

These estimates are an approximation of the average time expected to be necessary for the collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances. Estimated total reporting burden: 275 hours. The estimated annual burden per State or local government respondent varies from 2 hours to 6 hours, with an estimated average of 4 hours. The estimated annual burden for all other respondents varies from .5 hours to 1.5 hours, with an estimated average of 1 hour. Estimated number of State or local government respondents: 55. Estimated number of all other respondents: 55. Estimated annual frequency of State or local government responses (for reporting requirement only): 4. Estimated annual frequency of all other responses (for reporting requirement only): one time.

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) under section 42 of the Internal Revenue Code of 1986. These amendments are proposed to provide guidance under section 42(h)(3), as amended by section 7108(b) of the Omnibus Budget and Reconciliation Act of 1989. Section 42(h)(3) provides rules for determining the housing credit dollar amount available to housing credit agencies for allocation in any given calendar year.

Explanation of Provisions

Section 42 provides for a low-income housing credit that may be claimed as part of the general business credit under section 38. In general, the credit is allowable only if the owner of a qualified low-income building receives a housing credit allocation from a State or local housing credit agency (Agency) of the jurisdiction where the building is located.

The aggregate housing credit dollar amount that an Agency may allocate for any calendar year is limited to the State housing credit ceiling apportioned to the Agency for that year. Under section 42(h)(3)(C), the State housing credit ceiling of any State for any calendar year is an amount equal to the sum of: (a) $1.25 multiplied by the State population (the population component); (b) the unused State housing credit ceiling, if any, of the State for the preceding calendar year (the unused carryforward component); (c) the amount of State housing credit ceiling returned in the calendar year (the returned credit component); plus (d) the amount, if any, allocated to the State by the Secretary under section 42(h)(3)(D) from a national pool of unused credit (the national pool component).

The proposed regulations set forth the rules governing the order in which credit is allocated from the various components of the State housing credit ceiling under section 42(h)(3)(C) (the stacking rules). In general, under the stacking rules, credit is allocated first from the sum of the population and returned credit components, then from the unused carryforward component, and finally from the national pool component. The proposed regulations also reflect the statutory rule that unallocated credit attributable to the national pool component cannot be carried forward, and therefore is not included in the carryforward component for the following year. In addition, the regulations provide that no credit allocated prior to calendar year 1990, and no credit allowable under section 42(h)(4) (relating to the portion of credit attributable to eligible basis financed by certain tax-exempt obligations under section 103), may be returned for reallocation; thus, this credit is not included in the returned credit component for any year.

The proposed regulations permit an Agency to treat credit returned from a project to the Agency after October 31 of any calendar year and not reallocated by the Agency by the close of the year as returned at the beginning of the succeeding calendar year. For example, an Agency that receives returned credit from a project in November and does not have an opportunity to reallocate the credit by the end of the year may treat the credit as returned on January 1 of the following year (the two-month rule). If so treated, the credit becomes part of the returned credit component of the State housing credit ceiling for the succeeding calendar year.

The proposed regulations also provide guidance on satisfying the requirement of section 42(h)(5) and § 1.42–1T(c)(5) that credit be set aside for projects involving nonprofit organizations (the nonprofit set-aside). Under the regulations, the nonprofit set-aside is determined annually by reference to the total State housing credit ceiling of the State, and not to each component of the State housing credit ceiling. Therefore, Agencies need not track each component of the State housing credit ceiling to ensure that at least 10 percent of each component is set aside for projects involving nonprofit organizations, provided that 10 percent of the total State housing credit ceiling is set aside for those projects. Agencies also need not track whether credit that was allocated in a calendar year and returned in a subsequent year was credit that was allocated from the nonprofit set-aside for the calendar year of the initial allocation.

Under section 42(h)(3)(D), States that have unused housing credit carryovers must assign them to the Secretary for inclusion in a national pool of unused credit (the National Pool), and the Secretary must allocate National Pool credit among qualified States. The proposed regulations provide rules for: (a) Calculating the unused housing credit carryover of a State; (b) determining which States are "qualified States" eligible to participate in the National Pool; and (c) determining the amount of credit reallocated from the National Pool to each qualified State.

As a general rule, if there is any unallocated credit within the State at the close of a calendar year, the State is not a qualified State and is ineligible to receive an allocation of credit from the National Pool the subsequent calendar year. Because of the two-month rule discussed above, unanticipated returns of credit at year-end need not disqualify States from the National Pool. In addition, the proposed regulations provide an exception for States that have a de minimis amount of unallocated credit remaining in their State housing credit ceiling at the close of a calendar year. Under the proposed regulations, a de minimis amount is not more than 1% of the State housing credit ceiling for the year. In determining whether there is any unallocated credit within the State at the close of a calendar year, and in applying the de minimis rule, the housing credit dollar amounts apportioned to all Agencies within the State (including Agencies of constitutional home rule cities in the State) and the allocations of all Agencies within the State are considered.

In addition to the 1% de minimis rule, the proposed regulations provide that in other circumstances where relief is deemed appropriate, the Internal Revenue Service may determine that a State is a qualified State eligible to participate in the National Pool. The Service is specifically interested in receiving comments on the types of circumstances where relief should be granted to qualify a State for the National Pool, and whether this relief is necessary given the opportunity States have to correct administrative errors and omissions, the two-month rule for returned credits, and the 1% de minimis rule.

Proposed Effective Date

These proposed regulations are proposed to be effective January 1, 1994.

Special Analyses

It has been determined that these proposed rules do not constitute a significant regulatory action as defined in Executive Order 12866. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of this notice of proposed rulemaking is being sent to the Chief Counsel for Advocacy of the Small Business Administration for comment on the regulations impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably an original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying.

A public hearing will be held on Tuesday, April 26, 1994, at 10 a.m. in the Internal Revenue Service Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply to the public hearing.

Persons who have submitted written comments by February 28, 1994, and who also desire to present oral comments at the hearing on the proposed regulations, should submit, not later than April 5, 1994, a request to speak and an outline of the oral comments to be presented at the hearing stating the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers thereto.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building before 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Christopher J. Wilson, Office of the Assistant Chief Counsel (Passthroughs and Special Industries), Internal Revenue Service. However, other personnel from the Service and the Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and Recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805; * * * § 1.42–14 is also issued under 26 U.S.C. 42(n).* * *

Par. 2. New § 1.42–14 is added to read as follows:

§ 1.42–14 Allocation rules for post-1989 State housing credit ceiling amounts.

(a) *In general.* The State housing credit ceiling for a State for any calendar year after 1989 is comprised of four components. The four components are:

(1) $1.25 multiplied by the State population (the population component);

(2) The unused State housing credit ceiling, if any, of the State for the preceding calendar year (the unused carryforward component);

(3) The amount of State housing credit ceiling returned in the calendar year (the returned credit component); plus

(4) The amount, if any, allocated to the State by the Secretary under section 42(h)(3)(D) from a national pool of unused credit (the national pool component).

(b) *The population component.* The population component of the State housing credit ceiling of a State for any calendar year is determined pursuant to section 146(j). Thus, a State's population for any calendar year is determined by reference to the most

recent census estimate, whether final or provisional, of the resident population of the State released by the Bureau of the Census before the beginning of the calendar year for which the State's housing credit ceiling is set. Unless otherwise prescribed by applicable revenue procedure, determinations of population are based on the most recent estimates of population contained in the Bureau of the Census publication, "Current Population Report, Series P–25; Population Estimates and Projections, Estimates of the Population of States." For convenience, the Internal Revenue Service publishes the population estimates annually.

(c) *The unused carryforward component.* The unused carryforward component of the State housing credit ceiling for any calendar year is the excess, if any, of the sum of the population and returned credit components, over the aggregate housing credit dollar amount allocated for the year. Any credit amounts attributable to the national pool component of the State housing credit ceiling that remain unallocated at the close of a calendar year are not carried forward to the succeeding calendar year; instead, the credit expires and cannot be reallocated by any Agency.

(d) *The returned credit component*—(1) *In general.* The returned credit component of the State housing credit ceiling for any calendar year equals the housing credit dollar amount returned during the calendar year that was validly allocated within the State in a prior calendar year to any project that does not become a qualified low-income housing project within the period required by section 42, or as required by the terms of the allocation. The returned credit component also includes credit allocated in a prior calendar year that is returned as a result of the cancellation of an allocation by mutual consent or by an Agency's determination that the amount allocated is not necessary for the financial feasibility of the project. For purposes of this section, credit is allocated within a State if it is allocated from the State's housing credit ceiling by an Agency of the State or of a constitutional home rule city in the State.

(2) *Limitations and special rules.* The following limitations and special rules apply for purposes of this paragraph (d).

(i) *General limitations.* Notwithstanding any other provision of this paragraph (d), returned credit does not include any credit that was—

(A) Allocated prior to calendar year 1990;

(B) Allowable under section 42(h)(4) (relating to the portion of credit attributable to eligible basis financed by certain tax-exempt obligations under section 103); or

(C) Allocated during the same calendar year that it is received back by the Agency.

(ii) *Credit period limitation.* Notwithstanding any other provision of this paragraph (d), an allocation of credit may not be returned any later than 180 days following the close of the first taxable year of the credit period for the building that received the allocation. After this date, credit that might otherwise be returned expires, and cannot be returned to or reallocated by any Agency.

(iii) *Two-month rule for returned credit.* An Agency may, in its discretion, treat credit that is returned from a project after October 31 of a calendar year and that is not reallocated by the close of the calendar year as returned on January 1 of the succeeding calendar year. In this case, the returned credit becomes part of the returned credit component of the State housing credit ceiling for the succeeding calendar year.

(iv) *Returns of credit.* Subject to the limitations of paragraph (d)(2) (i) and (ii) of this section, credit is returned to the Agency in the following instances in the manner described in paragraph (d)(3) of this section.

(A) *Building not qualified within required time period.* If a building is not a qualified building within the time period required by section 42, it loses its credit allocation and the credit is returned. A building is not qualified within the required time period if it is not placed in service within the period required by section 42 or if the project of which the building is a part fails to meet the minimum set-aside requirements of section 42(g)(1) by the close of the first year of the credit period.

(B) *Noncompliance with terms of the allocation.* If a building does not comply with the terms of its allocation, it loses the credit allocation and the credit is returned. The terms of an allocation are the written conditions agreed to by the Agency and the allocation recipient in the allocation document. However, if the terms of the allocation violate any requirement of section 42, the allocation is not valid and is treated as if it had not been made; in this case the credit is treated as if it had not been allocated, and is not a returned credit.

(C) *Mutual consent.* If the Agency and the allocation recipient cancel an allocation of an amount of credit by mutual consent, that amount of credit is returned.

(D) *Amount not necessary for financial feasibility.* If an Agency determines under section 42(m)(2) that an amount of credit allocated to a project is not necessary for the financial feasibility of the project and its viability as a qualified low-income housing project throughout the credit period, that amount of credit is returned.

(3) *Manner of returning credit*—(i) *Taxpayer notification.* After an Agency determines that a building or project no longer qualifies under paragraph (d)(2)(iv)(A), (B), or (D) of this section for all or part of the allocation it received, the Agency must provide written notification to the allocation recipient, or its successor in interest, that all or part of the allocation is no longer valid. The notification must also state the amount of the allocation that is no longer valid. The date of the notification is the date the credit is returned to the Agency. If an allocation is cancelled by mutual consent under paragraph (d)(2)(iv)(C) of this section, there must be a written agreement signed by the Agency, and the allocation recipient, or its successor in interest, indicating the amount of the allocation that is returned to the Agency. The date of the agreement is the date the credit is returned to the Agency.

(ii) *Internal Revenue Service notification.* If a credit is returned within 180 days following the close of the first taxable year of the building's credit period as provided in paragraph (d)(2)(ii) of this section, and a Form 8609 has been issued for the building, the Agency must notify the Internal Revenue Service (Service) that the credit has been returned. The Service should be notified as prescribed in § 1.42–5(e)(3). If the building is eligible for a reduced credit, the Form 8609 should be amended to reflect the reduction in credit.

(e) *The national pool component.* The national pool component of the State housing credit ceiling of a State for any calendar year is the portion of the National Pool allocated to the State by the Secretary for the calendar year. The national pool component for any calendar year is zero unless a State is a "qualified State". (See paragraph (i) of this section for rules regarding the National Pool and the description of a qualified State.) Credit from the national pool component of a State housing credit ceiling must be allocated prior to the close of the calendar year or the credit expires and cannot be reallocated by any Agency. A national pool component credit that is allocated during a calendar year and returned after the close of the calendar year may qualify as part of the returned credit component of the State housing credit ceiling for the calendar year that the credit is returned.

(f) *When the State housing credit ceiling is determined.* For purposes of accounting for the State housing credit ceiling on Form 8610, Annual Low-Income Housing Credit Agencies Report, and for purposes of determining the set-aside apportionment for projects involving qualified nonprofit organizations described in section 42(h)(5) and § 1.42–1T(c)(5), the State housing credit ceiling for any calendar year is determined at the close of the calendar year.

(g) *Stacking order.* Under section 42(h)(3)(C), credit is treated as allocated from the various components of the State housing credit ceiling in the following order. The first credit allocated for any calendar year is treated as credit from the sum of the population and returned credit components of the State housing credit ceiling. Once all of the credit in these components has been allocated, the next credit allocated is treated as credit from the unused carryforward component of the State housing credit ceiling. Finally, after all of the credit from the population component, returned credit component, and unused carryforward component has been allocated, any further credit allocated is treated as credit from the national pool component.

(h) *Nonprofit set-aside*—(1) *Determination of set-aside.* Under section 42(h)(5) and § 1.42–1T(c)(5), at least 10 percent of a State housing credit ceiling in any calendar year must be set aside exclusively for projects involving qualified nonprofit organizations (the nonprofit set-aside). However, credit allocated from the nonprofit set-aside in a calendar year and returned in a subsequent calendar year does not retain its nonprofit set-aside character. The credit becomes part of the returned credit component of the State housing credit ceiling for the calendar year that the credit is returned, and must be included in determining the nonprofit set-aside of the State housing credit ceiling for that calendar year. Similarly, credit amounts that are not allocated from the nonprofit set-aside in a calendar year and are returned in a subsequent calendar year become part of the returned credit component of the State housing credit ceiling for that year, and are also included in determining the set-aside for that year.

(2) *Allocation rules.* An Agency may allocate credit from any component of the State housing credit ceiling as part of the nonprofit set-aside, and need not reserve 10 percent of each component for the nonprofit set-aside. Thus, an Agency may satisfy the nonprofit set-aside requirement of section 42(h)(5) and § 1.42–1T(c)(5) in any calendar year by setting aside for allocation, from any one or more components of the State housing credit ceiling, an amount equal to at least 10 percent of the total State housing credit ceiling for the calendar year.

(i) *National Pool*—(1) *In general.* The unused housing credit carryover of a State for any calendar year is assigned to the Secretary for inclusion in a national pool of unused housing credit carryovers (the National Pool) that is reallocated among qualified States the succeeding calendar year. The assignment to the Secretary is made on Form 8610.

(2) *Unused housing credit carryover.* The unused housing credit carryover of a State for any calendar year is the excess, if any, of the unused carryforward component of the State housing credit ceiling for the calendar year over the excess, if any, of—

(i) The total housing credit dollar amount allocated for the year, over

(ii) The sum of the population and returned credit components of the State housing credit ceiling for the year.

(3) *Qualified State*—(i) *In general.* The term "qualified State" means, with respect to any calendar year, any State that has allocated its entire State housing credit ceiling for the preceding calendar year and for which a request is made by the State, not later than May 1 of the calendar year, to receive an allocation of credit from the National Pool for that calendar year. Except as provided in paragraph (i)(3)(ii) of this section, a State is not a qualified State in a calendar year if there remains any unallocated credit in its State housing credit ceiling at the close of the preceding calendar year that was apportioned to any Agency within the State for the calendar year.

(ii) *Exceptions*—(A) *De minimis amount.* If the amount remaining unallocated at the close of a calendar year is only a de minimis amount of credit, the State is a qualified State eligible to participate in the National Pool. A credit amount is de minimis if it does not exceed 1 percent of the aggregate State housing credit ceiling of the State for the calendar year.

(B) *Other circumstances.* The Internal Revenue Service may, under appropriate circumstances, determine that a State is a qualified State eligible to participate in the National Pool even though the State's unallocated credit is not a de minimis amount.

(iii) *Time and manner for making request.* The time and manner for making a request of housing credit dollar amounts from the National Pool by a qualified State is prescribed in Rev. Proc. 92–31, 1992–1 C.B. 775.

(4) *Formula for determining the National Pool.* The amount allocated to a qualified State in any calendar year is an amount that bears the same ratio to the aggregate unused housing credit carryovers of all States for the preceding calendar year as that State's population for the calendar year bears to the population of all qualified States for the calendar year.

(j) *Coordination between Agencies.* The Agency responsible for filing Form 8610 on behalf of all Agencies within a State and making any request on behalf of the State for credit from the National Pool (the Filing Agency) must coordinate with each other Agency within the State to ensure that the various requirements of this section are complied with. For example, the Filing Agency of a State must ensure that all Agencies within the State that were apportioned a credit amount for the calendar year have allocated all their respective credit amounts for the calendar year before the Filing Agency can make a request on behalf of the State for a distribution of credit from the National Pool.

(k) *Examples.* The operation of the rules of this section may be illustrated by the following examples. Unless otherwise stated in an example, Agency A is the sole Agency authorized to make allocations of housing credit dollar amounts in State M, all of Agency A's allocations are valid, and for calendar year 1994 Agency A has available for allocation a State housing credit ceiling consisting of the following housing credit dollar amounts:

A. Population component	$100
B. Unused carryforward component	50
C. Returned credit component	10
D. National pool component	0
Total	160

In addition, the $10 of returned credit component was returned before November 1, 1994.

Example (1)—(i) *Additional facts.* By the close of 1994, Agency A had allocated $80 of the State M housing credit ceiling. Of the $80 allocated, $16 was allocated to projects involving qualified nonprofit organizations.

(ii) *Application of stacking rules.* The first credit allocated is treated as allocated from the population and returned credit components of the State housing credit ceiling, to the extent of those components. In this case, the $80 of credit allocated is less than the sum of the population and returned credit components. The excess of the sum of the population and returned credit components over the total amount allocated for the calendar year ($110 − 80=$30) becomes the unused carryforward component of State M's 1995 State housing credit ceiling.

Because Agency A did not allocate credit in excess of the sum of the population and returned credit components, no credit is treated as allocated from State M's $50 unused carryforward component in 1994. Because none of this component may be carried forward, all $50 is assigned to the Secretary for inclusion in the National Pool. Under paragraph (i)(3) of this section, State M does not qualify for credit from the National Pool for the 1995 calendar year.

(iii) *Nonprofit set-aside.* Agency A allocated exactly the amount of credit to projects involving qualified nonprofit organizations as necessary to meet the nonprofit set-aside requirement ($16, 10% of the $160 ceiling).

Example (2).—(i) *Additional facts.* By the close of 1994, Agency A had allocated $130 of the State M housing credit ceiling. Of the $130 allocated, $20 was allocated to projects involving qualified nonprofit organizations.

(ii) *Application of stacking rules.* The first $110 of credit allocated is treated as allocated from the population and returned credit components. In this case, because all of the population and returned credit components are allocated, no amount is included in State M's 1995 State housing credit ceiling as an unused carryforward component. The next $20 of credit allocated is treated as allocated from the $50 unused carryforward component. The $30 remaining in the unused carryforward component is assigned to the Secretary for inclusion in the National Pool for the 1995 calendar year. Under paragraph (i)(3) of this section, State M does not qualify for credit from the National Pool for the 1995 calendar year.

(iii) *Nonprofit set-aside.* Agency A allocated $4 more credit to projects involving qualified nonprofit organizations than necessary to meet the nonprofit set-aside requirement. This does not reduce the application of the 10% nonprofit set-aside requirement to the State M housing credit ceiling for the succeeding year.

Example (3).—(i) *Additional fact.* None of the applications for credit that Agency A received for 1994 were for projects involving qualified nonprofit organizations.

(ii) *Nonprofit set-aside.* Because at least 10% of the State housing credit ceiling must be set aside for projects involving a qualified nonprofit organization, Agency A can allocate only $144 of the $160 State housing credit ceiling for calendar year 1994 ($160 − 16=$144). If Agency A allocates $144 of credit, the credit is treated as allocated $110 from the population and returned credit components and $34 from the unused carryforward component. The $16 of unallocated credit that is set aside for projects involving qualified nonprofit organizations is treated as the balance of the unused carryforward component, and is assigned to the Secretary for inclusion in the National Pool. Under paragraph (i)(3) of this section, State M does not qualify for credit from the National Pool for the 1995 calendar year.

Example (4).—(i) *Additional facts.* The $10 of returned credit component was returned prior to November 1, 1994. However, a $40 credit that had been allocated in calendar year 1993 to a project involving a qualified nonprofit organization was returned to the Agency by a mutual consent agreement dated November 15, 1994. By the close of 1994, Agency A had allocated $160 of the State M housing credit ceiling, including $16 of credit to projects involving qualified nonprofit organizations.

(ii) *Effect of two-month rule.* Under the two-month rule of paragraph (d)(2)(iii) of this section, Agency A may treat the $40 of previously allocated credit as returned on January 1, 1995. If Agency A treats the $40 amount as having been returned in calendar year 1995, the State M housing credit ceiling for 1994 is $160. This entire amount, including the $16 nonprofit set-aside, has been allocated in 1994. Under paragraph (i)(3) of this section, State M qualifies for the National Pool for the 1995 calendar year.

(iii) *If two-month rule not used.* If Agency A treats the $40 of previously allocated credit as returned in calendar year 1994, the State housing credit ceiling for the 1994 calendar year will be $200 of which $50 will be attributable to the returned credit component ($10+$40=$50). Because credit amounts allocated in a prior calendar year that are returned in a subsequent calendar year do not retain their nonprofit character, the nonprofit set-aside for calendar year 1994 is $20 (10% of $200). The $160 that Agency A allocated during 1994 is first treated as from the population and returned credit components, which total $150. The next $10 of credit allocated is treated as from the unused carryforward component. The $40 of unallocated credit from the unused carryforward component includes the $4 of unallocated nonprofit set-aside. The entire $40 of unallocated credit from the carryforward component is assigned to the Secretary for inclusion in the National Pool for the 1995 calendar year. State M does not qualify for credit from the National Pool for the 1995 calendar year.

Example 5.—(i) *Additional facts.* For calendar year 1994, Agency A has a State housing credit ceiling that consists of the following housing credit dollar amounts:

A. Population component	$100
B. Unused carryforward component	0
C. Returned credit component	20
D. National pool component	10
Total	$130
Minimum nonprofit set-aside	13
Ceiling amount not set-aside	117

In addition, the $20 of returned credit component was returned before November 1, 1994. By the close of 1994, Agency A had allocated $100 of the State housing credit ceiling.

(ii) *Application of stacking rules.* The $20 excess of the sum of the population component and the returned credit component over the total amount allocated for the calendar year ($120 − 100=$20) becomes the unused carryforward component of the State housing credit ceiling for the 1995 calendar year. The $10 of unallocated credit from the national pool component expires and cannot be reallocated. This amount is neither carried over to 1995 by State M nor assigned to the Secretary for inclusion in the National Pool. Under paragraph (i)(3) of this section, State M does not qualify for credit from the National Pool for the 1995 calendar year.

(l) *Effective date.* The rules set forth in this notice of proposed rulemaking are proposed to be effective January 1, 1994.

Michael P. Dolan,

Acting Commissioner of Internal Revenue.

[FR Doc. 93–31739 Filed 12–28–93; 8:45 am]

BILLING CODE 4830–01–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 63 and 71

[AD–FRL–4617–1]

Federal Operating Permit Programs; Permits for Early Reductions Sources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Pursuant to section 112(i)(5) of the Clean Air Act (Act), a rule governing the granting of compliance extensions for sources achieving early reductions of hazardous air pollutants (HAPs) was promulgated in the **Federal Register** on December 29, 1992. Sources qualifying for a compliance extension under the Early Reductions Rule must obtain a permit containing an emission limitation to ensure that the early reductions are maintained throughout the compliance extension period and are federally enforceable. This rulemaking would establish an interim permitting mechanism for such sources until permanent permitting programs become effective pursuant to title V of the Clean Air Act (Act), as amended.

Also proposed in this rule is an amendment to the Early Reductions Rule which would append to an enforceable commitment information on emission reduction measures employed to achieve early reductions. This proposed change would enhance the enforceability of such a commitment.

DATES: *Comments.* Comments must be received on or before January 28, 1994.

Public Hearing. If anyone contacts EPA requesting to speak at a public hearing by January 12, 1994, a public hearing will be held on January 26, 1994 beginning at 10 a.m. Persons interested in attending the hearing should call Ms. Deanna Allen at (919) 541–5573 to verify that a hearing will be held.

Request to Speak at Hearing. Persons wishing to present oral testimony must contact EPA by January 12, 1994.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate if possible) to: Air Docket (LE–131), Attention Docket Number A–93–08 (see Docket section below), room M1500, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Docket. Docket No. A–93–08, containing supporting information used in developing the proposed rule is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket, Room M1500, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC. A reasonable fee may be charged for copying.

All information used in the development of the proposed amendment to the Early Reductions Rule is contained in the preamble below. However, Docket No. A–90–47, containing the supporting information for the original Early Reductions Rule, is available for public inspection and copying between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Waterside Mall, room M–1500, 1st floor, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mr. David Beck, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5421.

SUPPLEMENTARY INFORMATION: The information presented in this preamble is organized as follows:

I. Background and Purpose for Proposed Permits Rule
- A. The Early Reductions Program
- B. Permitting Problem under Early Reductions
- C. The EPA's Proposed Solution
- D. Implementation

II. Summary of and Rationale for Proposed Permits Rule
- A. Program Overview
- B. Permit Applications
- C. Permit Content
- D. Permit Issuance, Reopenings, and Revisions
- E. Public Participation and Administrative Review

III. Summary of and Rationale for Proposed Amendment to Early Reductions Rule

IV. Administrative Requirements

I. Background and Purpose for Proposed Permits Rule

A. The Early Reductions Program

The Clean Air Act Amendments of 1990 revised section 112 of the Act, which directs the EPA to establish national emission standards for hazardous air pollutants (HAP). A new provision, section 112(i)(5), offers to sources that achieve substantial early reductions of HAP emissions an extension in complying with applicable standards to be promulgated under section 112(d). Specifically, the early reductions provision allows an existing source emitting HAPs to be granted a six-year extension of compliance with an otherwise applicable section 112(d) standard upon demonstration by the owner or operator of the source that it has achieved, prior to certain dates, a HAP reduction of 90 percent or more from established base year emission levels (95 percent or more for HAPs which are particulate matter). Generally, sources would have to achieve the 90 (95) percent reduction prior to proposal of an applicable section 112(d) standard. However, sources that would be subject to early section 112(d) standards also have the option of participating by making an enforceable commitment, prior to proposal of an applicable section 112(d) standard, to achieve the 90 (95) percent reduction before January 1, 1994. For sources successfully demonstrating qualifying HAP reductions, a permit would be issued granting the source the six-year compliance extension and containing a federally enforceable alternative emission limitation reflecting the qualifying reduction.

On December 29, 1992, the EPA promulgated in the **Federal Register** (57 FR 61970) an implementing rule for the Early Reductions provision of the Act. The Early Reductions Rule established procedures and requirements for source owners or operators wishing to obtain the six-year compliance extension.

B. Permitting Problem Under Early Reductions

Prior to promulgation of the Early Reductions Rule, the EPA anticipated that permit applications for section 112(i)(5) compliance extensions simply would be part of a comprehensive title V permit application for the entire plant site, since section 112(i)(5)(D) of the Act specifies that sources granted compliance extensions must have their alternative emission limitations embodied in a permit issued pursuant to title V of the Act. Under section 504(a) of the Act, a comprehensive title V permit application would encompass all Act requirements applicable to all emitting units at the plant site, not just the alternative emission limitation related to the early reductions source. (An early reductions source can consist of a designated subgroup of all HAP emitting units at the facility.) These applications were to have been processed by States with approved title V permitting programs or, where a State program had not yet been approved, by the EPA pursuant to regulations anticipated to be promulgated for Federal title V permitting (future part 71 rule).

Shortly before the rule for the Early Reductions Program was promulgated, it became apparent that neither State nor Federal comprehensive title V permitting programs would be in place in time to process the initial early reductions permit applications which will be filed by April 30, 1994. States are not required to submit title V permit programs to the EPA for approval until November 15, 1993, and EPA has until November 15, 1994 to approve or disapprove the State's proposed program. Additionally, a Federal title V permit program, which primarily would be used when a State has failed to obtain approval of a title V program, likely will not be promulgated until 1995.

C. The EPA's Proposed Solution

Since there will be no comprehensive title V permit issuance mechanism available to process initial early reductions related permit applications, the EPA is proposing in today's notice to establish a title V program limited to implementation of the Early Reductions Program. The legal rationale for establishing such a limited Federal permit program under title V is expanded upon below.

The EPA considered various alternatives for implementing the Early Reductions Program in advance of the comprehensive title V program. The first alternative was to delay any permit application deadlines for early reductions sources until a title V permitting mechanism was available. Although this option would be the simplest to implement administratively, it has several drawbacks. Primarily, section 112(i)(5) evidences an intent that alternative emission limitations are to be embodied in a permit issued pursuant to title V. The EPA therefore believes that, to be consistent with the Act, it must make the title V permit the implementing vehicle for the Early Reductions Program, except where it would be strictly infeasible to do so.

In addition to this legal consideration, permit issuance delays under this option could be significant, possibly a year or two behind original expectations. The delay would mean that a source owner or operator would not know for a considerable length of time whether the EPA (or other permitting authority) would approve the early reduction demonstration and grant a compliance extension from a section 112(d) standard. If the extension is not granted, the source may have little if

any time to prepare to meet an impending section 112(d) standard compliance deadline. Additionally, this option would allow participating sources to operate without a permit for possibly two years or more after the early reductions were required to be achieved, which is not desirable from an enforcement standpoint. For these reasons this option was rejected.

Another alternative was to use federally enforceable permit programs already in effect. Some states have permitting functions which are federally enforceable under State Implementation Plans. Presumably, this mechanism could be adapted to handle early reductions permit applications. However, as with the first alternative described above, this alternative is flawed in that it does not utilize the permitting mechanism intended by the Act, namely, title V.

In addition, under this scenario the EPA still would have to promulgate a rule or at least issue guidance describing how such existing permit programs would have to be modified for the writing of early reductions permits, with additional time spent approving the modified programs. Moreover, not all States have federally enforceable air permit programs, and some other mechanism must be sought in those instances. This option therefore did not offer a complete solution to the problem, although it could be considered for use where federally enforceable State permit programs exist and where no State or Federal title V mechanism has been established.

A third alternative considered and eventually selected by EPA was the establishment of a new permit program tailored to the Early Reductions Program. Again, however, any such program would be flawed from a legal standpoint if it was not established under the authority in title V. Furthermore, the establishment of a special early reductions permit program apart from title V would be needlessly redundant since EPA considers title V permits to be an adequate vehicle for alternative emission limitations, and since these limitations will eventually need to be incorporated into the State-issued, comprehensive, title V permits once they are available.

D. Implementation

This rule establishing the specialty permits program may not be promulgated until after the April 30, 1994 permit application deadline for early reductions sources subject to enforceable commitments. Therefore, applications submitted by that date may have to be based on the requirements contained in today's proposed rule. The EPA will begin evaluation of applications submitted by April 30, 1994, but will not issue any specialty permits until after promulgation of this rule. Should the promulgated rule differ from this proposed rule such that permit applications already submitted need to be revised, the owner or operator will be notified of the change(s) and asked to amend the original application.

II. Summary of and Rationale for Proposed Permits Rule

The proposed rule describes an interim, Federal, title V permit program specific to hazardous air pollutant emissions from sources participating in the Early Reductions Program. It is meant only to fill the need to issue timely permits to these sources in the interval prior to the availability of a comprehensive title V permitting mechanism and does not change a source's obligations under title V of the Act. Therefore, companies issued specialty title V permits under this rule still must file comprehensive title V permit applications as required after State title V permit program approval occurs and the specialty permit eventually would become part of the comprehensive permit issued for the plant site.

The EPA believes there is ample authority under the CAA to issue specialty title V permits in this instance. Permits issued pursuant to the rule would meet all the requirements of title V, with the exception of section 504(a). Section 504(a) requires that each title V permit assure compliance with all applicable requirements of the Act. EPA reads the general mandate of section 504(a) in conjunction with section 112(i)(5) to allow narrower specialty permits that address only the alternative emissions limitation.

While this reading does not appear to be fully consistent with the literal language of section 504(a) standing alone, it is necessary in order to meet Congress' goals with respect to the Early Reductions program. If section 504(a) were read to require title V permits issued to early reductions sources to assure compliance with all applicable requirements (which, under the part 70 regulation, includes, at a minimum, SIP requirements and existing NESHAP and NSPS standards), significant delay in permit issuance to such sources would occur, compromising the viability of the Early Reductions Program. Unless an Early Reductions source is able to obtain a specialty title V Early Reductions permit before it is issued a comprehensive title V permit, it would in effect be required to achieve early emissions reductions and maintain those reductions while remaining at peril of enforcement of the relevant section 112(d) standard (because the evaluation of the reduction demonstration and granting of the compliance extension occurs in the context of permit issuance). Moreover, without the specialty permit, the permitting authority has no way to enforce the required emissions reduction against the source.

This reading is consistent with the purpose of section 504(a), which is to assure that permits issued pursuant to a comprehensive title V program address all applicable requirements. Nothing in this proposed rule would affect part 70 requirements to issue permits that address all applicable requirements. The main functions of this rule are to set requirements for permit applications and permit content and establish procedures for permit issuance and revision. The rule was composed by adapting provisions from the promulgated part 70 rule (57 FR 32250, July 21, 1992) for State title V permitting programs to fit the needs of this interim Federal program. Thus, there are many similarities in language and structure between the two rulemakings. Two significant differences between this rulemaking and the part 70 rule are: (1) The part 70 rule describes required elements and procedures for establishing State title V permitting programs whereas this rulemaking *is* an actual permit program and (2) the part 70 rule requires comprehensive permits which address all applicable requirements at a plant site while this rulemaking would establish permits only for the hazardous air pollutant emissions from the defined early reductions source at a plant site. These differences led to the deletion of several sections of the part 70 rule and revision of others.

The remainder of this section describes the contents of the proposed rule and the rationale behind the proposed provisions. It is not the purpose of this preamble to reiterate the rationale for the part 70 rule for State permit programs but rather concentrate on areas where the part 70 rule was revised or new requirements added. The reader may refer to the proposal and promulgation notices for the part 70 rule for further information on its provisions and the rationale behind the provisions. (Part 70 was proposed on May 10, 1991, 56 FR 21712, and promulgated on July 21, 1992, 57 FR 32250.)

The two sections of the proposed rule not discussed under separate sections of the preamble are definitions (§ 71.22) and applicability (§ 71.23). Most of the definitions for the proposed rule were taken directly from the promulgated part 70 rule, although several were not incorporated because they were not applicable to this rulemaking. A few definitions also were added from the promulgated Early Reductions Rule. The applicability section of the part 70 rule was deleted and replaced by two short paragraphs to narrow the scope of the rule to sources participating in the Early Reductions Program. Several other sections of the part 70 rule not pertinent to this rulemaking and not incorporated include: Program Submittals and Transition (§ 70.4), Permit Review by the EPA and Affected States (§ 70.8), Federal Oversight and Sanctions (§ 70.10), and Requirements for Enforcement Authority (§ 70.11). These sections apply specifically to State program requirements or to the approval and oversight aspects of State title V permit programs. Finally, a section on public participation and administrative appeal (§ 71.27) was added in order to establish: Specific procedures for notice and comment on draft permits and elements of the administrative record on permit decisions; procedures for appeal of final permit decisions; and prerequisites for judicial review.

A. Program Overview

This section of the rule (§ 71.21) describes the purpose, which is to establish an interim mechanism for issuing specialty, Federal title V permits for sources participating in the Early Reductions Program, and more importantly details how this specialty permits program interfaces with the States and their responsibilities under title V.

Early reductions specialty permits issued under this rulemaking will have a fixed term of five years, the maximum allowed under title V of the Act. However, prior to expiration of these permits, States probably will obtain approval of their comprehensive title V programs and will be in position to start issuing comprehensive title V permits. As this occurs, the EPA eventually will stop issuing specialty title V permits for early reductions sources and defer to the approved State title V programs. Several questions arise related to this transition: at exactly what point will the EPA stop issuing the specialty permits, would a State with an approved title V program be able to issue specialty early reductions permits in cases where the permit application was being processed by the EPA at the time of title V program approval, and how will existing specialty permits be treated when comprehensive title V permits are established for the entire plant site?

In resolving the first two questions, a primary concern was to ensure that permit issuance (and associated granting of a compliance extension) would not be substantially delayed as a result of the transition to State responsibility for permitting. Owners or operators must know in a timely fashion whether their sources will be granted a compliance extension. If a reduction demonstration is denied for some reason, the source will have to meet the section 112(d) emission standard on schedule. In such cases, the later a source receives word of an early reduction demonstration disapproval, the less time the source has to prepare to meet the 112(d) standard. Under the proposed rule, the Administrator will issue a specialty permit to an early reductions source within 12 months of receiving a complete specialty permit application. If a complete application has been received and is being processed by the EPA at the time a State obtains approval of a part 70 program, simply turning over the application to the State and letting the 12 month process begin all over again would produce substantial delay in permit issuance. The delay would be exacerbated if the source owner or operator had to rework the specialty permit application and resubmit it as a comprehensive title V application (under the part 70 rule owners or operators normally would be allowed up to one year to prepare and submit a comprehensive application).

To avoid this scenario, the proposed rule stipulates that the EPA may continue to process and issue an early reductions specialty permit in cases where: The permit application is filed with, but the permit has not yet been issued by, the EPA prior to the involved State obtaining approval of a part 70 program; or the specialty permit application deadline for the early reductions source [according to § 71.24(b) of the proposed rule] occurs before the comprehensive permit application deadline set in the State title V program. EPA solicits comment on whether it is necessary or appropriate for it to retain discretion to process and issue a specialty permit in the latter instance.

Note that the rule does not stipulate that the Administrator definitely will continue to issue specialty permits in the two cases above, but may do so. The key to whether EPA will issue the specialty permit or defer to the State for permit issuance is the degree of delay that would occur in granting the compliance extension through the State program. If the permit could be issued by the State within a few months of the time EPA would have issued the permit, it is likely that EPA would not have to issue a specialty permit and would defer to the State.

The third question examines what happens to an existing early reductions specialty permit once the involved State has obtained approval of a part 70 program, and the answer is derived from an understanding of the character of such permits. It is the EPA's intent within this rulemaking to issue permits granting qualifying sources six-year compliance extensions from otherwise applicable section 112(d) standards and containing an alternative emission limitation to be met by the source until the extension expires. These permits are to be issued as specialty title V permits, meaning that their content will be consistent with the requirements of title V of the Act and consistent with part 70 rules establishing requirements for State title V programs for issuing comprehensive permits. However, a specialty permit will encompass only the early reductions source (which can be a designated subset of all HAP emitting equipment at the plant site) and only the HAP emissions from it. All other Act applicable requirements for emitting units from the plant site, including those for non-HAP emissions from the early reductions source, will be covered by the comprehensive title V permit issued for the plant site at a later time. Thus an owner or operator of a plant issued a permit under this subpart will have satisfied title V requisites for the early reductions source and for one applicable Act requirement, i.e., the otherwise applicable standards promulgated under section 112(d) of the Act. An existing early reductions specialty permit will be incorporated, without reopening, as part of the comprehensive permit issued for a facility, unless reopening is necessary for some other reason according to § 71.26(e). In issuing a comprehensive permit, a State may, however, extend the term of an existing early reductions permit so that it coincides with the expiration of the remainder of the comprehensive permit or the six-year compliance extension, as applicable.

The EPA invites comment on its proposed position regarding the relationship between incorporation of the specialty permit into the comprehensive part 70 permit and reopening of the specialty permit. Specifically, EPA requests comments on whether the entire specialty permit (as opposed to merely the early reductions determination) should be incorporated without reopening, or whether instead the State should have the option of excluding certain elements of the specialty permit such as the permit

shield, the emergency upset provision, or provisions for operational flexibility from the comprehensive part 70 permit.

The EPA is proposing to allow for the delegation of this early reductions specialty permit program to a State prior to the State obtaining full approval of a title V permitting program. Functions delegated would include the evaluation and approval or disapproval of the emission reduction demonstration which would qualify the source for a compliance extension (unless the State already had been delegated this function under an earlier delegation for the Early Reductions Program) and the issuance of a specialty title V permit granting the extension and establishing an alternative emission limitation for the source. However, after the specialty permit program is delegated to the State, appeals of final permit decisions would still be taken to the Environmental Appeals Board, pursuant to the administrative appeal provisions of § 71.27. The EPA plans to issue guidance, similar to that issued for the early reductions rule, which will further clarify the conditions under which EPA will delegate this specialty permit program to States. The EPA plans to evaluate State resources and capacity for successful implementation of the specialty permit program prior to granting a delegation. This will likely include, at a minimum, examination of the State's legal authority, resources, ability to assure compliance consistent with relevant schedules, and whether the State, in implementing the specialty permits rule, will otherwise satisfy its objectives and the objectives of the early reductions rule.

Enforcement of issued specialty permits would be delegated only if the State demonstrates that it is has enforcement authority substantially equivalent to that described in the part 70 rule (§ 70.11), including: the ability to restrain any person from engaging in an activity which is in violation of a permit and which poses an imminent and substantial danger to public health or welfare, or the environment; the ability to assess or sue to recover in court civil penalties and to seek criminal remedies; and a burden of proof under State law for establishing violations that is no greater than the burden of proof required under the Act. The requirement that a State merely have authority "substantially equivalent" to that in § 70.11 would not allow the exclusion of any elements of that section. Rather, it is intended to allow delegation to a State which takes a different approach to a particular element that in EPA's judgment attains the same enforcement results. Comment is solicited on this delegation requirement, and in particular whether EPA should require stricter consistency with § 70.11, or whether instead it should allow States to depart more freely from those requirements.

The EPA does not intend that Federal title V permit programs be delegable to the States generally. Title V addresses the transfer of authority to States through specific program approval procedures, which is the primary mechanism for such transfer. The EPA generally contemplates promulgation of a Federal operating permits program only where the State fails to obtain or retain approval. However, EPA believes that delegation of this program is warranted in light of the special circumstances surrounding this rule. As explained above, this specialty permits program is not being established in response to the failure of any State to comply with title V. Rather it is an interim measure designed to fill a gap in the statute where there otherwise would be no permit issuance mechanism to implement the Early Reductions Program.

Although it is the intent of title V that it be implemented by the States wherever possible, it appears unrealistic to expect States to gain approval of a title V program, even one limited in scope to the early reductions program, in time to implement this specialty permit program from its inception. If States are to issue permits to early reductions sources prior to approval of a comprehensive title V program, EPA must be able to delegate this part 71 program directly to the States. The EPA believes this outcome is preferable, provided the State program is adequate, because allowing the State to issue the initial specialty permit will greatly facilitate the transition to a State-implemented title V program.

Similar to the situation above regarding specialty permit issuance after a State obtains approval of a comprehensive title V program, the Administrator may continue to process and issue a specialty permit in cases where the permit application is filed prior to the State obtaining delegation to implement this subpart. Again, whether EPA or the State issues the specialty permit depends on the amount of delay induced by transfer to the State. If the delay would not be significant, the application could be transferred to the delegatee.

B. Permit Applications

Procedures for filing permit applications under this subpart and the information required for complete permit applications are covered in § 71.24 of the rule. The section is patterned after the identically named section in the part 70 permit rule, although much of the original part 70 section has been revised or deleted to reflect the purposes of the early reductions specialty permit program.

To apply for an alternative emission limitation and a compliance extension for an early reductions source, an owner or operator must file a specialty permit application with the EPA Administrator. The Administrator will delegate the review and final disposition of permit applications under this subpart to the EPA Regional Offices and, therefore, applications actually should be sent to the appropriate EPA Region. Applications, in general, must be filed no later than 120 days after the date of proposal of an applicable standard issued pursuant to section 112(d) of the Act or 120 days after promulgation of this subpart, whichever is later. However, sources that have made enforceable commitments must submit applications by April 30, 1994. These deadlines will help assure that permits for early reductions sources will be issued in a timely manner.

Generally, a specialty permit application must contain all required information upon initial submittal in order to be considered a "complete" application. However, one exception is the documentation of actual post-reduction emissions, which cannot be completed until after the post-reduction year. (The post-reduction year is the year following the deadline for making early reductions, or in other words the year after the proposal date of an applicable section 112(d) standard or, for sources that have made enforceable commitments, calendar year 1994.) Therefore, the documentation of actual post-reduction emissions will not be part of the initial permit application but will be filed later as a supplement to the application. The supplement must be filed after the post-reduction year but no later than 13 months after the applicable deadline for making early reductions. For sources that have made enforceable commitments, the supplement must be filed after December 31, 1994 but no later than January 31, 1995.

Although the overall demonstration of actual post-reduction emissions will not be filed until after the end of the post-reduction year, source test results that will be used in the overall demonstration must be sent with the permit application. This requirement assures that source tests are conducted early in the post-reduction year (or sooner). For example, if an owner or operator plans to source test an emitting unit in the early reductions source to help substantiate post-reduction emissions for the unit, the testing must be completed in time to submit results from the test with the permit application. These test results later would be combined with some type of emission monitoring or relevant parameter monitoring information to demonstrate actual emissions for the emitting unit for the post-reduction year. The EPA will begin evaluating permit applications when they are received, and a "completeness" determination will be made. The EPA 12-month timetable for permit issuance begins upon receipt of a complete application. However, no specialty permit will be issued until the post-reduction emission demonstration has been submitted and approved.

The Administrator will determine whether a permit application under this subpart is complete within 45 days of receipt. If no completeness determination is made within 45 days, the application will be deemed complete. The 45-day completeness determination period is somewhat less than that established in the part 70 rule (60 days) because specialty applications will be shorter than comprehensive permit applications and will be reviewed on a priority basis by EPA. During the processing of a complete application the Administrator may request the applicant to send additional information, if it is needed to evaluate or take final action on the permit. An applicant also has the responsibility to amend a permit application upon becoming aware that relevant facts were initially omitted, incorrect information was submitted, or new requirements became applicable after the permit application was filed. The source must submit this information in a timely manner or its application will no longer be considered complete.

For a permit application to be complete, the requirements of paragraphs § 71.24(c) and (e) must be met. These requirements are similar to those in the part 70 rule for State title V programs, but have been revised somewhat to apply to early reductions sources. The primary components of the application are: identifying information for the facility; a description of the early reductions source; substantiated base year emissions for the source; information on emission reduction measures employed to achieve the early reductions and results from any short-term emission tests completed after employment of such measures; the alternative emission limitation proposed for the source; and monitoring, recordkeeping, certification and reporting requirements proposed for the source. If an enforceable commitment has been filed and approved, it can be used to supply the facility information, source description, and base year emissions required for the permit application. As mentioned above, the complete post-reduction emissions demonstration, which documents actual annual post-reduction HAP emissions and shows achievement of qualifying early reductions, is submitted later as a supplement to the initial permit application.

Detailed requirements for the description of the early reductions source, the associated base year and post-reduction hazardous air pollutant emissions, emission reduction measures employed, and other information necessary to demonstrate that the source has achieved qualifying early reductions will not be discussed in this preamble but are contained in the Early Reductions Rule § 63.74 and are incorporated into this rulemaking by reference. Thus, the permit application must contain sufficient information to satisfy § 63.74 of the Early Reductions Rule.

The source owner or operator also must propose in the permit application an alternative emission limitation to be met throughout the compliance extension period [§ 71.24(e)(3)]. This number would constitute an annual cap on HAP emissions from the early reductions source and would reflect at least a 90 percent reduction from the established base year emissions (95 percent reduction for sources emitting particulate HAP). Aggregate HAP emissions from all emitting equipment or operations in the early reductions source must remain at or below the alternative emission limitation on an annual basis. If the early reductions source emits any of the hazardous air pollutants designated "high-risk" pollutants by the Early Reductions Rule, then a second alternative emission limitation would be required. This second limitation would be set at a level at least 90 (95) percent below base year emissions adjusted by the weighting factors of any high-risk pollutants emitted.

Section 71.24(e)(4) also requires the permit application to include "additional emission limitations, limitations on operation, work practice standards, and any other emission limiting requirements for the early reductions source necessary to assure compliance with the alternative emission limitation(s)." It may not be necessary to delineate additional individual emission limits for emitting units in the early reductions source provided that the monitoring, reporting, and recordkeeping terms of the permit are sufficient to assure enforceability of the alternative emission limitation. The reader is referred to the following section on permit content for more detail on additional limits in early reductions permits.

The permit application also must contain information necessary to define alternative operating scenarios for the early reductions source and identify associated permit terms and conditions needed to assure that the source will meet the alternative emission limitation under the alternative scenarios. Many emitting processes or operations vary during the course of a year due to seasonal factors, production rate changes, raw material switching, product changes, or other variations considered normal for a particular business. Such variations would become allowable under an early reductions permit if they are defined in the permit and associated limiting terms or conditions in the permit assure that the alternative emission limitation will not be exceeded.

The last requirement for a permit application, § 71.24(e)(6), includes statements related to compliance. Specifically, each application must contain: (a) A statement of the methods proposed to demonstrate continuing compliance with the alternative emission limitation and other permit conditions, including a description of monitoring devices or activities for the emissions units in the source, test methods, and recordkeeping and reporting; (b) a schedule of submissions of compliance certifications during the permit term (at least annually); and (c) a statement indicating the source's compliance status with applicable enhanced monitoring requirements (if any) and compliance certification requirements of the Act.

As noted in the previous paragraph, the permit application must contain the owner or operator's proposed compliance provisions (monitoring, recordkeeping, reporting, and compliance certifications) necessary to assure that the early reductions source maintains compliance with the alternative emission limitation. The EPA cannot prescribe the types of monitoring required within this rulemaking because the Early Reductions Program is open to all types of source categories and emission reduction measures and selection of appropriate monitoring methods directly depends on emission characteristics and reduction measures used. Nonetheless, it is the owner or operator's responsibility to propose appropriate monitoring for the early

reductions source. Guidance for generating proposed monitoring requirements in an early reductions permit application will be available through the following means.

Major sources of HAP, those that emit 10 tons per year or more of an individual HAP or 25 tons per year or more of any combination of HAP, will be subject to enhanced monitoring requirements under section 114(a)(3) of the Act, and other sources may be subject to such enhanced monitoring requirements. The EPA is in the process of establishing implementing regulations for the enhanced monitoring provision of the Act. If the enhanced monitoring regulations are not promulgated at the time of filing a permit application under this rulemaking, any proposed enhanced monitoring regulations should be used as a guide. If such promulgation occurs after the time of permit application filing but prior to permit issuance, the promulgated regulations will be taken into account in the final permit. Once a permit is issued, EPA does not anticipate requiring a revision of the permit for monitoring until renewal. (Renewal of specialty permit terms and conditions for an early reductions source will be accomplished pursuant to an approved comprehensive title V permit program, since the specialty permit itself will not be renewed.)

Additional help for establishing monitoring requirements for specific types of emissions may be available from existing emission standards for the same type or similar type of source, or from standards based on use of the same or similar emission reduction measures. Normally, specific monitoring requirements are established as part of an emission standard for a source category, e.g., a new source performance standard issued under section 111 of the Act or existing hazardous air pollutant standards issued under section 112. Such standards could provide useful information to guide the owner or operator in proposing monitoring methods for the early reductions source.

In general, for early reductions sources containing multiple individual emission points, which in aggregate are subject to the alternative emission limitation, monitoring devices/activities should be specified for each point to substantiate ongoing performance of the source. This does not mean that every emission point will be required to have a monitoring device that directly measures emissions. Other methods may suffice to indicate with accuracy that emissions are within allowable levels, such as monitoring process or equipment parameters or material flows, or performing equipment inspections. Factors influencing acceptability of a monitoring method include the accuracy and reliability of the method, the frequency of monitoring or testing, and the amount of emissions from the unit to be monitored. The larger emission units in the source likely will be subject to more rigorous monitoring requirements. During the post-reduction year, owners or operators should begin implementing monitoring they plan to propose in their permit applications to help substantiate post-reduction emissions.

To complement compliance monitoring, the source owner or operator must include recordkeeping and reporting requirements in the permit application. Records would be kept of compliance monitoring results and would be reported to the EPA periodically. Such reports must be submitted at least every six months, more frequently if necessary for adequate enforcement of the alternative emission limitation. Additional detail on recordkeeping and reporting is in the following section of this preamble on permit content.

Finally, the permit application must provide a statement indicating the source's compliance status with respect to the enhanced monitoring requirements of the Act, where applicable. These requirements will be detailed in regulations EPA will issue in the near future. If the regulations have not been promulgated at the time of filing the permit application, the applicant should use the proposed version of the regulations in discussing the source's enhanced monitoring compliance status.

Any permit application, report, or compliance certification submitted under this subpart must contain a certification by a responsible official indicating the submittal is true, accurate, and complete based on information available to the official and conclusions reached after reasonable inquiry into the contents of the submittal.

C. Permit Content

The permit content section of the proposed rule (§ 71.25) details the information and requirements that must be in permits issued under this subpart. It mirrors a similar section of the part 70 rule for State permit programs and contains several parallels to the previous section on permit applications. Overall, the section contains much of the same language from the part 70 rule. For the most part, only relatively minor revisions have been made to the part 70 counterpart due to the narrow focus of this rulemaking on hazardous air pollutants from early reduction sources. For example, because these permits do not implement applicable requirements of the Act but rather create alternative emission limits, the proposed rule contains no requirement that these permits address all applicable requirements.

The most significant changes are that the part 70 paragraphs on general permits and temporary sources have been deleted. General permits are designed to cover numerous similar sources with essentially the same permit conditions and limitations, thus reducing the time and expense of issuing separate permits for the sources. Early reductions sources will be different from each other and will require different permit terms and conditions. No general permits are contemplated for early reductions sources. Temporary sources are nonpermanent operations that will operate at multiple locations during the permit term. Early reductions sources will be permanent operations at a fixed site. Therefore, any provisions in the State permit program rule for temporary sources would not apply to this rulemaking.

In general, a permit will contain an alternative emission limitation for the early reductions source; additional emission limitations, operational limits, or work practice standards for the early reductions source, as necessary to assure practical enforceability of the alternative emission limitation; monitoring, recordkeeping, compliance certification, and reporting requirements; alternate operating scenarios provisions, if requested by the applicant; provisions for trading emissions increases and decreases, if feasible and requested by the applicant; compliance requirements (including compliance certifications); a provision for emergencies which may arise within the early reductions source; and a "permit shield" provision. The development of the permit content provisions will not be discussed in detail in this preamble since the requirements are very similar to the part 70 rule for State title V permit programs. The reader is referred to the **Federal Register** notices for that rulemaking for such information. The following paragraphs primarily will summarize the most important provisions and explain any significant departures from the part 70 rule.

Each early reductions source will receive an alternative emission limitation for hazardous air pollutants, written in terms of an annual cap. If the source emits any of the 47 high-risk

pollutants listed in the final early reductions rule, an additional alternative emission limitation will have to be issued which takes into account the weighting factors assigned to the high-risk pollutants.

As noted in the previous section of this preamble on permit applications, § 71.25(a)(2) also requires the permit to include "additional emission limitations, limitations on operation, work practice standards, and any other emission limiting requirements for the early reductions source necessary to assure compliance with the alternative emission limitation(s)." This requirement is not meant to mandate additional limitations but rather to provide for their use, as necessary, to ensure practical enforceability of early reductions permits. It is important that EPA have the ability any time during the year to track a source's progress toward meeting the alternative emission limitation, discern excess emissions, and require corrective action. Annual emissions limits alone are not easily enforced because it is difficult to discern and prove at any given time that the source will exceed the annual emissions cap. Monitoring, reporting, and recordkeeping terms written into a specialty permit would enhance the enforceability of the annual cap, particularly where they include provisions incorporating a rolling annual emission determination, perhaps on a quarterly or monthly basis. With this mechanism there would be more frequent determination and reporting of emissions for the previous 12 month period, thereby giving a better, more timely indication of a source's performance. However, if this method still would not create sufficient enforceability for a particular source, additional short-term emission limits might be appropriate.

No prejudgments are made in this rulemaking as to whether additional limitations on the source would be necessary to ensure enforceability of the alternative emission limitation under the Early Reductions Program. The likely variety in numbers and types of emitting units comprising early reductions sources precludes this. These decisions will be made during permit issuance and will be based on several factors including: The ability of EPA to be able to determine compliance more frequently than annually, the number of distinct emitting units in the source, and the emission characteristics of the emitting units.

The additional requirements may be work practices or limits on operation, as authorized by section 112(h) of the Act. Examples include a permit requirement to properly utilize floating roofs with adequate seals to prevent emissions from storage tanks or a requirement to operate an emissions control device, such as an incinerator, within a specified temperature range. Short-term emission limits on certain emitting units also could be specified, such as monthly or daily emission limits on the larger emissions in the early reductions source.

Each permit will contain monitoring requirements necessary to assure compliance with the alternative emission limitation and other limitations on the early reductions source. As described in the section above on permit applications, monitoring methods will be proposed by the applicant and will be confirmed, or if necessary revised, as part of the permit evaluation and issuance process. The permit also will specify records to be kept at the facility and periodic reports to be submitted to EPA.

Many of the permit content section requirements related to monitoring, recordkeeping, reporting, and compliance certification contain detail that will guide the applicant in preparing a complete initial permit application. For example, records of monitoring information must include the date, place, and time of sampling or measurements; the date analyses were performed; the company that performed the analyses; the analytical techniques or methods used; the results of such analyses; and the operating conditions existing at the time of sampling or measurement.

At a minimum, the early reductions source owner or operator must submit reports of all monitoring at least every six months. Shorter reporting intervals could be specified within the permit if warranted, perhaps for some of the most significant emission points in the early reductions source or where emissions are expected to vary substantially with time or seasonally.

The owner or operator also will be obligated to report deviations from permit requirements within ten days of occurrence, including those due to upset conditions. The counterpart requirement in the part 70 rule for State programs requires "prompt" reporting of such deviations but allows the State to set specific deadlines. For the purposes of this rulemaking, the ten-day deadline is considered to constitute "prompt" reporting. Ten days was judged to provide reasonably quick notice of deviations to the permitting authority, yet give the owner or operator sufficient time to investigate the event and prepare a brief report. To minimize the number of reportable "deviations," the permit should include, as comprehensively as possible, terms and conditions covering routine variations in operations and maintenance, including startups and shutdowns. (Of course the permit terms and conditions for routine variations still must assure compliance with the alternative emission limitation.) The EPA seeks comment on the 10-day reporting deadline for permit deviations.

The permit will contain terms and conditions for alternate operating scenarios at the early reductions source, if requested by the applicant. The purpose of this provision, which is similar to the part 70 rule, is to accommodate different operating modes without requiring a permit modification. The permit will be written to ensure that the alternative emission limitation is met under each operating scenario and will require the owner or operator to record in a log the scenario under which it is operating.

As noted in the preamble to the final operating permit regulations, EPA believes that the operational flexibility provisions of section 502(b)(10) of the Act are a mandatory element of any title V permit program. [See 57 FR 32250, 32266 (July 21, 1992)]. Accordingly, the part 70 regulations provided for three alternatives, two of which were mandatory for any State operating permit program, for implementing this section of the Act. The two mandatory elements are at least potentially applicable to this rule. The optional element did not pertain to section 112 requirements, and therefore can have no relevance here. Part 70 requires, first, that a State program allow certain narrowly defined changes at a permitted facility that contravene permit terms ("section 502(b)(10) changes"). Second, State programs must provide for emissions trading within a permitted facility for purposes of complying with a federally enforceable emissions cap established in the permit independent of or more strict than an applicable requirement.

The EPA has considered the range of application for operational flexibility in this specialty permit program, and has decided, for the reasons discussed below, that only the second of the alternatives described above is appropriate for this program. The EPA solicits comment on whether the emissions trading provision retained in this rule is appropriate or necessary, and whether it should be augmented with a provision for "section 502(b)(10) changes."

Proposed § 71.25(a)(10) provides for the permit to allow trading hazardous air pollutant emission increases and

decreases between emissions units covered by the alternative emission limitation, where the permittee requests it and the permittee proposes adequate procedures to quantify the increases and decreases and ensure that the alternative emission limitation will not be violated. Additionally, the changes precipitating the emissions increases and decreases cannot constitute a modification under title I of the Act and the permittee must give a seven-day advance notice of the change to the permitting authority. Such notice must describe the proposed change, when it will occur, and how the change will comply with the alternative emission limitation and other terms and conditions of the permit.

The incorporation of this operational flexibility provision into the proposed specialty permits rule is consistent with the part 70 provisions for operational flexibility, since the alternative emission limitation is essentially a federally enforceable emissions cap established independent of otherwise applicable requirements. It also is consistent with the purposes of the Early Reductions Program, because it allows the source considerable flexibility in how it will meet the reduction level. At the same time, it assures that the specialty part 71 permit will be enforceable, since the permitting authority may not accept a proposal for emissions trading that does not include replicable procedures adequate to ensure that individual trades will be quantifiable and enforceable.

As noted above, the proposed rule does not allow for "section 502(b)(10) changes." These are defined in the part 70 regulation as changes that contravene an express permit term, where such changes would not contravene federally enforceable permit terms that are applicable requirements of the Act or are monitoring (including test methods), reporting, recordkeeping, or compliance certification requirements. As conveyed in the preamble to the part 70 regulations, this provision is designed to allow changes that contravene permit terms not needed to enforce emission limitations or a federally enforceable cap assumed to avoid an otherwise applicable requirement.

The EPA does not believe there will be any such superfluous terms in specialty permits. Because EPA will be the permitting authority for these specialty permits (or will have an oversight function where a State has been delegated the specialty permits program), it will be able to ensure that nonessential requirements do not find their way into the permit. This task should be greatly facilitated by the fact that these permits will address only the alternative emission limitation. There will be no need, for example, to examine State requirements associated with delegated Federal standards or State Implementation Plans and determine whether certain terms are unnecessary for ensuring compliance with these requirements.

Given the narrow programmatic focus of these permits, the source-specific nature of the limitations to be incorporated, and the careful scrutiny that will be given to each permit by EPA prior to its issuance, the EPA believes it is highly unlikely that the flexibility intended by § 70.4(b)(12)(i) of the part 70 regulations is needed in this program. Moreover, in light of this finding, EPA believes that providing sources with the authority to contravene any specialty permit terms would be inconsistent with section 502(b)(10) of the Act. For this reason, EPA is proposing not to allow the flexibility to make "section 502(b)(10) changes" in this specialty permits program.

Other provisions on permit content in § 71.25 of the proposed rule which are very similar to the part 70 rule include: a severability clause to ensure continued validity of the various permit requirements in the event of a challenge to any portion of a specialty permit, certain provisions related to permit enforcement, compliance requirements, the permit shield, and the emergency provision. These provisions will not be discussed in detail, except for a summary of compliance certification requirements and a brief discussion of the permit shield as applied to early reductions sources.

As required by title V of the Act, permits must contain requirements that the source certify compliance at least annually. Early reductions sources will have to show at the end of every year that the alternative emission limitation has been met as well as the other terms and conditions in the specialty permit. The permit could require certification of terms and conditions more frequently than annually, if necessary for proper enforcement of the permit. A compliance certification must contain: an identification of each term or condition of the permit that is the basis of the certification; a discussion of the compliance status and whether compliance was continuous or intermittent during the year (or other reporting period); the methods used to determine compliance over the reporting period; and other facts required by the permitting authority, if any, to determine compliance status.

Section 71.25(d) of the proposed rule allows for the establishment of a permit shield. Under this provision, EPA will provide in any permit that compliance with the terms and conditions of the permit will be deemed compliance with the requirements of the early reductions regulations (part 63, subpart D). Like the permit shield provided for in part 70, this shield essentially protects the source against a claim in an enforcement action that the permit does not adequately implement the underlying requirement. Also similar to part 70, the permit shield provided for in this program does not shield the source against any changes to the regulations that may occur following permit issuance.

Unlike the part 70 permit shield, the shield proposed here has a very limited range of operation. It does not shield the source relative to any applicable requirements other than the Early Reductions Rule. Moreover, it does not explicitly act as a shield relative to the section 112(d) standards that would apply in the absence of the alternative emission limitations. The EPA believes that no such shield is necessary, since it is inherent in the operation of the Early Reductions provision of the Act (section 112(i)(5)) that these standards will not be enforceable against the source while the alternative emission limitation is in effect.

The permit shield provision in the proposed rule differs in another respect from that in part 70. Under part 70, a State retains discretion not to grant a shield in any particular circumstance. The EPA is proposing to grant a shield for each specialty permit it issues.

The EPA believes that, in spite of the narrow range of requirements addressed in these specialty permits, the permit shield may be useful in this permit program in that it may provide the source with additional assurance that the terms of its permit faithfully implement the requirements of the Early Reductions Rule. The EPA solicits comment on this use of the shield, and in particular whether such assurance against differing interpretations of the Early Reductions Rule in an enforcement action is necessary or appropriate.

A final point of discussion on the permit content section of the rule relates to the payment of fees by the early reductions source. Title V of the Act requires State permit programs to contain provisions for the collection of fees to cover the cost of issuing comprehensive permits. However, under circumstances in which the Administrator issues a comprehensive permit under title V, the Administrator's collection of fees is discretionary. For the issuance of specialty permits under this rulemaking, the EPA has adopted the stance that fees may be required by the Administrator (§ 71.25(a)(8)).

Although EPA is reserving the right to collect fees for issuing specialty permits, at this time the EPA does not anticipate collecting such fees due to the effort involved in setting up and administering a fees collection system and because EPA expects to issue relatively few permits for the brief duration of this specialty permits program. Under a delegation, States would be expected to collect fees for issuing specialty permits sufficient to cover the cost of administering the delegated program. The EPA solicits comment specific to this policy on collection of fees for federally issued permits under this rule. Taking into consideration such comments, EPA intends to make a definite statement in the promulgated version of the rule on whether fees will be collected for federally issued specialty permits.

D. Permit Issuance, Reopenings, and Revisions

Section 71.26 of the proposed rule pertaining to the mechanics of issuing permits is similar in structure to its counterpart in the part 70 rule (§ 70.7). Edits have been made to the part 70 language to make the section appropriate for the Early Reductions Program. Additionally, a couple of significant changes have been made and are discussed below.

A specialty permit or specialty permit modification will be issued by the Administrator only if: A complete application for the permit or modification has been submitted, public participation requirements of § 71.27 of the proposed rule have been met, the terms and conditions of the permit meet all the requirements of § 71.25 for permit content, and the permit provides for compliance with an alternative emission limitation reflecting the emissions reduction which qualified the early reductions source for a six-year compliance extension under the Early Reductions Rule. Within 45 days of receiving an application, the Administrator will notify the applicant that the application is complete or that it is incomplete and request additional information. If no notification is sent within 45 days, the application is deemed complete. Permits will be issued within 12 months of receipt of a complete application. (Although, as mentioned earlier in this preamble, no permit will be issued until this rule is promulgated and the demonstration of post-reduction emissions has been submitted and approved.)

For all permit applications and permit modifications, the Administrator will provide for public comment, including comment by affected States, and for a public hearing if requested. Notice of the proposed action will be provided according to the requirements of § 71.27. The draft permit and supporting materials will be available for public inspection during the comment period, which shall be at least 30 days. Within 30 days of issuance of final permit decisions, appeals may be filed with the Environmental Appeals Board, and such appeals shall be prerequisites for judicial review of final permit decisions. If the Administrator approves a State program for the implementation of this subpart, the Administrator will retain the right to object to issuance of a permit or permit modification that does not meet the requirements of this subpart, according to the procedures described in § 71.26(f).

Unlike comprehensive title V permits, specialty permits that would be issued under this rulemaking will not be renewed. The issuance of specialty permits to early reductions sources is an interim means of meeting the requirements of section 112(i)(5) of the Act until a comprehensive title V permit issuance mechanism is available, and the five-year term of a specialty permit will be sufficient to bridge this interval. Therefore, renewal is not necessary. A specialty permit eventually will be incorporated into the comprehensive permit for the facility containing the early reductions source. If for some reason there is a delay in issuing the comprehensive permit to the facility despite the timely filing of a complete comprehensive application, then any existing specialty permit reaching the end of its term shall not expire but will remain in effect until the comprehensive permit is issued. However, the fact that a specialty permit exists for an early reductions source in no way shields an owner or operator from an obligation to file a timely application for a comprehensive title V permit for the entire facility.

The part 70 rule section on permit issuance (§ 70.7) contains procedures for three different types of modifications to permits: Administrative amendments, minor permit modifications, and significant modifications. For specialty permits under this rulemaking, only two procedures are being proposed, one for administrative amendments and one for all other types of modifications. Administrative amendments are narrowly defined, minor revisions to permits and include only the following types of actions: correction of typographical errors; changes to name, address, or phone number of a person identified in the permit; incorporation of more frequent monitoring or reporting by the permittee; and changes in ownership that do not involve other permit changes. Administrative amendments may be implemented by the owner or operator upon submittal of the request to the Administrator. The Administrator will take action on such requests within 60 days and need not provide notice to the public or affected States.

All other permit revisions that cannot be classified as administrative amendments must be processed through the modification procedures (§ 71.26(d)). Permit modifications are processed in the same way as initial permit applications. The modification application need only address the proposed changes to terms and conditions in the existing permit but otherwise must meet the requirements for permit applications (§ 71.24) and will be offered for public comment as in § 71.27. The Administrator will take final action on permit modifications within 12 months of receipt of a complete application for the modification.

Specialty permits may be reopened and revised if the Administrator determines that the permit contains a material mistake, that inaccurate statements were made in establishing the alternative emission limitation or other terms or conditions of the permit, or that the permit must be revised to assure compliance with the alternative emission limitation. Procedures for reopening and revising a permit are the same as for initial permit issuance and affect only those parts of the permit which caused the reopening. The Administrator will provide the owner or operator at least 30 days advance notice before reopening a permit.

As previously indicated and unlike the part 70 rule for comprehensive permits, no provision has been made in this rulemaking for minor modifications to specialty permits. The minor modifications provisions of part 70 allow a permitted source to make certain changes immediately upon application to the permitting authority, thereby avoiding the delay associated with review and issuance procedures for significant modifications. Although this rulemaking currently does not contain such a provision, the EPA is considering inclusion of minor modification procedures in the final rule that either would be similar to those in part 70 or would provide for a 30 or 60 day expedited review of minor modifications prior to the source making the change, as opposed to the significant modification process which may take up to twelve months.

The part 70 rule (§ 70.7(e)(2)(i)(A)) provides criteria for determining whether proposed changes at a source may be processed as minor modifications. Most relevant here are subsection (i)(A)(*2*), which prohibits use of the minor modification track for significant changes to existing monitoring, reporting, or recordkeeping requirements in the permit, and subsection (i)(A)(*4*), which provides that a minor modification cannot "seek to establish or change a permit or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject," including, specifically, "an alternative emissions limit approved pursuant to regulations promulgated under section 112(i)(5) of the Act."

The EPA recognizes that situations may arise in which an early reductions source owner or operator wishes to make insignificant changes to compliance terms in the permit, such as those involving monitoring, reporting, or recordkeeping. On the one hand, subsection (i)(A)(*4*) would prohibit use of the minor modification track to revise an alternative emission limitation, and presumably any compliance terms in the permit necessary for enforcement of that limitation. On the other hand, alternative emission limitations, similar to a promulgated standard augmented by compliance terms existing only in the permit, may be susceptible to changes to those compliance terms that are truly insignificant. Therefore, EPA does not believe that subsections (i)(A)(*2*) and (i)(A)(*4*)(*B*) are mutually exclusive, but rather that these two subsections, read together, may yield an interpretation which would allow insignificant changes to monitoring, recordkeeping, or reporting requirements associated with an early reductions alternative limitation.

Despite the viability of this interpretation from a textual standpoint, certain policy concerns have led EPA to exclude the minor modification track from the proposed rule. In particular, there is concern that allowing "insignificant" changes to a specialty permit's monitoring, reporting, or recordkeeping provisions to be treated as minor modifications could weaken enforcement of the overall alternative emission limitation. Similar to the alternative emission limitation, there will be no specific applicable requirements of the Act underlying the monitoring, reporting, and recordkeeping terms of a specialty permit (except perhaps for general requirements for enhanced monitoring promulgated under section 114(a)(3) of the Act). Such terms essentially will be negotiated and determined by the Administrator to be adequate for the purposes of the Early Reductions Program at the time of permit issuance. Therefore, if a supposedly insignificant monitoring change were to be made at an early reductions source, processed as a minor modification, and after review by the permitting authority found to be a significant change, the only recourse for the permitting authority would be to require the source to return to the original permit terms. There would be no possibility of enforcement of the underlying applicable requirement, since none exists, and no penalty to the source. Additionally, the monitoring change made may have resulted in inaccurate or unreliable information, compromising the ability of the permitting authority to determine later whether the source had met the alternative emission limitation for the year.

Moreover, the ability to effect insignificant changes to compliance provisions in the permit prior to governmental review will be practicable only if there is sufficient predictability concerning what changes reach the significance threshold. For requirements of general applicability, this predictability can be achieved through the establishment of guidelines addressing significance in the context of compliance regimes found in established requirements. However, inherent in the concept of an early reductions alternative emission limitation is the probability that it will contain compliance provisions tailored uniquely to the permitted source. The EPA believes that, for a source permitted in this manner, the forum for predicting what changes to compliance terms may be insignificant should be the permit itself. Any flexibility to make insignificant changes to monitoring, recordkeeping, or reporting provisions should therefore be either written into the permit at issuance, or approved by the Administrator in advance of the change through a significant modification process.

Finally, it is not altogether clear that early reductions sources will need the flexibility provided by a minor permit modification procedure. Each specialty permit will contain requirements specifically designed for the types of pollutants emitted and reduction measures employed at the subject early reductions source. Such requirements will be proposed by the owner or operator in the permit application and, although proposed requirements can be modified during the permit issuance process, presumably will reflect the owner's or operator's preferences. This likely would limit the need to make changes during the permit term.

The EPA seeks comment on this issue specifically with regard to the need for minor modification procedures for specialty permits, the appropriateness of having such procedures, the enforceability of the alternative emission limitation if minor modification procedures were to be adopted, and whether an expedited review of proposed changes in advance of the change would be more appropriate for early reductions sources than allowing changes prior to governmental review as in the part 70 minor modification procedures.

E. Public Participation and Administrative Review

Section 71.27 of the proposed rule provides detailed procedural requirements for public participation in and administrative review of permitting decisions. While the Part 70 rule establishes minimum requirements for public participation in State administered programs, EPA believes that since the Early Reductions Program will be federally administered and not subject to further rulemaking before the program is in effect, specific procedures for public participation and administrative review should be established concurrently with the other requirements of this rule. This approach is consistent with other federally administered permitting programs, such as the Prevention of Significant Deterioration ("PSD"), National Pollutant Discharge Elimination System ("NPDES") and Resource Conservation and Recovery Act ("RCRA") programs.

EPA considered two alternative methods of establishing the public participation and administrative review procedural requirements. The first alternative would be to amend the existing procedures in 40 C.F.R. Part 124, which establishes specific decisionmaking procedures for RCRA, Underground Injection Control ("UIC") PSD and NPDES permits, so that they would be compatible with the Early Reductions Program. EPA would then incorporate those provisions by reference in the early reductions permit rule. The second alternative was to establish public participation and administrative appeal procedures as a separate section of this rule. This alternative has the advantage of allowing these procedures to focus specifically on the needs of the Early Reductions Program as well as appear in close proximity to the permit program requirements in the Code of Federal Regulations.

The proposal follows the second alternative. These public participation and administrative appeals procedures are set out at § 71.27, and are based closely on the selected provisions part 124, subpart A. The EPA does not believe the choice of one format over the other will have a substantial impact on the implementation of this rule. The EPA will further consider these issues of regulatory structure as it develops the comprehensive part 71 program, and solicits comment on this question in this rulemaking as well.

Once a permit application is complete, including an application to modify an existing permit, EPA will tentatively decide whether to prepare a draft permit. Such draft permits will contain permit conditions specified in § 71.25, and be publicly noticed and made available for comment. Administrative modifications of permits will not be subject to draft permit or public notice requirements. All draft permits will be accompanied by a statement of basis that briefly describes the derivation of the conditions of the draft permit and the reasons for them.

Section 71.27(d) establishes public notice and comment procedures for early reductions permit actions, including application denials, draft-permit preparation, scheduling of public hearings, reopening of the public comment period, and granting of appeals. Notice of draft permits (including permit modifications) will provide at least 30 days for public comment, and notices of hearings will issue at least 30 days before hearings are held. Notice will be provided by mail to interested persons, publication, or other reasonable means, and will include information on the permittee, the processing agent, contact persons, and general procedures on submitting comments and requesting to speak at hearings. In addition, notices of hearings will provide information on dates, times and places of hearings, as well as applicable rules and procedures. EPA may hold hearings either upon the basis of requests or on its own initiative.

Interested persons are required to raise all reasonably ascertainable issues during the public comment period, but EPA may reopen the public comment period on its own initiative or at the request of interested persons if doing so would expedite the decisionmaking process. Comments filed pursuant to such reopenings will be limited to the new questions that necessitated reopening. After the close of all public comment periods, EPA will issue a final permit decision that includes information on procedures for appeal, accompanied by a response to comments filed by the public. EPA will individually notify affected States whose recommendations are not accepted for the permit. Final permit decisions will be based on the administrative record defined in § 71.27(k), including comments received, hearing transcripts, the response to comments, the final permit, the permit application, and the draft permit and its statement of basis.

Section 71.27(l) grants a right of appeal of final permit decisions and establishes procedures for such appeals. Within 30 days of a final permit decision, interested persons may petition the Environmental Appeals Board to review the final permit decision. Petitions for review must include a statement of the reasons supporting review and may address only issues raised during the public comment period, unless it was impracticable to raise the relevant objections during such period or the grounds for objection arose after the period closed. An example of a situation in which it is impracticable to raise an objection during the comment period would be when a significant change is made from a draft to final permit without providing an opportunity for public comment. Moreover, while persons who participated in the comment or hearing processes may petition the Board to review any condition of the final permit decision, persons who failed to file comments or participate in hearings may petition the Board only with respect to changes from the draft to final permit decision. When an early reductions permit is appealed, it will nevertheless remain fully effective and enforceable against the permitted source.

Finally, all permits may be modified, revoked and reissued, or terminated at the request of any interested person or upon EPA's initiative for reasons specified in §§ 71.25(a)(7) and 71.26(e). EPA tentative decisions to modify, revoke and reissue, or terminate permits will follow the same public notice and comment procedures as initial draft permits. Denials of requests may be appealed to the Environmental Appeals Board, and such appeals are prerequisites for judicial review.

EPA seeks comment on its method of establishing procedures for public participation and administrative review, and on the appropriateness of the specific procedures proposed. EPA particularly seeks comment on the issues of petitions to modify and terminate permits, the statement of basis accompanying draft permits, the proposed public notice and comment requirements, and appeals of permits.

III. Summary of and Rationale for Proposed Amendment to Early Reductions Rule

The Early Reductions Rule requires an enforceable commitment to include a description of the participating source, documentation of actual HAP emissions from the source for the chosen base year, and a statement of commitment to achieve actual annual post-reduction emissions of a specified amount, where the amount is set by the requirement to achieve a 90 (95) percent reduction from the actual base year emissions. If a source had 100 tons per year of gaseous HAP emissions, then the source owner or operator would commit to achieving a 90 percent reduction or 10 tons of HAP emissions per year. No other explicit promises were required to be in an enforceable commitment.

According to the Early Reductions provisions of the Act, enforceable commitments made under the Early Reductions Program are to be enforceable to the same extent as a section 112(d) standard that would otherwise apply to the early reductions source. Therefore, EPA can initiate enforcement action against sources that fail to live up to their commitments. Owners or operators of participating sources would demonstrate achieving promised reductions by submitting post-reduction emission information for the year following the reduction deadline (calendar year 1994). Since this information would not be submitted to EPA until after the end of 1994 and since the source owner or operator was not required to make any other specific promises in the enforceable commitment, little opportunity exists for EPA to check on a participating source's compliance with an enforceable commitment until after the end of 1994.

Nonetheless, a source that has made an enforceable commitment is expected to have implemented before January 1, 1994 emission reduction measures sufficient to ensure that 1994 actual HAP emissions fall within the commitment level. A description of all such emission reduction measures employed is required to accompany the permit application to be submitted by participating sources by April 30, 1994. EPA is proposing to append the emission reduction measures information to the enforceable commitment to complement the participant's commitment to a specific numerical reduction target. In essence, adding this information to an enforceable commitment would present EPA the opportunity to inspect

participating facilities during 1994 to see that declared reduction measures were operational and functioning properly. In the event an inspection shows that a claimed reduction measure is not in operation or is not being operated or carried out properly and the cause is not attributed to a sudden, unavoidable malfunction of emission reduction equipment or processes, the source would be in violation of its enforceable commitment. A violation of this type could cause the source to be subject to a penalty or could cause the source's later demonstration of achieving qualifying reductions to be invalidated (resulting in EPA refusing to grant an early reductions compliance extension), unless the owner or operator can show to the satisfaction of EPA that the 90 (95) percent reduction target had been achieved despite the violation.

During 1994, an owner or operator of a participating source may discover that reduction measures listed in the initial permit application are not needed to achieve the reduction levels specified in the enforceable commitment or may need to replace failed emission reduction equipment. For such situations, a source making any change prior to the end of 1994 in the emission reduction measures described in the initial permit application must submit a notice describing the changes to EPA within 5 days of making the change. Such notice will constitute an amendment to the enforceable commitment.

IV. Administrative Requirements

A. Public Hearing

A public hearing will be held, if requested, to discuss the proposed specialty permits rule and the proposed amendment to the Early Reductions Rule in accordance with section 307(d)(5) of the Act. Persons wishing to make oral presentations should contact EPA at the address given in the ADDRESSES section of this preamble. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement with EPA before, during, or within 30 days after the hearing. Written statements should be addressed to the Air Docket Section address given in the ADDRESSES section of this preamble.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at EPA's Air Docket Section in Washington, D.C. (see ADDRESSES section of this preamble).

B. External Participation

In accordance with section 117 of the Act, publication of this proposal was preceded by consultation with appropriate advisory committees, independent experts, and other regulatory agencies. The Administrator welcomes comments on all aspects of the proposed regulation.

C. Docket

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and involved industries to readily identify and locate documents so that they can participate effectively in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated rule and EPA responses to significant comments, the content of the docket, except for interagency review materials, will serve as the record in case of judicial review [section 307(d)(7)(A)].

D. Paperwork Reduction Act

The information collection requirements in the proposed specialty permits rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request (ICR) document has been prepared by EPA (ICR No. 1650.01) and a copy may be obtained from Sandy Farmer, Information Policy Branch (2136); U.S. Environmental Protection Agency; 401 M Street, SW.; Washington, DC 20460; or by calling (202) 260–2740.

This collection of information is estimated to have a public reporting burden averaging 554 hours per respondent for one-time burden items and 43 hours per respondent annually for recurring burden items. This includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Chief, Information Policy Branch (2136); U.S. Environmental Protection Agency; 401 M Street SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

The information collection requirements of the previously promulgated Early Reductions Rule (57 FR 61970) were submitted to and approved by the Office of Management and Budget. A copy of this ICR (OMB control number 2060–0222) may be obtained from Sandy Farmer at the address mentioned in the first paragraph of this section. Today's proposed change to the Early Reductions Rule would not affect information collection requirements of the rule. No new information is being solicited and the existing ICR does not require revision.

E. Executive Order 12291 Review

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. The criteria set forth in section 1 of the Order for determining whether a regulation is a major rule are as follows: (1) Is likely to have an annual effect on the economy of $100 million or more; (2) is likely to cause a major increase in costs or prices for consumers, individual industries, geographic regions, or Federal, State, or local governments; or (3) is likely to result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The EPA has concluded that the specialty permits rule would result in none of the economic effects set forth in section 1 of the order as grounds for the finding "major rule." The Early Reductions Program is a voluntary program, open to sources that seek a temporary alternative to meeting an otherwise applicable section 112(d) standard. Generally, sources will participate in the program if they feel participation would lower compliance costs compared to meeting the section 112(d) standard. It is not possible to predict with accuracy the magnitude of compliance cost reduction through participation in the Early Reductions Program, although it surely would not be great enough to produce annual compliance cost reductions of $100 million. Through the first two years, the program has attracted about 70 participants. It is expected that there will be 50 or less participants per year for the remainder of the program. If there are as many as 50 participants per year, their annual cost reduction would have to average $2 million to reach the economic effect threshold of $100 million annually for a major rule. Indications from current participants are that the savings are much less.

The proposed amendment to the Early Reductions Rule regarding the content of enforceable commitments is a minor action. It requires no actions on the part of participants in the Early Reductions Program and only affects EPA's enforcement opportunities under the program. No economic effects are associated with the proposed change.

The proposed specialty permits rule and the proposed change to the Early Reductions Rule presented in this notice were submitted to OMB for review as required by Executive Order 12291. Any written comments from OMB to EPA and any written EPA response to those comments will be included in the dockets listed at the beginning of today's notice under ADDRESSES. The dockets are available for public inspection at the EPA's Air Docket Section, which is listed in the ADDRESSES section of this preamble.

F. Regulatory Flexibility Act Compliance

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the specialty permits rule and the amendment to the Early Reductions Rule, if promulgated, will not have a significant economic impact on a substantial number of small business entities. The EPA estimates that this rule will have no direct economic impact on any business entities for two reasons. First, the Early Reductions Program is a voluntary program, an alternate means of complying with otherwise applicable standards forthcoming under section 112(d) of the Act. Generally, companies would participate in the program if they thought their compliance costs would be less than those associated with meeting otherwise applicable standards. Costs could be less because the 90 (95) percent reduction threshold to qualify for an extension likely will be lower than the reduction required by applicable section 112(d) standards. Moreover, the Early Reductions Rule provides owners or operators considerable flexibility to average qualifying reductions among participating emissions units.

Second, the specialty permits program rulemaking simply adapts for earlier use the intended mechanism for eventually delineating and enforcing all Act requirements at individual facilities, namely the title V permit. Sources not electing to participate in the Early Reductions Program would have to obtain title V permits anyway when comprehensive title V. Therefore, this rulemaking does not add any additional requirements to participants. The impacts from the requirements of title V were considered in the promulgated part 70 rule for State comprehensive programs (57 FR 32250). Moreover, the proposed change to the Early Reductions Rule would have no economic effect on any large or small business entities.

List of Subjects in 40 CFR Part 71

Environmental protection, Air pollution control, Hazardous air pollutants, Operating permits, Reporting and recordkeeping requirements.

Dated: November 22, 1993.

Carol M. Browner,

Administrator.

Title 40, chapter I of the Code of Federal Regulations is proposed to be amended as follows:

PART 63—COMPLIANCE EXTENSIONS FOR EARLY REDUCTIONS

1. The authority citation for part 63 subpart D continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

Subpart D—[Amended]

2. Section 63.75 is revised by adding paragraph (g) to read as follows:

§ 63.75 Enforceable commitments.

* * * * *

(g) The control measure information required under § 63.74(d)(1) as part of post-reduction emission documentation and submitted in a permit application according to the provisions of § 63.77 shall become part of an existing enforceable commitment upon receipt of the permit application by the permitting authority. An owner or operator shall notify the permitting authority of any change made to the source during calendar year 1994 which affects such control measure information and shall mail the notice within 5 days (postmark date) of making the change. The notice shall be considered an amendment to the source's enforceable commitment.

3. Part 71 is added to read as follows:

PART 71—FEDERAL OPERATING PERMIT PROGRAMS

Subpart A—[Reserved]

Subpart B—Permits for Early Reductions Sources

Sec.
71.21 Program overview.
71.22 Definitions.
71.23 Applicability.
71.24 Permit applications.
71.25 Permit content.
71.26 Permit issuance, reopenings, and revisions.
71.27 Public participation and administrative review.

Authority: 42 U.S.C. 7401, *et seq.*

Subpart A—[Reserved]

Subpart B—Permits for Early Reductions Sources

§ 71.21 Program overview.

(a) The regulations in this subpart provide for a limited, Federal, title V, permit program to establish alternative emission limitations for early reductions sources that have demonstrated qualifying reductions of hazardous air pollutants under section 112(i)(5) of the Act. A permit issued under this subpart which establishes such an enforceable alternative emission limitation shall grant all emissions units in the early reductions source a six-year extension from otherwise applicable dates of compliance for standards promulgated under section 112(d) of the Act.

(b) After approval of a State's comprehensive permit program pursuant to title V of the Act, the Administrator may continue to issue specialty permits under this subpart only under the following circumstances:

(1) The early reductions source filed a permit application under this subpart before the State obtained approval of a comprehensive title V permit program but the permit had not been finally issued at the time of State program approval; or

(2) The early reductions source will be required to file an early reductions permit application under § 71.24(b) before a comprehensive permit application is required by the State under the approved program.

(c) A permit issued to an early reductions source under this subpart shall have a term not to exceed five years. Such a specialty permit shall be incorporated into a comprehensive title V permit subsequently issued to the facility containing the early reductions source, without reopening or revision of the specialty permit except as provided in § 71.26(e).

(d) Issuance of a specialty permit under this subpart does not relieve a source from an obligation to file a timely and complete comprehensive permit application as required under an approved comprehensive title V permit program.

(e) *Delegation to other permitting authorities.* (1) The Administrator may delegate to another permitting authority the responsibility to implement this permit program. Under such a delegation, the Administrator reserves the right to issue a final permit to early

68818 Federal Register / Vol. 58, No. 248 / Wednesday, December 29, 1993 / Proposed Rules

Federal Register / Vol. 58, No. 248 / Wednesday, December 29, 1993 / Proposed Rules 68819

reductions sources that filed permit applications with the Administrator prior to the permitting authority obtaining delegation.

(2) Under any delegation, the Administrator will require that the permitting authority have enforcement authority substantially equivalent to that specified in § 70.11 of this chapter.

(3) Upon any delegation, administrative appeals of permit decisions issuing pursuant to the delegated program shall continue to be subject to the requirements of § 71.27(l).

§ 71.22 Definitions.

All terms used in this subpart not defined below are given the same meaning as in the Act or in subpart D of part 63 of this chapter.

Act means the Clean Air Act, as amended, 42 U.S.C. 7401, *et seq.*

Actual emissions means the actual rate of emissions of a pollutant, but does not include excess emissions from a malfunction, or startups and shutdowns associated with a malfunction. Actual emissions shall be calculated using the early reductions source's actual operating rates, and types of materials processed, stored, or combusted during the selected time period.

Affected States are all States:

(1) Whose air quality may be affected and that are contiguous to the State in which a permit, permit modification or permit renewal is being proposed; or

(2) That are within 50 miles of the permitted source.

Comprehensive title V permit program means a program approved by the Administrator under part 70 or a program promulgated for EPA permit issuance under title V that encompasses all applicable requirements of the Clean Air Act.

Draft permit means the version of a permit for which the Administrator offers public participation under § 71.27.

Early reductions source means an emitter of hazardous air pollutants as defined pursuant to § 63.73 of this chapter that is seeking to obtain a compliance extension through a permit application filed under this subpart.

Emissions unit means any part or activity of a stationary source that emits or has the potential to emit any hazardous air pollutant.

Enforceable commitment means a document drafted pursuant to section 112(i)(5)(B) of the Act and signed by a responsible company official which commits a company to achieving before January 1 1994 sufficient reductions in hazardous air pollutants from a designated early reductions source to qualify such source for a compliance extension under section 112(i)(5)(A) of the Act.

The *EPA* or the *Administrator* means the Administrator of the EPA or his or her designee.

Final permit means the version of a permit issued by the Administrator under this subpart that has completed all review procedures required by § 71.27.

Hazardous air pollutant means any air pollutant listed pursuant to section 112(b) of the Act.

Permit means any permit covering an existing early reductions source that is issued, amended, or revised pursuant to this subpart.

Permit modification means a revision to a permit issued under this subpart that meets the requirements of § 71.26(d).

Permit revision means any permit modification or administrative permit amendment.

Permitting authority means either of the following:

(1) The Administrator, in the case of EPA-implemented programs; or

(2) The State air pollution control agency, local agency, other State agency, or other agency authorized by the Administrator to carry out a permit program under this subpart.

Responsible official means one of the following:

(1) For a corporation: A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit and either:

(i) The facilities employ more than 250 persons or have gross annual sales or expenditures exceeding $25 million (in second quarter 1980 dollars); or

(ii) The delegation of authority to such representative is approved in advance by the permitting authority;

(2) For a partnership or sole proprietorship: a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal, or other public agency: Either a principal executive officer or ranking elected official. For the purposes of this part, a principal executive officer of a Federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a Regional Administrator of EPA).

State means any non-Federal permitting authority, including any local agency, interstate association, or statewide program. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. Where such meaning is clear from the context, "State" shall have its conventional meaning.

§ 71.23 Applicability.

(a) *Sources covered.* The provisions of this subpart apply to an owner or operator of an existing source who is seeking a compliance extension under section 112(i)(5) of the Act and who, pursuant to part 63, subpart D of this chapter, is required to file a permit application for the extension prior to the date a comprehensive title V permit program is approved for the State in which the existing source is located.

(b) *Covered emissions.* All hazardous air pollutant emissions from the early reductions source shall be included in permit applications and part 71 permits issued under this subpart.

§ 71.24 Permit applications.

(a) *Where to file.* To apply for a compliance extension and an alternative emission limitation under this subpart, the owner or operator of an early reductions source shall file a complete permit application with the appropriate EPA Regional Office. The owner or operator shall also send a copy of the application to the appropriate State agency; to the EPA Emission Standards Division, Mail Drop 13, Research Triangle Park, North Carolina, 27711 (attention: Early Reductions Officer); and to the EPA Office of Enforcement, EN–341W, 401 M Street, SW., Washington, DC 20460 (attention: Early Reductions Officer).

(b) *Deadlines.* (1) Permit applications under this subpart for early reductions sources not subject to enforceable commitments shall be submitted by the later of the following dates:

(i) Within 120 days of the date of proposal of an otherwise applicable standard issued under section 112(d) of the Act, or

(ii) 120 days after [THE EFFECTIVE DATE OF THIS SUBPART].

(2) Permit applications for early reductions sources subject to enforceable commitments established pursuant to § 63.75 of this chapter shall be filed no later than April 30, 1994.

(3) Except as provided in paragraph (b)(4) of this section, the post-reduction emissions information required under paragraph (e)(2) of this section shall not be filed as part of the initial permit application but shall be filed later as a supplement to the application. The supplemental information shall be filed no earlier than one year after the date early reductions had to be achieved according to § 63.72(a)(2) of this chapter and no later than 13 months after such date.

(4) If a source test will be the supporting basis for establishing post-reduction emissions for one or more emissions units in the early reductions source, the test results shall be submitted by the deadline for submittal of a permit application under this section.

(c) *Complete application.* To be deemed complete, an application must provide all information required pursuant to paragraph (e) of this section, except for the information on post-reduction emissions required under paragraph (e)(2) of this chapter. Applications for permit revision need supply the information required under paragraph (e) of this section only if it is related to the proposed change. Information submitted under paragraph (e) of this section must be sufficient to allow the Administrator to determine if the early reductions source meets the applicable requirements of subpart D of part 63 of this chapter. Unless the Administrator determines that an application is not complete within 45 days of receipt of the application, such application shall be deemed to be complete, except as otherwise provided in § 71.26(a)(3). If, while processing an application that has been determined or deemed to be complete, the Administrator determines that additional information is necessary to evaluate or take final action on that application, the Administrator may request such information in writing and set a reasonable deadline for a response.

(d) *Duty to supplement or correct application.* Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional or revised information as necessary to address any requirements of subpart D of part 63 of this chapter (Compliance Extensions for Early Reductions) or of this subpart that become applicable to the early reductions source after the date it filed a complete application but prior to release of a draft permit.

(e) *Required information.* Information as described below accounting for each emissions unit within the early reductions source shall be included in the application. Required information shall be submitted both in hard copy and in a computerized format compatible with the Aerometric Information Retrieval System (AIRS). (Note: EPA has not yet finalized AIRS formatting requirements for title V permit information; additional information pertaining to computerized formats for title V submittals will be supplied upon publication of the final rule). The following elements are required information for permit applications under this subpart:

(1) Identifying information, including company name, telephone number, and address (and plant name, telephone number, and address if different from the company name); owner's name, telephone number, and agent; and telephone number(s) and name(s) of plant site manager/contact;

(2) All information required in § 63.74 of this chapter, including that needed to describe the early reductions source, its base year and post-reduction emissions, and supporting basis for the emissions;

(3) A statement of the proposed alternative emission limitation for hazardous air pollutants from the early reductions source on an annual basis, reflecting the emission reductions required to qualify the early reductions source for a compliance extension under subpart D of part 63 of this chapter;

(4) Additional proposed emission limits for specific emissions units, limitations on operation, work practice standards, and any other emission limiting requirements necessary to assure proper operation of installed control equipment and compliance with the annual alternative emission limitation for the early reductions source;

(5) Information necessary to define alternative operating scenarios for the early reductions source or permit terms and conditions for trading hazardous air pollutant increases and decreases under § 71.25(a)(10), including any associated permit terms and conditions needed to assure compliance with the alternative emission limitation under the alternative operating scenarios or pollutant trading;

(6) Statements related to compliance meeting the following criteria:

(i) A statement of methods proposed to determine compliance by the early reductions source with the proposed alternative emission limitation, including a description of monitoring devices and activities, recordkeeping, and reporting requirements and test methods;

(ii) A schedule for submission of compliance certifications during the permit term, to be submitted no less frequently than annually; and

(iii) A statement indicating the early reductions source's compliance status with any applicable enhanced monitoring and compliance certification requirements of the Act.

(f) Any application form, report, or compliance certification submitted pursuant to the regulations in this subpart shall contain certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under this part shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

§ 71.25 Permit content.

(a) *Standard permit requirements.* Each permit issued under this subpart shall include the following elements:

(1) *Alternative emission limitation.* An annual alternative emission limitation for hazardous air pollutants from the early reductions source reflecting the 90 percent reduction (95 percent for hazardous air pollutants which are particulate matter) which qualified the early reductions source for a compliance extension under subpart D of part 63 of this chapter;

(2) *Additional emission limitations.* Additional emission limitations, limitations on operation, work practice standards, and any other emission limiting requirements for the early reductions source necessary to assure compliance with the alternative emission limitation;

(3) *Monitoring requirements.* Each permit shall contain the following monitoring requirements;

(i) All emissions monitoring and analysis procedures or test methods necessary to assure compliance with the emission limitations established under paragraphs (a) (1) and (2) of this section. Such monitoring or testing shall be consistent with the demonstration made pursuant to § 63.74 of this chapter and any procedures and methods promulgated pursuant to sections 114(a)(3) or 504(b) of the Act;

(ii) Periodic monitoring or testing sufficient to yield reliable data from the relevant time period that are representative of the early reductions source's compliance with the permit. Such monitoring requirements shall assure use of terms, test methods, units, averaging periods, and other statistical conventions consistent with the demonstration made pursuant to § 63.74 of this chapter. Recordkeeping provisions may be sufficient to meet the requirements of this paragraph (a)(3)(ii) of this chapter; and

(iii) As necessary, requirements concerning the use, maintenance, and, where appropriate, installation of monitoring equipment or methods.

(4) *Recordkeeping requirements.* The permit shall contain recordkeeping requirements including the following, as applicable:

(i) Records of required monitoring information that include the following:

(A) The date, place as defined in the permit, and time of sampling or measurements;

(B) The date(s) analyses were performed;

(C) The company or entity that performed the analyses;

(D) The analytical techniques or methods used;

(E) The results of such analyses; and

(F) The operating conditions as existing at the time of sampling or measurement;

(ii) Retention of records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original stripchart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

(5) *Reporting requirements.* The permit shall require the following:

(i) Submittal of reports of all required monitoring at least every 6 months. All instances of deviations from permit requirements must be clearly identified in such reports.; and

(ii) Reporting within ten calendar days of any deviations from permit requirements, including those attributable to upset conditions as defined in the permit. Such reports shall include the probable cause of such deviations and any corrective actions or preventive measures taken.

(6) A severability clause to ensure the continued validity of the various permit requirements in the event of a challenge to any portions of the permit.

(7) Provisions stating the following:

(i) The permittee must comply with all conditions of the part 71 permit issued under this subpart. A violation of an alternative emission limitation, as well as any other requirement established in a permit issued under this subpart, is enforceable pursuant to the authority of section 113 of the Act, notwithstanding any demonstration of continuing 90 percent (95 percent in the case of hazardous air pollutants which are particulates) emission reduction over the entire early reductions source. Any permit noncompliance constitutes a violation of the Act and is grounds for enforcement action or for permit termination, revocation and reissuance, or modification.

(ii) Need to halt or reduce activity not a defense. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(iii) The permit may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

(iv) The permit does not convey any property rights of any sort, or any exclusive privilege.

(v) The permittee shall furnish to the Administrator, within a reasonable time, any information that the Administrator may request in writing to determine whether cause exists for modifying the permit, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Administrator copies of records required to be kept by the permit.

(8) If required by the Administrator, a provision to ensure that an early reductions source pays fees to the Administrator consistent with the level of effort expended by the Administrator in issuing the permit pursuant to this subpart.

(9) Terms and conditions for reasonably anticipated operating scenarios identified by the early reductions source in its application as approved by the Administrator. Such terms and conditions:

(i) Shall require the early reductions source, contemporaneously with making a change from one operating scenario to another, to record in a log at the permitted facility a record of the scenario under which it is operating; and

(ii) Must ensure that the terms and conditions of each such alternative scenario meet the alternative emission limitation and the requirements of this subpart.

(10) Terms and conditions, if the permit applicant requests them, for the trading of hazardous air pollutant emissions increases and decreases among emissions units within the early reductions source without permit revision or case-by-case approval of each emissions trade, provided that:

(i) Such terms and conditions include all terms required under paragraphs (a) and (c) of this section to determine compliance;

(ii) The changes in hazardous air pollutant emissions do not exceed the emissions allowable under the permit;

(iii) The changes in hazardous air pollutant emissions are not modifications under any provision of title I of the Act; and

(iv) The early reductions source owner or operator provides the Administrator written notification at least 7 days in advance of the proposed changes and includes in the notification a description of the change in emissions that will occur, when the change will occur, and how the increases and decreases in emissions will comply with the alternative emission limitation and other terms and conditions of the permit.

(b) *Federally enforceable requirements.* All terms and conditions in a permit issued under this subpart are enforceable by the Administrator and citizens under the Act.

(c) *Compliance requirements.* All permits issued under this subpart shall contain the following elements with respect to compliance:

(1) Consistent with paragraphs (a)(3), (a)(4), and (a)(5) of this section, compliance certification, testing, monitoring, reporting, and recordkeeping requirements sufficient to assure compliance with the terms and conditions of the permit. Any document (including reports) required by a permit shall contain a certification by a responsible official that meets the requirements of § 71.24(f).

(2) Inspection and entry provisions that require that, upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Administrator or an authorized representative to perform the following:

(i) Enter upon the permittee's premises where the early reductions source is located or emissions-related activity is conducted, or where required records are kept;

(ii) Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(iii) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and

(iv) Sample or monitor at reasonable times substances or parameters for the purpose of determining compliance with the permit.

(3) Requirements for compliance certification with terms and conditions contained in the permit, including the alternative emission limitation. Permits shall include each of the following:

(i) The frequency (not less than annually) of submissions of compliance certifications;

(ii) Consistent with paragraph (a)(3) of this section, a means for monitoring the compliance of the early reductions source with its alternative emission limitation;

(iii) A requirement that the compliance certification include the following:

(A) The identification of each term or condition of the permit that is the basis of the certification;

(B) The compliance status;

(C) Whether compliance was continuous or intermittent;

(D) The method(s) used for determining the compliance status of the early reductions source, currently and over the reporting period consistent with paragraph (a)(3) of this section; and

(E) Such other facts as the permitting authority may require to determine the compliance status of the early reductions source;

(iv) A requirement that all compliance certifications be submitted to the Administrator or the Administrator's designated agent; and

(v) Such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

(4) Such other provisions as the Administrator may require.

(d) *Permit shield.* (1) The Administrator will expressly include in a permit issued pursuant to this subpart a provision stating that compliance with the conditions of the permit shall be deemed compliance with part 63, subpart D of this chapter (the Early Reductions Rule), as of the date of permit issuance.

(2) A permit shield may be extended to all permit terms and conditions that allow increases and decreases in hazardous air pollutant emissions pursuant to paragraph (a)(10) of this section.

(3) Nothing in this paragraph or in any permit issued pursuant to this subpart shall alter or affect the following:

(i) The provisions of section 303 of the Act (emergency orders),

(ii) The liability of an owner or operator of an early reductions source for any violation of applicable requirements prior to or at the time of permit issuance, or

(iii) The ability of the Administrator to obtain information from an early reductions source pursuant to section 114 of the Act.

(e) *Emergency provision*—(1) *Definition.* An "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the early reductions source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the early reductions source to exceed an emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.

(2) *Effect of an emergency.* An emergency constitutes an affirmative defense to an action brought for noncompliance with such an emission limitation if the conditions of paragraph (e)(3) of this section are met.

(3) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(i) An emergency occurred and that the permittee can identify the cause(s) of the emergency;

(ii) The permitted facility was at the time being properly operated;

(iii) During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission limitation, or other requirements in the permit; and

(iv) The permittee submitted notice of the emergency to the Administrator within 2 working days of the time when emission limitations were exceeded due to the emergency. This notice fulfills the requirement of paragraph (a)(5)(ii) of this section. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(4) In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency has the burden of proof.

§ 71.26 Permit issuance, reopenings, and revisions.

(a) *Action on application.* (1) A permit or permit modification may be issued only if all of the following conditions have been met:

(i) The Administrator has received a complete application for a permit or permit modification;

(ii) The requirements for public participation under § 71.27 have been followed; and

(iii) The conditions of the proposed permit or permit modification meet all the requirements of § 71.25 and provide for compliance with an alternative emission limitation relecting the emissions reduction which qualified the early reductions source for a compliance extension under part 63, subpart D of this chapter.

(2) The Administrator will take final action on each permit application (including a request for permit modification) within 12 months after receiving a complete application, except that final action may be delayed where an applicant fails to provide additional information in a timely manner as requested by the Administrator under § 71.24(c).

(3) The Administrator will promptly provide notice to the applicant of whether the application is complete. Unless the Administrator requests additional information or otherwise notifies the applicant of incompleteness within 45 days of receipt of an application, the application shall be deemed complete.

(4) If a source submits a timely and complete application for permit issuance, the source's failure to have a title V permit for purposes of any requirements under section 112 pertaining to the early reductions source is not a violation of this part until the Administrator takes final action on the permit application. This protection shall cease to apply if, subsequent to the completeness determination made pursuant to paragraph (a)(3) of this section, and as required by § 71.24(d), the applicant fails to submit by the deadline specified in writing by the Administrator any additional information identified as being needed to process the application.

(b) *Permit renewal and expiration.* (1) Permits issued under this subpart shall not be renewed. Permit renewal for expiring permits issued under this subpart shall be accomplished according to the requirements of title V of the Act for comprehensive permits for the facility containing the early reductions source.

(2) Except as specified in paragraph (b)(3) of this section, permit expiration terminates the early reductions source's right to operate.

(3) If, consistent with the requirements of title V of the Act, a timely and complete application for a comprehensive title V permit for the facility containing the early reductions source has been submitted but the permitting authority has failed to issue or deny the comprehensive permit prior to expiration of a permit issued under this subpart, then the existing permit for the early reductions source shall not expire until the comprehensive title V permit for the facility has been issued or denied.

VOL 58 ISS 248 DE 29 1993 UMI

(c) *Administrative permit amendments.* (1) An "administrative permit amendment" is a permit revision that:

(i) Corrects typographical errors;

(ii) Identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;

(iii) Requires more frequent monitoring or reporting by the permittee; or

(iv) Allows for a change in ownership or operational control of an early reductions source where the permitting authority determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the permitting authority.

(2) *Administrative permit amendment procedures.* An administrative permit amendment may be made by the Administrator consistent with the following:

(i) The Administrator will take no more than 60 days from receipt of a request for an administrative permit amendment to take final action on such request, and may incorporate such changes without providing notice to the public or affected States provided that any such permit revisions are designated as having been made pursuant to this paragraph.

(ii) The early reductions source may implement the changes addressed in the request for an administrative amendment immediately upon submittal of the request.

(d) *Permit modification.* (1) A permit modification is any revision to a permit issued under this subpart that cannot be accomplished under the program's provisions for administrative permit amendments under paragraph (c) of this section.

(2) *Modification procedures.* Permit modifications shall meet all requirements of this subpart, including those for applications, public participation, and review by affected States, as they apply to permit issuance. The Administrator shall complete review on permit modifications within 12 months after receipt of a complete application.

(e) *Reopening for cause.* (1) Each issued permit shall include provisions specifying the conditions under which the permit will be reopened. A permit shall be reopened and revised under any of the following circumstances:

(i) The Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emission limits or other terms or conditions of the permit.

(ii) The Administrator determines that the permit must be revised to assure compliance with the alternative emission limitation.

(2) Proceedings to reopen and issue a permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists.

(3) Reopenings under paragraph (e)(1) of this section shall not be initiated before a notice of such intent is provided to the early reductions source by the Administrator. Such notice will be provided at least 30 days in advance of the date that the permit is to be reopened, except that the Administrator may provide a shorter time period in the case of an emergency.

(f) *EPA review under State programs for issuing specialty permits.* (1) If the Administrator approves a State program for the implementation of this subpart, the State program shall require that the Administrator receive a copy of each permit application (including any application for permit modification), each proposed permit, and each final permit issued pursuant to this subpart. The State program may require that the applicant provide a copy of any permit application directly to the Administrator.

(2) The Administrator will object to the issuance of any proposed permit determined by the Administrator not to be in compliance with requirements under this subpart or part 63 of this chapter. If the Administrator objects in writing within 45 days of receipt of a proposed permit and all necessary supporting documentation, the State shall not issue the permit.

(3) Any EPA objection to a proposed permit will include a statement of the Administrator's reasons for objection and a description of the terms and conditions that the permit must include to respond to the objections. The Administrator will provide the permit applicant a copy of the objection.

(4) Failure of the State to do any of the following also shall constitute grounds for an objection:

(i) Comply with paragraph (f)(1) of this section;

(ii) Submit any information necessary to review adequately the proposed permit; or

(iii) Process the permit under procedures approved to meet paragraph (f) of this section.

(5) If the State fails, within 90 days after the date of an objection under paragraph (f)(2) of this section, to revise and submit a proposed permit in response to the objection, the Administrator will issue or deny the permit in accordance with the requirements of this subpart.

(6) *Public petitions to the Administrator.* Within 60 days after expiration of the Administrator's 45-day review period, any person may petition the Administrator in writing to make an objection. Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for and consistent with § 71.27, unless the petitioner demonstrates that it was impracticable to raise such objections within such period, or unless the grounds for such objection arose after such period. If the Administrator objects to the permit as a result of a petition filed under this paragraph, the permitting authority shall not issue the permit until EPA's objection has been resolved, except that a petition for review does not stay the effectiveness of a permit or its requirements if the permit was issued after the end of the 45-day review period and prior to an objection. If the permitting authority has issued a permit prior to receipt of an EPA objection under this paragraph, the Administrator will modify, terminate, or revoke such permit, and shall do so consistent with the procedures in 40 CFR 70.7(g)(4) or (g)(5)(i) except in unusual circumstances, and the permitting authority may thereafter issue only a revised permit that satisfies EPA's objection. In any case, the source will not be in violation of the requirement to have submitted a timely and complete application.

§ 71.27 Public participation and administrative review.

All permit proceedings, including preparation of draft permits, initial permit issuance, permit modifications, and granted appeals, shall provide adequate procedures for public participation, including notice, opportunity for comment, a hearing if requested, and administrative appeal. Specific procedures shall include the following:

(a) *Modification, revocation and reissuance, or termination of permits.* (1) Permits may be modified, revoked and reissued, or terminated either at the request of any interested person (including the permittee) or upon the Administrator's initiative. However, permits may only be modified, revoked and reissued, or terminated for the reasons specified in §§ 71.25(a)(7) and 71.26(e). All requests shall be in writing and shall contain facts or reasons supporting the request

(2) If the Administrator decides the request is not justified, he or she shall send the requester a brief written response giving a reason for the decision. Denials of requests for modification, revocation and reissuance, or termination are not subject to public notice, comment, or hearings. Denials by the Administrator may be informally appealed to the Environmental Appeals Board by a letter briefly setting forth the relevant facts. The Board may direct the Administrator to begin modification, revocation and reissuance, or termination proceedings under paragraph (a)(3) of this section. The appeal shall be considered denied if the Board takes no action within 60 days after receiving it. This informal appeal is, under 42 U.S.C. 307, a prerequisite to seeking judicial review of EPA action in denying a request for modification, revocation and reissuance, or termination.

(3) (i) Except in the case of administrative modifications of permits, if the Administrator tentatively decides to modify or revoke and reissue a permit under §§ 71.25(a)(7) and 71.26(e), he or she shall prepare a draft permit under paragraph (b) of this section incorporating the proposed changes. The Administrator may request additional information and, in the case of a modified permit, shall require the submission of an updated application. In the case of revoked and reissued permits, the Administrator shall require the submission of a new application.

(ii) In a permit modification under this section, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this section, the entire permit is reopened just as if the permit had expired and was being reissued. During any revocation and reissuance proceeding the permittee shall comply with all conditions of the existing permit until a new final permit is reissued.

(4) If the Administrator tentatively decides to terminate a permit under §§ 71.25(a)(7) and 71.26(e), he or she shall issue a notice of intent to terminate. A notice of intent to terminate is a type of draft permit which follows the same procedures as any draft permit prepared under paragraph (b) of this section. A notice of intent to terminate shall not be issued if the Administrator and the permittee agree to termination in the course of transferring permit responsibility to an approved State under § [illegible] 21(e).

(5) Any request by the permittee for modification to an existing permit shall be treated as a permit application and shall be processed in accordance with all requirements of § 71.24.

(b) *Draft permits.* (1) Once an application is complete, the Administrator shall tentatively decide whether to prepare a draft permit or to deny the application.

(2) If the Administrator tentatively decides to deny the permit application, he or she shall issue a notice of intent to deny. A notice of intent to deny the permit application is a type of draft permit which follows the same procedures as any draft permit prepared under this section. If the Administrator's final decision is that the tentative decision to deny the permit application was incorrect, he or she shall withdraw the notice of intent to deny and proceed to prepare a draft permit under paragraph (b)(4) of this section.

(3) If the Administrator decides to prepare a draft permit, he or she shall prepare a draft permit that contains the permit conditions under § 71.25.

(4) All draft permits prepared under this section shall be publicly noticed and made available for public comment. The Administrator shall give notice of opportunity for a public hearing, issue a final decision and respond to comments. For all early reductions permits, an appeal may be taken under paragraph (l) of this section.

(c) *Statement of basis.* The Administrator shall prepare a statement of basis for every draft permit. The statement of basis shall briefly describe the derivation of the conditions of the draft permit and the reasons for them or, in the case of notices of intent to deny or terminate, reasons supporting the tentative decision. The statement of basis shall be sent to the applicant and, on request, to any other person.

(d) *Public notice of permit actions and public comment period—(1) Scope*—(i) The Administrator shall give public notice that the following actions have occurred:

(A) A permit application has been tentatively denied under paragraph (b)(2) of this section;

(B) A draft permit has been prepared under paragraph (b)(3) of this section;

(C) A hearing has been scheduled under paragraph (f) of this section;

(D) An appeal has been granted under paragraph (l)(3) of this section.

(ii) No public notice is required in the case of administrative permit modifications, or when a request for permit modification, revocation and reissuance, or termination has been denied under paragraph (a)(2) of this section. Written notice of that denial shall be given to the requester and to the permittee.

(iii) Public notices may describe more than one permit or permit action.

(2) *Timing.* (i) Public notice of the preparation of a draft permit or permit modification (including a notice of intent to deny a permit or permit modification application) shall allow at least 30 days for public comment.

(ii) Public notice of a public hearing shall be given at least 30 days before the hearing. (Public notice of the hearing may be given at the same time as public notice of the draft permit or permit modification and the two notices may be combined.)

(iii) The Administrator shall provide such notice and opportunity for participation to Affected States on or before the time that the Administrator provides this notice to the public.

(3) *Methods.* Public notice of activities described in paragraph (d)(1)(i) of this section shall be given by the following methods:

(i) By mailing a copy of a notice to the following persons (any person otherwise entitled to receive notice under this paragraph may waive his or her rights to receive notice for any permit):

(A) The applicant;

(B) Any other agency which the Administrator knows has issued or is required to issue any other permit under the Clean Air Act for the same facility or activity;

(C) Affected States and Indian Tribes;

(D) Affected State and local air pollution control agencies, the chief executives of the city and county where the early reductions source is located, any comprehensive regional land use planning agency and any State, Federal Land Manager, or Indian Governing Body whose lands may be affected by emissions from the regulated activity;

(E) Persons on a mailing list developed by:

(*1*) Including those who request in writing to be on the list;

(*2*) Soliciting persons for "area lists" from participants in past permit proceedings in that area; and

(*3*) Notifying the public of the opportunity to be put on the mailing list through periodic publication in the public press and in such publications as Regional and State funded newsletters, environmental bulletins, or State law journals. (The Administrator may update the mailing list from time to time by requesting written indication of continued interest from those listed. The Administrator may delete from the list the name of any person who fails to respond to such a request.)

VOL 58 ISS 248 DE 29 1993 UMI

(4) To any unit of local government having jurisdiction over the area where the early reductions source is located and to each State agency having any authority under State law with respect to the operation of such source.

(ii) By publication of a notice in a daily or weekly newspaper of general circulation within the area affected by the early reductions source.

(iii) By any other method reasonably calculated to give actual notice of the action in question to the persons potentially affected by it, including press releases or any other forum or medium to elicit public participation.

(4) *Contents.*

(i) *All public notices.* All public notices issued under this subpart shall contain the following minimum information:

(A) The name and address of the Administrator or the Administrator's designated agent processing the permit;

(B) The name and address of the permittee or permit applicant and, if different, of the facility regulated by the permit;

(C) The activity or activities involved in the permit action;

(D) The emissions change involved in any permit modification;

(E) The name, address and telephone number of a person from whom interested persons may obtain additional information, including copies of the draft permit, the application, all relevant supporting materials, and all other materials available to the Administrator that are relevant to the permit decision;

(F) A brief description of the comment procedures required by paragraphs (e) and (f) of this section and the time and place of any hearing that will be held, including a statement of procedures to request a hearing (unless a hearing has already been scheduled) and other procedures by which the public may participate in the final permit decision;

(G) Any additional information considered necessary or proper.

(ii) *Public notices for hearings.* In addition to the general public notice described in paragraph (d)(4)(i) of this section, the public notice of a hearing under paragraph (f) of this section shall contain the following information:

(A) Reference to the date of previous public notices relating to the permit;

(B) Date, time, and place of the hearing;

(C) A brief description of the nature and purpose of the hearing, including the applicable rules and procedures.

(5) In addition to the general public notice described in paragraph (d)(4)(i) of this section, all persons identified in paragraphs (d)(3)(i)(A), (B), and (C) of this section shall be mailed a copy of the fact sheet or statement of basis, the permit application (if any), and the draft permit (if any).

(e) *Public comments and requests for public hearings.* During the public comment period provided under paragraph (e) of this section, any interested person may submit written comments on the draft permit or permit modification and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised at the hearing. All comments shall be considered in making the final decision and shall be answered as provided in paragraph (j) of this section. The Administrator will keep a record of the commenters and of the issues raised during the public participation process, and such records shall be available to the public.

(f) *Public hearings.* (1)(i) The Administrator shall hold a hearing whenever he or she finds, on the basis of requests, a significant degree of public interest in a draft permit or permit modification;

(ii) The Administrator may also hold a public hearing at his or her discretion, whenever, for instance, such a hearing might clarify one or more issues involved in the permit decision;

(iii) Public notice of the hearing shall be given as specified in paragraph (d) of this section.

(2) Whenever a public hearing is held, the Administrator shall designate a Presiding Officer for the hearing who shall be responsible for its scheduling and orderly conduct.

(3) Any person may submit oral or written statements and data concerning the draft permit or permit modification. Reasonable limits may be set upon the time allowed for oral statements, and the submission of statements in writing may be required. The public comment period under paragraph (d) of this section shall be automatically extended to the close of any public hearing under this section. The hearing officer may also extend the comment period by so stating at the hearing.

(4) A tape recording or written transcript of the hearing shall be made available to the public.

(g) *Obligation to raise issues and provide information during the public comment period.* All persons, including applicants, who believe any condition of a draft permit is inappropriate or that the Administrator's tentative decision to deny an application, terminate a permit, or prepare a draft permit is inappropriate, must raise all reasonably ascertainable issues and submit all reasonably ascertainable arguments supporting their position by the close of the public comment period (including any public hearing). Any supporting materials which are submitted shall be included in full and may not be incorporated by reference, unless they are already part of the administrative record in the same proceeding, or consist of State or Federal statutes and regulations, EPA documents of general applicability, or other generally available reference materials. Commenters shall make supporting materials not already included in the administrative record available to EPA as directed by the Administrator. (A comment period longer than 30 days may be necessary to give commenters a reasonable opportunity to comply with the requirements of this section. Additional time shall be granted to the extent that a commenter who requests additional time demonstrates the need for such time.)

(h) *Reopening of the public comment period.* (1)(i) The Administrator may order the public comment period reopened if the procedures of this paragraph could expedite the decisionmaking process. When the public comment period is reopened under this paragraph, all persons, including applicants, who believe any condition of a draft permit is inappropriate or that the Administrator's tentative decision to deny an application, terminate a permit, or prepare a draft permit is inappropriate, must submit all reasonably available factual grounds supporting their position, including all supporting material, by a date, not less than 60 days after public notice under paragraph (h)(1)(ii) of this section, set by the Administrator. Thereafter, any person may file a written response to the material filed by any other person, by a date, not less than 20 days after the date set for filing of the material, set by the Administrator.

(ii) Public notice of any comment period under this paragraph shall identify the issues to which the requirements of paragraph (h)(1)(i) of this section shall apply.

(iii) On his or her own motion or on the request of any person, the Administrator may direct that the requirements of paragraph (h)(1)(i) of this section shall apply during the initial comment period where it reasonably appears that issuance of the permit will be contested and that applying the requirements of paragraph (h)(1)(i) of this section will substantially expedite the decisionmaking process. The notice of the draft permit shall state whenever this has been done.

(iv) A comment period of longer than 60 days will often be necessary in complicated proceedings to give commenters a reasonable opportunity to comply with the requirements of this section. Commenters may request longer comment periods and they shall be granted to the extent they appear necessary.

(2) If any data, information, or arguments submitted during the public comment period appear to raise substantial new questions concerning a permit, the Administrator may take one or more of the following actions:

(i) Prepare a new draft permit, appropriately modified;

(ii) Prepare a revised statement of basis, a fact sheet or revised fact sheet, and reopen the comment period; or

(iii) Reopen or extend the comment period to give interested persons an opportunity to comment on the information or arguments submitted.

(3) Comments filed during the reopened comment period shall be limited to the substantial new questions that caused its reopening. The public notice shall define the scope of the reopening.

(4) Public notice of any of the above actions shall be issued under paragraph (d) of this section.

(i) *Issuance and effective date of permit.* (1) After the close of the public comment period on a draft permit, the Administrator shall issue a final permit decision. The Administrator shall notify the applicant and each person who has submitted written comments or requested notice of the final permit decision. This notice shall include reference to the procedures for appealing a decision on a permit. For the purposes of this paragraph (i), a final permit decision means a final decision to issue, deny, modify, revoke and reissue, or terminate a permit.

(2) A final permit decision shall become effective 30 days after the service of notice of the decision unless:

(i) A later effective date is specified in the decision; or

(ii) No comments requested a change in the draft permit, in which case the permit shall become effective immediately upon issuance.

(j) *Response to comments.* (1) At the time that any final permit decision is issued, the Administrator shall issue a response to comments. This response shall:

(i) Specify which provisions, if any, of the draft permit have been changed in the final permit decision, and the reasons for the change; and

(ii) Briefly describe and respond to all significant comments on the draft permit raised during the public comment period, or during any hearing.

(2) Any documents cited in the response to comments shall be included in the administrative record for the final permit decision as defined in paragraph (k) of this section. If new points are raised or new material supplied during the public comment period, EPA may document its response to those matters by adding new materials to the administrative record.

(3) The response to comments shall be available to the public.

(4) The Administrator will notify in writing any Affected State of any refusal to accept recommendations for the permit that the State submitted during the public or Affected State review period.

(k) *Administrative record for final permit.* (1) The Administrator shall base final permit decisions on the administrative record defined in this paragraph (k).

(2) The administrative record for any final permit shall consist of:

(i) All comments received during the public comment period, including any extension or reopening;

(ii) The tape or transcript of any hearing(s) held;

(iii) Any written material submitted at such a hearing;

(iv) The response to comments required by paragraph (j) of this section and any new materials placed in the record under paragraph (j) of this section;

(v) Other documents contained in the supporting file for the permit;

(vi) The final permit;

(vii) The application and any supporting data furnished by the applicant;

(viii) The draft permit or notice of intent to deny the application or to terminate the permit;

(ix) The statement of basis for the draft permit;

(x) All documents cited in the statement of basis.

Other documents contained in the supporting file for the draft permit.

(3) The additional documents required under paragraph (k)(2) of this section should be added to the record as soon as possible after their receipt or publication by EPA. The record shall be complete on the date the final permit is issued.

(4) This section applies to all final permits.

(5) Material readily available at the issuing Regional Office, or published materials which are generally available and which are included in the administrative record under the standards of paragraph (j) of this section ("response to comments"), need not be physically included in the same file as the rest of the record as long as it is specifically referred to in the statement of basis or fact sheet or in the response to comments.

(l) *Appeal of permits.* (1) Within 30 days after a final permit decision has been issued, any person who filed comments on the draft permit or participated in the public hearing may petition the Environmental Appeals Board to review any condition of the permit decision. Any person who failed to file comments or failed to participate in the public hearing on the draft permit may petition for administrative review only to the extent of the changes from the draft to the final permit decision. The 30-day period within which a person may request review under this subsection begins with the service of notice of the Administrator's action unless a later date is specified in that notice. The petition shall include a statement of the reasons supporting that review, including a demonstration that any issues raised were raised during the public comment period (including any public hearing) to the extent required by the regulations in this subpart unless the petitioner demonstrates that it was impracticable to raise such objections within such period or unless the grounds for such objection arose after such period, and, when appropriate, a showing that the condition in question is based on:

(i) A finding of fact or conclusion of law which is clearly erroneous, or

(ii) An exercise of discretion or an important policy consideration which the Environmental Appeals Board should, in its discretion, review.

(2) The Board may also decide on its initiative to review any condition of any permit issued under this subpart. The Board must act under this paragraph within 30 days of the service date of notice of the Administrator's action.

(3) Within a reasonable time following the filing of the petition for review, the Board shall issue an order either granting or denying the petition for review. To the extent review is denied, the conditions of the final permit decision become final agency action. Public notice of any grant of review by the Board under paragraph (l) (1) or (2) of this section shall be given as provided in paragraph (d) of this section. Public notice shall set forth a briefing schedule for the appeal and shall state that any interested person may file an amicus brief. Notice of denial of review shall be sent only to applicant and to the person(s) requesting review.

VOL 58 ISS 248 DE 29 1993 UMI

(4) A petition to the Board under paragraph (l)(1) of this section is, under 42 U.S.C. 307(b), a prerequisite to the seeking of judicial review of the final agency action.

(5)(i) For purposes of judicial review, final agency action occurs when a final permit is issued or denied by EPA and agency review procedures are exhausted. A final permit decision shall be issued by the Administrator:

(A) When the Board issues notice to the parties that review has been denied;

(B) When the Board issues a decision on the merits of the appeal and the decision does not include a remand of the proceedings; or

(C) Upon the completion of remand proceedings if the proceedings are remanded, unless the Board's remand order specifically provides that appeal of the remand decision will be required to exhaust administrative remedies.

(ii) *Reserved.*

(6) Neither the filing of a petition for review of any condition of the permit or permit decision nor the granting of an appeal by the Environmental Appeals Board shall stay the effect of any contested permit or permit condition.

(m) *Computation of time.* (1) Any time period scheduled to begin on the occurrence of an act or event shall begin on the day after the act or event.

(2) Any time period scheduled to begin before the occurrence of an act or event shall be computed so that the period ends on the day before the act or event, except as otherwise provided.

(3) If the final day of any time period falls on a weekend or legal holiday, the time period shall be extended to the next working day.

(4) Whenever a party or interested person has the right or is required to act within a prescribed period after the service of notice or other paper upon him or her by mail, 3 days shall be added to the prescribed time.

40 CFR Part 141

[WH-FRL–4818–3]

Drinking Water Maximum Contaminant Level Goal; Fluoride

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent not to revise fluoride drinking water standards.

SUMMARY: By this notice, EPA is announcing its decision not to revise the maximum contaminant level goal (MCLG) for fluoride after considering recent reports concerning the health effects of fluoride. EPA's decision is based in part on advice from the National Academy of Sciences that the existing MCLG for fluoride provides for the protection of the health of persons. EPA invites public comment on this decision.

DATES: Comments should be postmarked or delivered by hand on or before February 28, 1994.

ADDRESSES: Send written comments to Fluoride Docket Clerk, Water Docket (MC–4101); U.S. Environmental Protection Agency; 401 M St. SW., Washington, DC 20460. Please submit any references cited in your comments. EPA requests an original and three copies of your comments and enclosures (including references). Commenters who want EPA to acknowledge receipt of their comments should include a self-addressed, stamped envelope. No facsimiles (faxes) will be accepted as EPA can not ensure that they will be submitted to the Docket.

Supporting documentation for this notice as well as all comments received are available for review at the Water Docket at the address given above. For access to Docket materials, call (202) 260–3027 between 9 a.m. and 3:30 p.m. for an appointment.

FOR FURTHER INFORMATION CONTACT: The Safe Drinking Water Hotline, Telephone (800) 426–4791. The Safe Drinking Water Hotline is open Monday through Friday, excluding Federal holidays, from 9 a.m. to 5:30 p.m. Eastern time. For technical information, contact Ken Bailey, Health and Ecological Criteria Division, Office of Water (4304), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, telephone (202) 260–5535.

SUPPLEMENTARY INFORMATION: EPA regulates fluoride in drinking water under the Safe Drinking Water Act (SDWA). In 1985 and 1986, EPA promulgated three separate but related standards for fluoride in drinking water under the SDWA.

On November 14, 1985, EPA promulgated a recommended maximum contaminant level for fluoride in drinking water at 4 mg/L (50 FR 47142). The RMCL for fluoride was upheld by the U.S. Court of Appeals for the D.C. Circuit in *NRDC* v. *EPA*, 812 F.2d 721 (D.C. Cir. 1987). Since the publication of the RMCL for fluoride, the 1986 Amendments to the Safe Drinking Water Act changed the term "recommended maximum contaminant level" to "maximum contaminant level goal" or MCLG. MCLGs are nonenforceable health goals which are set at a level at which no known or anticipated adverse health effects occur and which allows an adequate margin of safety. The 4 mg/L MCLG was designed to protect against crippling skeletal fluorosis.

On April 2, 1986, EPA promulgated a maximum contaminant level (MCL) for fluoride in drinking water at 4 mg/L (51 FR 11396). MCLs are enforceable standards and are to be set as close to the MCLGs as feasible. "Feasible" means feasible with the use of the best technology, treatment techniques and other means which the Administrator finds are available (taking cost into consideration).

At the same time, EPA promulgated a secondary maximum contaminant level (SMCL) for fluoride in drinking water of 2 mg/L to protect against objectionable dental fluorosis (51 FR 11396, 11401). Objectionable dental fluorosis includes moderate and severe dental fluorosis (50 FR 20164, 20169). Moderate dental fluorosis is characterized in part by white opaque areas covering at least 50% of a given tooth; severe dental fluorosis is characterized by stains and severe pitting of the teeth. SMCLs set limits for contaminants in drinking water which may affect the public welfare. SMCLs may apply to contaminants in drinking water which may affect aesthetic qualities of water and public acceptance, or which otherwise may affect the public welfare. SMCLs are not federally enforceable. The SMCL, at 40 CFR 143.5, provides for public notification when public water systems exceed the SMCL.

Since EPA promulgated the 4 mg/L MCL in 1986, a number of studies concerning fluoride in drinking water have been published. On January 3, 1990, EPA published a notice requesting additional information bearing on the existing standards for fluoride (55 FR 160). In that notice, EPA specifically requested copies of peer-reviewed scientific publications, published since January 1, 1985, dealing with the following topics as they relate to fluoride: (1) Possible adverse health effects (e.g., crippling skeletal fluorosis); (2) the incidence of objectionable dental fluorosis; (3) total exposure; and (4) water treatment technology and costs, especially in smaller public water supplies that serve from 25 to 3,300 persons. EPA received more than 1,500 responses to the January 3, 1990 notice.

On November 23, 1992, EPA published an update of its ongoing review of drinking water regulations for fluoride (57 FR 54957). In that update, EPA summarized significant events since the January 3, 1990 notice. Specifically, EPA noted that a 1992 report of the National Toxicology Program (NTP) which detailed a two-year chronic rat and mouse fluoride bioassay, concluded that, while there was equivocal evidence of carcinogenic activity of sodium fluoride in male F344/N rats, there was no evidence of carcinogenic activity in female F344/N rats or male or female mice. The update also noted that, in 1990, the Procter and Gamble (P&G) Company published the results of a chronic fluoride bioassay in which the authors concluded that sodium fluoride is not carcinogenic in male or female Sprague-Dawley rats.

Finally, the update noted the publication of a 1991 Department of Health and Human Services (DHHS) review of the results of the benefits and risks of fluoride entitled "Review of Fluoride Benefits and Risks," which provides an extensive review of both the NTP and P&G bioassays, as well as a significant body of additional data. The DHHS review concluded that, "[t]aken together, the data available at this time from these two animal studies fail to establish an association between fluoride and cancer" and "optimal fluoridation of drinking water does not pose a detectable cancer risk in humans." (Review of Fluoride: Benefits and Risks. Report of the Ad Hoc Subcommittee on Fluoride of the Committee to Coordinate Environmental Health and Related Programs. Public Health Service. Department of Health and Human Services. February 1991.) The DHHS review recommended that EPA review the fluoride drinking water regulations in light of the DHHS review and upcoming fluoride conferences.

In December 1991, as part of EPA's fluoride risk assessment, EPA asked the National Academy Sciences (NAS) of the National Research Council to review current toxicological and exposure data on fluoride and determine whether EPA's existing drinking water standards are adequate for protecting the public from the adverse health effects of fluoride. EPA also asked that the NAS identify gaps in fluoride toxicity data and make recommendations for future research. Because the public comments EPA received in response to the January 3, 1990 notice raised many of the issues EPA expected the NAS to address, EPA made these comments available to the NAS, along with material EPA had gathered separately.

In response to EPA's request, the NAS's Committee on Toxicology organized the Subcommittee on Health Effects of Ingested Fluoride. The Subcommittee included scientists with expertise in toxicology, pathology, medicine, dentistry, epidemiology, biostatistics, and risk assessment. On August 17, 1993, the Subcommittee released its report entitled "Health Effects of Ingested Fluoride." The preface to the Report summarized the work of the Subcommittee:

> The Subcommittee reviewed various kinds of toxicity that have been attributed to ingestion of fluoride (dental fluorosis; bone fracture; reproductive, renal, gastrointestinal, and immunological toxicities; genotoxicity; and carcinogenicity) and assessed the current EPA drinking-water standard for fluoride to determine if it is protective of public health. The report of the subcommittee is intended for use by EPA in deciding whether to maintain or revise its current drinking-water standard for fluoride (NAS, 1993, p. xiii).

The Executive Summary to the NAS Report provided the conclusions of the Subcommittee:

> Based on its review of available data on toxicity of fluoride, the Subcommittee concludes that EPA's current MCL of 4 mg/L for fluoride in drinking water is an appropriate interim standard. At that level, a small percentage of the U.S. population will exhibit moderate or even severe dental fluorosis. However, the question of whether to consider dental fluorosis a cosmetic effect or an adverse health effect and the balancing of the health risks and health benefits of fluoride are matters to be determined by regulatory agencies and are beyond the charge or expertise of this committee.
>
> The Subcommittee found inconsistencies in the fluoride toxicity data base and gaps in knowledge. Accordingly, it recommends further research in the areas of fluoride intake, dental fluorosis, bone strength and fractures, and carcinogenicity. The subcommittee further recommends that EPA's interim standard of 4 mg/L should be reviewed when results of new research become available and, if necessary, revised accordingly (NAS, 1993, p.11).

The Subcommittee, in its 133-page Report, evaluated in detail each of the following areas: Dental fluorosis, fluoride exposure and risk of bone fracture, reproductive effects of fluoride, effects of ingested fluoride on renal, gastrointestinal, and immune systems, genotoxicity of fluoride, carcinogenicity of fluoride and intake, metabolism, and disposition of fluoride (NAS, 1993). In each of these areas, the Subcommittee prepared detailed evaluations of available data and provided conclusions and, in some areas, recommendations for research.

As previously indicated, the Report noted that the question of whether to consider dental fluorosis a cosmetic effect or an adverse health effect was beyond the change or expertise of the NAS. Consequently, the Report contained no recommendations in this regard. On the issue of whether objectionable dental fluorosis should be considered a cosmetic effect or an adverse health effect, EPA has no new information leading the Agency to change the decision by former EPA Administrator, Lee Thomas, that objectionable dental fluorosis is a cosmetic effect and not an adverse health effect. That decision was supported by determinations of the former U.S. Surgeon General, C. Everett Koop (See 51 FR at 11401–11402; *NRDC* v. *EPA*, 812 F.2d 721, 724 (D.C. Cir. 1987); see also 50 FR 47142, 47143–47147). EPA will continue to consider any new information that might suggest otherwise. EPA also has requested advice from the U.S. Surgeon General, Dr. Joycelyn Elders, regarding the issue of whether dental fluorosis should be considered as an adverse health effect. Should that advice suggest a reconsideration of former Administrator Lee Thomas' decision, EPA will undertake such a review.

In conclusion, EPA believes the recommendations of the NAS Subcommittee on Health Effects of Ingested Fluoride support a decision not to revise the current MCLG for fluoride at this time. At this time, EPA has no evidence suggesting that the MCLG does not protect against adverse health effects with an adequate margin of safety and reaffirms the exisiting MCLG of 4 mg/L. EPA will consider any new evidence suggesting that the existing MCLG does not protect against adverse health effects with an adequate margin of safety.

Research is currently underway on the areas recommended by the NAS. EPA anticipates that results from that research will become available on an ongoing basis and will complete by 2001. EPA solicits public comment on this decision and will issue a final decision after consideration of comments received.

Dated: December 16, 1993.

Carol M. Browner,

Administrator, U.S. Environmental Protection Agency.

Polyethylene Glycol-Polyisobutenyl Anhydride-Tall Oil Fatty Acid Copolymer; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that an exemption from the requirement of a tolerance be established for residues of polyethylene glycol-polyisobutenyl anhydride-tall oil fatty acid copolymer

VOL 58 ISS 248 DEC 29 1993 UMI

when used as an inert ingredient (surfactant, dispersing agent, suspending agent, or related adjuvant) in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest. This proposed regulation was requested by ICI Americas, Inc.

DATES: Comments, identified by the document control number [OPP-300308], must be received on or before January 28, 1994.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 1132, Crystal Mall Bldg. #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by EPA without prior notice. The public docket is available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Connie Welch, Registration Support Branch, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Westfield Bldg. North, 6th Fl., 2800 Crystal Drive, Arlington, VA 22202, (703)-308-8320.

SUPPLEMENTARY INFORMATION: ICI Americas, Inc., Wilmington DE 19897, has submitted pesticide petition (PP) 3E4201 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(c) by establishing an exemption from the requirement of a tolerance for residues of polyethylene glycol-polyisobutenyl anhydride-tall oil fatty acid copolymer when used as an inert ingredient (surfactant, dispersing agent, suspending agent, or related adjuvant) in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in the petition and other relevant material have been evaluated. As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk. The Agency has decided that the data normally required to support the proposed tolerance exemption for polyethylene glycol-polyisobutenyl anhydride-tall oil fatty acid copolymer will not need to be submitted. The rationale for this decision is described below:

In the case of certain chemical substances which are defined as "polymers," the Agency has established a set of criteria which identify categories of polymers that present low risk. These criteria (described in 40 CFR 723.250) identify polymers that are relatively unreactive and stable compared to other chemical substances as well as polymers that typically are not readily absorbed. These properties generally limit a polymer's ability to cause adverse effects. In addition, these criteria exclude polymers about which little is known. The Agency believes that polymers meeting the criteria noted above will present minimal or no risk. Polyethylene glycol-polyisobutenyl anhydride-tall oil fatty acid copolymer conforms to the definition of a polymer given in 40 CFR 723.250(b)(11) and meets the following criteria which are used to identify low-risk polymers:

1. The minimum number-average molecular weight of the above-mentioned copolymer is 5,000. Substances with molecular weights greater than 400 are generally not readily absorbed through the intact skin, and substances with molecular weights greater than 1,000 are generally not absorbed through the intact gastrointestinal (GI) tract. Chemicals not absorbed through the skin or GI tract are generally incapable of eliciting a toxic response.

2. The above-mentioned copolymer is not a cationic polymer nor is it reasonably anticipated to become a cationic polymer in a natural aquatic environment.

3. The above-mentioned copolymer does not contain less than 32.0 percent by weight of the atomic element carbon.

4. The above-mentioned copolymer contains as an integral part of its composition the atomic elements carbon, hydrogen, nitrogen, and oxygen.

5. The above-mentioned copolymer does not contain as an integral part of its composition, except as impurities, any elements other than those listed in 40 CFR 723.250(d)(3)(ii).

6. The above-mentioned copolymer is not a biopolymer, a synthetic equivalent of a biopolymer, or a derivative or modification of a biopolymer that is substantially intact.

7. The above-mentioned copolymer is not manufactured from reactants containing, other than as impurities, halogen atoms or cyano groups.

8. The above-mentioned copolymer does not contain reactive functional groups that are intended or reasonably anticipated to undergo further reaction.

9. The above-mentioned copolymer is not designed or reasonably anticipated to substantially degrade, decompose, or depolymerize.

Based upon the above information and review of its use, EPA has found that, when used in accordance with good agricultural practice, this ingredient is useful and a tolerance is not necessary to protect the public health. Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [OPP-300308]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 2 of Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic effect on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: December 10, 1993.

Stephen L. Johnson,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(c) is amended by adding and alphabetically inserting the inert ingredient, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(c) * * *

Inert ingredients	Limits	Uses
* * *	*	* * *
Polyethylene glycol-polyisobutenyl anhydride-tall oil fatty acid copolymer (minimum number-average molecular weight 5,000).	.....	Surfactant, dispersing agent, suspending agent, or related adjuvant.

[BPD-706-P]

RIN 0938-AE99

Medicare Program; Medicare Coverage and Payment of Clinical Psychologist, Other Psychologist, and Clinical Social Worker Services

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: These proposed regulations would address the provisions of section 6113 of the Omnibus Budget Reconciliation Act of 1989 and section 4157 of the Omnibus Budget Reconciliation Act of 1990 by establishing requirements for Medicare coverage of services furnished by a clinical psychologist or as an incident to the services of a clinical psychologist and for services furnished by a clinical social worker. We are also proposing that clinical psychologists and clinical social workers use International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) coding when submitting Medicare Part B claims.

DATES: To be considered, comments must be mailed or delivered to the appropriate address, as provided below and must be received by 5 p.m. on February 28, 1994.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-706-P, P.O. Box 26688, Baltimore, MD 21207.

If you prefer, you may deliver your written comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code BPD-706-P. Comments received timely will be available for public inspection as they are received, beginning approximately 3 weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202-245-7890).

Please address a copy of comments on information collection requirements to: Allison Herron Eydt, HCFA Desk Officer, Office of Management and Budget, Office of Information and Regulatory Affairs, room 3002, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Regina Walker, (410) 966-6735, regarding coverage issues. Elisa Tunanidas, (410) 966-4505, regarding payment issues.

SUPPLEMENTARY INFORMATION:

I. Background

A. Clinical Psychologist Services

Before the enactment of the Omnibus Budget Reconciliation Act of 1989 (OBRA '89), Public Law 101-239, Medicare Part B paid for the services of clinical psychologists (CPs) only in certain situations. Services of CPs could be covered if furnished as an incident to the services of a physician (under section 1861(s)(2)(A) of the Social Security Act (the Act)) and also if furnished as outpatient hospital services under sections 1861(s)(2)(B), 1861(s)(2)(C), and 1861(ff)(2)(A) of the Act. In addition, CP services could be covered in other settings such as risk-based health maintenance organizations (HMOs) or competitive medical plans (CMPs), comprehensive outpatient rehabilitation facilities (CORFs), and community mental health centers

(CMHCs). Under certain circumstances described below, services could be covered when furnished off-site from a CMHC. Medicare Part B paid for the services if the CP was legally authorized to perform the services and if the services would have been covered if furnished by a physician or as an incident to a physician's service.

With respect to outpatient hospital services, Medicare Part B covers both the diagnostic and therapeutic services furnished by hospitals, or under arrangements by hospitals, to its outpatients. Covered diagnostic services to outpatients generally can include the services of nurses, psychologists, and technicians, drugs and biologicals necessary for diagnostic study, and the use of supplies and equipment.

For CP services furnished other than through a CMHC, payment was based on the payment methodology applicable to the facility. Payment was made directly to a CP only for services furnished through a CMHC and only on an assignment-related basis. Payment could also be made to a CP for services and supplies furnished at a CMHC or off-site of a CMHC as an incident to a CP's services if the services would be covered if furnished by a physician or as an incident to a physician's service. Payment to a CP was based on the lesser of the actual charge for the services or a fee schedule established by the Secretary. Additionally, under the predecessor provisions of section 1833(c) of the Act, payment in any year was limited to 80 percent of the lesser of an annual dollar amount specified by law (for example, $1,375 for 1989) or the "incurred expense" (62½ percent of the Medicare approved amount). The services of a CP furnished in a CMHC or off-site of a CMHC, and those services incident to a CP's services, were characterized in the law as "qualified psychologist services."

The relevant statutory provisions contained in the Act are as follows:

- Concerning amounts paid for CP services—section 1833(a)(1)(L).
- Concerning the limitation on payment for mental health treatment services—section 1833(c).
- Concerning assignment—section 1833(p).
- Concerning covered services—sections 1861(s)(2)(M) and 1861(aa)(1)(B).
- Concerning definition of "qualified psychologist services"—section 1861(ii).
- Concerning CP services in an HMO—section 1861(s)(2)(H)(ii).
- Concerning CP services in a CORF—section 1861(cc)(1)(D).

Section 6113(a) of OBRA '89, which was generally effective on July 1, 1990, revised section 1861(ii) of the Act by removing the restriction under which qualified psychologist services had to be furnished at a CMHC, or off-site if the patient was unable to travel to the center because of physical or mental impairment, institutionalization, or a similar reason. This, in effect, allows payment to be made directly to a CP for qualified psychologist services furnished by the CP or incidental to the CP's services (except for services furnished to hospital patients). The provision was effective for services furnished as of July 1, 1990. Section 1833(p) of the Act, which requires that payment for qualified psychologist services be made only on an assignment-related basis, was unchanged by the OBRA '89 amendments.

Section 6113(d) of OBRA '89 amended section 1833(d)(1) of the Act to eliminate the dollar limitation on payment for outpatient mental health treatment but retained the 62½ percent limitation. (Note that section 1833(d)(1) has been redesignated as section 1833(c) by the Medicare Catastrophic Coverage Repeal Act of 1989, Pub. L. 101–234.) This change applies to expenses for mental health treatment services incurred beginning with calendar year 1990.

Section 6113(c) of OBRA '89 requires the Secretary, while taking into consideration concerns for patient confidentiality, to develop criteria regarding direct payment to CPs under which the CPs must agree to consult with a patient's attending physician.

As a further development, section 4157(a) of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Public Law 101–508, amended section 1861(b) of the Act, which defines "inpatient hospital services," by revising paragraph (3) to exclude, effective January 1, 1991, CP services furnished to a hospital inpatient from the definition. In addition, section 4157(c) of OBRA '90 amended section 1862(a) of the Act, which concerns exclusions from coverage, by revising paragraph (14) to permit direct billing by CPs for qualified psychologist services and those services and supplies incident to their services if provided to hospital patients. (We had determined, based on the way the Act read as of July 1, 1990, that the services of CPs and services incident to a CP's services provided to hospital patients were "bundled" so that only the hospital could bill for them and, therefore, direct billing for these services did not apply.)

B. Diagnostic Psychological Tests

Before enactment of the qualified psychologist services benefit (that is, the CP benefit authorized under section 1861(ii) of the Act), HCFA authorized, under section 1861(s)(3) of the Act, Medicare coverage for diagnostic psychological testing services performed by a qualified psychologist practicing independently of an institution, agency, or physician's office. In order to have his or her diagnostic services covered under this provision, the psychologist must have met certain qualifications and the diagnostic services must have been ordered by a physician. These services were covered as "other diagnostic tests" and Medicare paid for them on a reasonable charge basis.

C. Clinical Social Worker Services

Before the enactment of OBRA '89, services of a clinical social worker (CSW) were payable by Medicare Part B when furnished in various settings, such as a risk-based HMO, as part of hospital outpatient services under sections 1861(s)(2)(B), 1861(s)(2)(C), and 1861(ff)(2)(C) of the Act, or as an incident to the services of a physician under section 1861(s)(2)(A) of the Act. The applicable HMO statutory provision is contained at section 1861(s)(2)(H)(ii) of the Act, which includes these services in the list of "medical and other health services."

Section 6113(b) of OBRA '89 amended section 1861(s)(2) of the Act by adding a new subparagraph (N) to include CSW services in the definition of medical and other health services generally covered under Part B of Medicare. It also amended section 1861(hh), which defines a CSW, to add a new subparagraph (hh)(2) to define "clinical social worker services" as services performed by a legally authorized CSW for the diagnosis and treatment of mental illnesses (other than services furnished to an inpatient of a hospital and other than services furnished to an inpatient of a skilled nursing facility (SNF) that the facility is required to provide as a requirement for participation) and that would be covered if furnished by a physician or as an incident to a physician's professional service. This provision is effective for services furnished on or after July 1, 1990.

Section 6113(b)(3) of OBRA '89 amended section 1833 of the Act, "Payment of Benefits," by adding paragraph (a)(1)(F) to establish the payment basis for CSW services as 80 percent of the lesser of (1) the actual charge for the services or (2) 75 percent of the fee schedule amount for CP services that are covered under section 1861(s)(2)(M) of the Act. This section of OBRA '89 also amends section 1833 of the Act by revising paragraph (p) to specify that Part B payment for CSW services (as defined in section 1861(hh)(2) of the Act) is made only on an assignment-related basis.

D. Payment in Certain Facilities

In accordance with section 1876(a)(6) of the Act, payment for services furnished to an enrollee of a risk-based HMO or CMP can only be made to the HMO or CMP. Thus, a CP or CSW who furnishes services in these settings may not bill Medicare directly for these services. Payment will continue to be made through the risk-based HMO or CMP under the appropriate payment methodology.

It should be noted, however, that the scope of services requirement for both cost and risk-based HMOs and CMPs is changed with the addition of CP and CSW services to the list of "medical and other health services" defined under section 1861(s) of the Act. The scope of services requirement for both cost and risk-based HMOs and CMPs is set forth in existing § 417.440(b) and includes all Part A and Part B services that are available to Medicare beneficiaries in the HMO's or CMP's geographic area. Therefore, both cost and risk contracting HMOs and CMPs must now furnish CP and CSW services as Medicare covered services. Note, however, that under section 1861(hh) of the Act, there is no coverage under Part B for services and supplies incident to a CSW's services. Coverage, however, is provided, under section 1861(s)(2)(H)(ii) of the Act, for services and supplies incident to a CSW's services if furnished in a risk-based HMO or CMP. Thus, services and supplies incident to a CSW's services are covered by Medicare only when furnished by risk-based HMOs and CMPs.

It should also be noted that, prior to the OBRA '89 amendment, Medicare permitted the services of CPs and CSWs furnished through risk-based HMOs and CMPs to be furnished without physician supervision. This permission has been extended, for covered CP and CSW services, to cost-based HMOs and CMPs.

CORFs could bill for CP services furnished through December 31, 1990. However, effective January 1, 1991, a separate claim must be submitted under Part B for services of a CP in a CORF furnished to CORF patients. This is because, as of January 1, 1991, services of CPs are not included in the scope of CORF services described under section 1861(cc)(1) of the Act. In that section, the law states that CORF services do not include any item or service that is not included under section 1861(b) of the Act if furnished to an inpatient of a hospital. As noted above, section 1861(b), which contains the statutory definition of "inpatient hospital services," as amended by section 4157(a) of OBRA '90, provides that inpatient hospital services means " * * * items and services furnished to an inpatient of a hospital * * * by the hospital * * * excluding, however— * * * qualified psychologist services * * *." As a result, a separate claim must also be submitted under Part B for CP services to hospital inpatients. The same policy applies to CORFs under section 1861(cc)(1) of the Act, as noted, to SNFs under section 1861(h)(7) of the Act, and to HHAs under the language following paragraph (m)(7) of section 1861 of the Act.

Note also that, in accordance with section 1881(b) of the Act, § 405.2163(c), which governs services required for outpatient maintenance dialysis patients furnished in end stage renal disease (ESRD) facilities, includes the services of social workers. Payment for social worker services is included in the composite rate payment made to the dialysis facility. Therefore, when a CSW furnishes social services as required under § 405.2163(c), these services are billed by the ESRD facility, and these services are paid for by Medicare as part of the composite rate. The composite rate, a payment rate provided for under section 1881(b) of the Act, is a comprehensive, all inclusive, prospective payment for all of the items and services required for outpatient maintenance dialysis.

Section 1861(aa) of the Act includes the services of CPs and CSWs in the services of a Federally qualified health center. Payment for these services is addressed in 42 CFR 405.2462 through 405.2468.

Payment for the services of CPs and CSWs furnished in rural health clinics will be addressed in a separate proposed rule.

II. Proposed Provisions of the Regulations

A. Clinical Psychologist Services

1. Inclusion as Medical and Other Health Services

We propose to revise § 410.10, "Medical and other health services: Included services," by adding a new paragraph (u) to include in the list of medical and other health services covered under Part B the diagnostic and therapeutic services furnished by a CP and services and supplies furnished as an incident to a CP's services. This is consistent with section 1861(s)(2)(M) of the Act, which includes these services as medical and other health services, and section 1861(ii) of the Act, which defines qualified psychologist services.

2. Covered Services

We propose, in a new § 410.71, that Medicare Part B cover (subject to the 62½ percent limitation for certain outpatient mental health treatment services) services that are furnished by a CP who meets the Medicare requirements discussed below and that are within the scope of his or her State license if the services would be covered if furnished by a physician or as an incident to a physician's services. This policy is based on the definition of qualified psychologist services in section 1861(ii) of the Act. There are a number of issues involved in this proposed provision, which we discuss below.

- In a new § 410.71(b), we would specify, based on the limitation set forth in section 1833(c) of the Act, that the outpatient mental health treatment services of CPs and services and supplies furnished as an incident to those services are subject to the 62½ percent payment limitation set forth in proposed § 410.155.
- In a new § 410.71(d), we would specify that payment for the services of CPs and incident—to services to hospital inpatients and outpatients through December 31, 1990, is made to the hospital. The practice of covering services furnished to hospital patients by an outside supplier as hospital services is referred to as "rebundling" or "bundling." Under the "rebundling" requirement, the services of a CP and incident—to services furnished to a hospital patient were considered to have been built into the hospital payment methodology, and payment was made to the hospital.

While § 411.15(m) of the regulations provides the basic rules for services provided by nonphysicians to hospital inpatients, there is no specific regulation that sets forth the basic rules for services provided by nonphysicians to hospital outpatients. (However, a notice of proposed rulemaking was published in the Federal Register on August 5, 1988, (53 FR 29486) that discusses the issue of rebundling of services furnished to hospital outpatients.)

As mentioned earlier, section 4157(a) of OBRA '90 amended section 1862(a) of the Act, which concerns exclusions from coverage, by revising paragraph (14) to permit direct billing by CPs for qualified psychologist services and for services and supplies furnished as an

VOL 58 ISS 248 DE 29 1993 UMI

incident to their services to hospital patients. Thus, the policy regarding the bundling of CP services provided to hospital patients has been changed. Effective January 1, 1991, CPs may bill Medicare Part B directly for their services to hospital patients.

• Section 1861(ii) of the Act does not define "clinical psychologist" but looks to the Secretary to do so. Current Medicare regulations related to HMOs and CMPs at § 417.416(d)(2) define a clinical psychologist as an individual who—

+ Holds a doctoral degree in psychology from a program in clinical psychology of an educational institution that is accredited by an organization recognized by the Council on Post-Secondary Accreditation;

+ Is licensed or certified at the independent practice level of psychology in the State in which he or she practices; and

+ Possesses 2 years of supervised clinical experience at least one of which is postdegree.

The definition at § 417.416(d)(2) has been used for purposes of coverage of CP services in HMOs and was issued in final regulations on January 10, 1985. Application of this definition in the CMHC setting was addressed through instructions issued in September 1986, and, for purposes of the expanded CP benefit, instructions were issued in August 1990.

There has been extensive concern that the education criterion (that is, that in order to have his or her services covered by Medicare, a psychologist must have a doctoral degree from "a program in clinical psychology") excludes psychologists who have been trained and licensed as "clinical" psychologists from receiving payment under Medicare because they have graduated from programs that are not identified as "clinical" by the academic institutions that grant the degrees. While we were not aware of any particular problems in this regard before the enactment of section 6113(a) of OBRA '89 and issuance of the CP instructions in August 1990, questions have arisen since that time.

Specifically, it is alleged that the current definition is too narrow in that it excludes many qualified practitioners of psychology whose doctoral degrees are not in "clinical psychology" but who have analogous training and practical experience in other branches of psychology. Thus, professional organizations, such as the American Psychological Association and various State psychological associations, as well as individual practitioners, members of the Congress, and beneficiaries have repeatedly requested that we undertake to ensure that coverage is available for the services of psychologists qualified to practice "clinical psychology," regardless of how their doctorate degrees are labeled.

As an interim measure, pending resolution of the issue through rulemaking, we informed the Medicare Part B carriers that they could use their discretion to include in the CP definition those psychologists who have appropriate training, knowledge, and experience in clinical psychology, even if their doctorates are from programs titled other than "Clinical Psychology." Based on the information available to us, about two-thirds of the carriers have adopted criteria in this regard similar to that which we are proposing in this rule.

There are many subfields in psychology within which one may obtain doctoral degrees. For example, in addition to Clinical and Counseling doctorates, there are also Neuropsychology, School, Developmental, Educational, Comparative, Experimental, and Industrial Psychology doctorates, among others, that may be received from various educational institutions. While it is not our intent to exclude from Medicare coverage the services of psychologists who are trained to practice "clinical psychology" simply because the programs that granted their degrees were not labeled as "clinical psychology programs," we must adhere to the statutory language as it appears in section 1861(ii) of the Act: "The term 'qualified psychologist services' means * * * services * * * furnished by a clinical psychologist (as defined by the Secretary) * * *." Thus, our task is to develop a definition of "clinical psychologist" that conforms to congressional intent and one that will not arbitrarily exclude those psychologists who have received education and training that is, in fact, indistinguishable from that received in a "Clinical Psychology" program.

We believe that, by using the term "clinical psychologist," the Congress was referring to persons educated and trained to furnish diagnostic testing and assessment services and preventive or therapeutic intervention services directly to individuals whose mental growth, adjustment, or functioning is impaired or is at risk of impairment.

The word "clinical" is defined in "Dorland's Medical Dictionary" as "pertaining to or founded on actual observation and treatment of patients, as distinguished from theoretical or experimental." Hence, we believe that persons who obtain doctorates from programs that provide such education and training, whether they be labeled as "Clinical Psychology" programs or not, should be able to qualify for Medicare coverage. Thus, we propose, in new § 410.71(e)(1), that a clinical psychologist is an individual who—

+ Holds a doctoral degree in psychology from an accredited program that prepares the candidate to practice clinical psychology by providing appropriate clinical psychology training;

+ Is licensed or certified at the independent practice level of clinical psychology by the State in which he or she practices; and

+ Possesses 2 years of supervised clinical experience, at least one of which is post-doctoral degree experience, and the supervision was provided by a psychologist qualified at the doctorate level.

We understand that the various States, in enforcing licensing and certification statutes, may employ concepts of what constitutes clinical psychology that are different from what we propose. Therefore, we specifically invite comments concerning this issue. The underlying premise of these proposals is that the program must provide education and training that prepares an individual for the practice of clinical psychology.

In making these proposals, we are trying to ensure the quality of services that the Congress intended for Medicare beneficiaries seeking psychological help yet not unduly restrict the professionals considered qualified under the statute to provide that care. We nonetheless realize that there may still be some psychologists with essentially equivalent education and training who would not qualify even under this broad definition and that there may be other approaches worthy of consideration. One solution we considered was to state as the sole criterion that, in order to qualify, a person must have a doctoral degree in psychology. However, given the fact that the statute uses the term "clinical psychologist" and that the various subfields of psychology recognize doctorates that are not clinical in nature, we believe that the standard must reference the clinical psychology criterion. While we do not know for certain what each individual State's standards are for practice in clinical psychology, we would want to avoid situations in which, for example, persons with education and training solely in industrial or experimental psychology could be billing Medicare for clinical psychology services. Additionally, as we understand congressional intent, services furnished in theoretical or academic settings, as distinguished from therapeutic work directly with patients, would not qualify as clinical psychology services. However, in preparing the final rule, we will be willing to consider variations of this basic approach or other responsible approaches that commenters may suggest.

The requirements for licensing or certification and supervised clinical experience in § 410.71(e)(1) would be the same as those established in 1985 in the HMO regulations at § 417.416(d)(2), except for the broader interpretation of what constitutes a degree from a "program in clinical psychology."

To ensure consistency, we are also proposing to revise the HMO rules at § 417.416(d)(2) to cross-refer to this definition.

Finally, it is apparently not unusual for a person to obtain a doctorate in one field of psychology and then later return to academia for a doctorate in another field of psychology. We understand, for example, that the American Psychological Association (APA) has set standards for training programs for persons wishing to change fields.

In establishing criteria for qualification as a clinical psychologist, we believe that appropriate retraining as a clinical psychologist of a psychologist originally trained in another field should be able to qualify for Medicare coverage purposes. However, we are not able to set specific standards for retraining programs and do not know whether there are standards other than those established by the APA. Therefore, we request public comment on this issue and ask that any suggested standards comply with our position concerning clinical psychology, as outlined above, and that the retraining program prepare the candidate to practice clinical psychology.

• We are proposing, in § 410.71(e)(2), that, when applying for a provider number and annually thereafter, CPs who bill Medicare Part B directly must submit an attestation statement agreeing to consult with the beneficiary's attending or primary care physician in accordance with accepted professional ethical norms, taking into consideration patient confidentiality. Section 6113(c) of OBRA '89 directs that—

> The Secretary of Health and Human Services shall, taking into consideration concerns for patient confidentiality, develop criteria with respect to payment for qualified psychologist services for which payment may be made directly to the psychologist under part B of title XVIII of the Social Security Act under which such a psychologist must agree to consult with a patient's attending physician in accordance with such criteria.

We believe that an attestation statement is a practical way to document the existence of an agreement between the CP and HCFA, to which the Secretary has delegated the administration of this provision.

The intended purpose of the consultation is to consider whether medical conditions or medication may be contributing to or causing the mental health problem. In the report of the House Budget Committee on H.R. 3299 (H.R. Rep. No. 247, 101st Cong., 1st Sess. 361 (1989)), the Energy and Commerce Committee expressed particular concern in the case of elderly patients, many of whom have multiple health problems and are taking one or more prescription drugs. We share this concern, and we believe that, to promote detection of causative or contributing factors, it is appropriate and good professional practice for CPs to consult with the beneficiary's attending or primary care physician.

It is important to note that section 6113(c) of OBRA '89 requires that the Secretary establish criteria under which payment may be made directly to the CP under Medicare Part B. These criteria must address the circumstances under which the CP will consult with the physician. The provision became effective on July 1, 1990. However, as discussed above, from the time this OBRA provision became effective, through December 31, 1990, CP services to hospital patients (inpatients and outpatients) were "bundled," and payment for inpatient services was made under Part A. Therefore, because CPs could not bill Medicare Part B directly for services to hospital patients and payment for such services was made to the hospital, the consultation provision was not applied to CPs furnishing services in the hospital setting.

However, enactment of section 4157(a) of OBRA '90 changed the situation because it excluded CP services from the definition of inpatient hospital services. Thus, under section 4157(c) of OBRA '90, effective January 1, 1991, CP services are "unbundled," and CPs can now bill Medicare Part B directly for such services.

We believe that the original congressional intent regarding the consultation requirement should be maintained for CP services furnished to hospital patients. Therefore, the proposed consultation requirement would apply to CPs who furnish services to hospital patients and bill Medicare Part B directly for such services.

The terms primary care physician and attending physician are used alternatively because there are situations where a patient may be under the care of a primary care physician only, or treated by the primary care physician and the attending physician concurrently, or the attending physician may also be the patient's primary care physician. While most Medicare patients are at least under the care of a primary care physician such as an internist or gynecologist for routine care, there are occasions that arise where a patient's medical condition requires more specialized treatment. In such cases, it is usually the primary care physician who refers the patient to an attending physician (for example, a surgeon or an oncologist) for such treatment. When these situations exist, it may be important for the CP to consult equally with both physicians to be fully aware of all the potential medical conditions or medications that may interfere with treatment for the patient's mental illness. However, we would specify, as a minimum requirement, that the consultation must be with one or the other.

In recognition of the beneficiary's right to confidentiality, we are proposing, in § 410.71(e)(2)(i), that the CP must agree to inform the beneficiary, prior to a consultation, that it is desirable to consult with the beneficiary's primary care or attending physician to consider any medical conditions that may be contributing to the beneficiary's condition. We would require, in § 410.71(e)(2)(iii), that if the beneficiary assents, the CP must agree to consult with the physician within 1 week of obtaining the beneficiary's consent. We believe this is a reasonable period of time, and we understand that this is the professional standard that would apply routinely in such circumstances. However, we specifically invite public comment on this subject.

In § 410.71(e)(2)(ii), we propose that the annual attestation contain an agreement to include a notation in the beneficiary's medical records to the effect that he or she was notified of the desirability of a consultation between the CP and the beneficiary's primary care or attending physician, and the patient's response to the notification. We believe this would be a suitable means of documenting that the CP has complied with the consultation agreement. With respect to the frequency of the required attestation, we believe that it would be appropriate to update such attestations on an annual basis. (One precedent occurs, for example, at § 412.46 where we require physician attestations for inpatient hospital medical review requirements to be updated annually). However, we are

interested in receiving public comment about this matter.

We propose, in § 410.71(e)(2)(iii), that in the attestation statement the CP agree that, if he or she is unable to reach the physician after at least four attempts, he or she will notify the physician in writing about the provision of care to the beneficiary. We specifically invite comments concerning this matter as well.

3. Incidental Services

In § 410.71(a)(2), we would specify that Medicare Part B would cover services and supplies furnished as an incident to a CP's services if the incidental services and supplies would be covered if furnished by a physician or as an incident to a physician's services. This is consistent with the definition of "qualified psychologist services" in section 1861(ii) of the Act.

We also propose that, in order for services and supplies furnished incident to the services of the CP to be covered by Medicare, they must meet the longstanding Medicare requirements that are applicable to services furnished as an incident to the professional services of a physician. The requirements are that the services must be—

- The type that are commonly furnished in a physician's or CP's office and are either furnished without charge or are included in the CP's bill;
- An integral, although incidental, part of professional services performed by the CP;
- Performed under the direct supervision of the CP (that is, the CP must be physically present and immediately available); and
- Performed by an employee of either the CP or the legal entity that employs the supervising CP under the common law control test of section 210(j) of the Act (42 U.S.C. 410(j)), as more fully set forth in 20 CFR 404.1007.

4. Consultation

In discussing the consultation between the CP and the patient's physician, the report of the House Ways and Means Committee stated that "The Committee intends that such consult would not be a billable service." (H. R. Report No. 247, 101st Cong., 1st Sess. 1015). We think such consultation is an inherent and incidental component of the services the psychologist provides to the beneficiary and should not constitute a separate and distinct service. Therefore, we are proposing, in § 410.71(c), that consultation between the CP and the beneficiary's primary care or attending physician would not be a separately-billable service for Medicare payment purposes. The primary care or attending physician also would not be permitted to bill Medicare for this consultation.

5. Payment on an Assignment-Related Basis

We propose to revise § 410.150, "To whom payment is made," by adding a new paragraph (b)(14) to specify that payment is made directly to the CP on an assignment-related basis for CP services furnished by him or her and for services and supplies furnished as an incident to his or her services. This is consistent with section 1833(p) of the Act, which requires payment for such services be made only on an assignment-related basis, and section 1861(ii) of the Act, which defines qualified clinical psychologist services.

Note that the assignment requirement would not preclude a CP from furnishing his or her services as an incident to the services of another health care practitioner if these services meet all of the incident-to requirements. In such a case, the practitioner may bill Medicare for the incident-to services. In this case, payment would be made by Medicare to the practitioner. (This is consistent with long-standing Medicare policy governing coverage of services furnished as an incident to the services of physicians or other health care professionals.)

6. Limitation on Mental Health Treatment Services

We propose, in accordance with the limitation in section 1833(c) of the Act, to revise § 410.152(a)(1)(iv), which concerns amounts of payment, to remove the annual dollar limitation on covered mental health treatment services as a factor in determining incurred expenses. (Incurred expenses are Part B covered expenses incurred by an individual during his or her coverage period.) We have revised this section by removing the specifics regarding the limitation amount and cross-referencing the limitation described in § 410.155.

7. Payment Amount

We propose to revise § 410.152, "Amounts of payment," by adding a new paragraph (l) to specify that Medicare Part B pays, subject to the mental health treatment limitation of § 410.155(c), 80 percent of the lesser of the actual charge or the fee schedule amount for CP services. This is based on the payment level established at section 1833(a)(1)(L) of the Act.

8. Definition of Mental Health Treatment

Section 1833(c) of the Act, as amended by section 6113(d) of Public Law 101–239, states that—

> * * * with respect to expenses incurred in any calendar year in connection with the *treatment* of mental, psychoneurotic, and personality disorders of an individual who is not an inpatient of a hospital at the time such expenses are incurred, there shall be considered as incurred expenses * * * 62½ percent of such expenses * * *. (Emphasis added.)

In addition to precluding the application of the limitation to mental health treatment services furnished to hospital inpatients, this section of the law goes on to specify that, for purposes of this limitation, the term "treatment" does not include brief office visits to a physician for the sole purpose of monitoring or changing drug prescriptions used in the treatment of mental disorders or partial hospitalization services that are not directly provided by a physician. We propose to add a definition of "mental health treatment" to paragraph (a) of § 410.155, "Mental health treatment limitation." We would define "mental health treatment" as "therapy for the treatment of a mental, psychoneurotic, or personality disorder." We would also specify a distinction between "treatment" and "diagnosis," as discussed below.

We would also revise § 410.155(b) to include examples of services that are subject to, or excluded from, the application of the limitation.

- We would state that the limitation does not apply to mental health treatment furnished to hospital inpatients, brief office visits to a physician for the purpose of monitoring or changing drug prescriptions used in the mental health treatment, partial hospitalization services that are not directly provided by a physician, and diagnostic services that are performed to establish a diagnosis.
- We would state that the limitation will apply not only to mental health treatment furnished by physicians and CORFs but also to mental health treatment furnished as an incident to the services of a physician and to the mental health services of other health care practitioners whether the services are furnished directly by the practitioners or as an incident to their services. Thus, for example, the limitation would apply to the services of CPs, services furnished as an incident to the services of CPs, and to the services of CSWs.

With respect to diagnostic psychological testing and other diagnostic services, we would provide that services performed in order to establish a patient's diagnosis are not subject to the limitation, because those services do not represent *treatment* of a mental disorder. Their purpose is to determine whether, in fact, the patient has a mental disorder and to identify the specific disorder. These diagnostic services must be completed *before* the patient's condition can be identified. Once the patient is determined to have a mental disorder, subsequent services to treat that disorder are subject to the limitation. Consequently, we believe that the limitation should apply to testing that is part of treatment (for example, when it is used to evaluate a patient's progress during treatment). Only diagnostic services used to establish a diagnosis for a patient's mental illness would be excluded from the limitation.

Section 6113(d) of Public Law 101–239 specifically eliminated the dollar limitation (formerly $1,375.00) on mental health services, effective January 1, 1990. However, the 62½ percent limitation on expenses for such services remains unchanged. Consistent with the statute, we would revise § 410.155(c) of the regulations to remove the dollar limitation.

We would also revise the heading of § 410.155, from "Psychiatric services" limitations: Expenses incurred for physician services and CORF services" to "Mental health treatment limitation." The example in existing paragraph (d) of how the limitation is applied would also be updated.

As a technical revision, we would remove the reference to "medical services for the diagnosis and treatment of tuberculosis" from the definition of "hospital" in § 410.155(a). Section 2335 of the Deficit Reduction Act of 1984 (Pub. L. 98–369) repealed the special conditions and requirements associated with coverage of treatment of tuberculosis patients and eliminated the special provider category of tuberculosis hospitals.

9. Bases for Payment

We propose, based on the payment provision at section 1833(a)(1)(L) of the Act, to revise § 424.55(b)(1), which concerns accepting assignment, to reflect that, in accepting assignment, a supplier (which includes a CP) agrees to accept, as the full charge for the service, the charge approved by the carrier as the basis for determining the Medicare Part B payment. We propose to revise paragraph (b)(2)(i) of this section, which currently reads: "To collect nothing for those services for which Medicare pays 100 percent of the reasonable charge." We would change "reasonable charge" to "approved amount". This would reflect that, based on recent statutory changes, there are also fee schedules and other bases for payment, in addition to reasonable charge.

We would also revise paragraph (b)(2)(ii) of § 424.55. This paragraph currently limits the amount that the supplier may collect from the beneficiary or other source to only the amount of any unmet deductible, plus 20 percent of the difference between the reasonable charge and the unmet deductible for those services for which Medicare pays 80 percent of that difference. We would revise this to state that, for those services for which Medicare pays less than 100 percent of the approved amount, the supplier may collect only the difference between the Medicare approved amount and the Medicare Part B payment (that is, the amount of any reduction in incurred expenses under § 410.155(c) and any applicable deductible and coinsurance amount). This change would recognize that a supplier may collect, from the beneficiary or other source, the 37½ percent differential that results from the mental health treatment limitation.

B. Diagnostic Psychological Tests

Diagnostic psychological testing services performed by an independent psychologist other than a CP, which we describe at section 2070.2 of the Medicare Carriers Manual, practicing independently of an institution, agency, or physician's office are currently covered as other diagnostic tests under section 1861(s)(3) of the Act.

We believe that, by establishing section 1861(ii) of the Act, the Congress did not intend to preclude coverage of diagnostic psychological tests under section 1861(s)(3) of the Act and, therefore, we intend to continue to cover this type of testing. We are, however, inviting public comment at this time on methods to employ that will control the potential for excessive use of psychological testing.

In addition, we intend to address the coverage requirements for the psychological tests benefit in a separate rulemaking in the near future. At that time, we will invite public comment about the professional qualifications that should be required for the persons who perform these tests. Until the rule establishing these qualifications is effective, we intend to continue to cover this type of testing if furnished by any psychologist who is licensed or certified to practice psychology in the State or jurisdiction where he or she is furnishing services or, if the jurisdiction does not issue licenses, if provided by any practicing psychologist. (It is our understanding that all States, the District of Columbia, and Puerto Rico license psychologists, but that some trust territories do not. Examples of psychologists, other than CPs, whose services would continue to be covered in the interim period include, but are not limited to, educational psychologists and counseling psychologists.)

Payment for psychological tests that are billed directly by these independent psychologists is no longer made on the basis of reasonable charges. Effective January 1, 1992, payment for psychological tests performed by these practitioners is made on the basis of the fee schedule for physicians' services. Hence, the payment amount for psychological tests (Current Procedural Terminology code 90830) is the same for physicians, clinical psychologists, and independent psychologists.

C. Clinical Social Worker Services

1. We propose, based on section 1861(s)(2)(N) of the Act, which includes the services of CSWs among medical and other health services, to add a new paragraph (v) to the list of medical and other health services at § 410.10 to include the services of CSWs.

2. We propose, in a new § 410.73(a), to define a CSW based on the definition of a CSW in section 1861(hh)(1) of the Act. We would define a CSW as an individual who—

- Possesses a master's or doctor's degree in social work;
- After obtaining the degree, has performed at least 2 years of supervised clinical social work; and
- Either is licensed or certified as a clinical social worker by the State in which the services are performed or, in the case of an individual in a State that does not provide for licensure or certification, has completed at least 2 years or 3,000 hours of post master's degree supervised clinical social work practice under the supervision of a master's degree level social worker in an appropriate setting such as a hospital, SNF, or clinic.

3. We propose, in a new § 410.73(b), to specify that Medicare Part B pays for services performed by a CSW for the diagnosis and treatment of mental illness that the CSW is legally authorized to perform if the services would be covered if furnished by a physician or as an incident to a physician's professional services. This is based on the definition of CSW services in section 1861(hh)(2) of the Act.

4. In a new § 410.73(c)(1), we would specify that payment for CSW services

VOL 58 ISS 248 DEC 29 1993 UMI

furnished to hospital inpatients and outpatients is made to the hospital. All services provided by CSWs to hospital patients (inpatients and outpatients) are bundled under section 1862(a)(14) of the Act. Therefore, CSWs cannot bill Medicare Part B directly for these services.

Section 4157 of OBRA '90 did not amend section 1862(a)(14) of the Act, which concerns exclusion from coverage, to unbundle inpatient and outpatient hospital services provided by CSWs. This section specifically unbundles only the following services:

- Physician services.
- Certified nurse midwife services.
- Qualified psychologist services (that is, services of CPs).
- Certified registered nurse anesthetist services.
- Services described under section 1861(s)(2)(K)(i) of the Act; that is, physician assistant services.

Therefore, CSW services to hospital patients remain bundled, which means that CSWs are precluded from billing the Medicare program for these services directly.

In a new § 410.73(c)(2), we would specify that payment for CSW services furnished to inpatients of an SNF, if the SNF is required to provide such services as a requirement for participation, is made to the SNF. Section 6113(b) of Public Law 101–239 explicitly excludes from the definition of "clinical social worker services" services furnished to an inpatient of an SNF that the SNF is required to provide as a requirement for participation. However, under existing § 483.15, which concerns quality of life requirements for long term care facilities, SNFs are required to hire a qualified social worker to provide social services in facilities with more than 120 beds. These social workers need not meet the statutory definition for a CSW, because, as provided in § 483.15(g)(4), they may qualify with a bachelor's level training and experience.

Payment for all social worker services performed in an SNF, in accordance with § 483.15, is made directly to the SNF and billed as an SNF service. However, under the statute any coverable CSW services furnished in an SNF that the SNF is not required to furnish as a requirement for participation could be billed by the CSWs directly under Part B.

While it is true that SNFs furnish social services, we cannot say that these services are always (or even ever) performed by individuals with the credentials of CSWs, or that services furnished in an SNF by a social worker (including a CSW who is an SNF employee) are diagnostic and therapeutic mental health services as envisioned in terms of CSW coverage. In studying the provision, we at first concluded that one practical approach would be to attempt to delineate types of services that could, and could not, be provided under Part B in an SNF setting. Thus, we considered proposing that—

- All generalized social worker services furnished to all SNF inpatients without individualization would be excluded from Part B coverage no matter who provides them.
- All identifiable CSW services furnished to individual patients in order to diagnose or treat the individual patient's mental illness would be covered under Part B if provided by a CSW.

However, this approach would be difficult to administer because both of these categories of services are difficult to identify and seem potentially to fall under the SNF requirements for participation. Therefore, carriers would not be able to distinguish, or limit in a clearly definable way, those services that are not required by the SNF requirements for participation. A clear distinction is needed, not only for Part A and Part B payment reasons, but also for SNF certification and survey purposes.

Furthermore, language in section 1819(b) of the Act that establishes required SNF services is somewhat imprecise, in that several major components of that subsection seem to entail the very type of work that CSWs might be expected to perform in an SNF, particularly, providing "specialized rehabilitative services" and "medically-related social services" in order "to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident." Section 1819(b)(4)(A)(v) of the Act requires SNFs to provide an ongoing program that furnishes these services and that is provided in accordance with an assessment made for each patient. On the face of it, services furnished to meet these requirements seem necessarily tailored to the individual. Hence, it is difficult to see how those functions could constitute "generalized" services furnished to all patients "without individualization."

Thus, we are inviting public comment and suggestions on how we can clearly identify or differentiate the level of services that would clearly qualify under the statute as CSW services performed in SNFs from those services that are required by the SNF requirements for participation.

As noted above, the conditions of coverage for ESRD facilities require that social worker services be made available to dialysis patients. Concerning the issue of whether CSWs could be paid directly for social worker services furnished to dialysis patients that the dialysis facilities are required to furnish as a condition of coverage, the composite rate is a comprehensive, all inclusive, prospective payment for all of the items and services required for outpatient maintenance dialysis. Because payment for the CSW services will be included in the composite rate payment made to the dialysis facility, we do not believe that CSWs can be paid directly for these services furnished to dialysis patients. Therefore, in a new § 410.73(c)(3), we would specify that payment for social services furnished to dialysis patients that are required by the conditions for coverage for ESRD facilities is made to the ESRD facility. However, we invite public comment regarding whether any CSW services to dialysis patients can be distinguished from the required facility services.

5. We have the same concerns regarding the need for consultation between the CSW and the beneficiary's physician as we do in the case of CPs. We believe that it is important that the CSW take into consideration medical conditions that may be causing or contributing to the beneficiary's problems and that the best way to identify these conditions is through consultation with the beneficiary's primary care or attending physician. Based on language in the conference report that accompanied H.R. 3299, it is clear that the conference committee had the same concern. The conference agreement stated:

> The conferees intend that the criteria developed by the Secretary stipulate that the patient's medical record include documentation that: (1) The psychologist or *clinical social worker* has informed the patient of the desirability of conferring with the patient's primary care physician to consider potential medical conditions contributing to the patient's condition * * * [Emphasis added.] (H.R. Rep. No. 247, 101st Cong., 1st Sess. 361 (1989))

Therefore, in a new § 410.73(d), we propose to hold those CSWs who bill Medicare Part B directly to the same consultation requirements as we would CPs. Accordingly, the CSW, when applying for a Medicare provider number and annually thereafter, would be required to submit to the carrier an attestation statement agreeing to consult with the beneficiary's attending or primary care physician in accordance with professional ethical norms, taking into consideration patient confidentiality. We would require that the attestation statement contain the same information proposed for the attestation statement we would require of CPs.

We also propose to specify, in a new § 410.73(c)(5), that a CSW or attending or primary care physician may not bill Medicare or the beneficiary for the consultation that would be required by this rule.

6. We propose to revise § 410.150, which explains to whom payment is made, by adding a new paragraph (b)(16) to specify that payment may be made directly to the CSW, on an assignment-related basis, for services he or she furnished.

7. As discussed under section II.A. of this preamble, we would revise §§ 410.152, "Amounts of payment," and 410.155(b), "Services subject to limitation," regarding application of the mental health treatment limitation. The provisions of proposed §§ 410.152 and 410.155(b) would also apply to services of CSWs.

8. We propose, based on the payment provision of section 1833(a)(1)(F) of the Act, to further revise § 410.152 by adding a new paragraph (m), which would specify that Medicare Part B pays, subject to the mental health treatment limitation of § 410.155(c), 80 percent of the lesser of the actual charge for the therapeutic services of a CSW or 75 percent of the fee schedule amount for CP services, which will be described in a separate rule addressing the provisions of section 1833(a)(1)(L) of the Act.

9. Before OBRA '89, we permitted the covered services of CPs and CSWs furnished through risk-based HMOs and CMPs to be furnished without physician supervision. We would amend § 417.416, "Qualifying condition: Furnishing of services," by adding a new paragraph (d)(3) to specify that a cost-based HMO or CMP may permit the covered services of a CSW to be furnished without physician supervision. Because under section 1861(hh) of the Act there is no coverage under Part B for services and supplies incident to a CSW's services, we would clarify that services incident to the professional services of a CSW are not covered by Medicare if furnished in a cost-based HMO or CMP.

10. The proposed revision to § 424.55, "Payment to the supplier," discussed in section II.A.9 of this preamble, would also apply to CSWs.

D CPs and CSWs Diagnostic Coding

When CPs and CSWs submit claims to carriers for services furnished to Medicare beneficiaries, they may have been using diagnosis codes either from the Diagnostic and Statistical Manual of Mental Disorders (Third Edition) (DSM–III–R) or the International Classification of Diseases, 9th Revision, Clinical Modification (ICD–9–CM). We are proposing that, beginning with the effective date of the final rule, CPs and CSWs would be required to use only ICD–9–CM diagnostic coding when submitting claims to our carriers. We have a long history of use of the ICD–9–CM coding system for reporting purposes for our Medicare beneficiaries. All of our hospital data are recorded using the ICD–9–CM coding system. Although DSM–III–R is based on ICD–9–CM, it is not compatible with our system software, and it would be costly to make it compatible. It would also be burdensome for physicians to be required to buy two sets of coding books.

In addition, note that section 1842(p) of the Act, as enacted by section 202(g) of the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360), requires that each request for payment, or bill submitted, for an item or service furnished by a physician for which payment may be made include the appropriate diagnosis code or codes established by the Secretary. In a proposed rule "Physician Billing Diagnostic Information," published on July 21, 1989, (54 FR 30558) we proposed to designate ICD–9–CM codes as the appropriate and sole diagnosis coding system for physicians' services. Further, section 1833(e) of the Act stipulates that no payment shall be made to any provider of services or other person under Part B unless the information necessary to determine the amounts due such provider or other person has been furnished. Thus, we believe that it would be appropriate to extend these requirements to CPs and CSWs.

III. Regulatory Impact Analysis

A. Introduction

We generally prepare and publish a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (U.S.C. 601 through 612) unless the Secretary certifies that a rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all psychologists, social workers, and hospitals to be small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any rule that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

We believe this proposed rule would not have a significant economic impact on a substantial number of small rural hospitals since it is unlikely that they would be involved in providing CP and CSW services, unless the facility is one providing services primarily for the mentally ill. We have prepared the following analysis, which in combination with the other sections of this proposed rule, is intended to conform to the objectives of the RFA and section 1102(b) of the Act.

To the extent that a legislative provision being announced by a rule such as this may have a significant effect on beneficiaries or providers or may be viewed as controversial, we believe that we should address any potential concerns. In this instance, we believe it is desirable to inform the public of our estimate of the substantial budgetary effect of these statutory changes.

It is the amendments to the Act as a result of sections 6113 (a) through (d) of OBRA '89 and section 4157(a) of OBRA '90 that would increase Medicare program expenditures, not these regulations, which merely conform to statutory provisions. The statutory elimination of the restriction on the site of service has increased the accessibility and availability of services, resulting in a significant increase in the number of services provided to Medicare beneficiaries. In addition, removal of the annual dollar limitation, which was effective on January 1, 1990, has also resulted in an increase in payment for mental health services provided by CPs and CSWs for Medicare patients whose cost of care may exceed what was the annual limitation of $1,375.00. We project that the combination of additional sites of service, additional providers, and removal of the annual dollar limitation would result in the following estimated increase in expenditures:

ESTIMATED INCREASE IN MEDICARE EXPENDITURES FOR CLINICAL PSYCHOLOGIST AND CLINICAL SOCIAL WORKER SERVICES

(In millions, rounded to the nearest $10 million)

FY 94	FY 95	FY 96	FY 97
$260	$320	$390	$430

The total expenditures are dependent upon the number of services and the charge per service of CPs and CSWs. We believe the increase in expenditures would be due primarily to an increase in the number of users rather than an increase in the average charge per service or the average number of services per beneficiary. We estimate the number of users would increase 10 percent each year due to additional providers, provider outreach, and an increasing number of beneficiaries.

It is also important to note that, in the absence of final regulations defining the criteria a CP must meet for Medicare purposes, the Medicare carriers have had the authority to determine whether a particular psychologist qualifies to have services covered by Medicare. In using this authority, the carriers decide if the educational background and experience of a particular psychologist qualify him or her as a CP. As noted earlier, we estimate that two-thirds of the carriers currently are paying psychologists based on the education and experience factors that would be adopted under this proposed rule. Therefore, the estimates presented above reflect amounts currently being paid for the services of psychologists, as approved by the carriers.

Another factor affecting these estimates is that, because of the availability of coverage of the service of CPs and CSWs, these professionals substitute for the services of psychiatrists. Thus, there is an offsetting effect in terms of program outlays.

B. Entities Affected

1. Effect on Clinical Psychologists

Under this proposed rule, CPs would be able to bill Medicare directly for all CP services, including those furnished to hospital patients. We anticipate an increase in services provided by CPs because there may have been a need for mental health care that was unmet because of limited access to CP and CSW services and also because demand may be stimulated when information concerning the availability of coverage for these services becomes more widely known.

2. Effect on Other Psychologists

These proposed regulations would continue to permit independent psychologists to bill the Medicare program directly for furnishing diagnostic psychological tests ordered by a physician or CP. Payment would be made under the fee schedule for physicians' services.

3. Effect on Clinical Social Workers

Clinical social workers were not previously able to bill directly for their services. Therefore, it is difficult to project accurately the number of CSWs who would elect to participate in the Medicare program and the number of beneficiaries who would be served. The services that are covered are those that are otherwise covered if furnished by a physician or as an incident to a physician's professional service. We believe the services provided by CSWs would be in addition to those previously furnished by psychiatrists and psychologists rather than a substitute for the service of medical doctors and CPs. The additional providers, and the willingness of the CSWs to participate in the Medicare program, would increase the access to care by persons in need of these services.

IV. Paperwork Reduction Act

Proposed regulations at §§ 410.71(e) and 410.73(e) contain information collection and recordkeeping requirements that are subject to the Office of Management and Budget approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). The information collection requirements concern the attestation statement from CPs and CSWs and the notation of medical records regarding consultation. The respondents who would provide the information are CPs and CSWs. Public reporting burden for this collection of information is estimated to be ½ hour per year per beneficiary receiving CP or CSW services. A notice will be published in the **Federal Register** after approval is obtained. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the OMB official whose name appears in the **ADDRESSES** section of this preamble.

V. Response to Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. We will, however, consider all comments that we receive by the date specified in the **DATES** section of this preamble and, if we proceed with a final rule, we will respond to the comments in the preamble of the final rule.

List of Subjects

42 CFR Part 410

Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Rural areas, X-rays

42 CFR Part 417

Administrative practice and procedure, Health maintenance organization (HMO), Medicare, Reporting and recordkeeping requirements.

42 CFR Part 424

Assignment of benefits, Physician certification, Claims for payment, Emergency services, Plan of treatment.

For the reasons set forth in the preamble, 42 CFR chapter IV is proposed to be amended as follows:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

A. Part 410 is amended as set forth below:

1. The authority citation is revised to read as follows:

Authority: Secs. 1102, 1832, 1835, 1861 (r)(s), (cc), (hh), and (ii), 1862(a), 1871, 1876, and 1881 of the Social Security Act, and sec. 6113(c), Public Law 101–239 (42 U.S.C. 1302 1395k, 1395n, 1395x (r), (s), (cc), (hh), and (ii), 1395y(a), 1395hh, 1395mm, and 1395rr, and 13951 (note)).

Subpart B—Medical and Other Health Services

2. In § 410.10, the introductory text is republished, and new paragraphs (u) and (v) are added to read as follows:

§ 410.10 Medical and other health services: Included services.

Subject to the conditions and limitations specified in this subpart, "medical and other health services" includes the following services:

* * * * *

(u) Clinical psychologist services and services and supplies furnished as an incident to the services of the clinical psychologist, as provided in § 410.71.

(v) Clinical social worker services, as provided in § 410.73.

3. New §§ 410.71 and 410.73 are added to read as follows:

§ 410.71 Clinical psychologist services and services and supplies incident to clinical psychologist services.

(a) *Included services.* (1) Medicare Part B covers services furnished by a clinical psychologist, who meets the requirements specified in paragraph (e) of this section, that are within the scope of his or her State license, if the services would be covered if furnished by a physician or as an incident to a physician's services.

(2) Medicare Part B covers services and supplies furnished as an incident to the services of a clinical psychologist if the following requirements are met:

(i) The services and supplies would be covered if furnished by a physician or as an incident to a physician's services.

(ii) The services or supplies are of the type that are commonly furnished in a physician's or clinical psychologist's office and are either furnished without charge or are included in the physician's or clinical psychologist's bill.

(iii) The services are an integral, although incidental, part of professional services performed by the clinical psychologist.

(iv) The services are performed under the direct supervision of the clinical psychologist (that is, the clinical psychologist must be physically present in the office suite and immediately available).

(v) The individual performing the service must be an employee of either the clinical psychologist or the legal entity that employs the supervising clinical psychologist, under the common law control test of the Act as more fully set forth in 20 CFR 404.1007.

(b) *Application of mental health treatment limitation.* The treatment services of a clinical psychologist and services and supplies furnished as an incident to those services are subject to the limitation on payment for outpatient mental health treatment services set forth in § 410.155.

(c) *Payment for consultations.* A clinical psychologist or an attending or primary care physician may not bill Medicare or the beneficiary for the consultation that is required under paragraph (e)(2) of this section.

(d) *Billing procedures.* Payment for the services of a clinical psychologist and for services furnished as an incident to a clinical psychologist's services that were furnished to hospital inpatients and outpatients through December 31, 1990, is made to the hospital. Effective January 1, 1991, clinical psychologists may bill Medicare Part B directly for these services.

(e) *Requirements for payment for services*—(1) *Qualifications.*—For purposes of this requirement, a clinical psychologist is an individual who meets the following requirements:

(i) Holds a doctoral degree in psychology from an accredited program that prepares the candidate to practice clinical psychology by providing appropriate clinical psychology training.

(ii) Is licensed or certified at the independent practice level of clinical psychology by the State in which he or she practices.

(iii) Possesses 2 years of supervised clinical experience, at least one of which is postdoctoral degree experience and the supervision was provided by a psychologist qualified at the doctorate level.

(2) *Agreement to consult.* When applying for a Medicare provider number, and annually thereafter, a clinical psychologist who bills Medicare Part B directly must submit to the carrier an attestation statement agreeing to consult with the beneficiary's attending or primary care physician (providing the beneficiary has such a physician) in accordance with accepted professional ethical norms, taking into consideration patient confidentiality. The attestation must specify that the clinical psychologist agrees to the following:

(i) To inform the beneficiary, before a consultation, that it is desirable to consult with the beneficiary's primary care or attending physician to consider relevant medical conditions.

(ii) To include a notation in the beneficiary's medical records that he or she was notified of the desirability of a consultation between the clinical psychologist and the primary care or attending physician, and the beneficiary's response to that notification.

(iii) If the beneficiary assents to the consultation, to consult with the primary care or attending physician within 1 week of obtaining the beneficiary's consent. In addition, the clinical psychologist must agree to notify the physician in writing about the provision of care to the beneficiary if, after at least four attempts, he or she is unable to consult directly with the physician.

§ 410.73 Clinical social worker services.

(a) *Definition.* For purposes of this part, a clinical social worker is defined as an individual who—

(1) Possesses a master's or doctor's degree in social work;

(2) After obtaining the degree, has performed at least 2 years of supervised clinical social work; and

(3) Either is licensed or certified as a clinical social worker by the State in which the services are performed or, in the case of an individual in a State that does not provide for licensure or certification, has completed at least 2 years or 3,000 hours of post master's degree supervised clinical social work practice under the supervision of a master's degree level social worker in an appropriate setting such as a hospital, SNF, or clinic.

(b) *Included services.* Medicare Part B covers the services of a clinical social worker furnished for the diagnosis and treatment of mental illness that the clinical social worker is legally authorized to perform under State law (or the State regulatory mechanism provided by State law) of the State in which the services are performed. The services must be of a type that would be covered if they were furnished by a physician or as an incident to a physician's professional service and must meet the requirements of this section.

(c) *Billing and payment for certain services.* (1) Payment for covered clinical social worker services furnished to hospital inpatients and outpatients is made to the hospital.

(2) Payment for covered clinical social worker services furnished to inpatients of an SNF, if the SNF is required to provide the services as a requirement for participation, is made to the SNF.

(3) Payment for social services furnished to dialysis patients that are required by the conditions for coverage for ESRD facilities under § 405.2163 of this chapter is made to the ESRD facility.

(4) A clinical social worker may not bill Medicare for the services specified in paragraphs (c)(1) through (c)(3) of this section.

(5) A clinical social worker or an attending or primary care physician may not bill Medicare or the beneficiary for the consultation that is required under paragraph (d) of this section.

(d) *Requirements for Medicare payment: Agreement to consult.* As a requirement for Medicare payment, when applying for a Medicare provider number, and annually thereafter, a clinical social worker who bills Medicare Part B directly must submit to the carrier an attestation statement agreeing to consult with the beneficiary's attending or primary care physician (providing the beneficiary has such a physician) in accordance with accepted professional ethical norms, taking into consideration patient confidentiality. The attestation must specify that the clinical social worker agrees to the following:

(1) To inform the beneficiary, before a consultation, that it is desirable to consult with the beneficiary's primary care or attending physician to consider medical conditions contributing to the beneficiary's condition.

(2) To include a notation in the beneficiary's medical records that he or she was notified of the desirability of a consultation between the clinical social

VOL 58 ISS 248 DEC 29 1993 UMI

worker and the primary care or attending physician, and the beneficiary's response to the notification.

(3) If the beneficiary assents to the consultation, to consult with the primary care or attending physician within 1 week of obtaining the beneficiary's consent. In addition, the clinical social worker must agree to notify the physician in writing about the provision of care to the beneficiary if, after at least four attempts, he or she is unable to consult directly with the physician.

Subpart E—Payment of SMI Benefits

4. In § 410.150, the introductory text of paragraph (b) is republished, new paragraphs (b)(12) through (b)(14) are added and reserved, and new paragraphs (b)(15) and (b)(16) are added to read as follows:

§ 410.150 To whom payment is made.

* * * * *

(b) *Specific rules.* Subject to the conditions set forth in paragraph (a) of this section, Medicare Part B pays as follows:

* * * * *

(12) [Reserved.]
(13) [Reserved.]
(14) [Reserved.]

(15) To a clinical psychologist on the individual's behalf for clinical psychologist services and for services and supplies furnished as an incident to his or her services.

(16) To a clinical social worker on the individual's behalf for clinical social worker services.

5. In § 410.152, the title of paragraph (a) is revised, the introductory text of paragraph (a)(1) is republished; paragraph (a)(1)(iv) and the introductory text for paragraphs (a)(2) and (b) are revised; new paragraph (k) is added and reserved; and new paragraphs (l) and (m) are added to read as follows:

§ 410.152 Amounts of payment.

(a) *General provisions*—(1) *Exclusion from incurred expenses.* As used in this section, "incurred expenses" are expenses incurred by an individual during his or her coverage period, for covered Part B services, excluding the following:

* * * * *

(iv) Expenses for mental health treatment services in excess of the mental health treatment limitation described in § 410.155.

(2) *Other applicable provisions.* Medicare Part B pays for incurred expenses the amounts specified in paragraphs (b) through (m) of this section, subject to the following:

* * * * *

(b) *Basic rules for payment.* Except as specified in paragraphs (c) through (m) of this section, Medicare Part B pays the following amounts:

* * * * *

(k) [Reserved.]

(l) *Amount of payment: Clinical psychologist services.* Medicare Part B pays 80 percent, subject to the limitation of § 410.155(c), of the lesser of the actual charge or the fee schedule amount for clinical psychologist services.

(m) *Amount of payment: Clinical social worker services.* Medicare Part B pays 80 percent, subject to the limitation of § 410.155(c), of the lesser of the actual charge for the services of a clinical social worker or 75 percent of the fee schedule amount for clinical psychologist services.

6. In § 410.155, the section heading is revised; in paragraph (a), the semicolon and the phrase "and medical services for the diagnosis and treatment of tuberculosis" is removed from the end of the definition of *hospital*, and a definition of *mental health treatment* is added at the end of the paragraph; and paragraphs (b), (c)(1), and (d) are revised to read as follows:

§ 410.155 Mental health treatment limitation.

(a) * * * *"Mental health treatment"* means therapy for the treatment of a mental, psychoneurotic, or personality disorder.

(b) *Application of the limitation.* (1) Services subject to the limitation include the following:

(i) Mental health treatment by physicians and other health care practitioners, whether furnished directly or as an incident to the services of the physician or other health care practitioner.

(ii) CORF mental health treatment furnished by physicians or other health care practitioners.

(2) Services not subject to the limitation include the following:

(i) Services furnished to a hospital inpatient.

(ii) Brief office visits for the purpose of monitoring or changing drug prescriptions used in the mental health treatment.

(iii) Partial hospitalization services not directly provided by a physician.

(iv) Diagnostic services, such as psychological testing, that are performed to establish a diagnosis.

(c) *Limitation*—(1) *Current limit.* Of the expenses incurred for services subject to the limit as specified in paragraph (b) of this section, only 62½ percent of the expenses will be considered payable under Medicare Part B, subject to the amount of payment and deductible provisions set forth in §§ 410.152 and 410.160, respectively.

* * * * *

(d) *Examples*—(1) As a private patient, whose physician accepted assignment, Mr. X's only medical expenses during calendar year 1991 were for physicians' services in connection with the treatment of a mental disorder that did not require inpatient hospitalization. The physician submitted a claim for $780, and the Medicare approved amount was determined to be $750. The statutory limit on the amount of expenses that are covered is 62½ percent of such expenses. (Here, $468.75 represents 62½ percent of $750.) Mr. X is required to meet the first $100 of total covered expenses for the Medicare Part B deductible, 20 percent of the balance of total covered expenses (20 percent of $368.75), and the difference between the Medicare approved amount and the total covered expenses ($750 minus $468.75). The remaining 80 percent is payable under Medicare Part B.

Total covered expenses	Mr. X's Payment	Medicare payment
$468.75	[2] $281.25	
[1] −100.00	[1] 100.00	
$368.75	[3] 73.75	[4] $295.00
	[5] $455.00	

[1] Deductible, as described in § 410.160.
[2] In excess of $468.75.
[3] 20 percent of total covered expenses less deductible.
[4] 80 percent of total covered expenses less deductible.
[5] Total payments by Mr. X.

(2) If Mr. X's physician had not accepted assignment, Mr. X would also have been liable for the difference between the actual charge of $780 and the approved amount of $750; that is, for an additional $30.

(3) If Mr. X had incurred $350 of the above expenses while an inpatient of a hospital (see paragraph (b) of this section), and the remaining $400 while not an inpatient of a hospital, payment would be computed as follows:

Total covered expenses	Mr. X's payment	Medicare payment
[1] $250.00	[2] $150.00	
[3] +350.00		

Total covered expenses	Mr. X's payment	Medicare payment
$600.00	[4] $100.00	
[1] −100.00		
$500.00	[5] $100.00	[6] $400.00
	[7] $350.00	

[1] 62½ percent of $400.
[2] In excess of 62½ percent of $400.
[3] 100 percent of expenses incurred while an inpatient.
[4] Deductible.
[5] 20 percent of total covered expenses less deductible.
[6] 80 percent of total covered expenses less deductible.
[7] Total payments by Mr. X.

(4) In 1991, a clinical psychologist submits a claim for $100 for a covered mental health treatment service. The approved amount is $80. The "payment amount" is the lesser of $100 and $80, or $80. The beneficiary previously satisfied $70 of his annual Part B deductible of $100, leaving $30 unsatisfied. The actual benefit amount is computed as follows:

- $80×.625=$50
- $50−$30=$20
- $20×.80=$16 (the actual benefit payable).

Since the clinical psychologist must accept assignment, the beneficiary is liable for $80−$16=$64. If the deductible had previously been satisfied, the actual benefit payable would have been $40 ($50×.80) and the beneficiary would have been liable for $80−$40=$40.

B. Part 417 is amended as follows:

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

1. The authority citation for part 417 continues to read as follows:

Authority: Secs. 1102, 1833(a)(1)(A), 1861(s)(2)(H), 1866(a), 1871, 1874, and 1876 of the Social Security Act (42 U.S.C. 1302, 1395*l*(a)(1)(A), 1395x(s)(2)(H), 1395cc(a), 1395hh, 1395kk, and 1395mm); sec. 114(c) of Pub. L. 97-248 (42 U.S.C. 1395mm note); 31 U.S.C. 9701; and secs. 215 and 1301 through 1318 of the Public Health Service Act (42 U.S.C. 216 and 300e through 300e-17), unless otherwise noted.

Subpart J—Qualifying Conditions for Medicare Contracts

2. In § 417.416, the introductory text of paragraph (d) is republished; paragraph (d)(2) is revised; and a new paragraph (d)(3) is added to read as follows:

§ 417.416 Qualifying condition: Furnishing of services.

* * * * *

(d) *Exceptions to physician supervision.* The following services may be furnished without the direct personal supervision of a physician:

* * * * *

(2) The organization may permit the services of clinical psychologists who meet the qualifications specified in § 410.71(e)(1) of this chapter, and the services and supplies incident to their professional services, to be furnished without the direct personal supervision of a physician.

(3) An organization that contracts on—

(i) A risk basis may permit the services of a clinical social worker (as defined at § 410.73 of this chapter) and the services and supplies incident to their professional services, to be furnished without physician supervision; or

(ii) A cost basis may permit the services of a clinical social worker (as defined in § 410.73 of this chapter) to be furnished without physician supervision. Services incident to the professional services of a clinical social worker furnished by an organization contracting on a cost basis are not covered by Medicare and payment will not be made for such services.

* * * * *

C. Part 424 is amended as follows:

PART 424—CONDITIONS FOR MEDICARE PAYMENT

1. The authority citation for part 424 is revised to read as follows:

Authority: Secs. 216(j), 1102, 1814, 1815(c), 1833, 1835, 1842(b), 1861, 1866(d), 1870 (e) and (f), 1871, and 1872 of the Social Security Act (42 U.S.C. 416(j), 1302, 1395f, 1395(l), 1395(n), 1395u(B), 1395x, 1395cc(d), 1395gg (e) and (f), 1395hh, and 1395ii).

2. In § 424.55(b), the introductory text is republished, and paragraphs (b)(1) and (b)(2) are revised to read as follows:

§ 424.55 Payment to the supplier.

* * * * *

(b) In accepting assignment, the supplier agrees to the following:

(1) To accept, as full charge for the service, the amount approved by the carrier as the basis for determining the Medicare Part B payment (the reasonable charge or the lesser of the fee schedule amount and the actual charge).

(2) To limit charges to the beneficiary or any other source as follows:

(i) To collect nothing for those services for which Medicare pays 100 percent of the Medicare approved amount.

(ii) To collect only the difference between the Medicare approved amount and the Medicare Part B payment (for example, the amount of any reduction in incurred expenses under § 410.155(c), any applicable deductible amount, and any applicable coinsurance amount) for services for which Medicare pays less than 100 percent of the approved amount.

BILLING CODE 4120-01-P

FEDERAL MARITIME COMMISSION

46 CFR Part 502

[Docket No. 93-24]

Amendment to Rules of Practice and Procedure

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule.

SUMMARY: The Federal Maritime Commission proposes to amend its Rules of Practice and Procedure to make the complainant in a private complaint action responsible for service of the complaint and certain other documents in any manner authorized by Rule 4 of the Federal Rules of Civil Procedure, when the Commission has been unsuccessful, for any reason, in effectuating service by certified or registered mail. The proposed rule would also require complainant, when it effectuates service of a complaint, to notify the Commission of the date and manner of service, and the respondent of the time in which it must answer the complaint. Similar amendments are proposed for the Commission's Rules governing small claims. The proposed rule would conform the Commission's Rules regarding service more closely to the Federal Rules of Civil Procedure.

DATES: Comments due February 14, 1994.

ADDRESSES: Send comments (original and fifteen copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573-0001.

FOR FURTHER INFORMATION CONTACT:

Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001 (202) 523–5725.

SUPPLEMENTARY INFORMATION: Under Rule 113 of its Rules of Practice and Procedure, 46 CFR 502.113, the Commission is presently charged with the responsibility for service of private complaints, amendments to complaints, and complainant's memoranda filed in shortened procedure cases, while section Rule 114, 46 CFR 502.114 requires that parties serve all other pleadings. In administering Rule 113, the Commission has experienced occasions where complaints and other pleadings have been returned by the United States Postal Service because the respondent refused delivery, an incorrect address was provided by the complainant, or the respondent had moved leaving no forwarding address. In such circumstances, the Commission has resorted to alternative methods of service such as utilizing a Commission investigator to personally find and serve the respondent, or serving the secretary of state pursuant to state law.

Section 11(b) of the Shipping Act of 1984, 46 U.S.C. app. 1710(b), requires the Commission to "furnish a copy" of a private complaint to the named respondent, but this would not appear to require the Commission to expend its own resources on behalf of a private complainant beyond an initial service by certified or registered mail. Accordingly, the Commission proposes to amend Rule 113 to shift the responsibility of service to the complainant when the Commission has been unsuccessful in effectuating service by certified or registered mail. In that event, it would be left to the complainant to effectuate service in any manner authorized by Rule 4 of the Federal Rules of Civil Procedure, including, but not limited to, delivering a copy of the complaint personally to the respondent or to an agent authorized by appointment or by law to receive service of process.

The proposed rule would also require the complainant, if required to effectuate service, to notify the Commission's Secretary of the date and manner of service, and to notify the respondent of the time prescribed by Rule 64 of the Commission's Rules of Practice and Procedure, 46 CFR 502.64, within which the respondent must answer the complaint. A new form—Notice of Complaint Filed—would be added to Exhibit 1, Subpart E of Part 502, Complaint Form and Information Checklist, which would inform the respondent of the time within which the complaint must be answered, similar to a summons in federal court. The proposed rule would also amend 46 CFR 502.304(d), governing claims filed under Subpart S, Informal Procedure for Adjudication of Small Claims, to require the claimant to effectuate service when service by certified or registered mail by the settlement officer has been unsuccessful. A new form—Notice of Claim Filed—would be added to subpart S as Exhibit 3.

The proposed rule would conform the Commission's Rules regarding service more closely to the Federal Rules of Civil Procedure, which require the plaintiff or the plaintiff's attorney to be responsible for prompt service of a complaint. Also, the proposed amendment would remove the burden on the Commission to effect service on those occasions when service by certified mail or registered mail has been unsuccessful.

The Federal Maritime Commission certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), that because this rule deals only with agency practice and procedure, it will not have a significant impact on a substantial number of small entities, including small businesses, small organizational units, and small government jurisdictions.

List of Subjects in 46 CFR 502

Administrative practice and procedure, Claims, Equal access to justice, Informal procedures for investigations, Lawyers, Penalties, Reporting and recordkeeping requirements.

Therefore, notice is hereby given that the Commission proposes to amend part 502 of title 46 CFR as follows:

PART 502—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 502 continues to read as follows:

Authority: 5 U.S.C. 504, 551, 552, 553, 559, 12 U.S.C. 1141j(a); 18 U.S.C. 207; 26 U.S.C. 501(c)(3); 28 U.S.C. 2112(a); 46 U.S.C. app. 817, 820, 821, 826, 841a, 1114(b), 1705, 1707–1711, 1713–1716; E.O 11222 of May 8, 1965 (30 FR 6469); 21 U.S.C. 853a; and Pub. L. 88–777 (46 U.S.C. app. 817d, 817e).

2. Section 502.113 is revised to read as follows:

§ 502.113 Service by the Commission and complainant.

(a) Complaints filed pursuant to § 502.62, amendments to complaints (unless otherwise authorized by the presiding officer pursuant to § 502.70(b)), and complainant's opening memoranda filed in shortened procedure cases will be served by the Commission by certified or registered mail. If service by the Commission is unsuccessful for any reason, the complainant must effectuate service in any manner and within the time period authorized by Rule 4 of the Federal Rules of Civil Procedure, notify the Secretary of the date and manner of service, and notify the respondent of the time, pursuant to § 502.64, within which respondent must answer the complaint. A form—Notice of Complaint Filed—is set forth in exhibit No.1a, subpart E.

(b) In addition to and accompanying the original of every document filed with the Commission for service by the Commission, there shall be a sufficient number of copies for use of the Commission (see § 502.118) and for service on each party to the proceeding. [Rule 113)].

3. Section 502.304(d) is revised to read as follows:

§ 502.304 Procedure and filing fee.

* * * * *

(d) A copy of each claim filed under this subpart, with attachments, shall be served by certified or registered mail by the Settlement Officer on the respondent involved. If service by the Settlement Officer is unsuccessful for any reason, the claimant must effectuate service in any manner authorized by Rule 4 of the Federal Rules of Civil Procedure, notify the Settlement officer of the date and manner of service, and notify the respondent of the time, pursuant to paragraph (e) of this section, within which respondent must answer the complaint. A form—Notice of Claim Filed—is set forth in exhibit 3, subpart S.

* * * * *

4. Exhibit No. 1a is added to subpart E, and exhibit No. 3 is added to subpart S to read as follows:

Exhibit No. 1a to Subpart E (§ 502.62)—Notice of Complaint Filed

Federal Maritime Commission, Washington, DC 20573

NOTICE OF COMPLAINT FILED
DOCKET NUMBER:
V.
TO: (Name and Address of Respondent)

You are hereby notified that a complaint has been filed against you, and you are required to file with the Secretary of the Commission and serve upon
COMPLAINANT OR COMPLAINANT'S ATTORNEY (Name and Address)

an answer to the complaint which is herewith served upon you, within _____ days after service of this notice upon you, exclusive of the day of service, unless additional time is permitted under Rule 64 of the Commission's Rules of Practice and Procedure, 46 CFR Part 502 (See also Rules 2, 41, 42, 101, and 111–118). If you fail to answer timely, judgment by default may be taken against you for the relief demanded in the complaint.

Secretary, Federal Maritime Commission

Date

Exhibit No. 3 to Subpart S [§ 502.304(d)]—Notice of Claim Filed

Federal Maritime Commission, Washington, DC 20573

NOTICE OF CLAIM FILED
INFORMAL DOCKET NUMBER:
V.
TO: (Name and Address of Respondent)

You are hereby notified that a claim has been filed against you, and you are required to file with the Settlement Officer, Federal Maritime Commission and serve upon
CLAIMANT OR CLAIMANT'S ATTORNEY (Name and Address)

an answer to the claim which is herewith served upon you, within 25 days after service of this notice upon you, exclusive of the day of service, unless additional time is permitted by the Settlement Officer. Your failure to respond is conclusively deemed to indicate your consent to the informal complaint procedure (46 CFR 502.304(e)), and an adverse decision may be entered against you; such decision will become final unless the Commission elects to review it within 30 days of the date of its service (46 CFR 502.304(g)).

[MM Docket No. 93–177, Rm–7594; DA 93–1534]

AM Radio Service Directional Antenna Performance

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; further extension of reply comment period.

SUMMARY: The Commission further extends time for filing reply comments in its proceeding examining the policies and rules pertaining to the performance verification of directional antenna systems at AM Broadcast Radio Service stations from December 29, 1993 to March 1, 1994. This action is being taken to allow parties knowledgeable in this area additional time for consultation and evaluation of the complex engineering issues raised in this Inquiry.

DATES: Reply comments are now due March 1, 1994.

ADDRESSES: Federal Communications Commission, Washington, DC, 20554.

FOR FURTHER INFORMATION CONTACT: Joseph Johnson, Mass Media Bureau, (202) 632–9660.

SUPPLEMENTARY INFORMATION:

Order Granting Further Extension of Time

Adopted: December 20, 1993; Released: December 21, 1993.

Reply Comment Date: March 1, 1994.

By the Chief, Mass Media Bureau:

1. On June 14, 1993, the Commission adopted a Notice of Inquiry, 8 FCC Rcd 4345 (1993), 58 FR 36184 (July 6, 1993), ("Inquiry") in MM Docket 93–177 to examine the policies and rules pertaining to the performance verification of directional antenna systems at AM Broadcast Radio Service stations. The directional antenna rules were initially promulgated in the late 1930s when there were few operational stations and all engineering calculations were performed manually. In the years since those rules were established, they have been amended many times, but no thorough top-to-bottom review has ever been undertaken in order to bring them uniformly up to a state-of-the-art status. The purpose of the Inquiry was to commence such a process by gathering all of the data and other information necessary for releasing a comprehensive set of proposals for rule amendments. The original deadlines for filing comments and reply comments to the Inquiry were August 20, 1993 and September 7, 1993, respectively.

2. On July 12, 1993, the Association of Federal Communications Consulting Engineers requested an extension of the comment and reply comment periods. An Order Granting Extension of Time, 8 FCC Rcd 6324, (1993), 58 FR 45311 (August 27, 1993), was adopted on August 19, 1993, extending the dates for comments and replies to October 29, 1993 and December 29, 1993, respectively. As of the end of the comment period, approximately 20 formal comments had been received at the agency. In addition, a meeting was held on November 17, 1993 at the Commission between agency staff and several representatives of engineering consulting firms to discuss the progress of gathering data for use in drafting proposed rule amendments.

3. The Commission now has before it a petition to further extend the date for filing of reply comments by 60 days. The petition was filed by the engineering firms du Treil, Lundin & Rackley; Hatfield & Dawson; Suffa & Cavell; Silliman & Silliman; and Moffet, Larson & Johnson. These firms are also the petitioners who originally requested this Inquiry. Petitioners state that they and others in the broadcast industry are engaged in a study of the issues raised in the Inquiry and that a forum will be held in January where all interested parties can discuss these matters with the aim of developing reply comments which are thorough and focused.

4. After reviewing the Inquiry comments and discussing some of the relevant issues with industry representatives, it is clear that the technical complexity involved in formulating certain of the necessary amendments to our rules is quite significant. For example, some of the computer software programs now available for analyzing antenna patterns are extremely complicated and any action by the agency to eliminate existing measurement requirements and substitute in their place theoretical calculations based on these programs must be based on a thorough examination of the software and an evaluation of how its use would affect antenna pattern accuracy. We believe that the petitioners and others are making progress in formulating their proposals, but that further work is necessary and that such work would be materially aided by the forum planned for January. Therefore we agree with petitioners that a further extension of the deadline for filing reply comments is warranted.

5. Accordingly, *It is ordered* That the request to extend the reply comment date filed by du Treil, Lundin & Rackley; Hatfield & Dawson; Suffa & Cavell; Silliman & Silliman; and Moffet, Larson & Johnson is granted. The date for filing reply comments is extended to March 1, 1994.

6. This action is taken pursuant to authority found in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and §§ 0.204(b), 0.283, 1.45 and 1.46 of the Commission's Rules.

7. Further information may be obtained from Joseph Johnson, Mass Media Bureau, Engineering Policy Branch, (202) 632–9660.

Cable Television Service; List of Major Television Markets

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission invites comments on its proposal, initiated by a request filed by Diversified Communications, the licensee of television station WYOU(TV), Scranton, The New York Times Company, licensee of television station WNEP-TV, Scranton, and WBRE Associates, licensee of television station WBRE-TV, Wilkes-Barre, Pennsylvania (collectively "joint petitioners"), to amend the Commission's Rules, regarding Major Television Markets, to add the communities of Hazelton and Williamsport, Pennsylvania, to the Wilkes-Barre-Scranton, Pennsylvania television market. This action is taken to test the proposal for market hyphenation through the record established based on comments filed by interested parties.

DATES: Comments are due on or before January 18, 1994, and reply comments are due on or before February 2, 1994.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Alan E. Aronowitz, Mass Media Bureau, Policy and Rules Division, (202) 632-7792.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 93-303, adopted December 8, 1993, and released December 21, 1993. The complete text of this document is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW., Washington, DC 20554, and may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Washington, DC 20037.

Synopsis of the Notice of Proposed Rule Making

1. The Commission, in response to a Petition for Rulemaking filed by the joint petitioners, proposed to amend Section 76.51 of the rules to add the communities of Hazelton and Williamsport, Pennsylvania to the Wilkes-Barre-Scranton television market.

2. In evaluating past requests for hyphenation of a market, the Commission has considered the following factors as relevant to its examination: (1) The distance between the existing designated communities and the community proposed to be added to the designation; (2) whether cable carriage, if afforded to the subject station, would extend to areas beyond its Grade B signal coverage area; (3) the presence of a clear showing of a particularized need by the station requesting the change of market designation; and (4) an indication of benefit to the public from the proposed change. Each of these factors helps the Commission to evaluate individual market conditions consistent "with the underlying competitive purpose of the market hyphenation rule to delineate areas where stations can and do, both actually and logically, compete."

3. Based on the facts presented, the Commission believes that a sufficient case for redesignation of the subject market has been set forth so that this proposal should be tested through the rulemaking process, including the comments of interested parties. It appears from the information before us that the television stations license to Wilkes-Barre, Scranton, Hazelton and Williamsport do compete for audiences and advertisers throughout much, if not all, of the proposed combined market area, and that evidence has been presented tending to demonstrate commonality between the proposed communities to be added to a market designation and the market as a whole. Moreover, the joint petitioners' proposal appears to be consistent with the Commission's policies regarding redesignation of a hyphenated television market.

Initial Regulatory Flexibility Analysis

4. The Commission certifies that the Regulatory Flexibility Act of 1980 does not apply to this rulemaking proceeding because if the proposed rule amendment is promulgated, there will not be a significant economic impact on a substantial number of small business entities, as defined by section 601(3) of the Regulatory Flexibility Act. A few cable television system operators will be affected by the proposed rule amendment. The Secretary shall send a copy of this Notice of Proposed Rule Making, including the certification, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Public Law No. 96-354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1981).

Ex Parte

5. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, provided they are disclosed as provided in the Commission's Rules. See generally 47 CFR 1.1202, 1.1203 and 1.1206(a).

Comment Dates

6. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, interested parties may file comments on or before January 18, 1994, and reply comments on or before February 2, 1994. All relevant and timely comments will be considered before final action is taken in this proceeding. To file formally in this proceeding, participants must file an original and four copies of all comment, reply comments, and supporting comments. If participants want each Commissioner to receive a personal copy of their comments, an original plus nine copies must be filed. Comments and reply comments should be sent to the Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (room 239) of the Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

7. Accordingly, this action is taken by the Chief, Mass Media Bureau, pursuant to authority delegated by § 0.283 of the Commission's Rules.

Cable Television Service; List of Major Television Markets

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission invites comments on its proposal, initiated by a request filed by Golden Orange Broadcasting Co., Inc., to amend the Commission's Rules, regarding Major Television Markets, to add the community of Anaheim to the Los Angeles-San Bernardino-Corona-Fontana, California hyphenated television market. This action is taken to test the proposal for market hyphenation through the record established based on comments filed by interested parties.

DATES: Comments are due on or before January 18, 1994, and reply comments are due on or before February 2, 1994.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Alan E. Aronowitz, Mass Media Bureau, Policy and Rules Division, (202) 632-7792.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 93-304, adopted December 8, 1993, and released December 21, 1993. The complete text of this document is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW., Washington, DC 20554, and may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Washington, DC 20037.

Synopsis of the Notice of Proposed Rule Making

1. The Commission, in response to a Petition for Rulemaking filed by Golden Orange Broadcasting Co., Inc., licensee of KDOC-TV, Channel 56, Anaheim, California, proposed to amend Section 76.51 of the Rules to change the designation of the Los Angeles-San Bernardino-Corona-Fontana, California, television to include Anaheim as a designated community in the hyphenated market.

2. In evaluating past requests for hyphenation of a market, the Commission has considered the following factors as relevant to its examination: (1) The distance between the existing designated communities and the community proposed to be added to the designation; (2) whether cable carriage, if afforded to the subject station, would extend to areas beyond its Grade B signal coverage area; (3) the presence of a clear showing of a particularized need by the station requesting the change of market designation; and (4) an indication of benefit to the public from the proposed change. Each of these factors helps the Commission to evaluate individual market conditions consistent "with the underlying competitive purpose of the market hyphenation rule to delineate areas where stations can and do, both actually and logically, compete."

3. Based on the facts presented, the Commission believes that a sufficient case for redesignation of the subject market has been set forth so that this proposal should be tested through the rulemaking process, including the comments of interested parties. It appears from the information before us that Station KDOC-TV and stations licensed to communities in the subject television market do compete for audiences and advertisers throughout much of the proposed combined market area, and that evidence has been presented tending to demonstrate commonality between the proposed community to be added to a market designation and the market as a whole. Moreover, the petitioner's proposal appears to be consistent with the Commission's policies regarding redesignation of a hyphenated television market.

4. The Commission also noted that, by Report and Order in MM Docket No. 93-207, DA 93-1444 (released December 7, 1993), Section 76.51 was amended to add Riverside, California, as a designated community in the market. Additionally, the Commission recognized that the proposed major market adjustment under consideration involves a particularly large television market, the nation's second largest. In another proceeding, the Commission is considering several alternative possibilities other than market hyphenation to respond to competition issues that are raised with regard to stations operating in large markets under existing rules. See Notice of Proposed Rule Making in MM Docket No. 93-290 (Newton, New Jersey and Riverhead, New York), 58 FR 62085 (Nov. 24, 1993). In this regard, the Commission stated that interested parties may wish to address the issues raised in that proceeding in connection with the instant proposal.

Initial Regulatory Flexibility Analysis

5. The Commission certifies that the Regulatory Flexibility Act of 1980 does not apply to this rulemaking proceeding because if the proposed rule amendment is promulgated, there will not be a significant economic impact on a substantial number of small business entities, as defined by section 601(3) of the Regulatory Flexibility Act. A few cable television system operators will be affected by the proposed rule amendment. The Secretary shall send a copy of this Notice of Proposed Rule Making, including the certification, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Public Law No. 96-354, 94 Stat. 1164, 5 U.S.C. Section 601 *et seq.* (1981).

Ex Parte

6. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, provided they are disclosed as provided in the Commission's Rules. See *generally* 47 C.F.R. Sections 1.1202, 1.1203 and 1.1206(a).

Comment Dates

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, interested parties may file comments on or before January 18, 1994, and reply comments on or before February 2, 1994. All relevant and timely comments will be considered before final action is taken in this proceeding. To file formally in this proceeding, participants must file an original and four copies of all comment, reply comments, and supporting comments. If participants want each Commissioner to receive a personal copy of their comments, an original plus nine copies must be filed. Comments and reply comments should be sent to the Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (room 239) of the Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

8. Accordingly, this action is taken by the Chief, Mass Media Bureau, pursuant to authority delegated by § 0.283 of the Commission's Rules.

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 93–02; Notice 03]

RIN 2127–AF14

Federal Motor Vehicle Safety Standards; Compressed Natural Gas Fuel Containers

AGENCY: National Highway Traffic Safety Administration (NHTSA), Transportation (DOT).

ACTION: Supplemental notice of proposed rulemaking (SNPRM).

SUMMARY: This notice proposes to modify the agency's January 1993 proposal to establish a new Federal motor vehicle safety standard related to Compressed Natural Gas Fuel Containers. In its earlier notice, the agency proposed several requirements to ensure the safety of CNG containers including a burst requirement to evaluate the container's initial strength and its degradation over time. In this notice, the agency is proposing to pattern the burst requirement more closely on the American National Standards Institute's (ANSI) voluntary industry standard, known as NGV2. The agency's decision to seek comment on this alternative approach is prompted by the agency's consultation with other Federal agencies and its review of comments to the January proposal and other available information.

DATES: *Comments:* Comments on this notice must be received by the agency no later than January 28, 1994.

Proposed effective date: The standard would become effective six months after publication.

ADDRESSES: Comments on this notice should refer to the above docket and notice number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC 20590. Telephone: (202) 366–5267. Docket hours are 9:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Gary R. Woodford, NRM–01.01, Special Projects Staff, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202–366–4931).

SUPPLEMENTARY INFORMATION: On January 21, 1993, NHTSA published a notice of proposed rulemaking (NPRM) in which the agency proposed to establish a new Federal motor vehicle safety standard specifying performance requirements for vehicles fueled by compressed natural gas (CNG).[1] (58 FR 5323). The proposal was based on comments received in response to an advance notice of proposed rulemaking (ANPRM) published on October 12, 1990 and other available information (55 FR 41561). The NPRM was divided into two segments: (1) Vehicle requirements regarding the integrity of the entire vehicle fuel system, and (2) equipment requirements regarding the fuel containers[2] alone.

The agency's proposals regarding equipment requirements for CNG containers included a proposal that the CNG containers would be subject to a pressure cycling test to evaluate container durability and a burst test to evaluate the container's initial strength and its degradation over time. More specifically, NHTSA proposed with respect to the burst test that a CNG fuel container would have to withstand an internal hydrostatic pressure of 3.50 times the service pressure for 60 seconds, without any leakage or circumferential deformation over one percent. The multiple of the internal hydrostatic pressure, 3.50, is known as the safety factor. The agency tentatively concluded that the burst test, together with a pressure cycling test, would be sufficient to assure adequate levels of safety performance for both the strength and durability of CNG fuel containers used in motor vehicles.

Inclusion of a burst test with a safety factor in the proposal was based on ANSI/AGA–NGV2–1992 (NVG2), an industry standard promulgated by the Natural Gas Vehicle Coalition (NGVC) that has subsequently been approved by ANSI. NGV2 specifies several sets of detailed material and design requirements. For each set of those requirements, the standard specifies a unique safety factor for calculating the internal hydrostatic pressure that the tank must withstand. The safety factors range from 2.25 to 3.50, depending on the material and design involved. Thus, to satisfy this aspect of the standard, a container must meet both the material and design requirements as well as the burst test.

The agency did not propose adoption of the material and design requirements of NGV2. Instead, the agency proposed the single safety factor of 3.50 for all containers, regardless of their materials or design. It tentatively concluded that the factor would not impede technological development, yet would assure an acceptable level of safety for all containers.

CNG container manufacturers, CNG associates (NGVC and the American Gas Association (AGA)), utility companies, the American Automobile Manufacturers Association (AAMA) and other commenters addressed the issue of the safety factor. Most commenters disagreed with the agency's proposal to require that all containers meet a single safety factor.

NGVC, AGA, and the container manufacturers generally stated that they believed that the material and design of the fuel container must be taken into account in establishing an appropriate safety factor, if safe, cost-effective, and light-weight containers are to be produced. Establishing an overly high factor for a given combination of material and design could result in over-designed, heavy containers. They believed that some materials, such as fiberglass, need a higher safety factor because they degrade faster over time. In contrast, they stated that other materials such as steel or carbon composite maintain their strength for a longer time, and therefore containers made of those materials can be made with a lower safety factor.

Many of these commenters stated that the agency should adopt NGV2. NGVC and AGA believed that the NGVC voluntary standard provides a more appropriate level of safety, given the different container constructions, than the regulations proposed by NHTSA.

Two commenters said they believed that a single safety factor was appropriate. CNG Pittsburgh, a consulting firm, stated that a safety factor of 3.50 is conservative but reasonable for CNG fuel containers. AAMA stated that adopting NGV2's approach with various safety factors between 2.25 to 3.50 depending on the material and design involved would limit a manufacturer's choice of container designs and materials.

After reviewing the comments, NHTSA consulted with other Federal agencies knowledgeable about high pressure container technology, including the Department of Transportation's Research and Special Programs Administration (RSPA), the Department of Commerce's National Institute of Standards and Technology (NIST), and the National Aeronautics and Space Administration (NASA). From discussions with these agencies and analysis of comments to the NPRM, NHTSA has tentatively concluded that there are no procedures that could

[1] Natural gas is a vapor at standard temperature and pressure that is lighter than air. When used as a motor fuel, it is compressed in high pressure containers to increase the vehicle's driving range.

[2] Among the terms used to describe CNG fuel tanks are tanks, containers, cylinders, and high pressure vessels. The agency will refer to them as "containers" throughout this document.

adequately test a container's susceptibility to fatigue and degradation over time. Specifying a single safety factor would not protect in all instances against these problems since the strength of some containers is highly dependent on the specific material and method of design. Therefore, NHTSA is considering a burst test which links the use of particular designs and materials to compliance with safety factors tailored to those designs and materials, since it appears that this approach may be necessary to ensure the safe performance of pressure vessels used for fuel containers. The agency further notes that international standards addressing CNG fuel containers, including regulations of Transport Canada and those being drafted by the International Standards Organization (ISO) follow this practice; i.e., linking use of particular designs and materials with strength requirements suitable for those designs and materials.

Based on these considerations, NHTSA is requesting comment on the appropriateness of requiring CNG containers to meet design and material requirements, such as those specified in NGV2, and to meet safety factors tailored to those requirements. More specifically, the agency is considering NGV2's specifications of types of primary and reinforcement materials, construction methods and practices, container dimensions, composite reinforcement, and tests for yield strength, tensile strength, and material elongation (NGV2 1–5 a-e, 1–6 c-f, 1–7 a-e, 1–9 a and b, 1–12a, and 1–13 b1 and b2). The agency advises commenters to review NGV2 for specific information about these and other provisions that the agency may decide to include in the final rule.

NHTSA notes that by incorporating NGV2 material and design provisions in the FMVSS, the only way a container manufacturer could comply with the Federal standard would be with a container that uses those materials and designs specified in NGV2. To permit containers using other materials or designs not specified in NGV2, a manufacturer would have to petition NHTSA to amend the Federal standard. An alternative to the petition process would be for the Federal standard to specify a catch-all high end safety factor for any container whose design and materials are not specified in NGV2. While the agency is concerned whether inclusion of a high-end safety factor would be sufficient by itself to prevent the manufacture of containers using inferior designs or materials that degrade rapidly, it nevertheless requests comments about the appropriateness of such a catch-all provision. More generally, the agency requests comment about the effect of adopting NGV2 on future container technology.

Rulemaking Analyses

A. Executive Order 12866 (Federal Regulation) and DOT Regulatory Policies and Procedures

NHTSA has analyzed this supplemental proposal and determined that it is not "significant" within the meaning of Executive Order 12866 or the Department of Transportation regulatory policies and procedures. The agency believes that CNG container manufacturers already comply with NGV2. Thus, the estimates of potential regulatory impacts in the Preliminary Regulatory Evaluation remain valid. That evaluation has been placed in the docket for this rulemaking.

B. Regulatory Flexibility Act

NHTSA has also considered the effects of this rulemaking action under the Regulatory Flexibility Act. Based upon the discussion in the immediately preceding paragraph, I certify that this proposed rule would not have a significant economic impact on a substantial number of small entities.

C. Executive Order 12612 (Federalism)

NHTSA has analyzed this rulemaking action in accordance with the principles and criteria contained in Executive Order 12612. NHTSA has determined that the proposed rule would not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

D. National Environmental Policy Act

In accordance with the National Environmental Policy Act of 1969, NHTSA has considered the environmental impacts of this proposed rule. The agency has determined that this proposed rule, if adopted as a final rule, would not have any adverse impact on the quality of the human environment. On the contrary, because NHTSA anticipates that ensuring the safety of CNG vehicles would encourage their use, NHTSA believes that the proposed rule would yield positive environmental consequences because CNG burns cleaner than gasoline or diesel fuels. VII.

Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket at the above address. NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and NHTSA recommends that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50

Issued on December 22, 1993.

Barry Felrice,

Associate Administrator for Rulemaking

BILLING CODE 4910–59–M

VOL 58 ISS 248 DE 29 1993 UMI

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 215, 216, and 222

[Docket No. 930404-3104; I.D. 122193B]

RIN 0648-AD11

Protected Species Special Exception Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; notice of public briefing and extension of comment period.

SUMMARY: In response to several requests, NMFS will hold a second public briefing on a proposed rule to revise regulations for public display, scientific research, and enhancement permits. To enable interested persons that attend this briefing an opportunity to comment, the comment period on the proposed rule is extended by 2 weeks.

DATES: The public briefing on the proposed revised permit regulations will be held at 10 a.m., on January 7, 1994. Written comments on the proposed rule must be postmarked or received by January 28, 1994.

ADDRESSES: The briefing will be held in Building 9 Auditorium, NOAA Sand Point Facility, 7600 Sand Point Way N.E., Seattle, WA 98115. Written comments on the proposed rule should be mailed to the Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910. Clearly mark the outside of the envelop "Proposed Rule Comments." A copy of the proposed rule may be obtained by writing to the same address, or by sending a facsimile to Ann Terbush at (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Ann Hochman, Ann Terbush, or Art Jeffers at (301) 713-2289, or Brent Norberg at (206) 526-6140. If you need accommodations to attend the briefing, please call Ann Hochman on (301) 713-2289 (voice). People who are deaf or hearing impaired may place a call through the Maryland Relay Service on 1-800-735-2258.

SUPPLEMENTARY INFORMATION: The proposed rule was published in the Federal Register (58 FR 53320) on Thursday, October 14, 1993. Three public hearings and one public briefing were held on the proposed rule (58 FR 58680). The comment period was extended previously until January 14, 1994 (58 FR 64285).

BILLING CODE 3510-22-P

50 CFR Parts 672 and 675

Groundfish of the Gulf of Alaska; Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan and request for comments.

SUMMARY: NMFS issues this notice that the North Pacific Fishery Management Council (Council) has submitted Amendment 25 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI) for Secretarial review and is requesting comments from the public. Copies of the amendment may be obtained from the Council (see ADDRESSES).

DATES: Comments on the FMP amendment should be submitted on or before February 22, 1994.

ADDRESSES: Comments on the FMP amendment should be submitted to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, Alaska, 99802 (Attn: Lori Gravel).

Copies of the amendment and the environmental assessment/regulatory impact review prepared for the amendment are available from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, Alaska 99510 (telephone 907-271-2809).

FOR FURTHER INFORMATION CONTACT: Susan Salveson, National Marine Fisheries Service, Alaska Region, 907-586-7228.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to the Secretary of Commerce (Secretary) for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires that the Secretary, upon reviewing the plan or amendment, must immediately publish a notice that the plan or amendment is available for public review and comment. The Secretary will consider the public comments received during the comment period in determining whether to approve the plan or amendment.

Amendment 25 would eliminate the primary pacific halibut prohibited species catch (PSC) limit that, when reached, closes Bycatch Limitation Zones 1 and 2H of the Bering Sea.

A proposed rule to implement Amendment 25 has been submitted for Secretarial review and approval. The proposed rule also includes regulatory amendments that would (1) authorize the release of vessel specific observer data on bycatch of prohibited species, and (2) prohibit the discard of salmon taken as bycatch in the BSAI groundfish trawl fisheries until each salmon has been counted by a NMFS-certified observer.

List of Subjects in 50 CFR Part 675

Fisheries, Reporting and recordkeeping requirements.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 23, 1993.

Richard H. Schaefer,

Director of Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Notices

Federal Register

Vol. 58, No. 248

Wednesday, December 29, 1993

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 23, 1993.

The Department of Agriculture has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extension, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from:

Department Clearance Officer, USDA, OIRM, room 404-W Admin. Bldg., Washington, DC 20250, (202) 690-2118.

BILLING CODE 3410-01-M

Forest Service

Feather Fork Mine Development, Plumas National Forest; Intent to Prepare an Environmental Impact Statement

SUMMARY: The Department of Agriculture, Forest Service, will prepare an Environmental Impact Statement to disclose the environmental consequences of the proposed Feather Fork Mine development by Plumas Gold, USA, Inc. The project is located on the La Porte Ranger District, Plumas National Forest, Plumas County, California. The Feather Fork Mine is on both private and public lands, and is approximately 5 air miles northeast of the town of La Porte, California in Section 14, T. 22 N., R. 9 E, Mt. Diablo Meridian. The Forest Service invites written comments on this proposal. A full environmental analysis will be conducted. The Draft Environmental Impact Statement (DEIS) will be published in February 1994 and the Final Environmental Impact Statement (FEIS) will be available for review in May 1994.

DATE: Comments concerning the scope of analysis should be received in writing by January 14, 1994.

ADDRESSES: Submit written comments and suggestions to Charles W. Smay, District Ranger, PO Drawer 369, Challenge, CA 95925.

FOR FURTHER INFORMATION CONTACT: Michael A. Heath, Resource Officer, phone 916-675-2462. (The person who can answer most of the questions on the project).

SUPPLEMENTARY INFORMATION: The Plumas National Forest Land and Resource Management Plan provides direction for management of the project area located within Management Area 15, Little Grass. The Forest Plan has designated the area to be managed under the Timber Emphasis and Maximum Modification Prescriptions.

The project proposal is an underground gold mining operation submitted by Plumas Gold Mines USA, Inc. A new decline will be constructed to access the underground workings and transport ore to the surface. Gravels will be loaded by a road header onto trucks, much like a coal mining operation. This material will be stock piled for processing seven days a week. The gravels will be passed through a grizzly and onto a wash plant for sizing and washing. A jig and gold room will be used for the final concentration of gold. The mine life is 20 years at the design rate of 500 tons per day. Total tons to be mined is 3,600,000. Approximately 15-20 workers will be employed by Plumas Gold Mines, USA.

VOL 58 ISS 248 DE 29 1993 UMI

To maintain a 500 tons per day processing rate, winter access will be required by plowing snow over 10 miles of the main access road to the mine. A range of alternatives for this project will be considered, one of which would be a no action alternative. Other alternatives include various combinations of winter access to resolve conflicts with winter sport activities.

H. Wayne Thornton, Forest Supervisor, Plumas National Forest, Quincy, California, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). Some initial scoping and analysis has been completed for this proposed project. Major issues at this point include: (1) Conflict with other uses of the forest resources with "right to access" under the 1872 Mining Law, and (2) The mine site is located in a Protected Activity Area (PAC) for the California Spotted Owl.

The Forest Service will be seeking information, comments and assistance from federal, state agencies, local agencies, and other individuals and organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the DEIS. The scoping process includes:

1. Identifying potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e. direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.

The U.S. Forest Service is the Lead Agency. The Plumas County Planning Department has agreed to participate as a cooperating agency to evaluate impacts on both private and public lands that may exist in the proposed mining area.

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by January 1994. At that time EPA will publish a notice of availability of the DEIS in the **Federal Register**. The comment period on the DEIS will be 45 days from the date the Environmental Protection Agency's Notice of Availability appears in the **Federal Register**. To be most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions, *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the FEIS.

After the comment period for the DEIS ends, the comments received will be analyzed and considered by the Forest Service in preparation of the FEIS. The FEIS is scheduled to be completed by April 1994. In the FEIS the Forest Service is required to respond to comments received (40 CFR 1503.4). The responsible official will consider comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR part 217.

Dated: December 2, 1993.

Calvin Bird,

Acting Forest Supervisor.

[FR Doc. 93-31856 Filed 12-28-93; 8:45 am]

BILLING CODE 3410-11-M

Rural Electrification Administration

Western Farmers Electric Cooperative; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA) has made a Finding of No Significant Impact (FONSI) with respect to the potential environmental impacts resulting from a project proposed by Western Farmers Electric Cooperative (Western Farmers), of Anadarko, Oklahoma. The proposed project consists of the construction of approximately 32.0 miles of 138 kV transmission line and associated facilities in Pittsburg and Latimer Counties, Oklahoma.

REA has concluded that the environmental impacts from the proposed project would not be significant and that the proposed action is not a major Federal action significantly affecting the quality of the human environment. Therefore, the preparation of an environmental impact statement is not required.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Wolfe, Chief, Environmental Compliance Branch, Electric Staff Division, REA, Agriculture South Building, Washington, DC 20250, telephone (202) 720-1784.

SUPPLEMENTARY INFORMATION: REA, in accordance with its environmental policies and procedures, required that Western Farmers prepare a Borrower's Environmental Report (BER) reflecting the potential impacts of the proposed facilities. The BER, which includes input from the Federal, State, and local agencies, has been adopted as REA's Environmental Assessment for the project in accordance with 7 CFR 1794.61. REA has concluded that the BER represents an accurate assessment of the environmental impacts of the project. The proposed project should have no impact on cultural resources, floodplains, wetlands, water quality and Federally listed or proposed for listing threatened or endangered species or their critical habitat. Approximately 2.4 acres of prime farmland will be impacted by the proposed Manning Substation.

The proposed transmission line will tap Western Farmers' existing Tupelo-Lone Oak Transmission Line at a site approximately 1.5 miles north of Hartshorne, Oklahoma. The line will extend approximately 15.0 miles east to the proposed Manning Substation site located approximately 2.0 miles southwest of the town of Wilburton. The line would then continue east approximately 17.0 miles to the new Red Oak Substation site located approximately 4.0 miles southwest of the town of Red Oak.

Alternatives considered to the project as proposed were no action, purchase of power from Oklahoma Gas and Electric, renewal of existing contracts for substation use and wheeling of power with Public Service of Oklahoma, and alternative routes. REA has considered these alternatives and concluded that the project as proposed meets the present and future engineering and economic needs of Western Farmers and its member systems.

Copies of the BER and FONSI are available for review at REA at the aforementioned address, or can be reviewed at or obtained from the offices of Western Farmers, 710 NE 7th Street, Anadarko, Oklahoma 73005.

Dated: December 22, 1993.

Wally Beyer,

Administrator.

BILLING CODE 3410-15-P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Florida Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Florida Advisory Committee to the Commission will Convene at 1 p.m. and adjourn at 5 p.m. on Wednesday, January 26, 1994, at the Sheraton River House, 3900 NW. 21st Street (1/4 mile from the Miami International Airport), Miami, Florida 33142. The purpose of the meeting is to discuss the status of the Commission, SACs, 1994 appropriations, and staff and Commissioner appointments; discuss and update the current project, "Racial and Ethnic Tensions in Florida," and to discuss civil rights developments in the State.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairpersen Bradford Brown, 305-361-4284, or Bobby D. Doctor, Director of the Southern Regional Office, 404-730-2476 (TDD 404-730-2481). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, December 17, 1993.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

BILLING CODE 6335-01-P

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration (BXA).
Title: Request for Amendment Action.
Agency Form Number: BXA-685P.
OMB Control Number: 0694-0007.
Type of Request: Extension of the expiration date of a currently approved collection.
Burden: 224 hours.
Number of Respondents: 840.
Avg Hours Per Response: 15 minutes for form; 1 minute for recordkeeping.
Needs and Uses: This requirement permits U.S. exporters of controlled goods to amend their outstanding export licenses. The amendment, if approved by BXA, allows the exporter to make the changes in lieu of applying for a new license.
Affected Public: Businesses or other for-profit institutions, small businesses or organizations.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: Gary Waxman, (202) 395-7340.

Agency: Bureau of Export Administration (BXA).
Title: Notification of Delivery Verification Requirement.
Agency Form Number: BXA-648P.
OMB Approval Number: 0694-0008.
Type of Request: Extension of the expiration date of a currently approved collection.
Burden: 6 hours.
Number of Respondents: 11.
Avg Hours Per Response: 30 minutes.
Needs and Uses: In order to increase the effectiveness of export controls on international trade in strategic commodities, COCOM and other countries participate in the Import Certificate/Delivery Verification procedure. This clearance request is for the form used to notify U.S. exporters that they must require from their foreign consignee a certification that the commodities exported were actually delivered to the foreign consignee.
Affected Public: Businesses or other for-profit institutions, small businesses or organizations.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: Gary Waxman, (202) 395-7340.

Agency: Bureau of Export Administration (BXA).
Title: Recordkeeping Requirements Under General License GLOG.
Agency Form Number: No form number but requirements can be found at Section 771.7(b) of the Export Administration Regulations.
OMB Approval Number: 0694-0065.
Type of Request: Extension of the expiration date of a currently approved collection.
Burden: 50 hours.
Number of Recordkeepers: 50.
Avg Hours Per Recordkeeper: 1 hour.
Needs and Uses: BXA needs information to be maintained for the record to ensure that unprocessed western red cedar being exported is not harvested from public lands and therefore not subject to short supply regulations. These records are subject to audit.
Affected Public: Businesses or other for-profit institutions, small businesses or organizations.
Frequency: Recordkeeping.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: Gary Waxman, (202) 395-7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title of Survey: Marine Mammal Takings (Stranding Reports).
Agency Form Number: None assigned.
OMB Approval Number: 0648-0178.
Type of Request: Revision of a currently approved collection.
Burden: 1,333 hours.
Number of Respondents: 650.
Avg Hours Per Response: 20 minutes.
Needs and Uses: Marine mammal stranding reports provide baseline information on marine mammal mortalities, human interactions, and population dynamics. The agency uses the information to fulfill its management responsibilities under the Marine Mammal Protection Act. The information is submitted primarily by volunteer members of the marine mammal stranding networks.
Affected Public: Individuals, state or local governments, federal agencies or employees, and non-profit institutions.
Frequency: On occasion — as strandings occur.
Respondent's Obligation: Mandatory.
OMB Desk Officer: Don Arbuckle, (202) 395-7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title: Cooperative Game Fish Tagging Report.
Agency Form Numbers: NOAA 88-162 and 88-163.
OMB Approval Number: 0648-0247.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 360 hours.

Number of Respondents: 2,000.

Avg Hours Per Response: 2 minutes.

Needs and Uses: The Cooperative Marine Game Fish Tagging Program began in the Southeast Region in 1971. Data are needed to determine migratory patterns, distance traveled, stock boundaries, age, and growth of billfish and other recreational and commercially valued species. Anglers volunteer to participate in the program. Resulting analyses are used to develop fishery management plans.

Affected Public: Individuals.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Copies of the above information collection proposals can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to Gary Waxman or Don Arbuckle, as appropriate, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated: December 22, 1993.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 93–31839 Filed 12–28–93; 8:45 am]

BILLING CODE 3510–CW–F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: 1996 Pretests for the Survey of Income and Program Participation (SIPP) Redesign.

Form Number(s): Control, Core and Topical Modules In An Automated Instrument, and Reminder Card.

Agency Approval Number: None.

Type of Request: New collection.

Burden: 840 hours.

Number of Respondents: 840.

Avg Hours Per Response: 30 minutes.

Needs and Uses: The 1996 Pretests are part of a program of evaluation and development emerging from a comprehensive reassessment of the SIPP. The SIPP redesign is an evolving process that has multiple developmental and testing stages. Full implementation of the SIPP redesign is scheduled for February 1996. This clearance request is to accommodate pretests using a newly designed automated survey instrument. The pretests will involve two waves of interviews. The persons interviewed in Wave 1 will be interviewed again 4 months later in Wave 2. Objectives of the pretests are: to evaluate the total integration of the automated instrument; to observe field interviewing techniques through laptop management application; to assess the case management system's ability to assign, accept, and transfer cases; and to test closeout activities and post–closeout data preparations. Pretest interviewing will take place between April and September 1994.

Affected Public: Individuals or households.

Frequency: Twice during 1994.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 23, 1993.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

International Trade Administration

[A–533–809]

Notice of Final Determination of Sales at Less Than Fair Value: Certain Forged Stainless Steel Flanges from India

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: Mary Jenkins or Brian Smith, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 482–1756 or (202) 482–1766, respectively.

FINAL DETERMINATION: The Department of Commerce (the Department) determines that certain forged stainless steel flanges (flanges) from India are being, or likely to be, sold in the United States at less than fair value, as provided in Section 735 of the Tariff Act of 1930, as amended (the Act). We also determine that critical circumstances exist for Mukand Ltd. (Mukand), Sunstar Metals Ltd. (Sunstar), Bombay Forgings Pvt. Ltd. (Bombay Forgings) Dynaforge and for all other manufacturers, producers or exporters of subject merchandise. Further, we determine that critical circumstance do not exist for Akai Impex Ltd. (Akai). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the notice of the preliminary determination on July 29, 1993, (58 FR 41713 (August 5, 1993)), the following events have occurred. On August 2, 1993, Akai, one of the respondents in this investigation, submitted its response to the Department's deficiency letter regarding U.S. sales data.

On August 6, 1993, Akai requested a postponement of the final determination. We granted Akai's request and on August 11, 1993, we postponed the final determination until not later than December 20, 1993 (58 FR 44493 (August 23, 1993)).

On August 10, 1993, Akai requested a hearing. On August 13, 1993, Mukand, another respondent, also requested a hearing. However, both respondents withdrew their request prior to the scheduled hearing date.

On August 11, 1993, we received Akai's response to information requested by the Department concerning the production of subject merchandise sold during the period of investigation (POI).

On August 25, 1993, we received Akai's response to the Department's supplemental deficiency questionnaire regarding sales and cost data.

On August 30, 1993, Mukand submitted its case brief. Also on August 30, 1993, we received cost questionnaire responses from Forshas Forgings Pvt. Ltd. (Forshas) and Echjay Forgings Pvt Ltd, (Echjay), two unrelated companies to whom Akai subcontracted a portion of its production of flanges. On August 31, 1993, we received a cost response from M.K. Engineers, another of Akai's unrelated subcontractors. However, these submissions were not filed in accordance with 19 CFR 353.31 and 353.32. Therefore, we returned these submissions and allowed these companies to resubmit their responses by no later than September 17, 1993. All three companies refiled their Section D

The petitions were submitted pursuant to section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Trade Adjustment Assistance Division, room 7023, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: December 22, 1993.

Pedro R. Garza,

Deputy Assistant Secretary for Program Operations.

[FR Doc. 93–31840 Filed 12–28–93; 8:45 am]

BILLING CODE 3510–DS–M

VOL 58 ISS 248 DEC 29 1993 UMI

submissions within the prescribed deadline.

On September 15, 1993, we requested further information and clarification of the cost responses submitted by Echjay, Forshas and M.K. Engineers. On September 22, 1993, we received a response from Echjay. We did not receive response from either Forshas or M.K. Engineers.

On September 23, 1993, we advised Akai that there were discrepancies in its total volume and values reported in its previous response. On the same day, Akai submitted revised statistics for its sales exported to the United States during the period January 1991 to July 1993, a revised U.S. sales listing, and its audited balance sheet for the year ending March 31, 1993.

From October 4 through October 13, 1993, we verified the questionnaire responses submitted by Akai, Echjay and Forshas and M.K. Engineers. On October 18, 1993, we received comments from Echjay concerning our method of determining the "all other" rate.

We received case briefs from petitioners and Akai on November 17, 1993. We received rebuttal briefs from petitioners and Akai on November 21, 1993.

On November 22, 1993, petitioners alleged that both Akai and Mukand were planning to circumvent the upcoming antidumping duty order, should one be issued. On December 8, 1993, Gerlin, Inc., one of the petitioners in this investigation, also submitted a letter to the Department concerning possible circumvention of the potential antidumping duty order. Since this information was received too late to be addressed in this investigation pursuant to CFR 353.31(a)(l)(i), we have forwarded this information to the office of Antidumping Compliance for consideration.

Scope of Investigation

The products covered by this investigation are certain forged stainless steel flanges, both finished and not-finished, generally manufactured to specification ASTM A–182, and made in alloys such as 304, 304L, 316, and 316L. The scope includes five general types of flanges. They are weld neck, (used for butt-weld line connections), threaded, (used for threaded line connections), slip-on & lap joint, (used with stub ends/butt-weld line connections), socket weld, (used to fit pipe into a machined recession), and blind, (used to seal off a line). The sizes of the flanges within the scope range generally from one to six inches; however, all sizes of the above described merchandise are included in the scope. Specifically excluded from the scope of this investigation are cast stainless steel flanges. Cast stainless steel flanges generally are manufactured to specification ASTM A–351. The flanges subject to this investigation are currently classifiable under subheading 7307.21.1000 and 7307.21.5000 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of this investigation remains dispositive.

Period of Investigation

The POI is July 1, 1992, through December 31, 1992.

Such or Similar Comparisons

We have determined that the product covered by this investigation constitutes a single category of such or similar merchandise.

Fair Value Comparisons

To determine whether sales of flanges from India to the United States were made at less than fair value, we compared the United States Price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

Bombay Forgings and Dynaforge

As discussed in detail in our preliminary determination, as best information available (BIA), we are assigning Bombay Forgings and Dynaforge the highest rate in the petition. These two companies failed to respond to our mini-Section A antidumping questionnaire.

Mukand and Sunstar

As discussed in detail in our preliminary determination, as BIA we are also assigning Mukand and Sunstar the highest rate in the petition. We determined that these two companies significantly impeded our proceeding. (See Comment 2 in the "Interested Party Comments" Section of this notice for further discussion.)

Akai

United States Price

For Akai, we based USP on purchase price, in accordance with section 772(b) of the Act, because the subject merchandise was sold to unrelated purchasers in the United States prior to importation. We calculated purchase price based on packed, CIF (*i.e.*, cost, marine insurance and freight) prices to unrelated customers. We corrected Akai's data for minor errors and omissions found at verification. We made deductions for ocean freight, marine insurance and containerization, which included foreign inland freight, in accordance with section 772(d)(2) of the Act. Regarding marine insurance, we determined that Akai incorrectly reported these expenses for a significant number of transactions. Accordingly, we have based the deductions for these expenses on BIA. As BIA, we used the highest verified percentage of gross unit price represented by this expense and applied this percentage to all of Akai's sales transactions. (See Comment 5.)

Foreign Market Value

We have used constructed value (CV) to calculate FMV for Akai because Akai does not have sales in the home market or sales to third countries.

We have determined that Akai is the producer in this investigation because Akai controls the costs for all elements incorporated in the manufacture of the subject merchandise. (See final concurrence memorandum dated December 20, 1993, for a detailed analysis of our decision. (See also Comment 1.)

We relied on the CV submitted data, except in the following instances where the costs were not approximately quantified or valued:

1. Since Akai had incorrectly applied its packing cost calculation methodology to more than 45 percent of the transactions examined, as BIA, we recomputed packing costs using the highest verified percentage of gross unit price represented by this expense (See Comment 5);
2. We increased general and administrative expenses (G&A) to account for depreciation expense on administrative fixed assets (See Comment 14);
3. We increased the cost of manufacturing (COM) by the weighted-average variance noted at verification from sampled cost of manufacturing components (See Comment 11);
4. We included quality control costs incurred during the POI in the COM (See Comment 13);
5. For product codes with duplicate costs, we used the highest value reported for each product code, as BIA;
6. For one product code with an aberrational material cost, we used the reported material cost for the most similar flange; and
7. For those product codes for which we did not have product specific CV, as BIA, we applied the highest margin otherwise calculated for Akai to those sales transactions.

In accordance with section 773(e)(1) of the Act, we included in CV Akai's cost of materials and fabrication based on Akai's acquisition prices from its subcontractors for the manufacturing of subject merchandise. We also included the greater of (1) Akai's reported general expenses or (2) the statutory minimum of ten percent of COM. For profit, we used the statutory minimum of eight percent of the sum of COM and general expenses because Akai had no home market or third country sales. We also used U.S. selling expenses (direct and indirect) as a surrogate for home market class or kind selling expenses because Akai had no home market or third country sales.

Before comparing USP to CV, we corrected Akai's data for minor errors and omissions found at verification. We reclassified Akai's export expenses, bank charges and export credit guaranty corporation (ECGC) commissions, reported in Akai's cost responses but not separately identified in its U.S. sales listings, as direct selling expenses. (See Comment 6.) We also recalculated credit expenses, using the revised payment dates noted at verification. (See Comment 8.) We then made circumstance of sale adjustments, where appropriate, for credit, bank charges, ECGC commissions, stamp fees and export expenses. We added packing to the FMV.

Currency Conversion

Because certified daily exchange rates from the Federal Reserve were unavailable, we made currency conversions based on the official quarterly exchange rates in effect on the dates of the U.S. sales as certified by the U.S. Treasury.

Verification

As provided in section 776(b) of the Act, we verified information provided by Akai and its subcontractors by using standard verification procedures, including the examination of relevant sales and financial records, and selection of original source documentation containing relevant information.

Critical Circumstances

Petitioners allege that "critical circumstances" exist with respect to imports of the subject merchandise from India. Section 735(a)(3) of the Act provides that critical circumstances exist if:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

(B) There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Under 19 CFR 353.16(f), we normally consider the following factors in determining whether imports have been massive over a short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

In determining knowledge of dumping, we normally consider margins of 15 percent or more sufficient to impute knowledge of dumping under section 735(a)(3)(A)(ii) for exporters sales price sales, and margins of 25 percent or more for purchase price sales. (See, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy, 52 FR 24198, (June 29, 1987)).

For purposes of determining whether critical circumstances exist, we have determined that there is no history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of this investigation. Moreover, because the final margin for Akai is less than 25 percent, we determine in accordance with section 735(a)(3)(A)(ii) of the Act that knowledge of dumping does not exist for that company. Regarding massive imports, we determine that Akai had massive imports during the POI, based on the above criteria. However, because neither history nor knowledge of dumping exists for Akai, we determine that critical circumstances do not exist for Akai.

Regarding Mukand, Sunstar, Bombay Forgings, and Dynaforge, since the final margins for those companies are over 25 percent, we determine that knowledge of dumping exists, in accordance with section 735(a)(3)(A)(ii) of the Act. Furthermore, as BIA for these companies, we are making the adverse assumption that imports were massive over a relatively short period of time in accordance with section 735(A)(3)(B) of the Act. Based on this analysis, we determine that critical circumstances exist for imports of flanges from India for Mukand, Sunstar, Bombay Forgings and Dynaforge.

With respect to the firms covered by the "all others" rate, because the final margin exceeds 25 percent, we determine in accordance with section 735(a)(3)(A)(ii) of the Act that knowledge of dumping exists. Also, because we have determined that Akai and all other companies assigned a margin in this investigation had massive imports during the POI, we are also determining that massive imports exist for "all other" manufacturers, producers or exporters of subject merchandise. Therefore, we determine that critical circumstances exist for "all other" manufacturers, producers or exporters of subject merchandise.

Interested Party Comments

Comment 1

Petitioners contend that Akai is not the proper respondent in this case because Akai cannot be considered the manufacturer, insofar as Akai does not own any of the machines used in the manufacturing or finishing of the subject merchandise, did not direct or control the production of the subject merchandise during the POI, and could not demonstrate at verification that it purchased all the raw materials used by its subcontractors. Therefore, petitioners contend that Akai's costs and financial data cannot be used in any margin calculation. Petitioners further state that the facts in this case are almost identical to those in Sweaters Wholly or in Chief Weight of Man-Made Fiber from Taiwan; Final Results of Changed Circumstances Antidumping Administrative Review, 58 Fed. Reg. 32644 (June 11, 1993) ("MMF Sweaters"), where the Department found that the respondent (Jia Farn) was not a producer, but was simply reselling merchandise made by other manufacturers.

Akai argues that it is the producer of the subject merchandise insofar as it purchases and delivers the raw materials to subcontractors, controls the production and inspection of the end products, and owns the machines which were used for the finishing of flanges at its related party. Akai also states that at a minimum, it is an appropriate respondent as a reseller.

DOC Position

We disagree with petitioners that Akai is not the producer of the subject merchandise under investigation. Based on the facts set forth below, we have determined that Akai is the producer of this merchandise and, consequently, its costs are the appropriate basis for CV.

In this investigation, the Department is basing FMV on CV. Under section 773(e)(1) of the Act, as well as 19 CFR 353.50(a), the Department is required, in calculating CV, to determine the sum of the costs for materials, fabrication, and packing, as well as general expenses and profit. The Department is required to capture all the costs involved in the

production of the subject merchandise, and must therefore look to the company that controls the costs of production of the merchandise.

We verified that Akai purchases and maintains title (during the entire course of production) to the raw materials used for the production of the vast majority of the flanges, and that Akai directs and controls the manufacturing process insofar as it determines the quantity, size, and type of flanges to be produced. Accordingly, for the vast majority of the flanges produced and sold during the POI, we have determined that Akai controls the costs for all elements incorporated in the production of the flanges.

For a small percentage of the flanges produced and sold in the POI, Akai purchased completed rough flanges from unrelated producers. Some of these rough forgings were forwarded to machining shops for further manufacturing prior to shipment to the United States. We are using Akai's acquisition price to these unrelated forgers in constructing a value for the manufacture of these forgings. We are also using Akai's acquisition price for the small quantity of rough and machined flanges purchased from its wholly-owned related company. Ideally, we would use the costs of those manufacturers in calculating CV for those rough flanges sent to the United States without further manufacturing However, all of the flanges are essentially fungible, and it is not possible to separate the sales of those flanges from the rest of the sales. On the basis of the information available, it is reasonable, in the context of calculating the estimated dumping margin in this investigation, to use Akai's acquisition cost for this comparatively small number of flanges.

We also disagree with petitioners regarding MMF Sweaters. This case is readily distinguishable from MMF Sweaters in that Jia Farn could not show that it bought the raw materials used to produce the subject merchandise, directed or controlled the process of manufacture or production, or performed any processing on the subject of merchandise Akai, on the other hand, performs all of these functions with respect to most of its sales of flanges.

Comment 2

Mukand argues that both the Department's termination of the investigation with respect to Mukand and the continued application of the most adverse BIA rate to that company is inappropriate. Mukand asserts that the antidumping law is intended to be remedial, rather than punitive, in nature. Accordingly, Mukand contends that the Department's refusal to consider Mukand's data achieves none of the goals intended by the antidumping law.

Moreover, Mukand contends that it did not seriously impede the proceeding (the basis cited by the Department for using BIA), in that once Mukand became aware of the inconsistencies in its responses, it took all the necessary steps to correct the problem. Mukand asserts that, by assigning it the highest rate in the petition, the Department is effectively ignoring the numerous timely submissions made by Mukand, as well as the remedial actions taken by the company after the difficulties were identified.

According to Mukand, the Department should reconsider its position and use Mukand's actual data in the final determination. Alternatively, Mukand argues that, in the event that the Department determines that BIA is justified, the Department should apply a less adverse BIA rate because it "substantially cooperated" in the investigation.

DOC Position

In a June 22, 1993, memorandum to Barbara R. Stafford, Deputy Assistant Secretary for Investigations, we determined that Mukand and Sunstar, by their submissions of misleading and contradictory information, had significantly impeded this investigation. Section 776(c) of the Tariff Act of 1930, as amended, provides that whenever a party significantly impedes an investigation, the Department shall use BIA. We determined that, as evidenced by their submissions, respondents had misled the Department as to their business relationship and selling products. This information was critical to our analysis, and, without credible information, we were unable to proceed with the investigation. Accordingly, because Mukand and Sunstar have significantly impeded the Department's antidumping duty investigation, the statute requires the application of BIA. As BIA we used the highest margin contained in the petition.

Comment 3

Petitioners argue that Echjay and Forshas knew that the merchandise they were manufacturing for Akai was destined for the United States. Petitioners state that this is a critical point because the fact that these manufacturers knew the goods were to be exported must be taken into account by the Department in its determination of who the appropriate producer, and therefore respondent, is in this investigation. Specifically, petitioners cite Antifriction Bearings (Other Than Taper Roller Bearings) and Parts Thereof From France: et al; Final Results of Antidumping Duty Administrative Reviews (57 FR 28360, June 24, 1992), where the Department terminated its review of a reseller of antifriction bearings on the grounds that the reseller's suppliers had knowledge at the time they sold their merchandise to the reseller that those sales were destined for the United States. Petitioners note that in that review the Department reasoned that the suppliers were effectively acting as exporters, and, as such, the Department determined that it must use the pricing structure of the suppliers (rather than the resellers) to measure dumping activity. Petitioners contend that the fact pattern in the instant investigation is directly analogous, because Echjay and Forshas knew that the flanges in question were destined for the United States. Consequently, petitioners argue that Akai's U.S. prices are not relevant and that the Department should terminate its investigation of Akai

DOC Position

We disagree. In this case, the Department has determined that Akai is the producer of the merchandise under investigation and, consequently, is the appropriate respondent. (See Comment 1, above.) Therefore, it is irrelevant whether the subcontractors to which Akai paid an acquisition fee for processing its raw material knew the ultimate destination of the end product.

Comment 4

Akai argues that, in contrast to the data available at the preliminary determination, the Department now has sufficient information with which to calculate its dumping margin. Akai notes that the Department verified the fundamental data in Akai's submissions and that, in those cases where the Department found discrepancies at verification, either they involved minor adjustments or the Department was able to obtain the data to make the necessary corrections.

Petitioners disagree, stating that, not only is Akai not the proper respondent in this investigation, but also the errors and omissions discovered at verification were so significant that their correction would result in an entirely new response. Moreover, petitioners maintain that the information collected at verification was "new information" and that the Department is prohibited from using it under § 353.31 of the Department's regulations because it is untimely

DOC Position

We agree with Akai. Although at verification we found errors in the calculation of certain of Akai's expenses, the errors were not so significant as to call into question the fundamental integrity of Akai's response. Moreover, contrary to petitioners assertions, we did not accept "new information" at verification. Rather, we found that Akai failed to report certain direct selling expenses in its U.S. sales listing. This information, however, was on the record prior to verification as part of the Section D response. Accordingly, we have accepted Akai's response for purposes of the final determination.

Comment 5

Petitioners argue that Akai incorrectly reported its packing and marine insurance expenses in a significant number of instances. Regarding packing, petitioners assert that the Department sampled the packing material expenses reported and found that Akai had incorrectly applied its calculation methodology in over 45 percent of the cases. Moreover, petitioners assert that Akai completely failed to report packing labor expenses. Regarding marine insurance, petitioners contend that Akai incorrectly reported these expenses for over 66 percent of the transactions examined at verification. Furthermore, petitioners maintain that Akai incorrectly allocated these expenses to specific transactions in its sales listing using volume, rather than value.

Akai argues that its packing expenses were neither systematically under- or over-stated. Akai further maintains that these expenses represent an insignificant part of total cost. Accordingly, Akai contends that, if the Department uses BIA to determined the amount of these expenses for purposes of the final determination, it should use the average expense reported.

DOC Position

We agree with petitioners that Akai incorrectly reported its packing material charges and marine insurance. Because of the significant number of transactions involved, as BIA, we have used the highest verified expense factors (*i.e.*, the expense expressed as a percentage of unit price) for packing and marine insurance and applied them to all of Akai's sales transactions.

We disagree with petitioners regarding packing labor. At verification we noted Akai's related party, which is responsible for packing the merchandise for export, had no employees dedicated to its packing operations and had no packing labor costs separately identified in its accounting system. Thus, we found that any packing labor costs were likely to be negligible. Company officials stated that whatever incidental labor cost was incurred by the related party would be charged to Akai as part of the transfer price to Akai. Thus, we find that neither Akai nor its related party had any non-negligible or measurable packing labor cost and we find that the use of BIA is not warranted.

Comment 6

Petitioners argue that Akai failed to report bank charges and commissions, although the Department found at verification that Akai incurred them on each transaction reported in its U.S. sales listing.

DOC Position

We agree that Akai did not report its bank charges and commissions in its U.S. sales listing. However, contrary to petitioners' assertion, we noted at verification that Akai reported these charges as part of its cost response. Thus, Akai mistakenly misreported these expenses, rather than not reporting tham at all. Because we typically consider these expenses to be direct selling expenses, we have reclassified them as such for purposes of the final determination. Accordingly, we calculated transaction-specific expenses for each of Akai's U.S. sales, using the data examined at verification. We then made the appropriate circumstances of sale adjustments to FMV to account for these charges.

Comment 7

Petitioners argue that Akai did not report the proper gross unit price in its U.S. sales database because it failed to account for exchange rate gains and loss. Petitioners contend that the prices for 100 percent of the sales reported do not represent the actual payment received by Akai. Therefore, they argue that these prices should not be used for purposes of the final determination.

According to Akai, however, the Department verified that it reported the correct transaction prices. Akai notes that the sales verification report states that there were "no discrepancies found in the amounts recorded in Akai's sales register and the amounts shown on Akai's final invoices received from the bank."

DOC Position

We disagree with petitioners that Akai should have reported exchange gains or losses in its U.S. sales. The Department's practice is not, and has never been, to require respondents to report this type of adjustment. Moreover, the Department's questionnaire instructs respondents to report sales prices in the currency in which the sales are made. We determined at verification that Akai had accurately reported its U.S. sales prices in accordance with the questionnaire instructions (*i.e.*, in U.S. dollars because this is the currency in which Akai invoices its U.S. customers.) Accordingly, we have used these prices for purposes of the final determination.

Comment 8

Petitioners argue that the Department found at verification that Akai incorrectly reported its credit expenses, date of payment and direct and indirect selling expenses. Petitioners contend that the Department should not correct any of these discrepancies because collectively they are so extensive that correcting them would result in the creation of a significantly different questionnaire response.

DOC Position

We disagree, in part. We found at verification that Akai did misreport its payment period and direct and indirect selling expenses. However, we disagree that these errors are so egregious that correcting them would result in the creation of a new response. Accordingly, we have corrected these errors for purposes of the final determination, based on our findings at verification.

Comment 9

Echjay argues that it should be assigned the same dumping margin as Akai, rather than the "all others" rate. According to Echjay, Akai's rate is appropriate because Echjay's cost data forms the basis for Akai's margin. Echjay further notes that it cooperated fully in this investigation because it responded to each of the Department's request for information.

Petitioners maintain that the Department should apply the all other rate to all of Akai's subcontractors (including Echjay), because the Department does not have the information necessary to calculate company-specific margins for these companies for purposes of the final determination. Petitioner's further argue that the all other rate is also appropriate for Akai, because Akai is not the appropriate respondent in this investigation. (See Comment 1, above.) As the all other rate, petitioners assert that the Department should use the average of the margins contained in the petition. Petitioners reason that this is

VOL 58 ISS 248 DE 29 1993 UMI

VOL 58 ISS 248 DE 29 1993 UMI

the appropriate rate because, given the circumstances surrounding the application of adverse BIA to Mukand, it would be unfair to penalize other exporters for the behavior of an unrelated company

DOC Position

We disagree with Echjay. It is the Department's practice to assign the "all others" rate to companies who have not submitted responses to the Department's sales questionnaire. Absent a full questionnaire response, the Department does not have sufficient data with which to calculate a company-specific margin. While Echjay provided selected cost data, it elected not to provide data on its selling practices (*i.e.*, it chose not to submit a voluntary response). Consequently, we do not have any data upon which we could base USP for Echjay. We also note that the purpose of verification is not to collect such data. We disagree with Echjay that we could use Akai's data for this purpose as there is no evidence on the record that these data are representative of Echjay's selling practices. Accordingly, we have not assigned Echjay the same rate as Akai.

With regard to petitioners' argument that the Department should calculate the all other rate based on the average of the margins provided in the petition, we also disagree. It is the Department's practice to calculate the all other rate based on the margins assigned to the companies under investigation. Consequently, we calculated the all other rate in this case in accordance with our standard practice.

Comment 10

Petitioners claim that (1) Akai did not provide evidence that they used domestic raw materials for manufacturing the subject merchandise during the POI; (2) information on the record implies that Akai received less than the actual International Price Reimbursement Scheme (IPRS) claims submitted to the government; and (2) it was unclear whether the reimbursements received several months after the POI were earned on production during the POI. Accordingly, petitioners argue that the Department should disallow Akai's IPRS rebates entirely.

Akai argues that supporting documentation provided at verification demonstrated that domestic raw materials were purchased and used to manufacture the subject merchandise during that POI.

DOC Position

We disagree with petitioners. At verification, we determined that all raw materials used in manufacturing the subject merchandise were purchased from unrelated Indian suppliers. Since Akai sold the subject merchandise exclusively to the United States and because Akai used only domestic raw materials, all raw material inputs qualified under the IPRS government program.

The record clearly demonstrates that Akai was entitled to the reimbursement, that the total claim was approved by the Indian Government and Akai was in the process of collecting on these receivables. Even though the government reimbursements were received subsequent to the POI, the total reimbursement claim revenue reported during the POI was properly used to match revenue with the related raw material expenses incurred. Therefore, we have not disallowed these rebates for purposes of the final determination.

Comment 11

Based upon the results of a random sample taken at verification, petitioners claim Akai understated its COM. Consequently, petitioners argue that the Department should assume that all reported costs were understated by the largest variance determined from the random sample and should increase Akai's cost accordingly.

Akai states that the Department has sufficient data to make the cost adjustments deemed necessary

DOC Position

We disagree with petitioners. The largest variance accounts for one error, whereas the weighted-average adjustment represents all understatement errors in the sample. Therefore, Akai's COM was increased by the weighted-average of all understated COM variances found in the sample.

Comment 12

Petitioners argue Akai incorrectly reported its U.S. profit on a product-specific basis.

DOC Position

We agree. Under 18 CFR 353.50 (a)(2), the Department is required to use the profit on the class or kind of merchandise sold in the home market in calculating CV. Since there were no home market or third country sales, the statutory minimum profit of eight percent was applied.

Comment 13

Petitioners state that Akai incorrectly reported its quality controls costs as direct selling expenses, rather than including them in the COM.

Akai states that the Department has sufficient data to make any adjustments deemed necessary.

DOC Positions

We agree with petitioners. Quality control costs are considered a cost of manufacturing. Additionally, there is no information on the record to support that this testing was a condition of sale Therefore, we increased COM by the amount of quality control costs as a percent of the revised COM excluding this adjustment, and reduced direct selling expenses accordingly

Comment 14

Petitioners maintain that Akai incorrectly reported G&A costs by excluding depreciation expenses.

Akai states the Department has sufficient data to make the adjustment deemed necessary.

DOC Position

We agree with petitioners that depreciation expense on administrative fixed assets should be included in the reported G&A costs. Accordingly, we increased the submitted G&A by the amount of depreciation expenses reported in Akai's 1993 financial statement

Comment 15

Petitioners contend that Akai underreported its raw material costs by failing to report commissions and brokerage charges

DOC Position

We disagree. During the cost verification we saw no evidence that Akai incurred commission and brokerage charges on raw materials. Consequently, we have made no adjustment for these charges for purposes of this final determination

Comment 16

Petitioners contend that the Department cannot rely on the information submitted by Akai's subcontractors because if found pervasive deficiencies in this information at verification. Accordingly, petitioners argue that the Department must resort to BIA for these costs. should the Department determine that it is appropriate to use them to calculate Akai's margin.

DOC Position

Because we have used the acquisition prices between Akai and its subcontractors, this issue is moot

Continuation of Suspension of Liquidation

In accordance with section 735(c)(4)(A) of the Act, we are directing the Customs Service to continue to retroactively suspend liquidation of entries of subject merchandise for Mukand, Sunstar, Bombay Forgings and Dynaforge. We are also directing Customs Service to retroactively suspend liquidation of all entries of subject merchandise for all other companies except Akai. Retroactive suspension will apply to entries of flanges from India that are entered, or withdrawn from warehouse, for consumption on or after May 7, 1993, which is the date 90 days prior to the date of publication of our preliminary determination in the **Federal Register**. For Akai, we are directing the Customs Service to continue to suspend liquidation of all entries of flanges from India, that are entered, or withdrawn from warehouse, for consumption on or after August 5, 1993, which is the date of our preliminary determination. The Customs Service shall require a cash deposit or the posting of a bond equal to the margins below on all entries of flanges from India. The suspension of liquidation will remain in effect until further notice. The estimated dumping margins are as follows:

Manufacturer/producer/exporter	Margin (percentage)
Mukand Ltd	210.00
Sunstar Metals Ltd	210.00
Bombay Forgings Pvt. Ltd	210.00
Dynaforge	210.00
Akai Impex Pvt. Ltd	19.74
All Others	162.44

International Trade Commission Notification

In accordance with Section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our determination. As our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry within 45 days.

Notification to Interested Parties

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility covering the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This determination is published pursuant to Section 735(d) of the Act (19 U.S.C. 1673d(d)), and 19 CFR 353.20(a)(4).

Dated: December 20, 1993.

Barbara Stafford,

Acting Assistant Secretary for Import Administration.

Final Determination of Sales at Less Than Fair Value: Certain Forged Stainless Steel Flanges From Taiwan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: Pamela Ward, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-1174.

Final Determination

The Department of Commerce (the Department) determines that certain forged stainless steel flanges (flanges) from Taiwan are being, or likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the notice of the preliminary determination on July 29, 1993 (58 FR 41716 (August 5, 1993)), the following events have occurred. On August 2, 1993, one of the respondents in this investigation, Ta Chen Stainless Pipe Co., Ltd. (Ta Chen), notified the Department that its subcontractors would not respond to the Department's cost of production (COP) questionnaire. In addition, on August 2, 1993, Ta Chen, requested a postponement of the final determination. We granted this request, and on August 11, 1993, we postponed the final determination until not later than December 20, 1993 (58 FR 44493 (August 23, 1993)).

On August 24, 1993, Ta Chen submitted its response to the Department's June 4, 1993, supplemental questionnaire.

On October 1, 1993, Ta Chen submitted a letter stating that it would not participate in verification and withdrew from this investigation.

On October 12 and October 13, 1993, respectively, petitioners and Enlin Steel Corporation (Enlin), another respondent, submitted case briefs. On October 18 and October 20, 1993, respectively, petitioners and Enlin submitted rebuttal briefs.

Scope of Investigation

The products covered by this investigation are certain forged stainless steel flanges both finished and not-finished, generally manufactured to specification ASTM A-182, and made in alloys such as 304, 304L, 316, and 316L. The scope includes five general types of flanges. They are weld neck, used for butt-weld line connections, threaded, used for threaded line connections, slip-on & lap joint, used with stub ends/butt-weld line connections, socket weld, used to fit pipe into a machined recession, and blind, used to seal off a line. The sizes of the flanges within the scope range generally from one to six inches; however, all sizes of the above described merchandise are included in the scope. Specifically excluded from the scope of this investigation are cast stainless steel flanges. Cast stainless steel flanges generally are manufactured to specification ASTM A-351. The flanges subject to this investigation are currently classifiable under subheading 7307.21.1000 and 7307.21.5000 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of this investigation remains dispositive.

Period of Investigation

The period of investigation (POI) is July 1, 1992, through December 31, 1992.

Best Information Available

Enlin

In the preliminary determination, the Department determined that Enlin had been uncooperative in this investigation. The Department based this decision on the fact that Enlin did not file a response to sections B and C of the Department's questionnaire, due by April 23, 1993. In making this determination, the Department took into consideration that, on April 30, 1993, Enlin stated in writing that it would not be responding to the Department's questionnaire and requested a suspension agreement. (*See* Comment 1.) Section 776(c) of the Act provides that whenever a party refuses or is unable to produce information requested in a timely manner and in the form required, or otherwise significantly impedes an investigation, the Department shall use the best

VOL 58 ISS 248 DEC 29 1993 UMI

information otherwise available (BIA). We have done so in this investigation.

Because Enlin refused to answer the Department's questionnaire, we find it has been uncooperative in this investigation. As BIA for Enlin, we are assigning the highest margin provided in the petition, in accordance with the two-tiered BIA methodology under which the Department imposes the most adverse rate upon those respondents who refuse to cooperate or otherwise significantly impede the proceeding. The Department's two-tier methodology for assigning BIA based on the degree of respondent's cooperation has been upheld by the U.S. Court of Appeals for the Federal Circuit. (*See Allied-Signal* v. *U.S.*, Slip-Op. 93–049 (CAFC)(June 22, 1993) (*Allied*); *see also Krupp Stahl AG et al.* v. *U.S.*, Slip Op. 93–84 (CIT May 26, 1993).) The highest margin in the petition is 48.00 percent. (See Comment 1.)

Ta Chen

Ta Chen did not allow the Department to verify the information it submitted for the record in this investigation. In addition, Ta Chen withdrew from this investigation, stating that it no longer had an economic interest in the outcome of this proceeding. Section 776(b) of the Act provides that if the Department is unable to verify the accuracy of the information submitted, it shall use BIA as the basis for its determination, which may include the information submitted in support of the petition. Because Ta Chen's data was not verified, the Department must rely on BIA to determine Ta Chen's margin.

As BIA for Ta Chen, we are assigning the highest margin provided in the petition, in accordance with the two-tiered BIA methodology under which the Department imposes the most adverse rate upon those respondents who refuse to cooperate or otherwise significantly impede the proceeding. Accordingly, because Ta Chen significantly impeded this investigation by not participating in verification and withdrawing from this proceeding, we are assigning the highest margin in the petition of 48.00 percent as BIA. (See Comment 2.)

Tay Precision

As detailed in the preliminary determination, Tay Precision requested proprietary treatment of its volume and value submission, but failed to provide a public version of its response. The Department informed Tay Precision that if a public version was not submitted that the Department would return its response. Because Tay Precision did not respond to the Department's request and properly file a response to our questionnaire, on June 23, 1993, we returned its response in accordance with 19 CFR 353.32(d). We determined that the use of BIA is appropriate for Tay Precision Industries Co., Ltd. (Tay Precision) because it failed to provide the information requested in the form required. In deciding whether to use BIA, section 776(c) provides that the Department may take into account whether the respondent was able to produce information requested in a timely manner and in the form required.

Consequently, we determined that it is appropriate to assign Tay Precision the highest margin contained in the petition, 46.00 percent, in accordance with the two-tiered BIA methodology under which the Department imposes the most adverse rate upon those respondents who refuse to cooperate or otherwise significantly impede the proceeding.

Critical Circumstances

Petitioners allege that "critical circumstances" exist with respect to imports of flanges from Taiwan. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

In determining knowledge of dumping, we normally consider margins of 15 percent or more sufficient to impute knowledge of dumping for exporter's sales price sales, and margins of 25 percent or more for purchase price sales. (See, e.g., Final Determination of Sales at Less Than Fair Value: Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy, 52 FR 24198, June 29, 1987.) Since the final margins for flanges from Taiwan for all parties are above 25 percent, we determine, in accordance with section 735(a)(3)(A)(ii) of the Act that knowledge of dumping existed for flanges from Taiwan.

Under 19 CFR 353.16(f) and 19 CFR 353.16(g), we normally consider the following factors in determining whether imports have been massive over a short period of time: (1) the volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of the domestic consumption accounted for by imports.

As BIA for Enlin, Ta Chen, and Tay Precision we are making the adverse assumption that imports were massive over a relatively short period of time in accordance with section 735(a)(3)(B) of the Act.

Based on the above analysis, we determine that critical circumstances exist for imports of flanges from Taiwan for Enlin, Ta Chen, and Tay Precision. With respect to firms covered by the "All Other" rate, because the dumping margin is sufficient to impute knowledge of dumping, and because we have determined, as BIA, that imports of flanges have been massive over a relatively short period of time for the companies under investigation, we determine that critical circumstances also exist for "All Other" firms.

Interested Party Comments

Comment 1

Enlin maintains that the Department must select the less adverse second-tier BIA in assigning its final dumping margin because Enlin has exhibited a high level of cooperation with the Department. Enlin states that it provided a timely response to section A of the Department's questionnaire. In addition, when it informed the Department that it was unable to provide further questionnaire responses due to the prohibitive costs involved, Enlin indicated its desire to enter into negotiations for a suspension agreement with the Department. Furthermore, Enlin cites *Allied* as support because Enlin states that it continued to participate by offering to sign a suspension agreement. Additionally, Enlin asserts that it satisfies the requirements for a suspension agreement outlined in section 734 of the Act because it accounts for "substantially all" of U.S. imports of the subject merchandise during the POI.

Petitioners state that Enlin has refused to cooperate with the Department by refusing to respond to requests for information which are necessary for any margin calculation based on actual sales data. Petitioners contend that Enlin's offer to discuss a suspension agreement is not cooperation, because petitioners claim that Enlin knows that it does not meet the requirements for a suspension agreement.

Petitioners argue that this case is distinguishable from Allied. Unlike in this investigation, the respondent in Allied did not refuse to respond to the Department's questionnaire, but proposed that it supply a more simplified response. Here, Enlin did not state that it could not adequately prepare questionnaire responses using the information it had, but rather stated that it could not justify the expense of collecting the information.

DOC Position

We agree with petitioners. The purpose of the BIA rule is to induce a noncomplying respondent to provide the Department with timely, complete, and accurate factual information. The courts have recognized that cooperation by the parties is essential for the Department to gather needed information, and that it cannot be left to the largesse of the parties at their discretion to supply the Department with information. *See Atlantic Sugar Ltd.*, v. *U.S.*, 744 F.2d 1556, 1560 (1984); *Olympic Adhesives, Inc.* v. *U.S.*, 899 F2d 1565, 1571 (Federal Cir. 1990).

The United States Court of Appeals for the Federal Circuit has held that the Department's two-tier methodology is a reasonable and permissible exercise of the Department's statutory authority to use BIA when a respondent refuses or is unable to provide requested information. (See Allied at page 15.) The Department's two-tier methodology for assigning BIA is based on the degree of a respondent's cooperation with the Department. In accordance with its first-tier, the Department imposes the most adverse margin rate upon those respondents who refuse to cooperate or otherwise significantly impede the proceeding. In contrast, respondents who substantially cooperate but nonetheless fail to provide information requested in the required form and in a timely manner are subject to second-tier BIA.

Enlin argues that it should be deemed a cooperative respondent based on the Federal Appeal Court's decision in Allied. There the court found a second-tier cooperative BIA rate appropriate because the respondent had not refused to respond, but instead had demonstrated a willingness to work with the Department by submitting information it had to the extent it could (which was in a simplified manner). Enlin's situation is distinguishable. Unlike in Allied where the respondent indicated an interest in accommodating the Department's request by submitting information requested in a simplified manner, here Enlin simply refused to answer questionnaire sections B and C and made no other efforts to comply during the investigation. Unlike the respondent in Allied, Enlin stated on the record that, since U.S. exports of the subject merchandise were a "relatively minor part of Enlin's export business" the resulting cost of preparing a full response could not be "economically justified." (See Enlin letter to the Department dated April 30, 1993.) Enlin made a calculated decision that it was not worth its time, effort, and expense. The Department will not find that refusing to answer a questionnaire can be construed as cooperating in an investigation. (See Final Determinations of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, Certain Corrosion-Resistant Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate from Argentina; et al., 58 FR 37062 (July 9, 1993).) Indeed, a recent court decision is analogous and lends support to our position. See *Yamaji Fishing Net Co. Inc.*, v. *U.S.*, Slip. Op. 93–62 (CIT) (August 13, 1993) (Yamaji). In Yamaji, the court upheld an uncooperative BIA rate for a respondent who failed to submit its records in computer format, even though it did not maintain computer records. The court found that a mere letter from the respondent indicating it would not comply with information requests because it did not maintain computer records, and that therefore it would be too much of a burden in time and expense to put its records into computer format, was not a request for a waiver from the Department's requirement of submitting data in computer format.

Furthermore, the fact that Enlin evinced an interest to negotiate a suspension agreement with the Department is unlike the respondent's willingness in Allied to work out a simplified review process and is not indicative of a willingness to work with the Department in responding to our questionnaire. We cannot agree with Enlin that a party can merely request a suspension agreement from the Office of Antidumping Investigations (OAI) and be considered a cooperative party in an on-going proceeding. Enlin was specifically instructed in May 1993, by OAI officials to contact the Office of Agreements Compliance (OAC), the office which handles suspension agreements, regarding its request to enter into negotiations for a suspension agreement. However, Enlin never pursued further entering into a suspension agreement with either OAC or OAI officials, nor did Enlin ever submit a draft proposed agreement to either OAC or OAI officials as required by 19 CFR 353.18(g)(1)(i). Moreover, under 19 CFR 353.18 the Department has no affirmative obligation to initiate discussion of a possible suspension agreement.

Furthermore, in order to qualify for a suspension agreement, signatories of the agreement must account for substantially all the imports of the subject merchandise during the POI. Here, Enlin alone could not qualify because it does not account for "substantially all" of the imports to the United States. (See Memorandum to The File, dated November 23, 1993, and accompanied attachments for a detailed factual discussion.) Accordingly, we have continued to assign Enlin a rate based on first-tier BIA. As BIA we have used the highest rate in the petition.

Comment 2

Petitioners contend that because Ta Chen withdrew from this investigation and has refused to allow the Department to verify its information, that the Department must consider Ta Chen an uncooperative respondent. Petitioners add that Ta Chen's participation prior to its withdrawal should have no bearing on the selection of BIA. Petitioners cite the Final Determination of Sales at Less than Fair Value: Sweaters Wholly or in Chief Weight of Man-Made Fiber from Hong Kong 55 FR 30733 (July 27, 1990), where the Department assigned the highest margin in the petition because of a respondent's refusal to allow its data to be verified.

DOC Position

We agree. Because Ta Chen withdrew from the proceeding and did not allow the Department to verify its information submitted for the record of this investigation, the Department cannot rely on Ta Chen's data for the final determination. (See Section 776(b) of the Act.) Accordingly, we find that Ta Chen has significantly impeded this investigation and we have assigned Ta Chen the highest margin in the petition as adverse BIA.

Comment 3

Petitioners contend that the Department should use adverse BIA with respect to Tay Precision because the firm refused to provide information requested by the Department in proper form. Petitioners submit that the Department should use the two-tiered BIA methodology used in the preliminary determination and assign the highest margin alleged in the petition as BIA for Tay Precision. Furthermore, petitioners state that in the Final Determinations of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, Certain Corrosion-Resistant Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate from

VOL 58 ISS 248 DEC 29 1993 UMI

Argentina; et al., 58 FR 37062 (July 9, 1993) the Department found that refusing to answer questionnaires could not be construed as cooperating in an investigation. Furthermore, petitioners add that the BIA provision is intended to encourage responsiveness by the firms involved in an investigation, and Tay Precision's refusal to respond calls for the use of an adverse BIA rate.

DOC Position

We agree. As stated in our preliminary determination, we found that Tay Precision failed to provide the information requested in proper form as required by 19 CFR 353.32(b)(1) and 19 CFR 353.32(b)(2). Therefore, the Department returned information to Tay Precision pursuant to 19 CFR 353.32(d). Accordingly, we have continued to assign this company a rate based on first-tier BIA. As BIA we have used the highest rate in the petition.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(4) of the Act, we are directing the Customs Service to continue to suspend liquidation for Enlin, Tay Precision and "All Others" and to retroactively suspend liquidation for Ta Chen of entries of flanges from Taiwan, that are entered, or withdrawn from warehouse, for consumption on or after May 7, 1993, which is the date 90 days prior to the date of publication of our preliminary determination in the Federal Register. The Customs Service shall require a cash deposit or the posting of a bond equal to the margins below on all entries of flanges from Taiwan. The suspension of liquidation will remain in effect until further notice. The estimated dumping margins are as follows:

Manufacturer/producer/exporter	Margin percentage
Enlin Steel Corporation	48.00
Ta Chen Stainless Pipe Co., Ltd.	48.00
Tay Precision Industries Co., Ltd.	48.00
All Others	48.00

International Trade Commission Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our determination. As our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry within 45 days.

Notification to Interested Parties

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility covering the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)), and 19 CFR 353.20(a)(4).

Dated: December 20, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

[FR Doc. 93-31668 Filed 12-28-93; 8:45 am]

BILLING CODE 3510-DS-P

(A-351-819)

Final Determination of Sales at Less Than Fair Value: Stainless Steel Wire Rods From Brazil

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: Jim Cunningham, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-4207.

FINAL DETERMINATION: We determine that stainless steel wire rods from Brazil are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since publication of the affirmative preliminary determination on August 5, 1993 (58 FR 41723), the following events have occurred.

On August 18, 1993, the Department sent Eletrometal-Metais Especiais SA (Eletrometal) a deficiency questionnaire. On September 7, 1993, Eletrometal responded to the deficiency questionnaire.

On September 13, 1993, the Department visited Eletrometal's facilities in Sumare, Brazil for verification. Also, on September 13, 1993, the Department notified Eletrometal that it was terminating verification because respondent had omitted a significant number of sales from the sales listing it had submitted to the Department.

On October 26, 1993, Al Tech Specialty Steel Corp., Armco Stainless & Alloy Products, Carpenter Technology Corp., Republic Engineered Steels, Talley Metals Technology, Inc., and United Steelworkers of America, AFL-CIO/CLC (petitioners) and Eletrometal submitted case briefs. On November 1, 1993, petitioners submitted their rebuttal brief.

Scope of Investigation

For purposes of this investigation, certain stainless steel wire rods (SSWR) are products which are hot-rolled or hot-rolled, annealed, and/or pickled rounds, squares, octagons, hexagons or other shapes, in coils. SSWR are made of alloy steels containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. These products are only manufactured by hot-rolling, are normally sold in coiled form, and are of solid cross-section. The majority of SSWR sold in the United States are round in cross-sectional shape, annealed, and pickled. The most common size is 5.5 millimeters in diameter.

The SSWR subject to this investigation are currently classifiable under subheadings 7221.00.0005, 7221.00.0015, 7221.00.0020, 7221.00.0030, 7221.00.0040, 7221.00.0045, 7221.00.0060, 7221.00.0075, 7221.00.0080 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation (POI) is July 1, 1992, through December 31, 1992.

Best Information Available

We have determined, in accordance with section 776(c) of the Act, that the use of best information available (BIA) is appropriate for sales of subject merchandise in this investigation. In deciding whether to use BIA, section 776(c) provides that the Department may take into account whether the respondent was able to produce information requested in a timely manner and in the form required. In this case, the exporters of SSWR from Brazil did not do so. Consequently, we based our determination in this investigation on BIA.

We applied BIA to respondents in accordance with the two-tiered BIA methodology, under which the Department imposes the most adverse rate upon those respondents who refuse to cooperate or otherwise significantly impede the proceeding. The Department's two-tier methodology for assigning BIA based on the degree of respondents' cooperation has been upheld by the U.S. Court of Appeals for the Federal Circuit. (See Allied-Signal Aerospace Co. v. the United States, Slip Op. 93-1049 (Fed Cir. June 22, 1993); *see also Krupp Stahl AG. et al. v. the United States*, Slip Op. 93-84 (CIT May 26, 1993).)

Acos Finos Piratini SA and Acos Villares SA

During the course of this investigation, the Department encountered serious problems in obtaining from these two firms the volume and value data needed for its analysis. The Department attempted to solicit this information, stating that if we did not receive a response to our requests, we might make our determination on the basis of BIA. In spite of this attempt, we did not receive any information from either Acos Finos Piratini SA (Piratini) and Acos Villares SA (Villares), the two manufacturers and exporters named in the petition.

Since Piratini and Villares did not respond to our questionnaires, we used as BIA the highest margin contained in the January 15, 1993, pre-initiation amendment to the petition in this investigation, 26.50 percent.

Eletrometal

We did not use Eletrometal's response to the Department's questionnaire for purposes of our preliminary determination since it contained major deficiencies which could not be corrected in time for use in the preliminary determination. We gave Eletrometal the opportunity to correct the deficiencies in its response prior to verification. Because of the problems encountered at the verification of Eletrometal, we have used as BIA for this respondent the average of the margins contained in the January 15, 1993, pre-initiation amendment to the petition.

We terminated verification because at the start of our verification, Eletrometal informed the verifiers that it had omitted a significant portion of its home market sales from the sales listing it reported to the Department.

Moreover, in reaching our decision to terminate verification, we considered the fact that the Department had already afforded Eletrometal opportunities to respond to three supplemental questionnaires in order to rectify deficiencies in its previous responses and that the time for making substantial revisions to questionnaire responses had passed.

We decided that, given these previous opportunities to rectify its responses, Eletrometal's admission that a significant percentage of sales were omitted from its home market sales database called into question the reliability and accuracy of its home market sales database and areas of its response affected by this database. The omission of these sales taints Eletrometal's entire database since it affects model matching, the calculation of differences in physical merchandise, and weighted-average home market expenses. Even if Eletrometal had provided a corrected sales database at verification, the untimely submission of such a substantial amount of data would not have allowed the Department an adequate opportunity to analyze it prior to attempting to verify its accuracy.

Despite Eletrometal's deficiencies, we consider it a cooperative respondent. In reaching this determination, we have considered Eletrometal's deficiency responses and other attempts to comply with our requests for information. While Eletrometal's responses were inadequate and unreliable for purposes of our investigation, these problems do not appear to have stemmed from a deliberate attempt to deceive the Department. We have also considered the fact that Eletrometal volunteered the omitted sales at the start of verification and that it provided a reasonable explanation for its error. For Eletrometal, therefore, we have used, as BIA for a cooperating respondent, the average of the margins contained in petitioners' January 15, 1993, amendment to the petition, 24.63 percent.

Critical Circumstances

Petitioners alleges that "critical circumstances" exist with respect to imports of the subject merchandise from Brazil. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

(B) There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Under 19 CFR 353.16(f), we normally consider the following factors in determining whether imports have been massive over a short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports, if such data is available.

In determining knowledge of dumping, we normally consider margins of 15 percent or more sufficient to impute knowledge of dumping under section 735(a)(3)(A)(ii) of the Act for exporters sales price sales, and margins of 25 percent or more for purchase price sales. (See, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy, 52 FR 24198, June 29, 1987).

Since the margins for SSWR from Brazil for Piratini and Villares are above 25 percent, we determine in accordance with section 735(a)(3)(A)(ii) of the Act that importers had knowledge of dumping of SSWR by these companies. Since Piratini and Villares have not responded to our questionnaire, we are making the adverse assumption, as BIA, that imports from Piratini and Villares were massive over a relatively short period of time in accordance with section 735(a)(3)(B) of the Act. Based on this analysis, we find that critical circumstances exist for imports of SSWR from Brazil for Piratini and Villares.

Since all of Eletrometal's sales to the United States are purchase price sales, and the margin assigned to Eletrometal is less than 25 percent, we determine that importers did not have knowledge of dumping of SSWR by Eletrometal. Furthermore, no allegation has been made that there is a history of dumping in the SSWR industry. Since the first prong of the critical circumstances test is not met for Eletrometal, it is not necessary to examine whether there have been massive imports of SSWR over a relatively short period. Therefore, we find that critical circumstances do not exist with respect to Eletrometal.

Because we have not found that critical circumstances exist with respect to all respondents, we also do not find that critical circumstances exist with respect to all other exporters and producers of subject merchandise from Brazil.

Analysis of Comments Received

Comment 1

Petitioners argue that Eletrometal failed verification and should, therefore,

be assigned a margin based on BIA. Petitioners state that given the problems with Eletrometal's data during the course of this investigation and its failure to complete verification, the Department should use a BIA margin of 26.50 percent for Eletrometal for this determination.

DOC Position

We agree in part. While we agree that early termination of Eletrometal's verification warrants the use of BIA, as stated above, we consider Eletrometal a cooperative respondent. For the reasons stated above, we have used, as BIA for a cooperating respondent, the average of the margins contained in petitioners' January 15, 1993, amendment, 24.63 percent.

Comment 2

Petitioners argue that the Department should find that critical circumstances exist with respect to imports from all exporters. They state that since Piratini and Villares did not respond to the Department's questionnaire, the Department must affirm its preliminary finding that imports from these two companies were massive over a relatively short period of time. They further state that since Eletrometal failed verification, and, since the integrity of its response and all the data contained in the response is unreliable, the Department should find that critical circumstances exist with respect to Eletrometal also.

DOC Position

We agree in part. While we agree with petitioners' statement that critical circumstances exist with respect to Piratini and Villares, we disagree that critical circumstances exist with respect to Eletrometal.

Since petitioners have not alleged a history of dumping in the SSWR industry, and since all of Eletrometal's sales to the United States are purchase price sales and the margin assigned to Eletrometal is less than the 25 percent threshold at which the Department will impute knowledge of dumping in purchase price situations, we have determined that critical circumstances do not exist with respect to Eletrometal.

Comment 3

Eletrometal argues that the Department should have accepted its additional sales prior to or at the start of verification. Eletrometal states that there is no regulatory provision that prohibits the Department from accepting additional information prior to verification and that the Department should not penalize Eletrometal for omitting these sales from its responses to the Department's questionnaire. Eletrometal explains that the omission of these sales was due to an administrative error at the time of preparing its questionnaire response and that a list of the omitted sales was presented to the Department at the start of verification. It also states that the Department has no basis to reject this information on grounds that Eletrometal has not cooperated with the Department's investigation.

Eletrometal argues that the Department regularly accepts corrected information after verification and cites *Monsanto Co.* v. *United States*, 698 F. Supp 275 (CIT 1988). Eletrometal also argues that the Court of International Trade (CIT) has held that the Department enjoys considerable discretion not to verify every piece of information regarding a respondent's sales. It also argues that Congress intended that the Department have latitude in its verification procedures and, in support, cites *Kerr-McGee Chemical Corp.* v. *United States*, 739 F. Supp. 613 628 (CIT 1990).

DOC Position

We disagree with respondent. The omitted sales in question were never properly reported, even at verification. It was only at verification that the Department was informed of their existence, provided company reports illustrating these sales and given the percentage of home market sales represented by these omitted transactions. While Eletrometal did provide a list of sales that were omitted, this list was presented at the end of the verification. Under 19 CFR 353.31(a)(i), the deadline for submitting factual information is seven days before the scheduled date on which the verification is to commence, unless the Department requests such factual information. The Department did not request this information. Moreover, the information Eletrometal presented did not include information, such as control numbers, product codes, payment terms, taxes, movement expenses, and selling expenses, which were requested by the Department in the antidumping questionnaire. Thus, with regard to Eletrometal's argument that the Department should have accepted additional sales that it submitted at verification, the Department cannot accept information that has not been properly submitted in a timely fashion.

Moreover, the Department's three deficiency letters provided ample opportunities for Eletrometal to adequately examine the accuracy of the sales listings that it had submitted. While we agree that Eletrometal has cooperated with the Department's investigation, Eletrometal's omission of such substantive data calls into question the reliability and accuracy of Eletrometal's home market sales database and areas of its response affected by this database. Moreover, the late submission of such substantive data would not have allowed the Department an adequate opportunity to analyze it prior to verification.

Unlike the situation in *Monsanto Co.* v. *United States*, the information omitted by Eletrometal neither corrected nor clarified information submitted in the original questionnaire response. The omitted information was not in support of previously submitted information but pertained to additional sales independent of existing data. Furthermore, while Congress and the CIT have granted the Department considerable latitude in its verification procedures, this discretion is granted because of the impracticability of examining all of a company's information at verification, not to require the Department to verify any and all new information provided at verification.

Comment 4

Eletrometal states that the Department should not have cancelled verification simply because respondent disclosed additional home market sales at the start of verification. Eletrometal states that even if the Department refused to accept the sales information that it presented at the start of verification, the Department was unjustified in cancelling the entire verification. Respondent also argues that the Department would have been able to verify the great majority of home market sales that it reported and that the Department could have chosen to apply BIA only to those sales that had been omitted from Eletrometal's questionnaire response.

Eletrometal argues that the Department's decision to cancel verification is inconsistent with its prior practice. It cites Bicycle Speedometers from Japan (58 FR 42,289) (August 9, 1993,) and Light-Walled Welded Rectangular Carbon Steel Tubing from Argentina (54 FR 13,913) (April 6, 1989) (Argentine Tubing), in which the Department discovered unreported sales during the verifications.

Petitioners argue that as late as the issuance of the Department's preliminary determination, Eletrometal's responses were seriously deficient. Petitioners also state that in an effort to provide Eletrometal every opportunity to comply with its requests, the Department indicated it would verify Eletrometal's responses. Petitioners further state that when it became clear at verification that the responses were not complete, the Department properly terminated verification. Petitioners also refute Eletrometal's interpretation of the Department's prior practice.

DOC Position

We agree with petitioners. The Department provided ample opportunity for Eletrometal to properly and fully report its sales data. While the Department may well have been able to verify some of respondent's data, Eletrometal's omission of a significant amount of data casts doubts over the completeness and the reliability of Eletrometal's home market sales database and areas of its response affected by the database.

With regard to the Department's prior practice concerning unreported sales at verification, the cases cited by Eletrometal are not contrary to the position taken by the Department in this case. The verification in Bicycle Speedometers from Japan took place in the context of an administrative review of an order which had been previously verified. Thus, the Department already had an understanding of the overall extent of respondent's sales. Furthermore, the volume of unreported sales involved in that verification was not specified.

Respondent's reliance on Argentine Tubing is also misplaced. Although the Department's analysts did continue verification after the respondent submitted a new home market sales listing at the verification site, the analysts did so only "after warning [respondent] that the Department was not likely to accept such a massive revision this late in an investigation." Argentine Tubing at 13914. In fact, the Department did reject this new database, and relied totally on BIA at the final determination, noting the "[w]hile the Department allows minor revisions to questionnaire responses after the preliminary determination and during verification, it is well-established Department policy not to accept new responses after the preliminary determination because at that point in an investigation there is insufficient time for the Department to analyze and verify properly the new information." Id. at 13915.

If anything, Argentine Tubing is a case study in the futility of attempting the verification of substantial late home market database changes with the attendant impact on product matches, difmers, etc., not a policy statement that verification must be continued under such conditions.

Comment 5

Eletrometal states that prior to the start of verification, it disclosed inventory carrying costs. Eletrometal states that if these inventory carrying costs were added, they would decrease the home market price.

Petitioners argue that Eletrometal's claim regarding inventory carrying costs is irrelevant because all of Eletrometal's U.S. sales are purchase price sales, and the Department's purchase price methodology does not involve any treatment of inventory carrying costs. Petitioners also state that any addition to home market price would increase, not decrease, the home market price and its margin of dumping.

DOC Position

This issue is moot since the Department is using an assigned BIA margin rather than a calculated margin in this investigation.

Suspension of Liquidation

In accordance with section 735(c)(4) of the Act, we are directing the Customs Service to continue to suspend liquidation of all entries of certain stainless steel wire rods from Brazil manufactured or exported by Piratini or Villares that are entered, or withdrawn from warehouse, for consumption on or after May 7, 1993, which is 90 days prior to the date of publication of our preliminary determination in the Federal Register. We are directing the Customs Service to continue to suspend liquidation of all entries of certain stainless steel wire rods from Brazil manufactured or exported by Eletrometal and all other manufacturers that are entered, or withdrawn from warehouse, for consumption on or after August 5, 1993, which is the date of publication of our preliminary determination in the Federal Register. The Customs Service shall require a cash deposit or posting of a bond equal to the margins listed below on all entries of SSWR from Brazil. This suspension of liquidation will remain in effect until further notice. The estimated dumping margins are as follows:

Manufacturer/producer/exporter	Margin percentage
Eletrometal—Metais Especiais S.A.	24.63
Acos Finos Piratini SA	26.50
Acos Villares SA	26.50
All Others	25.88

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the International Trade Commission (ITC) of our determination. The ITC will make its determination whether these imports materially injure, or threaten material injury to, a U.S. industry within 45 days of the publication of this notice. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled.

However, if the ITC determines that such injury does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on SSWR from Brazil entered or withdrawn from warehouse, for consumption on or after the date of suspension of liquidation, equal to the amount by which the foreign market exceeds the United States price.

Notification to Interested Parties

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility covering the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This determination is published pursuant to section 735(d) of the Act and 19 CFR 353.20(a)(4).

Dated: December 20, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

[FR Doc. 93-31670 Filed 12-28-93; 8:45 am]

BILLING CODE 3510-DS-P

[A-427-811]

Final Determination of Sales at Less Than Fair Value: Certain Stainless Steel Wire Rods From France

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 29, 1993.

FOR FURTHER INFORMATION CONTACT: John Beck, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-3464.

Final Determination

We determine that certain stainless steel wire rods from France are being, or

VOL 58 ISS 248 DE 29 1993 UMI

are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since our preliminary determination on July 28, 1993 (58 FR 41726, August 5, 1993) and the postponement of our final determination on August 18, 1993 (58 FR 44660, August 24, 1993), the following events have occurred:

On August 9, 1993, Al Tech Specialty Steel Corp., Armco Stainless & Alloys Products, Carpenter Technology Corp., Republic Engineered Steels, Talley Metals Technology, Inc. and the United Steelworkers of America, AFL–CIO/CLC (collectively petitioner) requested that a public hearing be held. On August 12 and 31, 1993, Imphy, S.A. (Imphy), Ugine-Savoie, Metalimphy Alloys Corp. (MAC) and Techalloy Company, Inc. (Techalloy) (collectively respondent) requested that a public hearing be held.

In September 1993, respondent submitted revised home market and U.S. sales listings, supplemental section D and E questionnaire response information, and corrections and/or revisions to its submissions. Respondent also attempted to submit additional sales in late October 1993.

We conducted verification of respondent's sales and cost questionnaire responses in France in late September and early October 1993, and in the United States in mid-October 1993. In November 1993, respondent submitted revised sales listings to correct for errors discovered at verification.

Case and rebuttal briefs were submitted by petitioner and respondent on November 17 and 24, 1993, respectively. A public hearing was held on November 29, 1993.

Scope of Investigation

For purposes of this investigation, certain stainless steel wire rods (SSWR) are products which are hot-rolled or hot-rolled annealed, and/or pickled rounds, squares, octagons, hexagons or other shapes, in coils. SSWR are made of alloy steels containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. These products are only manufactured by hot-rolling, are normally sold in coiled form, and are of solid cross-section. The majority of SSWR sold in the United States is round in cross-sectional shape, annealed, and pickled. The most common size is 5.5 millimeters in diameter.

The SSWR subject to this investigation is currently classifiable under subheadings 7221.00.0005, 7221.00.0015, 7221.00.0020, 7221.00.0030, 7221.00.0040, 7221.00.0045, 7221.00.0060, 7221.00.0075, 7221.00.0080 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation (POI) is July 1, 1992, through December 31, 1992.

Such or Similar Comparisons

We have determined that the product covered by this investigation comprises a single category of "such or similar" merchandise. Where there were no sales of identical merchandise in the home market to compare to U.S. sales, we made similar merchandise comparisons on the basis of: (1) Grade; (2) diameter; (3) further manufacturing. We made adjustments for differences in the physical characteristics of the merchandise, in accordance with section 773(a)(4)(C) of the Act.

Fair Value Comparisons

To determine whether sales of SSWR from France to the United States were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

United States Price

We based USP for some U.S. sales on purchase price, in accordance with section 772(b) of the Act, because the subject merchandise was sold to unrelated purchasers in the United States prior to importation and because exporter's sales price (ESP) methodology, in those instances, was not otherwise indicated. We accepted all of respondent's classifications of purchase price sales (see Comment #1 in the Interested Party Comments section of this notice). We excluded certain U.S. sales with zero prices or zero quantities because these sales constituted an insignificant portion of total U.S. sales.

In addition, where certain sales to the first unrelated purchaser took place after importation into the United States, we based USP on ESP, in accordance with section 772(c) of the Act.

For purchase price and ESP sales, we made deductions, where appropriate, for discounts and the following movement charges: foreign brokerage, foreign inland freight, marine insurance, ocean freight, U.S. brokerage, U.S. duty, and U.S. inland freight. We added amounts for billing adjustments and freight revenue.

For both purchase price and ESP sales, we re-calculated credit for those sales that had missing payment or shipment dates. As best information available (BIA), we used the date of the final determination for the missing payment dates, and the date of sale for the missing shipment dates (see Comment #8 in the Interested Party Comments section of this notice). In addition, we added an additional amount to brokerage charges to account for an understatement of this expense discovered at verification (see Comment #6 in the Interested Party Comments section of this notice). Furthermore, we have reclassified inventory carrying costs as credit expenses for consignment sales (see Comment #5 in the Interested Party Comments section of this notice).

For ESP sales only, we deducted commissions, direct U.S. selling expenses, including credit expenses, warranty expenses, and warehousing, other direct non-U.S. selling expenses, indirect selling expenses, inventory carrying costs, and premiums for product liability insurance. For further manufacturing sales, we deducted the amount of general and administrative (G&A) expenses included in indirect selling expenses, since these G&A expenses were included in respondent's cost of production. (See Comment #15 of the Interested Party Comments section of this notice.)

In addition, we made deductions, where appropriate, for all value added in the United States pursuant to section 772(e)(3) of the Act. The value added consists of the costs associated with further manufacturing the imported product, including a proportional amount of any profit. We calculated profit attributable to further manufacturing in the United States by deducting from the sales price all applicable costs incurred in producing the further manufactured product. We then allocated the total profit proportionally to all components of cost. We deducted only the profit attributable to the value added in the United States. In determining the costs incurred to produce the further manufactured products, we included (1) the costs of manufacture; (2) movement and packing expenses; and (3) general, selling and administrative expenses, and (4) interest expenses. We adjusted respondent's further manufacturing cost data for certain G&A expenses which respondent had excluded in its

response. This adjustment was specific to each further manufacturing facility. For those sales of further manufactured merchandise where respondent did not specify the facility of further manufacture, we made this adjustment by using the highest G&A rate applied to any facility as BIA.

For price-to-price comparisons only, we made an adjustment to U.S. price for the value-added tax (VAT) paid on the comparison sale in France. In *Federal-Mogul Corporation and The Torrington Company v. United States*, Slip Op. 93–194 (CIT October 7, 1993), the Court of International Trade (CIT) rejected our revised implementation of the Act's instructions on taxes (our implementation was demonstrated in the preliminary determination in this investigation) and prohibited us from applying a purely tax neutral margin calculation methodology. Accordingly, we have again changed our practice, as instructed by the CIT, and adjusted U.S. price for tax by multiplying the home market tax rate by the U.S. price at the point in the chain of commerce of the U.S. merchandise that is analogous to the point in the home market chain of commerce at which the foreign government applies the home market consumption tax.

In this investigation, the tax levied on the subject merchandise in the home market is 18.6 percent. We calculated the appropriate tax adjustment to be 18.6 percent of U.S. price net of adjustments reflected on the invoice at the time of sale (which, in this case, is the point in the chain of commerce of the U.S. merchandise that is analogous to the point in the home market chain of commerce at which the foreign government applies the home market consumption tax), and added this amount to the U.S. price. We also calculated the amount of the tax adjustment that was due solely to the inclusion of price deductions in the original tax base (i.e., 18.6 percent of the sum of any adjustments, expenses and charges that were deducted from the tax base). We deducted this amount from the net U.S. price after all other additions and deductions had been made. By making this additional tax adjustment, we avoid a distortion that would cause the creation of a dumping margin even when pre-tax dumping is zero.

Respondent reported additional sales to the Department on October 15, 25 and 28, 1993. These sales were submitted too late to be included in our analysis. (See Comment #2 in the Interested Party Comments section of this notice.) We also discovered that the cost of further manufacturing data did not include costs associated with certain further manufactured sales of MAC. Consequently, we were unable to adjust the prices of these sales for their further manufacturing costs. As BIA, we have assigned these sales the higher of either: (1) the average of all margins alleged in the petition for the relevant class or kind of merchandise; or (2) the highest non-aberrant calculated margin for any other sale of merchandise.

Foreign Market Value

We compared the volume of home market sales of SSWR to the volume of third country sales in accordance with 19 CFR 353.48(a) to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating FMV. We found that the home market was viable for sales of SSWR.

We used the Department's related party test to determine whether sales to related customers were made on an arm's-length basis. See Appendix II to the Final Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products from Argentina (58 FR 37077, July 9, 1993) for more information on the Department's related party test. We did not include in our price-to-price comparisons any sales to related customers that we determined were not at arm's-length.

Cost of Production

Petitioner alleges that respondent's home market sales of SSWR were made at prices below cost of production (COP). On the basis of petitioner's allegations, we gathered data on production costs. We compared the weighted-average home market prices to the COP.

If over 90 percent of respondent's sales of a given model were at prices equal to or greater than the COP, we did not disregard any below-cost sales because we determined that respondent's below-cost sales were not made in substantial quantities. If between ten and 90 percent of respondent's sales of a given model were at prices equal to or greater than the COP, we disregarded only the below-cost sales, if they were found to be made over an extended period of time. Where we found that more than 90 percent of respondent's sales were at prices below the COP, we disregarded all sales for that model and calculated FMV based on constructed value (CV), if those sales were made over an extended period of time. We disregarded below-cost sales because the respondent failed to demonstrate, as requested by the Department in the COP questionnaire, that these below-cost sales were made at prices permitting the recovery of all costs within a reasonable period of time in the normal course of trade.

In order to determine whether below-cost sales were made over an extended period of time, we performed the following analysis on a product-specific basis: (1) If respondent sold a product in only one month of the POI and there were sales in that month below the COP, or (2) if respondent sold a product during two months or more of the POI and there were sales below the COP during two or more of those months, then below-cost sales were considered to have been made over an extended period of time.

In order to determine whether home market prices were above the COP, we calculated the COP based on the sum of respondent's cost of materials, fabrication, selling, general and administrative (SG&A) expenses, and interest expenses. We compared home market selling prices, net of movement charges and discounts and rebates, to each product's COP.

Price-to-Price Comparisons

For those products for which there are an adequate number of sales at prices equal to or greater than the COP, we based FMV on home market prices. For the subject merchandise, we calculated FMV based on delivered prices, inclusive of packing and VAT, to unrelated customers in the home market and to related customers, sales to which are at arm's-length under the related party test. We deducted inland freight, inland insurance, discounts and rebates from these prices. We added home market interest revenue to these prices. We also deducted home market packing costs and added U.S. packing costs. We re-calculated credit for those sales that had missing payment or shipment dates. As BIA, we used the date of the final determination for the missing payment dates, and the date of sale for the missing shipment dates.

For comparisons involving both purchase price and ESP, we included in FMV the amount of the VAT collected in the home market. We also calculated the amount of the tax that was due solely to the inclusion of price deductions in the original tax base (i.e., 18.6 percent of the sum of any adjustments, expenses, charges and offsets that were deducted from the tax base). We deducted this amount from the FMV after all other additions and deductions had been made. By making this additional tax adjustment, we avoid a distortion that would cause the

creation of a dumping margin even when pre-tax dumping is zero.

For purchase price comparisons, pursuant to section 773(a)(4)(B) of the Act and 19 CFR 353.56(a)(2), we made circumstance-of-sale adjustments for credit expenses and warranties, where appropriate. We deducted home market indirect selling expenses from FMV, capped by the amount of the U.S. commission. In addition, we re-calculated a re-adjustment of the amount of tax on the U.S. direct selling expenses added to FMV by applying the tax rate to those expenses. We also added this re-adjustment to FMV.

For ESP comparisons, we deducted home market indirect selling expenses from FMV, capped by the sum of U.S. indirect selling expenses and the U.S. commission amount. Although respondent reported related party commissions in the home market, respondent has not claimed them as direct selling expenses and, instead, included these expenses in indirect selling expenses.

For ESP comparisons, where there were no U.S. commissions, we offset the indirect selling expenses in the United States by providing for a corresponding deduction for indirect selling expenses in the home market, capped by the total indirect selling expenses incurred on the U.S. sale in the comparison.

Constructed Value

For those products without an adequate number of sales at prices above the COP, we based FMV on CV. We calculated CV based on the sum of the cost of materials, fabrication, general expenses, and U.S. packing cost. We included the respondent's reported general expenses in CV since these expenses were greater than the statutory minimum of ten percent of the cost of manufacture (COM). We re-calculated the weighted-average profit from the adjusted home market net sales prices and reported COPs. Since this amount was greater than the statutory minimum of eight percent of the COM, we used the re-calculated profit for CV.

For purchase price comparisons, we made circumstance-of-sale adjustments for differences in credit and warranty expenses, where appropriate. We deducted home market indirect selling expenses from FMV capped by the amount of the U.S. commission. For ESP comparisons, we deducted home market indirect selling expenses capped by the sum of U.S. indirect selling expenses and the U.S. commission amount. Although respondent reported related party commissions in the home market, respondent has not claimed them as direct selling expenses and, instead, included these expenses in indirect selling expenses.

For ESP comparisons, where there were no U.S. commissions, we offset the indirect selling expenses in the United States by providing for a corresponding deduction for indirect selling expenses in the home market, capped by the total indirect selling expenses incurred on the U.S. sale in the comparison.

Currency Conversion

We made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we verified information provided by respondent by using standard verification procedures, including the examination of relevant sales and financial records, and selection of original source documentation containing relevant information.

Interested Party Comments

Comment 1: In the preliminary determination, the Department treated certain U.S. sales as purchase price sales. We treated these sales as purchase price sales because respondent claimed that they were sales of merchandise that was produced to specification, sold prior to importation, and was not available for sale to other customers (see the July 16, 1993, memorandum from team to Richard Moreland).

Petitioner argues that the Department should reclassify these sales as ESP transactions. First, petitioner claims that although the sales in question were made prior to importation, respondent nonetheless warehoused or "inventoried" the merchandise before it shipped it to its customers. Second, petitioner argues that direct shipments to the unrelated buyer are not in the normal commercial channel of sale for respondent and that most sales of SSWR from France are inventoried by MAC. Third, petitioner argues that MAC's sales activities extend well beyond a communication link or processor of sales-related documents. Consequently, petitioner argues that the sales in question, along with sales that are not warehoused in the United States and are shipped directly from France to the U.S. customer, should be classified as ESP sales.

Respondent maintains that the Department found no evidence of significant U.S. market activity by MAC at verification. Respondent argues that there is no merit to petitioner's assertions that warehousing by MAC after importation precludes the finding that such sales are purchase price sales. Respondent contends that its sales are always made-to-order, are always sold prior to importation, and are never available for sale to other customers or out of pre-existing inventory.

DOC Position: We agree with respondent and have treated these sales as purchase price sales based on the use of the three purchase price/ESP criteria set forth in the Final Determination of Sales at Less Than Fair Value: Coated Groundwood Paper from Finland (56 FR 56363, November 4, 1991). In that case, the Department stated that where the terms of sale are set prior to the date of importation, the Department would examine several additional criteria when making a decision as to whether a sale should be considered as purchase price or ESP. As a result, we classify a sale as purchase price if the following criteria are met.

The first criterion is that the merchandise in question is shipped directly from the manufacturer to the unrelated buyer, without being introduced into the inventory of the related selling agent. The second criterion is that this arrangement is the customary commercial channel for sales of this merchandise between the parties involved.

First, we should note that not all sales classified as purchase price sales were warehoused by the U.S. subsidiary. Instead, they were shipped directly from France to the unrelated customer.

For the remaining sales that respondent classified as purchase price, the merchandise is warehoused by the related U.S. selling agent but not inventoried. The term "inventory", as it is commonly used in business, implies that the merchandise is in storage and is available for sale. We determined at verification that, with regard to the sales in question, the merchandise is not available for sale to any customer. Instead, the merchandise is considered as being warehoused, as it is awaiting delivery to a specific customer. Consequently, petitioner's arguments concerning the merchandise being inventoried, and that this is the customary commercial channel for sales of the subject merchandise, are not applicable.

The third criterion is that the related selling agent located in the United States acts only as a processor of sales-related documentation and a communication link with the unrelated U.S. buyer. No information submitted on the record, or found at verification, shows that MAC advertises or provides in-house technical services, although it does indicate that MAC participates in sales negotiations and takes title to the merchandise. At verification, the team tried to determine the extent to which MAC sets the terms of sale. Based on information gathered at verification, we have determined that MAC does not have the flexibility to set the price or terms of sale and acts only as processor of sales-related documentation. Therefore, we have determined that these sales are purchase price sales and have treated them as such.

Comment 2: On October 15 and 25, 1993, respondent submitted sales that it, until those dates, had omitted from its response. One of the sales submitted on October 15 was a sample transaction.

Petitioner argues that the Department should use BIA to derive dumping margins for all U.S. sales first reported on October 25, 1993. Petitioner claims that these sales were submitted untimely and that respondent had several opportunities to report these sales in a timely manner in revisions made to its sales database. As BIA, petitioner states that the Department should use "the higher of the average margin in the petition for the relevant class or kind of merchandise, or the highest non-aberrant calculated margin," as was done in the Certain Hot-Rolled, Cold-Rolled, Corrosion-Resistant and Cut-to-Length Carbon Steel Flat Products Investigations from France (58 FR 37125, July 9, 1993) (Carbon Steel Products from France).

Respondent maintains that there is no reason to exclude these sales in the final determination. Respondent points out that the sales in question represent a very minor portion of the U.S. database and were reported as soon as they were discovered. Respondent maintains that it was faced with a formidable task of reporting subject sales, and these particular sales were omitted in prior submissions due to an isolated computer error.

Respondent maintains that it has cooperated fully with the Department's investigation. Respondent states that the Department fully verified the volume and expenses associated with the additional sales reported. Respondent further states that if the Department decides that BIA is warranted for these sales, the most appropriate BIA would be to exclude these sales from the Department's analysis. Alternatively, respondent states that the Department should use a weighted-average margin from all of the other sales as BIA.

DOC Position: We agree with petitioner and have applied BIA margins to these unreported sales (see United States Price section of this notice). We have determined that these sales constitute a significant portion of total U.S. sales. According to 19 CFR 353.31(a)(1)(i), submissions of factual information must be made no later than seven days before the scheduled date on which verification is to commence. Here, respondent did not meet this deadline. As BIA, we assigned these sales the higher of either: (1) The average of all margins alleged in the petition for the relevant class or kind of merchandise; or (2) The highest non-aberrant calculated margin for any other sale of merchandise. This use of BIA is consistent with that used in Carbon Steel Products from France, where the facts of the case were similar.

Comment 3: Petitioner argues that the Department, as BIA, should disallow any difference in merchandise (difmer) adjustments claimed by respondent that reduce foreign market value, or resort to the next most costly home market product grouping for comparison to U.S. sales where dissimilar sales must be compared. Petitioner states that there is no evidence on the record to demonstrate that respondent's difmer adjustments relate only to physical characteristics of the merchandise. Petitioner asserts that respondent has stated that it incorporates non-physical characteristics into its product coding system and has failed to state or to prove that the difmers exclude cost differences resulting from non-physical differences in the products.

Respondent argues that it adhered to the Department's methodology for making difmer adjustments and has demonstrated that the cost differentials which were the basis for the difmer adjustments relate to physical differences in the merchandise. Respondent states that the Department's questionnaire instructed respondent to provide information on physical differences between the U.S. and home market merchandise, as well as differences in costs of materials, labor and variable production overhead for producing the merchandise. Respondent states that difmer adjustments for similar products were based on the variable costs for producing the merchandise. Respondent further states that its product codes, which were relied upon in identifying identical and similar matches, include the production process and end-use of the merchandise. Respondent argues that there can be no separation between production process and end-use from physical characteristics and that the production process and end-use are directly related to and result in physical differences in the products.

DOC Position: We agree with respondent. The Department verified that the matching of U.S. and home market products was, in fact, done pursuant to the guidelines established in Appendix V of the Department's questionnaire. At Ugine-Savoie, we verified that certain Ugine-Savoie products contained non-metallic physical properties which distinguished them from similar products with the same metallic composition. At respondent's company, we verified that certain products had different chemical properties, including metallic properties, which were more specific and inclusive than the basic criteria established in Appendix V of the questionnaire. These physical characteristics, such as the precise percentage of aluminum, were reflected in the product code precisely because the end-use for the wire rod would require specific physical composition of the product (e.g., percentages of nickel, copper, aluminum, etc. determine whether the rod is best suited for future cold-heating, fine wire drawing, welding, etc.).

The accounting team verified that the costs reported were based on the processes used for specific heats. The specific processes of a heat would depend on the physical characteristics desired for the finished product and, in some cases, the size of orders and the corresponding capacity of the production sites; some costs then might relate to a process (such as which particular furnace was used) based on aspects not absolutely related to the exact physical characteristics of the finished product. Considering the volume and complexity of the heats processed during the POI and the nature of the respondent's accounting system, the reliance on heat-specific costs was a reasonable measure; based on the facts specific to this case, requiring

respondent to retroactively calculate and eliminate any processing costs which related to the specific size or timing of a heat would represent an unreasonable burden on respondent.

We therefore used the reported difmer adjustments in calculating the dumping margin for purposes of the final determination.

Comment 4: Petitioner asserts that in accordance with the decision of the appellate court in *Zenith Electronics Corp.* v. *United States*, the Department should eliminate its circumstance of sale adjustment for VAT without any further adjustments to USP. Petitioner claims that the Department's current practice of adding to USP the absolute amount of tax assessed on the comparison merchandise sold in the country of exportation is contrary to the holding of the appellate court in the 1993 *Zenith* decision and has been rejected by the CIT in several other cases. Petitioner believes that the statute requires the adjustment to be based on the amount of tax that would have been applied to the U.S. sale.

Respondent argues that the Department properly adjusted for VAT on the U.S. side. Respondent contends that the Department's methodology is not precluded by statute or recent court holdings. Respondent states that the *Zenith* decision requires the Department to increase USP for the amount, instead of the rate, of the ad valorem tax and that the statute does not permit the Department to make a circumstance-of-sale adjustment for any residual distortions in the dumping margin caused by the adjustment of USP. Respondent further argues that the *Zenith* decision acknowledged that the Department has the authority and the ability to make tax-neutral assessments by adding the amount of home market taxes to USP.

DOC Position: On October 7, 1993, the CIT, in *Federal-Mogul Corp. and The Torrington Co.* v. *United States*, Slip Op. 93–194 (CIT, October 7, 1993), rejected the Department's methodology for calculating an addition to USP under section 772(d)(1)(C) of the Act to account for taxes that the exporting country would have assessed on the merchandise had it been sold in the home market. The CIT held that the addition to USP under section 772(d)(1)(C) of the Act should be the result of applying the foreign market tax rate to the price of the United States merchandise at the same point in the chain of commerce that the foreign market tax was applied to foreign market sales. *Federal-Mogul*, Slip Op. 93–194 at 12.

The Department has changed its methodology in accordance with the *Federal-Mogul* decisions, and has applied this new methodology in making its final determination in this investigation. From now on, the Department will add to USP the result of multiplying the foreign market tax rate by the price of the United States merchandise at the same point in the chain of commerce that the foreign market tax was applied to foreign market sales. The Department will also adjust the USP tax adjustment and the amount of tax included in FMV. These adjustments will deduct the portions of the foreign market tax and the USP tax adjustment that are the result of expenses that are included in the foreign market price used to calculate foreign market tax and are included in the United States merchandise price used to calculate the USP tax adjustment and that are later deducted to calculate FMV and USP. These adjustments to the amount of the foreign market tax and the USP tax adjustment are necessary to prevent our new methodology for calculating the USP tax adjustment from creating antidumping duty margins where no margins would exist if no taxes were levied upon foreign market sales.

This margin creation effect is due to the fact that the bases for calculating both the amount of tax included in the price of the foreign market merchandise and the amount of the USP tax adjustment include many expenses that are later deducted when calculating USP and FMV. After these deductions are made, the amount of tax included in FMV and the USP tax adjustment still reflects the amounts of these expenses. Thus, a margin may be created that is not dependent upon a difference between USP and FMV, but is the result of the price of the United States merchandise containing more expenses than the price of the foreign market merchandise. The Department's policy to avoid the margin creation effect is in accordance with the United States Court of Appeals' holding that the application of the USP tax adjustment under section 772(d)(1)(C) of the Act should not create an antidumping duty margin if pre-tax FMV does not exceed USP. *Zenith Electronics Corp.* v. *United States*, 988 F.2d 1573, 1581 (Fed. Cir. 1993). In addition, the CIT has specifically held that an adjustment should be made to mitigate the impact of expenses that are deducted from FMV and USP upon the USP tax adjustment and the amount of tax included in FMV. *Daewoo Electronics Co., Ltd.* v. *United States*, 760 F. Supp. 200, 208 (CIT, 1991).

However, the mechanics of the Department's adjustments to the USP tax adjustment and the foreign market tax amount as described above are not identical to those suggested in *Daewoo*. (See the "Fair Value Comparisons" section of this notice.)

Comment 5: Petitioner asserts that respondent understated the direct credit expenses incurred on U.S. consignment sales and that the Department should correct for this understatement. Petitioner states that respondent's classification of costs incurred during the consignment inventory period as inventory carrying costs and therefore as indirect selling expenses is inconsistent with the position taken by respondent's parent company in the investigation of Carbon Steel Products from France. Petitioner contends that in that investigation, respondent argued that the credit period for home market consignment sales began at the time the merchandise left the mill and not when the end customer was invoiced by respondent's customer. Petitioner states that the Department accepted that methodology in that case and should therefore calculate direct credit costs by adding the inventory carrying costs and the direct credit costs reported by respondent for each of its consignment sales.

Respondent maintains that expenses attributable to the Techalloy consignment sales were properly reflected. Respondent argues that the sale to its customer is not consummated until the consigned inventory has been withdrawn from the warehouse of respondent's customer and respondent's customer has then been invoiced. Respondent further argues that it is not the Department's practice to treat carrying costs on consignment sales as a direct selling expense where respondent is invoiced at the time the customer withdraws the merchandise from the warehouse.

DOC Position: We agree with that costs incurred during the consignment inventory period are not inventory carrying costs but are direct credit expenses. During the period that the merchandise remained in respondent's customer's consignment inventory, the merchandise was not available for sale to any other of respondent's customers. Since it was not available for sale, we have determined that the expense incurred by respondent while it remained in its customer's inventory is a direct expense. The maintenance of consignment inventory on the respondent's customer's site was a condition of the sale.

This approach is consistent with the Department's determination in Carbon

Steel Products from France. As petitioner correctly notes, in that investigation the Department determined that the credit period for home market consignment sales began at the time the merchandise left the producing mill en route to its consignment customer's inventory, and not when the final customer was invoiced (respondent invoiced its consignment customer when the consignment customer withdrew the material from its warehouse and invoiced its customer).

Comment 6: Petitioner argues that the Department should use the highest unreported expense amount uncovered during verification as BIA to correct for respondent's understatement of its foreign and U.S. brokerage charges. Petitioner asserts that the Department should increase the U.S. and foreign brokerage charges for all of respondent's U.S. sales.

Respondent states that the minor foreign brokerage discrepancies noted by petitioner apply only to sales of Ugine-Savoie products, and therefore the Department should not inflate all of the expenses of all of the U.S. sales reported by respondent. Furthermore, respondent states that the U.S. brokerage expenses were generally tiny and were offset by an overstatement of the shipment expenses incurred on its U.S. sales. Therefore, respondent contends that petitioner's argument should be rejected.

DOC Position: We agree with petitioner, in part. At verification, Ugine-Savoie company officials explained that their computer system systematically failed to pick up certain brokerage expenses (see November 9, 1993, verification report from William H. Crow II to David L. Binder at pages 36, 39, and 44). Respondent had not previously reported these expenses in its response. Therefore, we have used the averages of the missing brokerage charges examined during verification, and increased the charge reported under U.S. brokerage for Ugine-Savoie sales only by the average per-unit omission specific to each type of sale (*e.g.*, purchase price, ESP, further manufactured) for use in the final determination.

Comment 7: Petitioner contends that information obtained at verification demonstrates that respondent significantly underreported the actual commission expenses it incurred on its U.S. sales. Petitioner argues that the Department should calculate a commission expense for all of respondent's U.S. sales.

Respondent states that it accurately reported the commissions paid on U.S. sales. Respondent contends that the suggestion of a defect in the listing of commissions in the verification report is an error in that report which respondent addressed in its case brief. Therefore, respondent contends that petitioner's argument should be rejected.

DOC Position: We agree with respondent. The verification report's suggestion of an error in the listing of commissions was incorrect. We did not find any deficiencies in respondent's reporting of commissions. (See memorandum to the file from John Beck dated December 20, 1993.)

Comment 8: Petitioner states that in calculating imputed credit on sales for which respondent has not yet received payment, the Department, as BIA, should use as the payment date the scheduled date of the final determination. Petitioner states that for all U.S. sales where payment was not received as of the questionnaire response submission date, respondent should not be allowed to calculate imputed credit based on the customer's normal payment terms.

Respondent argues that there is no basis for selecting the date of the final determination as the date of payment for these sales. Respondent states that it has made updated payment information as requested by the Department. Respondent further states that for those sales still left unpaid, its practice of imputing credit expense based upon the normal payment terms plus the customer's average days of late payment is reasonable.

DOC Position: We agree with petitioner. For sales where the customer had not paid as of the time of verification, we re-calculated credit expenses using the date of the final determination as the date of payment. This is consistent with how we treated unreported dates of payment in the Final Determinations of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate from Belgium, (58 FR 37083, July 9, 1993).

Comment 9: Respondent argues that the Department should not exclude sales to related customers in calculating FMV. According to respondent, these sales to related parties were made at arm's-length prices. Respondent also argues that the Department has no basis to apply the "arm's-length test" in this case because, this test is arbitrary and capricious. Respondent maintains that the test only proves that different purchasers may pay different prices. Further, respondent states that the test is faulty because it does not properly account for variables which may affect prices, such the size of the individual sale, the total volume of purchases by customers, and the fact that the volume purchased by a particular customer may affect the price to that customer.

Petitioner argues that the Department properly excluded sales to related parties in calculating FMV because there is no evidence that such sales were made at arm's-length prices. Petitioner notes that the Department has been given ample flexibility to devise methodologies to calculate dumping margins, is expected to follow the same methodology used in prior cases, and has relied on the related party test as a reasonable means to implement its regulations pertaining to related party sales. Petitioner states that the related party test is a reasonable means of implementing the Department's regulations and is not arbitrary.

DOC Position: We agree with petitioner and have used the related party test and excluded sales that were not found to be at arm's-length based on this test. As we stated in the Carbon Steel Products from France investigation, the Department's view is that the related party test fully conforms to 19 CFR 353.45(a), which provides that the Department should calculate FMV using sales to related parties only if it is satisfied that the prices of those sales are comparable to the prices of the subject merchandise sold to unrelated customers. Such instructions give the Department substantial latitude in defining "comparability." The results of the test in this investigation show that respondent's related party sales were not made at arm's-length prices.

Comment 10: Respondent contends that at the preliminary determination, the Department should not have excluded sales to related customers in calculating profit for purposes of computing CV. Respondent contends that the questionnaire provides that CV is to include home market profit from sales of the class or kind of merchandise. Respondent states that in Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From France, Germany, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom; Final Results of the Antidumping Duty Order (58 FR 39729, July 26, 1993), the Department rejected a narrow formulation of profit and instead based it on all home market sales, even those to related parties. Therefore, respondent urges the Department to use its home market related party sales for purposes of the final determination.

Petitioner maintains that the exclusion of sales to related parties in

calculating profit for CV purposes was appropriate at the preliminary determination. Petitioner argues that the Department's regulations do not allow for the calculation of FMV based on related party sales where the price to the related parties is not comparable to the price to unrelated parties. For this reason, petitioner believes that sales which are excluded based on the related party test should also be excluded from determining profit for CV. Petitioner argues that selling price is a key factor in determining profits. Petitioner further states that profit reflects a value component rather than a cost component. Petitioner notes that the statute gives the Department authority to disregard related party transactions in calculating CV where any value element does not fairly reflect the amount usually reflected in sales in the market under consideration.

DOC Position: We agree with petitioner and have excluded all home market sales to related parties that fail the arm's-length test in calculating profit for CV purposes. We have determined that if sales to related parties are excluded for price-to-price comparisons, these sales cannot be included for determining profit for the calculation of CV. This is consistent with our treatment of related party sales found not to have been made at arm's-length in the Certain Hot-Rolled, Cold-Rolled, Corrosion-Resistant and Cut-to-Length Carbon Steel Flat Products Investigations from Korea (58 FR 37176, July 9, 1993). In that case, we excluded sales that were made to related parties in calculating profit for CV. While in AFBs the Department may have used related-party sales found not to have been at arm's-length when calculating profit for CV, we have reconsidered this approach in this case and have determined that it is more appropriate to exclude them.

Comment 11: Petitioner states that the Department should correct for certain errors in respondent's U.S. sales listing found at verification. These errors included omission of certain U.S. brokerage and handling charges, packing costs, warranty expenses, indirect selling expenses, foreign brokerage and handling charges, and foreign inland freight charges.

Respondent agrees that these errors should be corrected.

DOC Position: We agree with petitioner and respondent and have corrected for the errors made in the respondent's U.S. sales listing.

Comment 12: Petitioner states that the Department should continue to adjust respondent's further manufacturing costs to include expenses omitted by respondent. Specifically, petitioner states that the non-recurring costs associated with plant closure, hazardous waste facility fees, and write-off of slow moving inventory are included in the U.S. financial statements and, therefore, they should be included in the further manufacturing G&A costs.

Respondent argues that the Department should not have included these costs in calculating the further manufacturing costs. Respondent contends that it properly omitted amounts noted in its financial statements regarding a hazardous waste facility fee assessment, a plant closure, and slow moving inventory because these items have nothing to do with increased value attributable to the further manufacture of the merchandise under investigation.

Respondent asserts that the hazardous waste fee is only an accrual for a potential liability for period prior to the POI and also prior to the current ownership of the company. Moreover, respondent claims that it may receive reimbursement of the fees in the future.

Respondent maintains that the amount attributable to the write-off of slow moving inventory is included in the financial statements as a footnote only and describes the write-off policy of the ultimate parent company and does not reflect a cost in the U.S. financial statements.

DOC Position: We agree with petitioner in part and respondent in part. We included the plant closure costs and the hazardous waste fees in the calculation of the further manufacturing costs because these items are included in the financial statements and reflect costs incurred during the POI. Even though the damages occurred prior to the POI, and the respondent may receive reimbursement in the future, the liability is currently payable, and recognized in the current period in the financial statements. This is consistent with what the Department did in the Final Determinations of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, Certain Corrosion-resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate from Germany (58 FR 37136, July 9, 1993). The Department did not include the slow-moving inventory write-off since it is not reflected in the U.S. income statement of the further manufacturer.

Comment 13: Petitioner argues that the Department should use BIA to calculate respondent's interest expense. Petitioner argues that we should use BIA because during verification, the Department discovered that respondent had deducted both short-term and long-term interest income when calculating its net interest expense. As BIA, petitioner recommends applying Usinor-Sacilor's (Imphy's and Ugine-Savoie's parent company) average long-term interest rate as stated in the footnotes to the financial statements to total debt.

Respondent maintains that it is not possible for Usinor-Sacilor to separate interest income from interest expense from the consolidating companies. The consolidating companies only report net interest to Usinor-Sacilor for consolidation.

DOC Position: We agree with petitioner in part. We increased interest expense by the estimated amount of long-term interest income that is included as an offset to interest expense. The Department normally allows only short-term interest income as an offset to financing expense. This is consistent with the methodology the Department applied in the Final Determination of Sales at Less Than Fair Value: Steel Wire Rope from Korea, (58 FR 11029, 11035, February 23, 1993). To estimate long-term interest income, we used the amount of assets which would generate long-term interest income, derived from Usinor-Sacilor's 1992 consolidated financial statements, multiplied by the 1992 French average annual long-term interest income rate published in the OECD Financial Statistics Monthly (January 1993).

Comment 14: Petitioner argues that the Department should correct respondent's alleged understatement of Ugine-Savoie's electricity expense. Respondent reduced Ugine-Savoie's electricity expense for income generated by the sale of electricity to an unrelated party. Petitioner contends that the cost of production calculations should be based on the actual cost of the inputs used to manufacture the merchandise under investigation and not reduced by unrelated income.

Respondent claims that it did not understate Ugine-Savoie's electricity expense. Respondent maintains that it gets reimbursed for the electricity that it sells to an unrelated company. Respondent argues that the Department's practice has been to reduce costs actually incurred where the respondent can demonstrate the extent to which the costs are unrelated to the production or sale of the subject merchandise.

DOC Position: We agree with petitioner. For cost of production and CV, we increased the electricity costs for the amount of the reimbursement in excess of the cost of the electricity. We based the calculation of cost of production on the actual costs of the inputs used to manufacture the merchandise under investigation. We do not reduce those costs by income unrelated to the production and sale of the subject merchandise. This is consistent with what the Department did in Television Receivers, Monochrome and Color, from Japan: Final Results of Antidumping Duty Administrative Review, (54 FR 13917, April 6, 1989). In that case, the respondent reported royalty income unrelated to televisions, and rents received from related parties for the lease of equipment and buildings. Because none of these categories was related to sales of the product under review or current operations, the Department excluded the income from production costs. We did not make this adjustment to the cost of production reported for further manufactured products because the data was not presented in a way to allow us to do so and any adjustment would be insignificant. As BIA, we accepted this portion of the further manufactured cost data as reported.

Comment 15: Petitioner asserts that in the preliminary determination, the Department properly included in the cost of further manufacturing 100 percent of respondent's G&A expenses instead of accepting respondent's allocation of a portion of its G&A expenses to indirect selling expenses. Petitioner argues that the Department should continue to include all of respondent's G&A expenses in the cost of further manufacturing, since respondent did not produce a breakdown, or identify these indirect selling expenses.

Respondent argues that it properly allocated a relative share of G&A costs to selling expenses since the G&A expenses supported both the selling function and the further manufacturing function. Respondent maintains that by attributing 100 percent of the G&A to further manufacturing, the Department erroneously inflated the further processing costs.

DOC Position: We agree with petitioner and have included in the cost of further manufacturing the total G&A costs without allocating any of these costs to indirect selling expenses. Respondent provided no detail of the G&A cost items that it wanted to reclassify as indirect selling expenses. Respondent had the opportunity to provide such detail in its response to the Department's questionnaire and at verification. It failed to do so. Consequently, without such detail, we have no way of knowing whether respondent accurately allocated the costs.

Comment 16: Respondent contends that the Department should not have used BIA for sales where there was no reported Techalloy plant code factor in the computer database for the preliminary determination. This identifying factor was necessary in order to assign the appropriate plant-specific G&A to those sales. For all sales of further manufactured merchandise where a specific Techalloy plant code was not specified, the Department applied a G&A adjustment factor representing the highest percentage adjustment that had been applied to any particular Techalloy facility as BIA applicable to the unidentified facility.

The sales without a plant code factor represent sales by MAC and United Stainless and Alloys (a division of MAC). The respondent asserts that these sales should not be adjusted by the BIA factor.

DOC Position: We agree with respondent. The Department used BIA for the adjustment at the preliminary determination because respondent had not provided the Department with the appropriate data needed to make respondent's claimed adjustment. Subsequently, respondent submitted the appropriate information on its further manufacturing computer tape. We verified this information and have used it in the final determination. Therefore, the use of BIA in this particular instance is no longer warranted.

Comment 17: Respondent contends that its calculation of value-added costs was appropriate. Respondent explains that major elements of respondent's value-added costs, such as labor and electricity, are recorded at actual cost on a product-by-product basis only at the end of the year. For this reason, respondent calculated value-added costs on an annual basis. Respondent argues that this approach comports with the Department's practice of using annual costs where they are a more accurate measure of actual cost.

Petitioner argues that the Department should revise respondent's fabrication costs to reflect costs incurred during the POI because respondent used fabrication costs based on average actual costs for the fiscal year, as opposed to costs specific to the POI. To do this, petitioner suggests that the Department use BIA to adjust for fabrication costs for respondent from an annual basis to the POI. Petitioner suggests that the Department should increase the cost of manufacture of SSWR manufactured by respondent by a percentage identified in the cost verification report, where the Department stated that respondent's failure to submit costs based on the POI decreased the submitted costs by a specific amount. (See November 9, 1993, verification report of COP and CV for Imphy S.A. and Ugine-Savoie at page 1.)

DOC Position: We agree with respondent and for the purpose of the final determination, we did not adjust certain fabrication costs in the cost of production calculation. The costs reflected in respondent's monthly reports do not reflect costs actually incurred because, for example, for electricity an annual payment may be required depending on the annual electricity used. In respondent's normal cost accounting system these certain costs are not adjusted to actual until the end of the fiscal year. Consequently, it would have been very difficult for respondent to isolate costs for the POI. Accordingly, for the final determination, we accepted the fabrication costs submitted by Ugine-Savoie. This is consistent with the Department's approach in the Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From the United Kingdom (58 FR 6207, January 27, 1993).

Comment 18: Respondent maintains that its depreciation methodology is reasonable. Respondent explains that its basis for allocating depreciation to product lines is derived from a theoretical study performed in 1986, and that the results of this study are used in the company's normal accounting system. Respondent also notes that there was no deviation from the normal method employed by the company to calculate depreciation used in the submission. In addition, respondent points out that the submitted depreciation expense is based on total actual expense.

Petitioner argues that the Department should calculate respondent's depreciation costs based on the cost and estimated useful lives of the assets that respondent used to manufacture stainless steel wire rod. Petitioner claims that the theoretical study performed in 1986 on depreciation was done based on replacement costs, as opposed to actual costs. Further, petitioner argues, the study is not appropriate for application to this investigation because the methodology proposed in the study and applied by respondent does not reflect the actual value of the assets used to produce the merchandise under investigation.

DOC Position: While we agree with petitioner that the use of a 1986 study which uses estimated replacement costs and estimated yields is not reflective of

actual depreciation costs for the subject merchandise, this allocation methodology is used by respondent in its normal accounting system. Without a more accurate alternative, we accepted respondent's methodology.

Comment 19: Respondent expresses concern about a statement in the Verification of Cost of Production and Constructed Value report of Imphy S.A. and Ugine-Savoie at page 2 regarding the "Financial Link Account." The report states that ". . . expenses in this account were not identifiable as they resulted from the consolidation." Respondent argues that expenses included in this account do not relate to the subject merchandise, and therefore, should not be included in the calculation of COP and CV. Respondent emphasizes that it demonstrated at verification that the submitted G&A expenses reconciled to the income statements. Further, respondent argues, the submitted G&A expenses included an allocation of the actual management expenses incurred by the Usinor-Sacilor Group, and that respondent demonstrated the reconciliation of the actual management expenses to the accounts of the management group.

DOC Position: We disagree with respondent. We included the amounts in the financial link account in the calculation of the interest and general and administrative rates. At verification, respondent indicated that these amounts relate to the expense category where they are reported in the income statement but could not be matched in the consolidation process. The financial statements for all Usinor-Sacilor Group companies are consolidated at the end of the year. On elimination of intercompany transactions during the consolidation process, there is not always a perfect match. These non-matching eliminations are then put into the financial link account. Since these costs could not be specifically identified or reconciled, it is possible that they relate to the subject merchandise. It is the Department's practice to include all costs relevant to the subject merchandise in the calculation of COP and CV. Therefore we included these additional costs in the calculation of the interest and G&A rates.

Comment 20: Petitioner argues that the Department should adjust respondent's COP to properly account for restructuring costs and for amortization of goodwill expense. Petitioner contends that these costs were included in respondent's financial statements, but excluded from the submission.

Respondent argues that the Department reviewed the calculation of the cost of manufacture and general expenses at verification, and found that all appropriate costs had been included. Respondent also points out that there is no amortization of goodwill in Imphy's 1992 financial statement. Thus, there is no basis for the Department to adjust respondents' cost of production for restructuring or goodwill.

DOC Position: We agree with respondent. At verification we found the costs of restructuring that are included in the financial statements were properly included in G&A expenses. We also determined that the amortization of intangible assets was properly included in the COP.

Continuation of Suspension of Liquidation

We are directing the Customs Service to continue to suspend liquidation of all entries of SSWR from France that are entered, or withdrawn from warehouse, for consumption on or after August 5, 1993, the date of publication of our preliminary determination in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the FMV of the merchandise subject to these investigations exceeds the U.S. price, as shown below. The weighted-average dumping margins are as follows:

Manufacturer/Producer/Exporter	Weighted-average margin percentage
Imphy and Ugine-Savoie	24.39
All others	24.39

International Trade Commission Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our determination.

Notification to Interested Parties

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This determination is published pursuant to section 735(d) of the Act and 19 CFR 353.20(a)(4).

Dated: December 20, 1993.

Barbara R. Stafford,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of revocation of Export Trade Certificate of Review No. 84-00011.

SUMMARY: The Secretary of Commerce issued an export trade certificate of review to Watsand International, Ltd. Because this certificate holder has failed to file an annual report as required by law, the Secretary is revoking the certificate. This notice summarizes the notification letter sent to Watsand International, Ltd.

FOR FURTHER INFORMATION CONTACT: Friedrich R. Crupe, Acting Director, Office of Export Trading Company Affairs, International Trade Administration, 202/482-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 ("the Act") [Pub. L. No. 97-290, 15 U.S.C. 4011-21] authorizes the Secretary of Commerce to issue export trade certificates of review. The regulations implementing Title III ("the Regulations") are found at 15 CFR part 325 (1986). Pursuant to this authority, a certificate of review was issued on May 25, 1984 to Watsand International, Ltd.

A certificate holder is required by law to submit to the Department of Commerce annual reports that update financial and other information relating to business activities covered by its certificate (Section 308 of the Act, 15 U.S.C. 4018, § 235.14 (a) of the Regulations, 15 CPR 325.14 (a)). The annual report is due within 45 days after the anniversary date of the issuance of the certificate of review (Sections 325.14 (b) of the Regulations, 15 CFR 325.14 (b)). Failure to submit a complete annual report may be the basis for revocation. Sections 325.10(a) and 325.14(c) of the Regulations, 15 CFR 325.10(a) (3) and 325.14(c).

On May 14, 1993, the Department of Commerce sent to Watsand International, Ltd. a letter containing annual report questions with a reminder that its annual report was due on July 9, 1993. Additional reminders were sent on July 13, 1993 and on August 13, 1993. The Department has received no written response from Watsand International, Ltd. to any of these letters.

On November 17, 1993, and in accordance with § 325.10 (c) (2) of the Regulations, [15 CFR 325.10 (c) (2)], the Department of Commerce sent a letter by certified mail to notify Watsand International, Ltd. that the Department was formally initiating the process to revoke its certificate for failure to file an annual report. In addition, a summary of this letter allowing Watsand International, Ltd. thirty days to respond was published in the **Federal Register** on November 22, 1993 at 58 FR 61674. Pursuant to 325.10(c) (2) of the Regulations (15 CFR 325.10(c) (2)), the Department considers the failure of Watsand International, Ltd. to respond to be an admission of the statements contained in the notification letter.

The Department has determined to revoke the certificate issued to Watsand International, Ltd. for its failure to file an annual report. The Department has sent a letter, dated December 22, 1993, to notify Watsand International, Ltd. of its determination. The revocation is effective thirty (30) days from the date of publication of this notice. Any person aggrieved by this decision may appeal to an appropriate U.S. district court within 30 days from the date on which this notice is published in the **Federal Register** 325.10(c) (4) and 325.11 of the Regulations, 15 CFR 324.10(c) (4) and 325.11 of the Regulations, 15 CFR 325.10(c) (4) and 325.11.

Dated: December 22, 1993.

Friedrich R. Crupe,

Acting Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-P

U.S. Geological Survey, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 93-116. *Applicant:* U.S. Geological Survey, Lakewood, CO 80225. *Instrument:* Borehole, In Situ Hydrochemical Electrode System. *Manufacturer:* Svensk Kärnbränslehantering AB, Sweden. *Intended Use:* See notice at 58 FR 51618, October 4, 1993. *Reasons:* The foreign instrument provides the following resolutions: (1) hydrostatic potential (Eh) of 0.001 volt, (2) pH of 0.02 unit, (3) sulphide concentration of 0.5 mg/l, (4) temperature of 0.05° celsius, and can withstand pressure in boreholes to 1.0 km. *Advice Received From:* Department of Energy, November 22, 1993.

Docket Number: 93-123. *Applicant:* University of Alaska, Fairbanks, AK 99775-0800. *Instrument:* Low Light Level Color Television Camera, Model Pavicam-S. *Manufacturer:* Pavic Inc., Japan. *Intended Use:* See notice at 58 FR 55043, October 25, 1993. *Reasons:* The foreign instrument provides: (1) a sensitivity of 2 lux scene illumination with f2.8 lens for full video (100% IRE) at 0 dB, (2) signal to noise ratio of 56 dB, (3) horizontal resolution of 500 lines and (4) a silicon intensifier target tube. *Advice Received From:* Naval Research Laboratory, November 24, 1993.

Docket Number: 93-126. *Applicant:* Research Foundation, State University of New York, Stony Brook, NY 11794. *Instrument:* Microstructure Profiler. *Manufacturer:* Seimac Ltd., Canada. *Intended Use:* See notice at 58 FR 55043, October 25, 1993. *Reasons:* The foreign instrument provides velocity and temperature measurements at sub-centimeter resolution using rapid sampling and extra velocity microstructure sensors. *Advice Received From:* National Oceanic and Atmospheric Administration and a private research institution, November 24, 1993.

The Department of Energy, Naval Research Laboratory, National Oceanic and Atmospheric Administration and a private research institution advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

University of California et al.; Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC.

Docket Number: 93-030R. *Applicant:* University of California, San Diego, San Diego, CA 92121. *Instrument:* Wave Measuring Equipment. *Manufacturer:* Datawell, BV, The Netherlands. Original notice of this resubmitted application was published in the **Federal Register** of April 26, 1993.

Docket Number: 93-145. *Applicant:* Brigham Young University, Purchasing Department, C-144 ASB, Provo, UT 84602. *Instrument:* Microvolume Stopped Flow Spectrofluorimeter, Model SX.17MV. *Manufacturer:* Applied Photophysics, United Kingdom. *Intended Use:* The instrument will be used for studies of vitamin B6 containing enzymes in experiments that deal with changes in spectral properties upon substrate addition with the objective of characterizing kinetic and mechanistic properties. In addition, the instrument will be used in graduate research courses in chemistry and biochemistry to teach fundamental research techniques to undergraduate students. *Application Received by Commissioner of Customs:* November 16, 1993.

Docket Number: 93-146. *Applicant:* Hunter College, Biological Sciences Department, 695 Park Avenue, Room 315HN, New York, NY 10021. *Instrument:* Northern Light Illuminator. *Manufacturer:* Imaging Research, Inc., Canada. *Intended Use:* The instrument is part of an image analysis system which will be used to quantitate mRNA levels in coronal sections of brain tissue which will allow the cellular determination of shifts in neuronal plasticity due to environmental challenge. *Application Received by*

Commissioner of Customs: November 17, 1993.

Docket Number: 93–147. *Applicant:* Department of Veterans Affairs, Middleville Road, Northport, NY 11768. *Instrument:* Electron Microscope, Model JEM 1010. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* The instrument will be used to examine various types of specimens of tumors, blood cells, brain, spinal cord, heart muscle, kidneys and lymph nodes, etc., from patients with pathological disorders. In addition, the instrument will be used on a one-to-one basis to train and teach staff members and medical residents in pathology, all aspects of Diagnostic Electron Microscopy. *Application Received by Commissioner of Customs:* November 18, 1993.

Docket Number: 93–148. *Applicant:* U.S. Department of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, John C. Stennis Space Center, Building 1103, Room 218, Stennis Space Center, MS 39529–6000. *Instrument:* Sounder System, Model EK 500. *Manufacturer:* Simrad Subsea, Norway. *Intended Use:* The instrument will be used on a research ship to acoustically sample fish densities, over a wide expanse of ocean during population density studies. *Application Received by Commissioner of Customs:* November 18, 1993.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-F

National Institute of Standards and Technology

Meeting to Discuss an Opportunity to Join a Cooperative Research and Development Consortium for Improving the Service Life Prediction of Organic Coating Systems

AGENCY: National Institute of Standards and Technology, DOC.

ACTION: Meeting notice.

SUMMARY: The National Institute of Standards and Technology (NIST) in cooperation with the Federal Highway Administration (FHWA) invites interested parties to attend a meeting on February 1, 1993 to discuss the possibility of setting up a cooperative research consortium on the development of new technology to develop techniques for improved service life prediction of coatings. Parties interested in participating in the consortium should be prepared to invest adequate resources in the collaboration and be firmly committed to the goal of developing new coating service life prediction technology.

Any program undertaken will be within the scope and confines of The Federal Technology Transfer Act of 1986 (Pub. L. 99–502, 15 U.S.C. 3710a), 2 which provides federal laboratories including NIST, with the authority to enter into cooperative research agreements with qualified parties. Under this law, NIST may contribute personnel, equipment and facilities—but no funds—to the cooperative research program.

The meeting will be held on February 1, 1994 at 8:30 a.m., room B221—Building 226 at NIST in Gaithersburg, MD, for interested parties. The meeting will discuss the possible formation of a research consortium including NIST, FHWA, industry and academia to conduct research in this area. This is not a grant program.

DATES: The meeting will be held on February 1, 1994. Interested parties should contact NIST to confirm their attendance at the address, telephone number or FAX number shown below no later than January 15, 1994.

ADDRESSES: The meeting will be held at 8:30 a.m., room B221—Building 226, National Institute of Standards and Technology, Gaithersburg, MD.

FOR FURTHER INFORMATION CONTACT: Dr. Jonathan Martin, Building 226, room B348, National Institute of Standards and Technology, Gaithersburg, MD 20899. Telephone: 301–975–6717; FAX: 301–990–6891.

Dated: December 20, 1993.

Samuel Kramer,

Associate Director.

National Oceanic and Atmospheric Administration

[I.D. 122293A]

Pacific Fishery Management Council; Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's Groundfish Permit Review Board (GPRB) will meet on January 18–20, 1994, at the Holiday Inn Crowne Plaza, Portola B Room, 600 Airport Boulevard, Burlingame, CA; telephone: (415) 340–8500. The meeting will begin on January 18 at 1 p.m., and reconvene on January 19 and 20 at 8 a.m. The meeting will not recess for the day until the business for each day is completed.

The GPRB will review appeals on NMFS denials of applications for West Coast groundfish limited entry permits.

This meeting is physically accessible to the disabled. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas Bigford at (206) 526–6140 at least 5 days prior to the January 18–20 meeting date.

FOR FURTHER INFORMATION CONTACT: Thomas Bigford, NMFS, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115; telephone: (206) 526–6140.

Dated: December 23, 1993.

[I.D. 122293B]

Pacific Fishery Management Council; Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Salmon Technical Team (STT) will meet on January 18–21, 1994, at the Council's office, 2000 SW First Avenue, Suite 420, Portland, OR; telephone: (503) 326–6352. The meeting will begin on January 18 at 10 a.m., and continue each day for the remainder of the week, from 8 a.m. until 5 p.m.

The STT will draft the "Review of 1993 Ocean Salmon Fisheries." The final report will be distributed to the public and reviewed by the Council at its March meeting in Portland, OR.

This meeting is physically accessible to the disabled. Requests for sign language interpretation or other auxiliary aids should be directed to Michelle Perry Sailer at (503) 326–6352 at least 5 days prior to the meeting date.

FOR FURTHER INFORMATION CONTACT: John Coon, Fishery Management Coordinator (Salmon), Pacific Fishery Management Council, 2000 SW First Avenue, suite 420, Portland, OR 97201; telephone: (503) 326–6352.

Dated: December 23, 1993.

Richard H. Schaefer,

Director, Office of Fisheries, Conservation and Management, National Marine Fisheries Service.

[I.D. 122293C]

South Atlantic Fishery Management Council; Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The South Atlantic Council's (Council) Billfish Advisory Panel (Panel) will meet on January 20–21, 1994, at the Town and Country Inn, 2008 Savannah Highway, Charleston, SC; telephone: (803) 571–4366. The meeting will be held on January 20 from 1 p.m. until 5 p.m., and on January 21, from 8:30 a.m. until 12 noon.

The panel will review the status of the billfish stocks and will discuss recommendations for future management.

This meeting is physically accessible to the disabled. Requests for sign language interpretation or other auxiliary aids should be directed to Carrie Knight at the council address below by January 13.

FOR FURTHER INFORMATION CONTACT: Carrie Knight, Public Information Officer, South Atlantic Fishery Management Council, One Southpark Circle, suite 306, Charleston, SC 29407–4699; telephone: (803) 571–4366.

Dated: December 23, 1993.

BILLING CODE 3510-22-F

Technology Administration

Public Meeting to Discuss Proposed Cooperation Between the Technology Administration and Japan's Agency of Industrial Science and Technology

AGENCY: Technology Administration, Commerce.

ACTION: Notice of public meeting.

SUMMARY: This is to notify interested parties of a public meeting to be held at the offices of the U.S. Department of Commerce to provide a forum for discussion of possible activities under a proposed Memorandum of Understanding (hereinafter "MOU") to be entered into between the Technology Administration (hereinafter "TA"), U.S. Department of Commerce, and the Agency of Industrial Science and Technology (hereinafter ("AIST"), of Japan's Ministry of International Trade and Industry (hereinafter "MITI"), and of possible joint research activities to be undertaken thereunder.

Under the proposed MOU, the parties will engage in mutual research, development, collaboration and other joint activities in the field of civil industrial technologies.

TIME AND PLACE: This public meeting will take place on January 11, 1994 from 1 p.m. to 5 p.m. The meeting will take place at the Main Commerce Building, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Please fax Dr. Phyllis Genther Yoshida at (202) 482–4826 one week prior to the meeting for a reservation and the specific location.

AGENDA:

1. Discuss the general purpose and scope of the MOU and the activities referenced therein.

2. Discuss possible participation in MOU-related activities by private and public sector entities.

3. Discuss intended benefits to U.S. and Japanese industry and commerce.

4. Discuss possible initiatives and enhanced incentives to improve U.S. access to Japanese technology, covering the areas of personnel issues, notification of research opportunities, scientific and technical information, and centers in Japan to provide support for U.S. researchers.

PUBLIC PARTICIPATION: The meeting will be open to the public, and will consist primarily of an open discussion. Seats will be available on a first-come first-served basis.

FOR FURTHER INFORMATION CONTACT: Dr. Phyllis Genther Yoshida, Director, Japan Technology Program, Office of International Technology Policy and Programs, Technology Administration, U.S. Department of Commerce, room 4817, 14th Street and Constitution Avenue, NW., Washington, DC 20230, fax (202) 482–4826.

Dated: December 21, 1993.

Mary L. Good,

Under Secretary for Technology.

BILLING CODE 3510-BP-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the United Mexican States

December 23, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing levels for the first year of the North America Free Trade Agreement.

EFFECTIVE DATE: January 1, 1994.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these levels, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6711. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In order to implement Annex 300–B of the North America Free Trade Agreement (NAFTA), restrictions and consultation levels for certain cotton, wool and man-made fiber textile products from Mexico are being established for the period beginning on January 1, 1994 and extending through December 31, 1994.

These restrictions and consultation levels do not apply to NAFTA originating goods, as defined in Annex 300–B, chapter 4 and Annex 401 of the agreement. In addition, restrictions and consultation levels do not apply to textile and apparel goods that are assembled in Mexico from fabrics wholly formed and cut in the United States and exported from and re-imported into the United States under U.S. tariff item 9802.00.90; or Chapter 61, 62 or 63 if, after such assembly, those goods that would have qualified for treatment under 9802.00.90 have been subject to bleaching, garment dyeing, stone-washing, acid-washing or perma-pressing. Restrictions and consultation levels will also not apply to textile and apparel goods which are exported from the United States and subsequently re-imported after repairs or alterations and entered under

Harmonized Tariff Schedule (HTS) number 9802.00.40 or 9802.00.50.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to implement levels for the 1994 period.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 58 FR 62645, published on November 29, 1993).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of NAFTA, but are designed to assist only in the implementation of certain of its provisions.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 23, 1993.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the provisions of Executive Order 11651 of March 3, 1972, as amended; and pursuant to the North America Free Trade Agreement (NAFTA) between the Governments of the United States, the United Mexican States and Canada, you are directed to prohibit, effective on January 1, 1994, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Mexico and exported during the twelve-month period beginning on January 1, 1994 and extending through December 31, 1994, in excess of the following levels:

Category	Twelve-month level
219	9,438,000 square meters.
313	16,854,000 square meters.
314	6,966,904 square meters.
315	6,966,904 square meters.
317	8,427,000 square meters.
338/339/638/639	650,000 dozen.
340/640	120,439 dozen.
347/348/647/648	650,000 dozen.
410	397,160 square meters.
433	11,000 dozen.
443	150,000 numbers.
611	1,267,710 square meters.
633	10,000 dozen.
643	155,556 numbers.

Imports charged to these category levels for the period January 1, 1993 through December 31, 1993 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the levels established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The levels set forth above are subject to adjustment in the future pursuant to the provisions of Annex 300–B of the NAFTA.

The foregoing levels do not apply to NAFTA originating goods, as defined in Annex 300–B, chapter 4 and Annex 401 of the agreement. In addition, restrictions and consultation levels do not apply to textile and apparel goods that are assembled in Mexico from fabrics wholly formed and cut in the United States and exported from and re-imported into the United States under U.S. tariff item 9802.00.90; or Chapter 61, 62 or 63 if, after such assembly, those goods that would have qualified for treatment under 9802.00.90 have been subject to bleaching, garment dyeing, stone-washing, acid-washing or perma-pressing. Restrictions and consultation levels will also not apply to textile and apparel goods which are exported from the United States and subsequently re-imported after repairs or alterations and entered under Harmonized Tariff Schedule (HTS) number 9802.00.40 or 9802.00.50.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 93–31845 Filed 12–28–93; 8:45 am]

BILLING CODE 3510–DR–F

Termination of the Requirement for an ITA–370P Form for Textile Products Exported From Mexico Under the Special Regime Program

December 22, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs terminating the requirement for a ITA–370P form for goods exported under the Special Regime Program.

EFFECTIVE DATE: January 1, 1994.

FOR FURTHER INFORMATION CONTACT: Lori Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–3400.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Pursuant to the North America Free Trade Agreement, effective on January 1, 1994, shipments of products exported from Mexico and entered into the United States under Harmonized Tariff Schedule (HTS) provision 9802.00.90.00 (formerly the Special Regime Program) will no longer require an ITA–370P form (Shippers Export Declaration)

In the letter published below, the Chairman of CITA directs the Commissioner of Customs, effective on January 1, 1994, to amend the existing export visa and certification requirements for Mexico to terminate the requirement that shipments of U.S formed and cut fabric from Mexico be accompanied by an ITA–370P form (Shippers Export Declaration). Also effective on January 1, 1994, U.S. Customs will neither accept nor sign the ITA–370P form for such shipments.

See 53 FR 32421, published on August 25, 1988.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 22, 1993.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on August 22, 1988, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive establishes export visa and exempt certification requirements for certain textiles and textile articles, produced, manufactured or assembled in Mexico

Effective on January 1, 1994, you are directed to terminate the requirement that shipments of apparel made from U.S. formed and cut fabric from Mexico entered into the United States under Harmonized Tariff Schedule (HTS) provision 9802.00.90.00 (formerly the Special Regime Program) be accompanied by an ITA–370P form (Shippers Export Declaration). Also effective on January 1, 1994, you are directed to neither accept nor sign the ITA–370P form for such shipments.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 93–31846 Filed 12–28–93; 8:45 am]

BILLING CODE 3510–DR–F

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange Options on One-Year U.S. Treasury Bill Futures Contracts, and Amendments to, and Reactivation of, the Underlying Dormant One-Year U.S. Bill Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of a proposed commodity option contract and amendments to the underlying futures contract.

SUMMARY: The Chicago Mercantile Exchange (CME or Exchange) has applied for designation as a contract market in options on the One-Year U.S. Treasury Bill futures contract. In addition, the CME proposes to amend and reactivate the dormant One-Year U.S. Treasury Bill futures contract that would underlie the proposed contract. The Director of the Division of Economic Analysis (Division) of the Commission, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposals for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATES: Comments must be received on or before January 28, 1994.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the CME One-Year U.S. Treasury Bill futures and option contacts.

FOR FURTHER INFORMATION CONTACT: Please contact Stephen Sherrod of the Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW, Washington, DC 20581, telephone 202–254–7303.

SUPPLEMENTARY INFORMATION: Regarding the dormant One-Year U.S. Treasury Bill futures contract, the CME proposes to convert the physical delivery procedures to cash settlement procedures based on the highest accepted yield at the first one-year U.S. Treasury bill auction during the futures contract month. Further, the CME proposes to double the contract size to $500,000. In addition, the CME proposes to increase the speculative position limits.

Copies of the terms and conditions will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the CME in support of the application for contract market designation and the amendments to the underlying futures contract may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the proposed terms and conditions, or with respect to other materials submitted by the CME. should send such comments to Jean A. Webb. Secretary, Commodity Futures Trading Commission, 2033 K Street, NW, Washington, DC 20581 by the specified date.

Issued in Washington, DC, on December 22, 1993.

Blake Imel,

Acting Director.

Department of the Army

Removal of DECCA Electronic Lattices From DMA Charts

AGENCY: Defense Mapping Agency, DOD.

ACTION: Notice.

SUMMARY: This notice announces that the Defense Mapping Agency intends to begin removing DECCA Electronic Navigation Lattices from new editions of charts commencing January 1, 1994. With the advent of the Global Positioning System (GPS), the requirement from DECCA navigation has diminished.

ADDRESSES: Director, Defense Mapping Agency, ATTN: PRB, Mail Stop A–13, 8613 Lee Highway, Fairfax, Virginia 22031–2127.

FOR FURTHER INFORMATION CONTACT: Mr. Jace Singler, (703) 385–9260.

Kenneth L. Denton,

Army Federal Register Liaison Office.

BILLING CODE 3710–08–M

Military Freight Traffic Rules Publication (MFTRP) No. 1A: Proposed Changes

AGENCY: Military Traffic Management Command, DoD.

ACTION: Notice.

SUMMARY: The Military Traffic Management Command proposes to amend the procedures used to reimburse commercial motor carriers for the cost of overdimensional and overweight permits. The amendment has two parts. The first part is the cancellation of Item 416, Overweight Permit Shipments (OQ), and Item 417, Overdimensional Permit Charges (OD), shown in MTMC Military Freight Traffic Rules Publication (MFTRP) No. 1A. These items provide individual state rates and charges for overweight and overdimensional shipments that require special permits. The second part of the amendment is a new Item 421, Overdimensional/Overweight Permits, to be published in MFTRP No. 1A. This item will read as follows:

Item 421 Overdimensional/Overweight Permits

1. When a carrier is required to obtain hauling permits in connection with overdimensional and/or overweight articles, the actual fee paid to any state, county or municipality for the permit, will be assessed, in addition to all other applicable charges. The carrier will be compensated for obtaining the permit through Item 55, ADVANCING CHARGES.

2. Definitions.

a. Overdimensional shipment. A shipment containing one or more non-divisible articles which measure in excess of 576 inches (48 feet) in length, 102 inches (8 feet, 6 inches) in width, or 162 inches (13 feet, 6 inches) in height from the ground to the top of the article after loading.

b. Overweight shipment. A shipment containing non-divisible article which exceeds 48,000 pounds (45,000 pounds on lowboy equipment).

3. The shipper will advise the carrier that a shipment is overdimensional/overweight when equipment is ordered. The carrier will provide the shipper a copy or facsimile of the origin state permit at time of loading. The carrier will provide the estimated permit costs

and ancillary charges to the shipper no later than 24 hours prior to loading. The shipper will cite the fees on the Government Bill of Lading (GBL) and include them in the estimated charges. The carrier will attach a copy of the permit receipt to the GBL it submits for payment.

DATES: Comments must be received on or before January 28, 1994.

ADDRESSES: Comments may be mailed to Headquarters, Military Traffic Management Command, ATTN: MTOP–T–NI, 5611 Columbia Pike, Falls Church, VA 22041–5050.

FOR FURTHER INFORMATION CONTACT: Mr. John Alexander, (703) 756–1870.

SUPPLEMENTARY INFORMATION: Carriers are currently reimbursed for overweight and overdimensional permit costs based on charges published in Items 416 and 417, respectively, of MFTRP No. 1A. The charges consist of individual state permit fees. As states change their fees, Items 416 and 417 become outdated. In lieu of frequently updating these items, MTMC is proposing to reimburse carriers for actual permit costs incurred plus ancillary expenses. In Federal Register Volume 58, No. 51, MTMC proposed that carriers should include permits costs in their linehaul rates. Carrier comments opposed to this proposal ca used MTMC to reexamine this issue, resulting in the current proposal.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3710–08–M

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Naval Research Advisory Committee Panel on Littoral Warfare/ Amphibious Warfare will meet on January 10, 11, and 12, 1994. The meeting will be held at MacDill Air Force Base, Tampa, Florida. The meeting will commence at 8:00 a.m. and terminate at 5:45 p.m. on January 10; commence at 8:00 a.m. and terminate at 6:00 p.m. on January 11; commence at 8:00 a.m. and terminate at 5:00 p.m. on January 12, 1994. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide the Department of the Navy with (1) an assessment of the capabilities and readiness of the U.S. Navy and Marine Corps to effectively conduct littoral and amphibious warfare operations, and (2) recommendations for technological investments that can improve performance while reducing risk to Marine and Naval forces. The agenda will include briefings and discussions related to 21st century advanced land warfare; joint littoral warfare training initiatives and advanced training/rehearsal decision aiding technologies; strike warfare, riverine warfare operations, and electronic warfare initiatives; offensive mining initiatives; science and technology issues impacting littoral warfare; and integrated command and control.

These briefings and discussions will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander R. C. Lewis, USN, Office of the Chief of Naval Research, 800 North Quincy Street, Arlington, VA 22217-5000 Telephone Number: (703) 696-4870.

Dated: December 22, 1993

Michael P. Rummel

LCDR, JAGC, USN, Federal Register Liaison Officer.

BILLING CODE 3810-AE-F

Planning and Steering Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Planning and Steering Advisory Committee will meet January 13, 1994, from 0900 to 1530, at the Center for Naval Analyses, 4401 Ford Avenue, Alexandria, Virginia. This session will be closed to the public.

The purpose of this meeting is to discuss topics relevant to SSBN security. The entire agenda will consist of classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that all sessions of the meeting shall be closed to the public because they concern matters listed in 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact: LCDR D. B. Rich, Pentagon Room 4D534, Washington, DC 20350, Telephone Number: (703) 693-7248.

Dated: December 23, 1993.

Michael P. Rummel,

LCDR, JAGC, USN, Federal Register Liaison Officer.

BILLING CODE 3810-AE-F

DEPARTMENT OF EDUCATION

[CFDA Nos.: 84.183A, 84.183D, 84.183E, 84.183F]

Direct Grant Programs and Fellowship Programs; Extension of Closing Dates

AGENCY: Department of Education

ACTION: Extension of closing dates.

SUMMARY: On September 24, 1993, the Department of Education published a combined application notice inviting applications for new awards for fiscal year 1994 under many of the Department's direct grant and fellowship programs. Detailed information concerning each competition was included in each program notice.

The purpose of this notice is to extend the deadline for transmittal of applications and the deadline for intergovernmental review for four programs under the Fund for the Improvement of Postsecondary Education. This action is taken as a result of the unavailability of application forms and guidelines until December 30, 1993.

The four programs affected by this extension are as follows:

- *CFDA 84.183A.* Drug-Prevention Programs in Higher Education—Institution-Wide Program (58 FR 50141, 50151, 50155–56). The revised deadline for transmittal of applications is February 25, 1994. The revised deadline for intergovernmental review is April 26, 1994.
- *CFDA 84.183D.* Drug-Prevention Programs in Higher Education—Special Focus Competition: Specific Approaches to Prevention Projects (Invitational Priority: Higher Education Consortia for Drug Prevention) (58 FR 50141, 50152, 50156–57). The revised deadline for transmittal of applications is March 11, 1994. The revised deadline for intergovernmental review is May 10, 1994.
- *CFDA 84.183E.* Drug-Prevention Programs in Higher Education—Analysis and Dissemination Program Competitions: Dissemination of Successful Projects (58 FR 50141, 50152, 50157) The revised deadline for transmittal of applications is February 14, 1994. The revised deadline for intergovernmental review is April 15, 1994.
- *CFDA 84.183F.* Drug-Prevention Programs in Higher Education—Analysis and Dissemination Program Competitions: Analysis Projects (58 FR 50141, 50152, 50157–58). The revised deadline for transmittal of applications is February 16, 1994. The revised deadline for intergovernmental review is April 17, 1994.

FOR APPLICATIONS OR INFORMATION CONTACT: The Fund for the Improvement of Postsecondary Education (FIPSE), U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5175. Telephone: (202) 205–0104 to order applications; or (202) 708–5750 for information. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Information about the Department's funding opportunities, including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server at GOPHER.ED.GOV (under Announcements, Bulletins, and Press Releases). However, the official application notice for a discretionary grant competition is the notice published in the Federal Register.

Program Authority: 20 U.S.C. 3211.

Dated: December 22, 1993.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

[FR Doc. 93–31795 Filed 12–28–93; 8:45 am]

BILLING CODE 4000–01–P

Direct Grant Programs and Fellowship Programs; Correction

AGENCY: Department of Education.

ACTION: Correction.

In the notice inviting applications for new awards for fiscal year 1994, beginning on page 50138 in the issue of Friday, September 24, 1993, make the following corrections:

On page 50141, in the chart for Office of Postsecondary Education, in the listing for CFDA No. 84.103, Training Program for Federal TRIO Programs, in the fourth column the application deadline date should read "3/31/94."

On page 50154, in the application notice for CFDA No. 84.103, Training Program for Federal TRIO Programs, in the first column, paragraph nine, Estimated Award Date, the date should read "August 1, 1994."

FOR FURTHER INFORMATION CONTACT: May J. Weaver, U.S. Department of Education, 400 Maryland Avenue, SW., room 5065, Washington, DC 20202–5249. Telephone (202) 708–4804. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Information about the Department's funding opportunities, including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server at GOPHER.ED.GOV (under Announcements, Bulletins, and Press Releases). However, the official application notice for a discretionary grant competition is the notice published in the Federal Register.

Dated: December 22, 1993.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

[FR Doc. 93–31796 Filed 12–28–93; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Finding of No Significant Impact; Proposed B-Factory (Asymmetric Electron Positron Collider)

AGENCY: U.S. Department of Energy.

ACTION: Finding of no significant impact.

SUMMARY: The Department of Energy (DOE) issues this Finding of No Significant Impact (FONSI) on its proposal to construct and operate the B-Factory. This finding is based on the DOE B-Factory Environmental Assessment (EA), DOE/EA–0882, September 1993, which evaluated the environmental effects of construction and operation of a proposed B-Factory particle accelerator (Asymmetric Electron Positron Collider) at either the Stanford Linear Accelerator Center (SLAC) near Menlo Park, California, or at the Cornell Electron Storage Ring (CESR) in Ithaca, New York. The B-Factory would produce certain subatomic particles, known as B mesons, that are important to high-energy physics. Subsequent to the release of the EA and Proposed FONSI, the Secretary of Energy announced on October 4, 1993, that SLAC had been selected as DOE's preferred site.

Based on the analyses in the EA, DOE has determined that the proposed action is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4321 et seq. Three documents were received from the public which provided comments on the proposed FONSI, EA or project. The Town of Ithaca, New York, indicated that it concurred with the FONSI. The Department of Planning of Tompkins County, New York, expressed concern about the possibility of spills of hazardous materials near Cascadilla Creek and requested copies of the Spill Prevention Control and Countermeasures Plan and the Stormwater Pollution Prevention Plan. A citizen from Woodside, California, wrote a letter expressing concerns with alternative energies and the economics of efficiency improvements which would generate more jobs. No Federal or State agencies responded. DOE has reviewed the comments received and has concluded that no new information was provided that would change the determination that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA, 42 U.S.C. 4321 et seq. Therefore, an environmental impact statement is not required. Further, it is DOE's conclusion that the comments provided no new information that would cause DOE to change its mind with regard to the selection of SLAC as the preferred site.

FOR FURTHER INFORMATION CONTACT: Requests for further information on the proposed project or for copies of the EA and FONSI should be sent to: James K. Farley, U.S. Department of Energy, Office of Energy Research (ER–8), 1000 Independence Avenue, SW., Washington, DC 20585, (301) 903–2314.

The FONSI, EA and related documents are also available for public review at the DOE public reading rooms listed below.

California: U.S. Department of Energy, San Francisco Operations Office, 1301 Clay Street, Room 700N, Oakland, California 94612, (510) 637–1762

District of Columbia: U.S. Department of Energy, Freedom of Information

Reading Room, Forrestal Building, Room 1E–90, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6020

New York: Newman Laboratory, Cornell University, Ithaca, New York 14853–5001, (607) 255–4951

For information on the availability of specific documents and the hours of operation of the DOE reading rooms, please contact reading rooms at the telephone numbers provided.

For general information on the DOE NEPA review process, contact: Carol M. Borgstrom, U.S. Department of Energy, Office of NEPA Oversight (EH–25), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION:

Proposed Action

The proposed action is to build a B-Factory at one of two locations, SLAC or Cornell, by modification of existing collider or accelerator facilities at either site. At SLAC, the existing facility is known as the Positron-Electron Colliding-Beam Storage Ring Project (PEP); at Cornell, the existing facility is called the Cornell Electron Storage Ring (CESR). After the EA and the Proposed FONSI were issued, DOE announced that SLAC was chosen as the preferred alternative site for the B-Factory.

B-Factory at SLAC

Construction and operation of a B-Factory at SLAC, referred to as PEP–II and identified by the Secretary as the preferred site, would involve collaboration of SLAC, Lawrence Berkeley Laboratory (LBL), and Lawrence Livermore National Laboratory (LLNL), as well as other institutions, in the design, assembly, and testing of components and equipment for the B-Factory. No conventional construction or modification to surface buildings would be required for PEP–II. The existing conventional facilities for PEP consist of beam housings, research halls, support buildings, roads, earthwork, fencing, landscaping, electrical and mechanical utilities, and the sanitary-sewer and storm-drain systems. These existing systems and facilities have adequate capacity for PEP–II.

The upgrade of the existing PEP collider to the PEP–II B-Factory would involve:

(1) The removal and disassembly of various components such as magnets, vacuum chambers, etc.;

(2) The refurbishment of reusable PEP components;

(3) The fabrication of new components at SLAC, LBL, LLNL, or other collaborating institutions;

(4) The assembly of PEP–II components into the existing tunnels and detection facilities at SLAC;

(5) Minor modifications to the linear accelerator focusing and transport systems; and

(6) Disposal of some components that cannot be reused, possibly as low-level radioactive waste.

Operation of PEP–II is expected to begin in 1998, with an estimated operational life for experimentation of 10–15 years. During operations, positrons and electrons would be accelerated in a linear accelerator and injected into storage rings where they would circulate in opposite directions, until they are brought together and collide in an interaction hall of a tunnel, thereby producing the B mesons for observation and study.

CESR–B Alternate Site

The upgrade of the existing CESR accelerator at Cornell to a B-Factory, referred to as the CESR–B, would involve: (1) The removal and disassembly of existing components; (2) conventional construction to provide approximately 49,500 square feet of additional space for electrical and mechanical equipment and x-ray beam lines; (3) conventional construction to add 2,900 square feet to the tunnel flare; (4) construction to expand existing routes of electric transmission lines; (5) reuse of some CESR components in CESR–B; and (6) disposal of some components, with possibly a few pieces disposed of as low-level radioactive waste. Component design, assembly, and construction at Cornell would take 3–4 years. Operation is expected to begin in 1998, with an estimated life of about 15 years.

Alternatives

Two alternatives to the proposed action were considered: (1) No action; and (2) the construction and operation of a B-Factory at a DOE facility other than SLAC or Cornell. Under the no action alternative, the B-Factory would not be built, and existing SLAC and Cornell facilities would continue to operate until the termination of their useful lifetime. At SLAC, the existing PEP facility would remain idle until new uses are determined or it is decommissioned. At Cornell, the existing CESR would continue to operate for about five years. The alternative to construct and operate a B-Factory at another DOE facility was not evaluated further in the EA due to its lack of feasibility in meeting the objectives of time, cost, and technical potential.

Environmental Impacts

The EA analyzed the impacts of constructing and operating a B-Factory at both the SLAC and Cornell sites for effects from construction, normal operations, accidents, decontamination and decommissioning, and cumulative and long term impacts. The EA considered impacts to air and water quality, land use, biological resources, noise, traffic, and hazardous materials usage. As described in the EA, there would be no significant impacts from construction or upgrade of the existing facilities at SLAC or Cornell.

PEP–II Alternate Site

Operation of the PEP–II would not significantly affect air and water quality, worker health and safety, public health and safety, and waste management systems. The impacts of ionizing radiation produced during operation are anticipated to be negligible. Nearly all of the radiation would be absorbed by the self-shielding copper vacuum chamber, the concrete tunnel walls, and the surrounding earth. Induced radioactivity could occur in a small number of components or devices. The number of workers that would be exposed to measurable amounts of radiation from PEP–II in the course of normal operations would not exceed 50. Based on a dose-to-risk conversion factor of 4×10^{-4} latent cancer fatalities per person-rem for adult workers, the risk of fatal cancer to the potentially exposed population of 50 workers over the 15-year operating period is less than 0.03. There are no persons residing within 0.3 km of the SLAC boundary. The population residing between 0.3 km and 0.5 km from the SLAC boundary is about 1200 people. Based on a dose-to-risk conversion factor of 5×10^{-4} latent cancer fatalities per person-rem for the whole population, the estimated latent cancer fatalities for this population over the 15-year operation of PEP–II is less than 0.002. (A conversion factor of 5×10^{-4} is used for the general population to reflect the presence of children, who appear to be at greater risk of dying from cancer as a result of exposure to radiation than adults.)

Impacts from radiological accidents would not significantly affect worker or public health and safety at PEP–II. The most serious accident involving worker and/or public exposure to radiation would be beam dumps from component and sub-system failures. The maximum potential dose equivalent at the PEP–II site boundary of the most serious radiation accident would be less than 0.005 mrem in a year, far below the operating limit of 10 mrem/year. For a population of 1,200, an exposure of 0.005 mrem/year results in a population dose of 0.09 person-rem over 15 years; less than 5×10^{-5} latent cancer fatalities.

Decontamination and decommissioning (D&D) activities at PEP–II are anticipated to have negligible impacts to worker and public health and safety. Non-radiological effects would be similar to those involved in facility construction: potential short-term effects to air and water quality, noise, dust, vehicle emissions, storm-water management, and waste handling and disposal. Radiological impacts are anticipated to be minimal through controlled storage of material with residual radioactivity and shipment to an approved low-level waste disposal facility.

No cumulative or measurable long-term environmental impacts are expected from the proposed PEP–II facility. The contributions of waste products from construction, operation, maintenance, and D&D activities would add to waste accumulation and the environmental impacts associated with disposal facilities. Their contribution to such impacts would be negligible. PEP–II operations are not expected to cause soil or groundwater activation. The radiological dose equivalent attributable to PEP–II operations would have negligible contributions to the cumulative impact of SLAC operations. There are no current or reasonably foreseeable major construction projects in the immediate vicinity of SLAC; thus, the PEP–II facility would not have any substantial effects on local offsite construction.

CESR–B Alternate Site

Operation of the CESR–B would not significantly affect air and water quality, worker health and safety, public health and safety, and waste management systems. The impacts of ionizing radiation produced during operation are anticipated to be negligible. Nearly all of the synchrotron radiation would be absorbed by the copper vacuum chamber. Based on an occupation risk factor of 4×10^{-4} fatal cancers/person-rem, the number of potential fatal cancers for radiation workers is 0.024, and for non-radiation workers is 0.0006. The dose to the general public over the 15-year operational life of the facility is estimated to be less than 0.1 person-rem, or less than 0.00005 fatal cancers (using 5×10^{-4} fatal cancers/person-rem risk factor).

No cumulative or measurable long-term environmental impacts are expected from the proposed CESR–B facility. The contributions of waste products from construction, operation, maintenance, and D&D activities would be negligible. CESR–B operations are not expected to cause soil or groundwater activation. The radiological dose equivalent attributable to CESR–B operations would make a negligible contribution to the cumulative impact of radiological operations at Cornell. The only other source of radiation exposure on campus is the Ward research reactor which shares no facilities with CESR, and would not be a source of cumulative exposures to workers or the public. The cumulative radioactive exposures to the public are anticipated to be negligible.

Determination

Based on the analyses in the EA and the comments received on the proposed FONSI, the DOE has determined that the proposed construction and operation of a B-Factory at SLAC does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the NEPA. Therefore, an environmental impact statement is not required.

Issued in Washington, DC this 13th day of December, 1993.

Tara O'Toole,

Assistant Secretary, Environment, Safety and Health.

BILLING CODE 6450–01–P

Energy Information Administration

Inventory of Current DOE Reporting and Recordkeeping Requirements

AGENCY: Energy Information Administration, DOE.

ACTION: Department of Energy's inventory of energy information collections, including reporting and recordkeeping requirements.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) herein publishes an inventory of energy information collections (including reporting and recordkeeping requirements) which had Office of Management and Budget (OMB) approval of October 1, 1993, the first day of Fiscal Year (FY) 1994. The inventory is published for the use of respondents and other interested parties. DOE's management and procurement collections are the responsibility of DOE's Assistant Secretary for Human Resources and Administration and are not included in these notices.

The listing that follows includes DOE energy information collections that had OMB approval as of October 1, 1993. For each information collection utilizing a structured form, Part I lists the current DOE control or form number, the title of the requirement, the OMB control number, and the OMB approval expiration date. Part II lists those information collections which do not utilize structured forms and the corresponding citations from the Code of Federal Regulations.

FOR FURTHER INFORMATION CONTACT: Herbert Miller, Energy Information Administration (EI–73), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 254–5346. Information on the availability of single, blank copies of those information collections utilizing structured forms can be obtained by contacting the National Energy Information Center (EI–231), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–8800.

SUPPLEMENTARY INFORMATION: As DOE's energy information collections are submitted for review and approval to OMB during FY 1994 (October 1, 1993 through September 30, 1994), **Federal Register** notices will be published informing the public to that effect. Such notices not only provide an opportunity for the public to review and comment on the collections but also notify the public of proposed changes to the inventory. Questions concerning the inventory or the changes that take place during FY 1994 may be directed to Mr. Miller at the address above.

STATUTORY AUTHORITY: Section 2(a) of the Paperwork Reduction Act of 1980 (Pub. L. 96–511), which amended Chapter 35 of title 44 United States Code (See 44 U.S.C. 3506(a) and (c), (1).

Issued in Washington, DC, December 20 1993.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

VOL 58 ISS 248 DE 29 1993 UMI

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. ER93–925–000, et al.]

New England Power Service, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

December 21, 1993.

Take notice that the following filings have been made with the Commission.

1. New England Power Service

[Docket No. ER93–925–000]

Take notice that on November 22, 1993, England Power Service on behalf of New England Power Company tendered for filing an amendment in the above-referenced docket.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

2. PacifiCorp

[Docket No. ER94–264–000]

Take notice that PacifiCorp on December 16, 1993, tendered for filing in accordance with the Commission's Order pertaining to agreements involving final amnesty for jurisdictional service and waiver of notice, issued July 30, 1993 under Docket No. PL93–2–002, the Contract for Sale of Electric Power and Energy and for Operation and Maintenance Services between the United States Bureau of Reclamation and PacifiCorp dated October 6, 1960.

Copies of this filing were supplied to the United States Bureau of Reclamation, the Public Utility Commission of Oregon and the Utah Public Service Commission.

PacifiCorp requests waiver of prior notice requirements be granted.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

3. Wisconsin Electric Power Co.

[Docket No. ER94–242–000]

Take notice that Wisconsin Electric Power Company (Wisconsin Electric) on December 14, 1993, tendered for filing an amendment to the interchange agreement between itself and Madison Gas and Electric Company (MG&E). The amendment would replace Service Schedule A—Limited Term Power and Energy with Service Schedule A—Negotiated Capacity and Energy.

Wisconsin Electric requests an effective date of sixty days after filing. Wisconsin Electric is authorized to state that MG&E joins in the requested effective date.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

4. El Paso Electric Co.

[Docket No. ER94–241–000]

Take notice that on December 14, 1993, El Paso Electric Company (EPE) requested the Commission to disclaim jurisdiction over an agreement between EPE and Texas-New Mexico Power Company (TNP) which provides the terms and conditions for participation in the construction, operation, maintenance and use of the Amrad to Artesia 345 kV transmission facilities and DC terminal by EPE and TNP, or, if the Commission asserts jurisdiction, to accept the agreements for filing to become effective December 8, 1981.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

5. PacifiCorp; Public Service Company of Colorado

[Docket No. ER94–240–000]

Take notice that on December 14, 1993, PacifiCorp tendered for filing on behalf of Public Service Company of Colorado (PSCo) and itself, in accordance with 18 CFR part 35 of the Commission's Rules and Regulations, revisions to the Power and Transmission Services Agreement among PSCo, Tri-State Generation and Transmission Association, Inc. (Tri-State) and PacifiCorp (PSCo Rate Schedule FERC No. 50 and PacifiCorp Rate Schedule FERC No. 319).

Copies of this filing have been supplied to PSCo, Tri-State, the Colorado Public Utilities Commission, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

6. Jersey Central Power & Light Company; Metropolitan Edison Company; Pennsylvania Electric Company

[Docket No. ER94–236–000]

Take notice that on December 13, 1993, Jersey Central Power & Light Company, Metropolitan Edison Company and Pennsylvania Electric Company (the GPU Electric Utilities) tendered for filing pursuant to Rule 205 of the Commission's Rules of Practice and Procedure (18 CFR 385.205) a proposed rate schedule change relating to the allocation among the GPU electric utilities of their respective Forecast Capacity Responsibility and the determination of their respective Annual Size Factors under the GPU System Power Pooling Agreement. The subject rate change, which was filed in response to the Orders of the Federal Energy Regulatory Commission issued July 30, 1993 and October 19, 1993, provides such data for periods beginning in 1976.

Copies of the filing have been furnished to the Pennsylvania Public Utility Commission and New Jersey Board of Regulatory Commissioners.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

7. Puget Sound Power & Light Co.

[Docket No. ER94–200–000]

Take notice that on November 30, 1993, Puget Sound Power & Light Company (Puget) tendered for filing an initial rate schedule between the United States of America Department of Energy acting by and through the Bonneville Power Administration ("Bonneville"), Public Utility District No. 1 of Chelan

County, Washington ("District") and Puget, executed December 23, 1957 (the "Agreement"). A copy of the filing was served upon Bonneville and District.

Puget states that the Agreement relates to Bonneville's provision of transmission services from District to Puget. The Agreement also provides that the amounts of energy to be delivered by Bonneville to Puget are to be the amounts deemed to be made available to Bonneville by the District, adjusted for losses incurred by Bonneville between its point of interconnection with District and its point or points of delivery to Puget.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

8. New York State Electric & Gas Corp.

[Docket No. ER94-269-000]

Take notice that on December 16, 1993, New York State Electric & Gas Corporation (NYSEG) tendered for filing an agreement with Steuben Rural Electric Cooperative, Inc. (Cooperative). Pursuant to the agreement, NYSEG agreed to construct certain tap facilities to facilitate transmission service to the Cooperative. NYSEG requests that the Commission consider the Agreement an expired CIAC agreement. NYSEG requests that the Commission consider the Agreement an expired CIAC agreement. In the alternative, NYSEG is filing the agreement as an initial rate schedule, and NYSEG requests an effective date of October 31, 1973. Accordingly, it has requested waiver of the Commission's notice requirements for good cause shown.

NYSEG states that a copy of this filing has been served by mail upon the Cooperative and upon the Public Service Commission of the State of New York.

Comment date: January 10, 1994, in accordance with Standard Paragraph E at the end of this notice.

9. Great Bay Power Corp.

[Docket No. ER94-215-000]

Take notice that on November 29, 1993, Great Bay Power Corporation (Great Bay) tendered for filing an executed copy of the service agreement for Green Mountain and Great Bay under the Tariff submitted on September 1, 1993 and amended October 14, 1993 in Docket No. ER93-924-000.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

10. Consolidated Edison Co.

[Docket Nos. ER93-208-000, ER93-209-000, ER93-210-000 and ER93-215-000]

Take notice that on December 15, 1993, Consolidated Edison Company of New York Inc. (Con Edison), in response to the Commission's Staff request for additional information, tendered for filing additional information relative to the below-listed interconnection agreements.

Docket No.	Persons receiving service
ER93-208-000	Orange & Rockland Utilities, Inc. (O&R).
ER93-209-000	New York Power Authority (NYPA).
ER93-210-000	Central Hudson Gas & Electric Corporation (CH).
ER93-215-000	NYPA.

Con Edison states that a copy of this filing has been served by mail upon O&R, NYPA and CH.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

11. Niagara Mohawk Power Corp.

[Docket No. ER94-252-000]

Take notice that Niagara Mohawk Power Corporation (Niagara Mohawk), on December 15, 1993, tendered for filing an agreement between Niagara Mohawk and Indeck Energy Services of Corinth, Inc. (Indeck) dated June 1, 1992 providing for the terms and conditions of an interconnection between Indeck's cogeneration facility and Niagara Mohawk's transmission system.

The effective date of June 1, 1992 is requested by Niagara Mohawk.

Copies of this filing were served upon Indeck and the New York State Public Service Commission.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

12. Otter Tail Power Co.

[Docket No. ER94-251-000]

Take notice that on December 15, 1993, Otter Tail Power Company (Otter Tail) tendered for filing a list of retail shared service contracts that may or may not be deemed under FERC jurisdiction. Otter Tail states that this filing is being done as a result of Docket No. PL93-3-002, Prior Notice and Filing Requirements Under Part II of the Federal Power Act.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

13. PacifiCorp

[Docket No. ER94-261-000]

Take notice that on December 16, 1993, Pacificorp tendered for filing, the Agreement for Transmission Services between Idaho Power Company and Pacific Power & Light Company (now PacifiCorp) dated September 10, 1980. In addition, PacifiCorp has requested a rate schedule designation for the Restated Transmission Services Agreement between PacifiCorp, dba PacifiCorp Electric Operations, and Idaho Power dated February 6, 1992 which has already been filed and accepted by the Commission. PacifiCorp has requested a waiver of the Commission's prior notice requirements.

Copies of this filing have been supplied to Idaho Power Company, the Idaho Public Utilities Commission, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

14. Portland General Electric Co.

[Docket No. ER94-258-000]

Take notice that on December 15, 1993, Portland General Electric Company (PGE) tendered for filing the Northern Intertie and Network Transmission Agreement (Agreement) Between the Bonneville Power Administration (BPA) and PGE. Under the Agreement PGE purchases transmission services from BPA and PGE is responsible for the replacement of transmission losses and, under some circumstances, the return of energy to BPA.

Waiver of the Commission's notice requirements is requested during the general amnesty period announced by the Commission in its order of July 30, 1993 in Docket No. PL93-2-002, to allow the Agreement to be effective January 1, 1993.

Copies of this agreement have been served on the distribution list, as included in the filing.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

15. Northern Indiana Public Service Co.

[Docket No. ER94-259-000]

Take notice that Northern Indiana Public Service Company (Northern Indiana), on December 15, 1993, tendered for filing a proposed initial rate schedule for inclusion in its FERC ElectricService Tariff in order to provide service to Greenfield Mills, Inc. (Greenfield Mills), the owner and operater of a hydroelectric facility in Lagrange County, Indiana. Pursuant to the rate schedule, Northern Indiana will purchase power generated by Greenfield Mills and, should Greenfield Mills need electricity for its operations, Northern Indiana will provide such "backfeed" power from its system supply. Northern Indiana will purchase power generated by Greenfield Mills during the 18-hour period from 6:00 a.m. to midnight at a rate of 7 mills per kilowatt hour (kWh); power generated during the remaining six hours of the day will be purchased by Northern Indiana at a rate of 3 mills per kWh. Northern Indiana sells backfeed to Greenfield Mills by offsetting two kWh of power purchased for every one kWh of power sold.

Northern Indiana is filing this rate schedule under the general "amnesty" provided in the Commission's Final Order in Docket No. PL93-2-002, 64 FERC ¶ 61,139 (1993). Northern Indiana and Greenfield Mills executed the contract at issue in this proceeding on May 1, 1959. Northern Indiana seeks Commission approval, without modification or condition, of the rate schedule as filed and a waiver of the 60-day notice requirement contained in the Federal Power Act. In addition, due to the de minimis nature of its contract with Greenfield Mills, Northern Indiana seeks waivers of certain of the filing requirements found in 18 CFR 35.12. Copies of Northern Indiana's application are on file with the Commission and are available for public inspection.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

16. PacifiCorp

[Docket No. ER94-255-000]

Take notice that on December 15, 1993, PacifiCorp, tendered for filing, in accordance with 18 CFR 35.13(a)(2)(ii) of the Commission's Rules and Regulations, PacifiCorp's proposed FERC Electric Tariff, Original Volume No. 8 (Tariff).

PacifiCorp respectfully requests pursuant to § 35.11 of the Commission's Rules and Regulations, that a waiver of prior notice be granted and that this filing be accepted for filing effective on August 2, 1991 or in the alternative effective on August 26, 1935, the approval date of the Public Utility Act of 1935.

Copies of this filing were supplied to the Public Utility Commission of Oregon.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

17. South Carolina Electric & Gas Co.

[Docket No. ER94-258-000]

Take notice that South Carolina Electric & Gas Company on December 15, 1993, tendered for filing an Interchange Agreement between South Carolina Electric & Gas Company and Oglethorpe Power Corporation.

Under the proposed Interchange Agreement between South Carolina Electric & Gas Company and Oglethorpe Power Corporation, the parties agree to service schedules for Reserve, Short Term Power, Limited Term Power, Economy Interchange and Other Energy Transactions.

Copies of this filing were served upon Oglethorpe Power Corporation.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

18. Allegheny Power Service Corporation on behalf of Mongahela Power Company, et al.

[Docket No.ER94-246-000]

Take notice that on December 14, 1993, Allegheny Power Service Corporation on behalf of Mongahela Power Company, The Potomac Edison Company and West Penn Power Company (The APS Companies) and Virginia Electric and Power Company, filed seven borderline service agreements within the Central Maine amnesty period pursuant to the Commission's Final Order—Prior Notice and Filing Requirements—Docket No. PL93-2-002. Allegheny Power Service Corporation requests waiver of notice requirements and asks the Commission to honor the proposed effective dates specified in the agreements.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

19. Iowa Electric Light and Power Co.

[Docket No. ER94-243-000]

Take notice that Iowa Electric Light and Power Company (Iowa Electric) on December 14, 1993, tendered for filing various documents evidencing Iowa Electric's agreement to provide transmission services to Iowa Public Service Company (IPS). Iowa Electric requests the Commission, pursuant to the amnesty provisions issued in the Final Order in Docket No. PL93-2-002, to waive its prior notice requirements and authorize an effective date for the rate schedule of October 1, 1987.

A copy of the filing was served upon Iowa State Utilities Board and Midwest Power Systems Inc., the successor to IPS.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

20. PacifiCorp

[Docket No. ER94-253-000]

Take notice that on PacifiCorp, on December 16, 1993, tendered for filing in accordance with Commission's Order pertaining to agreements involving final amnesty for jurisdictional service and waive of notice, issued July 30, 1993 under Docker No. PL93-2-002, the Electric Service Agreement between Emerald People's Utility District (Emerald) and PacifiCorp dated November 9, 1983.

Copies of this filing were supplied to Emerald, the Public Utility Commission of Oregon, and the Utah Public Service Commission.

PacifiCorp requests that a waiver of prior notice requirements be granted.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

21. Iowa Electric Light and Power Co.

[Docket No. ER94-247-000]

Take notice that Iowa Electric Light and Power Company (Iowa Electric) on December 14, 1993, tendered for filing an Operating and Transmission Agreement (Agreement), dated January 1, 1991, between Iowa Electric and Central Iowa Power Cooperative (CIPCO). Under the terms of the Agreement, the parties have integrated the operations of portions of their generating and transmission systems. Iowa Electric requests the Commission, pursuant to the amnesty provisions issued in the Final Order in Docket No. PL93-2-002, to waive its prior notice requirements and authorize an effective date for the rate schedule of January 1, 1991.

A copy of the filing was served upon Iowa State Utilities Board and CIPCO.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

22. Wisconsin Public Service Corporation, et al.

[Docket No. ER94-245-000]

Take notice that on December 14, 1993, Wisconsin Public Service Corporation (WPS), Wisconsin Power and Light Company (WPL), Wisconsin Electric Power Company (WEPCO) and Madison Gas and Electric Company (MGE)(collectively Joint Owners) requested that the Commission not require the filing of (1) an agreement for the construction and operation of the Edgewater 5 generating unit, together with amendments and (2) sections of

joint operating manuals which provide for the sharing of costs of transmission substations associated with the Kewaunee, Columbia and Edgewater 4 and 5 generating units. However, if the Commission should decide to require that the agreements and manuals be filed, the Edgewater 5 agreement and manuals are tendered for filing.

Comment date: January 7, 1994, in accordance with Standard Paragraph E at the end of this notice.

23. PacifiCorp

[Docket No. ER94-262-000]

Take notice that PacifiCorp on December 16, 1993, tendered for filing in accordance with the Commission's Order pertaining to agreements involving final amnesty for jurisdictional service and waiver of notice, issued July 30, 1993 under Docket No. PL93-2-002, agreements which contain provisions involving a return of energy losses associated with the purchase of Townsend-Garrison Transmission service from the Bonneville Power Administration (Bonneville).

Copies of this filing were supplied to Bonneville, The Montana Power Company, Portland General Electric Company, Puget Sound Power & Light Company, The Washington Water Power Company, the Public Utility Commission of Oregon, and the Utah Public Service Commission.

PacifiCorp requests waiver of prior notice requirements be granted and that the filed agreements be accepted for filing effective as indicated for the agreement.

Comment date: January 10, 1994, in accordance with Standard Paragraph E at the end of this notice.

24. PacifiCorp

[Docket No. ER94-267-000]

Take notice that PacifiCorp on December 16, 1993, tendered for filing in accordance with the Commission's Order pertaining to agreements involving final amnesty for jurisdictional service and waiver of notice, issued July 30, 1993 under Docket No. PL93-2-002, the Transmission and Interconnection Agreement between The Washington Water Power Company and PacifiCorp, effective January 1, 1993.

Copies of this filing were supplied to The Washington Water Power Company, the Public Utility Commission of Oregon and the Utah Public Service Commission.

PacifiCorp requests waiver of prior notice requirements be granted.

Comment date: January 10, 1994, in accordance with Standard Paragraph E at the end of this notice.

25. Southern California Edison Company

[Docket No. ER94-268-000]

Take notice that on December 16, 1993, Southern California Edison Company (Edison) tendered for filing an Amendment to the Power Contract designated Rate Schedule FERC No. 112, which has been executed by Edison and the California Department of Water Resources (CDWR): Amendment No. 3 to the Power Contract.

The Amendment provides for revised amounts of firm transmission service for an existing transmission service path.

The Amendment is proposed to become effective when executed by the Parties and accepted for filing by the Commission.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the California Department of Water Resources.

Comment date: January 10, 1993, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 93-31805 Filed 12-28-93; 8:45 am]

BILLING CODE 6717-01-P

[Docket No. ER94-239-000, et al.]

Wisconsin Public Service Corp., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

December 21, 1993.

Take notice that the following filings have been made with the Commission:

1. Wisconsin Public Service Corp.

[Docket No. ER94-239-000]

Take notice that on December 14, 1993, Wisconsin Public Service Corporation (WPSC) requested the Commission to disclaim jurisdiction over an executed Transmission Facilities Extension Agreement between WPSC and Rhinelander Paper Company which provides for the construction at Rhinelander's expense of a radial 115 Kv transmission line which WPSC will own and over which WPSC will provide Rhinelander with retail service when the line is completed by May of 1995. If the Commission asserts jurisdiction, WPSC tenders the agreements for filing.

WPSC requests the Commission to act on this submission within 60 days.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

2. Wisconsin Electric Power Co.

[Docket No. ER94-237-000]

Take notice that on December 13, 1993, Wisconsin Public Service Corporation (WPSC) requested the Commission to disclaim jurisdiction over an agreement under which WPSC provides retail electric service to the Wausau Center shopping mall in Wausau, Wisconsin (Wausau Center), under WPSC's Cp-1 large commercial and industrial retail rate, or, if the Commission asserts jurisdiction, to accept the agreement for filing to become effective August 3, 1983.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

3. New England Power Service Co.

[Docket No. ER94-234-000]

Take notice that on December 13, 1993, New England Power Service Company (NEPS) on behalf of New England Power Company tendered for filing a letter stating that NEP has entered into agreements with certain transmission customers regarding manual load shedding procedures.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

4. Northeast Utilities Service Co.

[Docket No. ER94-235-000]

Take notice that on December 13, 1993, Northeast Utilities Service Company (NUSCO) tendered for filing a letter, on behalf of The Connecticut Light and Power Company, Western Massachusetts Electric Company and Holyoke Water Power Company, stating that it was filing a changed rate schedule for sales of system power to Chicopee Municipal Lighting Plant.

NUSCO requests that the change in rate schedule become effective on December 1, 1993 and that such rate schedule change supersede FERC Rate Schedule Nos. CL&P 504 and HWP 49 at that time.

Comment date: January 5, 1994, in accordance with Standard Paragraph E at the end of this notice.

5. Central Vermont Public Service Corp.

[Docket No. ER94-205-000]

Take notice that on November 30, 1993, Central Vermont Public Service Corporation (CVPS) tendered for filing a letter stating that CVPS does not plan to file a forecast 1994 report for the FERC Electric Tariff, Original Volume No. 4.

Comment date: January 5, 1994, in accordance with Standard Paragraph E at the end of this notice.

6. Northern States Power Co. (Minnesota) and Northern States Power Co. (Wisconsin)

[Docket No. ER93-412-001]

Take notice that on December 15, 1993, Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin) (hereafter jointly NSP) tendered for filing its Compliance Filing to the Commission's "Order Accepting and Suspending Rates, Subject to Refund" dated November 30, 1993 in Docket No. ER93-412-000.

Pursuant to the Commission Order, NSP's proposed 3rd Substitute Original Sheet No. 200 (Rate Schedule P) and service schedule amendments are to be effective May 1, 1993.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

7. Union Electric Co.

[Docket No. ER94-238-000]

Take notice that on December 13, 1993, Union Electric Company (UE) tendered for filing a System Participation Power Agreement dated April 28, 1993, under the provisions of the Interconnection Coordinating Agreement Northern States Power Complaint, et al and UE dated January 7, 1965. UE asserts that the purpose of the Agreement is to set out specific terms for system participation power transactions.

UE requests that the filing be permitted to become effective May 1, 1993.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

8. Arizona Public Service Co.

[Docket No. ER94-248-000]

Take notice that on December 14, 1993, Arizona Public Service Company (APS) tendered for filing the Nonfirm Transmission Service Agreement for Arizona between El Paso Electric Company (EPE) and Arizona Public Service Company (APS or Company) (EPE Agreement) and the Edison-Arizona Interruptible Transmission Service Agreement between Southern California Edison Company (SCE) and APS (SCE Agreement).

The EPE Agreement provides for EPE to provide nonfirm transmission service to APS and the SCE Agreement provides for SCE to provide interruptible transmission service to APS.

Copies of this filing have been served upon EPE, SCE and the Arizona Corporation Commission.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

9. Central Power and Light Co.

[Docket No. ER94-249-000]

Take notice that on December 14, 1993, Central Power and Light Company (CPL) submitted to the Commission a Construction, Ownership and Operating Agreement under which CPL will be entitled to reimbursement from the Public Utilities Board of the City of Brownsville, Texas (City) for certain costs of maintaining two recently constructed transmission lines between Brownsville, Texas and Matamoros, Mexico. CPL has requested that the Commission disclaim jurisdiction over the Agreement or, in the alternative, accept the Agreement for filing as a rate schedule under the Federal Power Act.

Copies of the filing have been served upon the City and the Public Utility Commission of Texas.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

10. Wisconsin Electric Power Co.

[Docket No. ER94-250-000]

Take notice that Wisconsin Electric Power Company (WEPCO) on December 15, 1993, tendered for filing a Joint Use and Facility Sharing Agreement dated April 30, 1991, and Amendment No. 1 thereto, among Marquette Board of Light and Power (Marquette), Upper Peninsula Power Company (UPPCO), and WEPCO. Under the terms of the Agreement WEPCO shares with other parties, at no charge, the use of transmission line structures and right of way owned by WEPCO.

WEPCO states that its filing is being made pursuant to the Final Order and the Appendix thereto issued July 30, 1993 in Docket No. PL93-2-000. WEPCO requests that the Commission disclaim jurisdiction over the Agreement or, in the alternative, that the Commission accept the Agreement for filing and permit it to become effective in accordance with its terms.

Copies of the filing have been served on Marquette, UPPCO, and the Michigan Public Service Commission.

Comment date: January 6, 1994, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 93-31738 Filed 12-28-93; 8:45 am]

BILLING CODE 6717-01-P

[Docket No. CP92-715-000; et al.]

Liberty Pipeline Co., et al.; Intent To Resume Preparation of a Draft Environmental Impact Statement for the Proposed Liberty Pipeline Project and Request for Comments on Environmental Issues

December 22, 1993.

In the matter of Liberty Pipeline Co., Docket Nos. CP92-715-000, CP92-715-001; Texas Eastern Transmission Corp., Docket Nos. CP92-719-000, CP92-719-001, CP92-720-000, CP92-720-001, CP93-105-000, CP93-105-001, Transcontinental Gas Pipe Line Corp., Docket Nos. CP92-721-000, CP92-721-001; Texas Gas Transmission Corp., Docket Nos. CP92-730-000, CP92-730-001, CP92-734-000, CP92-734-001.

The staff of the Federal Energy Regulatory Commission (FERC or the Commission) will resume the preparation of an environmental impact statement (EIS) that will discuss environmental impacts of the construction and operation of natural gas facilities proposed in the Liberty

Pipeline Project.[1] This EIS will be used by the Commission in its decision-making process (whether or not to approve the individual projects).

A number of Federal agencies are being asked to indicate whether they wish to cooperate with us in the preparation of the EIS. These agencies are listed in Appendix 1 and may choose to participate once they have evaluated each proposal relative to their agencies' responsibilities.[2]

Summary of the Proposed Projects

Liberty Pipeline Company (Liberty) wants Commission authorization to transport up to 500,000 dekatherms of natural gas per day (Dthd) for six local natural gas distribution companies and electric generation companies and to construct and operate the following facilities needed to transport those additional volumes:

- 38.2 miles of new pipeline;
- One new meter station; and
- Two new delivery taps.

About 29.8 miles of the proposed new pipeline would be located under water between Middlesex County, New Jersey and the Borough of Queens, New York.

Texas Eastern Transmission Corporation (Texas Eastern) has an existing natural gas pipeline system consisting of various diameter pipe that extends from the State of Texas and offshore Louisiana through the Appalachian area to the Eastern Seaboard in the Philadelphia and New York area. Texas Eastern wants Commission authorization to expand and modify its facilities to transport up to an additional 255,744 Dthd to various local gas distribution companies and electric generation companies and to construct and operate the following facilities needed to transport those volumes:

- 134.1 miles of loop, replacement, and new lateral pipeline in 13 segments;[3]
- One new compressor station with a total of 4,600 horsepower (hp) of compression, and 27,800 hp of additional compression at seven existing compressor stations;
- Two new meter stations; and
- Minor modifications at other existing meter and compressor stations.

Transcontinental Gas Pipe Line Corporation (Transco) has an existing natural gas pipeline system consisting of various diameter pipe that extends from its principal sources of natural gas supply in Texas, Louisiana, Mississippi, and the offshore Gulf of Mexico area, through the states of Alabama, Georgia, South Carolina, North Carolina, Virginia, Maryland, Pennsylvania, and New Jersey, to its end in the New York City metropolitan area. Transco wants Commission authorization to expand and modify its facilities to transport up to an additional 115,000 Dthd to various gas distribution companies and electric generation companies and to construct and operate the following facilities needed to transport those volumes:

- 18.3 miles of loop and new lateral pipeline in three segments;
- 12,000 hp of additional compression at one existing compressor station;
- one new tap;
- one new meter station; and
- minor modification of one existing regulator station.

Transco also proposes to hydrostatically test and upgrade 29.4 miles of existing pipeline.

Texas Gas Transmission Corporation (Texas Gas) has an existing natural gas pipeline system located in Texas, onshore and offshore Louisiana, Arkansas, Mississippi, Tennessee, Kentucky, Indiana, Illinois, and Ohio. Texas Gas wants Commission authorization to expand and modify its facilities to transport up to an additional 137,803 Dthd to various gas distribution companies and electric generation companies and to construct and operate the following facilities needed to transport those volumes:

- 51.3 miles of loop pipeline in five segments.

The general locations of the facilities proposed by Liberty, Texas Eastern, Transco, and Texas Gas are shown in Appendices 2 through 4. A detailed listing of the facilities is in Appendices 5 and 6.

Three of the customers receiving gas from the Liberty Pipeline Project will use the natural gas to fuel new electric cogeneration plants. Although these facilities are not under the jurisdiction of the FERC, they will be discussed in the EIS and are included in appendix 6.

Background

On September 21, 1992 and December 14, 1992, Liberty, Texas Eastern, Transco, and Texas Gas applied to the Commission for authorization to construct new facilities and expand existing facilities to transport approximately 541,600 Dthd of natural gas through their systems as part of the Liberty Pipeline Project.[4] We issued the original Notice of Intent for the project on January 22, 1993, and conducted a thorough analysis of those proposals. However, because project changes were indicated by the applicants, we issued a notice of postponement for the project on July 16, 1993. By November 2, 1993, the applicants amended their proposals to reflect the following:

- A delay in the initial in-service date from November 1, 1994 to November 1, 1995;
- A phasing of the project so that some service would be provided beginning November 1, 1995, and the remainder would be provided beginning November 1, 1996;
- Changes in the locations of some of Texas Eastern's proposed loops and replacements, as necessary to allow the phasing of the project; and
- Changes in the locations of some of Texas Gas' proposed loops to avoid certain topographical constraints and residential areas.

The proposed facilities described in Appendices 5 and 6 reflect the above changes to the project. Appendix 7 lists all facilities which we have not yet studied.

Areas Previously Studied

In addition to the previous analysis we began for the Liberty Pipeline Project, some of Texas Gas' proposed facilities were previously studied in the ANR Phase II Project environmental assessment (EA) (Docket Nos. CP90–688–000, et al.).

All analyses previously conducted as part of the ANR Phase II EA, and mitigation methods authorized by the Commission in its Order of June 11, 1991, will be deemed still valid unless the Commission is otherwise notified by agencies or interested parties. Likewise, we request updated environmental information about areas that remain in the project, if the information supplied during the original Liberty Project analysis is no longer valid.

[1] Liberty Pipeline Company's, Texas Eastern Transmission Corporation's, Transcontinental Gas Pipe Line Corporation's, and Texas Gas Transmission Corporation's applications were filed with the Commission under section 7 of the Natural Gas Act and part 157 of the Commission's regulations.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available from the Commission's Public Reference Branch, room 3104, 941 North Capitol Street, NE., Washington, DC 20426 or call (202) 208–1371. Copies of the appendices were sent to all those receiving this notice in the mail.

[3] A loop is a segment of pipeline that is usually installed adjacent to an existing pipeline and connected to it at both ends. The loop allows more gas to be moved through that part of the pipeline system. A replacement allows more gas to be moved through a pipeline by replacing a segment of pipe with stronger or larger diameter pipe, usually in the same ditch. A lateral is a pipeline that branches off the mainline delivery system and serves to transport gas to an outlying region.

[4] Part of the originally proposed Liberty Pipeline Project was for the transportation of natural gas to customers in Elizabethtown, New Jersey (Docket No. CP92–716–000) and has since been dropped from the proposal.

Land Requirements for Construction

Pipelines

The proposed loops would generally be built parallel and adjacent to Texas Eastern's, Transco's, and Texas Gas' existing pipelines, using as much of the existing rights-of-way as possible. The majority of the proposed pipeline segments would be adjacent to existing pipeline or road, railroad, or electric transmission line rights-of-way. The land portion of Liberty's new pipeline would be constructed almost entirely within city streets.

The companies would use rights-of-way ranging in width from 50 to 100 feet, depending on pipe diameter, topography, and environmental concerns. After construction, the disturbed area would be restored, and a 0- to 50-foot-wide right-of-way in addition to existing rights-of-way would be permanently maintained. The remainder of the land would revert to its preconstruction use.

Aboveground Facilities

Liberty would construct the Howard Beach Meter Station on a 1.4-acre site in Queens County, New York. Texas Eastern would construct its proposed Glen Karn Compressor Station on 6 acres of a 48-acre site in Darke County, Ohio; the Leidy Compressor and Meter Stations on an approximate 40-acre site in Clinton County, Pennsylvania; and the South Amboy Meter Station on a 1.8-acre site in Middlesex County, New Jersey. Transco would construct its South Amboy Meter Station on a 3.4-acre site adjacent to Texas Eastern's proposed South Amboy Meter Station.

The EIS Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from a major Federal action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. The EIS we are preparing will give the Commission the information to do that. NEPA also requires us to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EIS on the important environmental issues, and to separate these from issues that are insignificant and do not require detailed study.

The EIS will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general subject headings:

- Geology
- Soils
- Water resources
- Fish and wildlife
- Endangered and threatened species
- Vegetation
- Wetlands
- Air quality and noise
- Land use
- Visual resources
- Recreation
- Socioeconomics
- Cultural resources
- Marine resources

We will also evaluate possible alternatives to the projects, or portions of the projects, and make recommendations on how to lessen or avoid impacts on the various resource areas. The City of New York, Borough of Queens has identified an alternative to the proposed route of the land portion of the Liberty Pipeline. This alternative is shown in appendix 8, along with an additional alternative route that we have identified. We will study these and possibly other alternatives along with the proposed routes.

Our independent analysis of the issues will result in the publication of a Draft EIS which will be mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for these proceedings. This Draft EIS will include our analysis of the newly proposed facilities and will reproduce our previous analyses in the ANR Phase II EA and the Liberty Pipeline Project. A 45-day comment period will be allotted for review of the Draft EIS. We will consider all comments on the Draft EIS and revise the document, as necessary, before issuing a Final EIS. The Final EIS will include our response to each comment received.

We plan to issue the Draft EIS in May 1994. Pending the identification and resolution of environmental issues, we plan to issue the Final EIS in late October 1994.

Currently Identified Environmental Issues

We have already identified a number of issues that we think deserve attention, based on a preliminary review of the proposed facilities and the environmental information provided by Liberty, Texas Eastern, Transco, and Texas Gas. These issues are presented in Appendix 9. Keep in mind that this is a preliminary list; the list of issues will be added to, subtracted from, or changed based on your comments and our own analysis.

Public Participation and Scoping Meetings

You can make a difference by sending a letter with your specific comments or concerns about the projects. You should focus on the potential environmental effects of the proposals, alternatives to the proposals (including alternative routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please follow the instructions below to ensure that your comments are received and properly recorded:

- Address your letter to: Lois Cashell, Secretary, Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, DC 20426.
- Reference Docket Nos. CP92–715–000, *et al.*;
- Send a copy of your letter to: Mr. Jeffrey Gerber, EIS Project Manager, Federal Energy Regulatory Commission, 825 North Capitol St., NE., room 7312 Washington, DC 20426; and
- Mail your comments so that they are received in Washington, DC on or before February 4, 1994.

During our previous analysis of these projects, we conducted scoping meetings in Lawrence, New York and Edison, New Jersey to provide you with more detailed information and another opportunity to offer your comments on the proposed projects. After we more fully review the changes that have been made to the proposed projects, we may decide to conduct additional scoping meetings. These meetings will be announced in the **Federal Register** and by a mailing to all parties receiving this notice in the mail.

Becoming an Intervenor

In addition to involvement in the EIS scoping process, you may want to become an official party to the proceedings or an "intervenor". Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its filings to all other parties. If you want to become an intervenor you must file a Motion to Intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (Title 18 CFR 385.214) which is attached as Appendix 10.

Environmental Mailing List

This notice is being sent to individuals, organizations, and government entities interested and/or potentially affected by the proposed project. It is also being sent to all

potential right-of-way grantors to solicit focused comments regarding environmental considerations related to the proposed project. As details of the project become established, representatives of Liberty, Texas Eastern, Transco, or Texas Gas will directly contact landowners, communities, and public agencies concerning any other matters, including acquisition of permits and rights-of-way.

If you do not want to send comments at this time but still want to keep informed and receive copies of the Draft and Final EISs, please return the Information Request (appendix 11). If you do not return the Information Request you will be taken off the mailing list.

Additional information about the proposed project is available from Mr. Jeffrey Gerber, EIS Project Manager, at (202) 208–0282.

Lois D. Cashell,

Secretary.

[FR Doc. 93–31730 Filed 12–28–93; 8:45 am]

BILLING CODE 6717–01–P

[Project Nos. 7745–003, et al.]

Hydroelectric Applications; Jerry Kaufman, et al.

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1a. Type of Application: Surrender of Exemption.

b. Project No: 7745–003.

c. Date Filed: November 17, 1993.

d. Applicant: Jerry Kaufman.

e. Name of Project: Garden Bar Power Plant.

f. Location: Camp Far West Ditch, near Lincoln, Placer County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Jerry Mason, 3035 Prospect Park Drive, suite 120, Rancho Cordova, CA 95670, (916) 858–0133.

i. FERC Contact: Patricia Massie, (202) 219–2681.

j. Comment Date: January 26, 1994.

k. Description of Application: Mr. Kaufman intends to remove the power plant. The turbines are old and the cost of putting the plant back into operation is too prohibitive. The liability of having the plant sit is also unacceptable.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

2a. Type of Application: Preliminary Permit.

b. Project No.: 11447–000.

c. Date filed: November 2, 1993.

d. Applicant: North Unit Irrigation District.

e. Name of Project: Wickiup.

f. Location: At the existing Bureau of Reclamation Wickiup dam on the Deschutes River, near Bend in Deschutes County, Oregon.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Harold V. Schonneker, North Unit Irrigation District, 2024 NW Beach Street, Madras, OR 07741, (503) 475–3625.

i. FERC Contact: Michael Spencer at (202) 219–2846.

j. Comment Date: February 22, 1994.

k. Description of Project: The proposed project utilize the Bureau of Reclamation's Wickiup dam and would consist of: (1) two penstocks connected to the dam's outlet works, one would be a 96-inch-diameter, 79-foot-long steel penstock and the other a 96-inch-diameter, 67-foot-long steel penstock; they would converge into a single 120-inch-diameter, 21-foot-long penstock; (2) a powerhouse containing a generating unit with a capacity of 7.0 MW and estimated average annual generation of 26.1 GWh; (3) a 90-foot-long concrete tailrace; and (4) a 9.1-mile-long transmission line.

No new access road will be needed to conduct the studies. The applicant estimates that the cost of the studies to be conducted under the preliminary permit would be $50,000.

l. Purpose of Project: Project power would be sold.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

3a. Type of Application: Amendment of License.

b. Project No: 1835–100.

c. Date Filed: October 28, 1993.

d. Applicant: Nebraska Public Power District.

e. Name of Project: North Platte/Keystone Diversion Dam.

f. Location: On the North and South Platte Rivers, Nebraska.

g. Filed Pursuant to: Section 23(b) of the Federal Power Act, 16 U.S.C. 817(b).

h. Applicant Contact: Mr. R. L. Peterson, Nebraska Public Power District, P.O. Box 310, North Platte, NE 69103, (308) 532–9200.

i. FERC Contact: Mr. Steve Hocking, (202) 219–2656.

j. Comment Date: January 26, 1994.

k. Description of proposed amendment: Nebraska Public Power District, licensee for the North Platte/Keystone Diversion Dam Project, filed an application to amend article 401 of their license. Article 401 requires the licensee to develop and maintain eight islands as nesting habitat for interior least terns and piping plovers. The proposed amendment would allow the licensee to substitute up to four sand pits for four of the eight islands they are required to develop. The proposed amendment requires a plan on how these sand pits would be developed. A draft plan was included in the licensee's filing.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

4a. Type of Application: Approval of Report on Recreation Resources and Change in Project Boundary.

b. Project No: 3133–012.

c. Date Filed: October 29, 1993.

d. Applicant: Errol Hydroelectric Ltd. Partnership and Union Water Power Company.

e. Name of Project: Errol Project.

f. Location: Umbagog Lake and Androscoggin River, Coos County, New Hampshire and Oxford County, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Gerald Poulin, President, Union Water Power Company, 150 Main Street, Lewiston, ME 04240, (207) 623–3521.

i. FERC Contact: Heather Campbell, (202) 219–3097.

j. Comment Date: February 3, 1994.

k. Description of Project: The Errol Hydroelectric Ltd. Partnership and Union Water Power Company, licensees for the Errol Project, filed a report on recreation resouces. They propose revising the project boundary to incorporate a canoe portage. The revision will affect lands owned by the licensees near the project powerhouse.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

5a. Type of Application: Exhibit Drawings.

b. Project No.: 2301–011.

c. Date Filed: December 15, 1992.

d. Applicant: Montana Power Company.

e. Name of Project: Mystic Lake Project.

f. Location: On the West Rosebud Creek, a tributary of the Stillwater River, in Custer National Forest and Stillwater County, Montana.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. G. Howard Van Noy, Senior Vice President, Generation and Transmission, Montana Power Company, 40 East Broadway, Butte, MT 59701, (406) 496–5064.

i. FERC Contact: Paul Shannon, (202) 219–2866.

j. Comment Date: February 3, 1994.

k. Description of Drawings: Montana Power Company requests approval of as-built exhibit K drawings that show the project boundary for the Mystic Lake Project. The exhibits show an additional three acres of federal lands within the project boundary compared to the exhibit K drawings filed in 1980. The three acres are near the project's inverted siphon. The licensee also submitted a copy of the Special Use Permit from the U.S. Forest Service which authorizes the use of the additional lands.

l. This paragraph also consists of the following standard paragraphs: B, C1, and D2.

6a. Type of Application: Project Boat Launch Plan.

b. Project No: 9821–067.

c. Date Filed: December 1, 1993.

d. Applicant: Trafalgar Power Company.

e. Name of Project: Ogdensburg Project.

f. Location: Odgensburg, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Lippman Tam, Trafalgar Power, Inc., P.O. Box 369, Rome, NY 13442, (504) 273–8891.

i. FERC Contact: Dan Hayes, (202) 219–2860.

j. Comment Date: February 4, 1994.

k. Description of Project: Trafalgar Power, Inc., licensee for the Ogdensburg Project, has filed an application to construct a boat launch and fishermen's access on the Ogdensburg impoundment on the South bank of the Ogdensburg impoundment adjacent to the Spring Street Bridge. The facility will have paved parking for ten vehicles, and paved access from Lake Street.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

7a. Type of Application: Non-project Use of Project Lands—Timber Harvest.

b. Project No: 2329–011.

c. Date Filed: October 6, 1993.

d. Applicant: Central Maine Power Company.

e. Name of Project: Wyman Hydroelectric Project.

f. Location: On the Kennebec River in Kennebec County, Maine.

g. Filed Pursuant to: Section 23(b) of the Federal Power Act, 16 U.S.C. 817(b).

h. Applicant Contact: Ms. Wendy Bley, Central Maine Power Company, Edison Drive, Augusta, ME 04336, (207) 526–9600.

i. FERC Contact: Steve Hocking (202) 219–2656.

j. Comment Date: January 26, 1994.

k. Description of proposed non-project use of project lands: Central Maine Power Company (CMP), licensee for the Wyman Hydroelectric Project, proposes a selective timber harvest on 295 acres of project lands. CMP proposes to harvest 76 acres of non-project lands as well. The proposed harvest includes areas just below Wyman Dam and on the eastern shore of Wyman Lake. A timber management plan is included in the proposal.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permits will not be accepted in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit with be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, Room 1027, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in

all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: December 22, 1993, Washington, DC

Lois D. Cashell,

Secretary.

[FR Doc. 93–31807 Filed 12–28–93; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. CP94–128–000, et al.]

Koch Gateway Pipeline Co., et al.; Natural Gas Certificate Filings

December 21, 1993

Take notice that the following filings have been made with the Commission:

1. Koch Gateway Pipeline Co.

[Docket No. CP94–128–000]

Take notice that on December 13, 1993, Koch Gateway Pipeline Company (Koch), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP94–128–000 a request pursuant to §§ 157.205, and 157.211 of the Commission's Regulations under the Natural Gas Act for authorization to place in service an existing six-inch diameter meter station and flow computer located in Nueces County, Texas, under its blanket certificate issued in Docket No. CP82–430–000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Koch states that the metering facilities are presently used to provide section 311 transportation service for Delhi Gas Pipeline Corporation (Delhi). Koch indicates that the authorization sought herein will provide Delhi with the additional ability to use these facilities as a delivery point on Delhi's blanket transportation agreements with Koch.

Comment date: February 4, 1994, in accordance with Standard Paragraph G at the end of this notice.

2. El Paso Natural Gas Co.

[Docket No. CP94–135–000]

Take notice that on December 15, 1993, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas 79978, filed in Docket No. CP94–135–000 a request pursuant to §§ 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216) for authorization to abandon two segments, totaling approximately 0.463 mile, of the Yuma Line, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

The request for authorization states that by order issued October 15, 1975, El Paso was issued a budget-type certificate of public convenience and necessity in Docket No. CP76–53. The request for authorization further states, that El Paso received blanket certificate authorization in Docket No. CP82–435–000 for routine certificate activities and abandonments of services and facilities, and in Docket No. CP88–433–000 for the transportation of natural gas on behalf of others. It is further stated that pursuant to such budget-type authorization, and at the request of the State of Arizona Highway Department, in 1976, El Paso relocated and replaced a total of approximately 0.50 mile of existing 16 inch loop line serving the Yuma, Arizona area, with approximately 0.463 mile of 6⅝ inch pipeline in order to accommodate new construction of Interstate 8 Highway in the City of Yuma, Arizona.

It is stated that the Yuma Line is used to transport natural gas received from El Paso's 26 inch California Line and 26 inch California First Loop Line, for deliveries of gas to Southwest Gas Corporation (Southwest) and Arizona Public Service Company (APS), and at the Yuma Power Plant also, respectively, both in the Yuma, Arizona area.

El Paso states that effective September 1, 1991 and October 1, 1991, Southwest and APS, respectively, elected to convert their firm sales entitlements under their existing Service Agreements to firm transportation service pursuant to the provisions of El Paso's Global Settlement in Docket No. RP88–44–000, et al. It is stated that the firm transportation service is rendered pursuant to the terms and conditions of two Transportation Service Agreements, both dated August 9, 1991, between El Paso and Southwest, and one Transportation Service Agreement dated October 24, 1990, between El Paso and APS, which provide for the firm transportation of Southwest's full requirements of natural gas to consumers situated within the States of Arizona and Nevada and APS' full requirements of natural gas for use in its power plants situated within the State of Arizona.

It is stated that the relocation and replacement of the segments of the Yuma Line as requested by the State of Arizona Highway Department did not result in any change in service by El Paso in 1976. El Paso further states that beginning with the 1990's there has been extensive business and industrial development, together with growth in the residential sector in the Yuma, Arizona area. It is averred that today, the pipeline segments that were relocated no longer are sufficient for El Paso to provide the necessary transportation service to Southwest and APS in the Yuma, Arizona area. El Paso states that, as a solution to this problem, El Paso would install, under § 157.208(a) of the Commission's Regulations, two new segments of 16 inch line in replacement of the two segments to be abandoned. It is stated that such construction would be accomplished subsequent to receipt of the abandonment authorization requested herein. Therefore, El Paso is proposing to abandon, by removal, the two segments of 6⅝ inch Yuma Line. El Paso also states that the abandonment and installation of the two new segments of 16 inch pipeline will be accomplished without service interruptions.

Comment date: February 4, 1994, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 93–31737 Filed 12–28–93; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. CP94–132–000, et al.]

Trunkline Gas Co., et al. Natural Gas Certificate Filings

December 17, 1993.

Take notice that the following filings have been made with the Commission:

1. Trunkline Gas Company

[Docket No. CP94–132–000]

Take notice that on December 14, 1993, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP94–132–000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon exchange services with Transcontinental Gas Pipe Line Corporation (Transco) and a transportation service provided for Southern Natural Gas Company (SONAT), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Trunkline states that it proposes to abandon the exchange services with Transco under its Rate Schedules X–7, E–14 and TE–6. Trunkline further states that it proposes to abandon the transportation service provided for SONAT under its Rate Schedules T–1.

Trunkline says that it notified Transco of its desire to terminate the exchange agreements by letter dated July 30, 1993. Transco accepted Trunkline's termination letter on September 2, 1993, it is stated, and requests authority to abandon these exchange agreements effective the date of Commission authorization.

Trunkline states that by letter dated November 15, 1993, SONAT notified Trunkline of its desire to terminate the transportation agreement effective September 1, 1994. Trunkline further states that it accepted SONAT's letter of termination and requests authority to abandon Rate Schedule T–1 effective September 1, 1994.

No facilities are proposed to be abandoned by this application.

Comment date: January 7, 1994, in accordance with Standard Paragraph F at the end of this notice.

2. Canyon Creek Compression Co.

[Docket No. CP94–138–000]

Take notice that on December 16, 1993, Canyon Creek Compression Company (Canyon Creek), 701 East 22nd Street, Lombard, Illinois, filed in Docket No. CP94–138–000 an application pursuant to section 7(b) of the Natural Gas Act for authorization to abandon firm transportation and compression service for Natural Gas Pipeline Company of America (Natural), Questar Pipeline Company (Questar), and Colorado Interstate Gas Company (CIG), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Canyon Creek proposes to abandon, effective December 1, 1993, firm transportation and compression services for Natural, Questar, and CIG, performed under authorization granted in Docket No. CP80–547 and under Canyon Creek's Rate Schedule C. Canyon Creek also proposes that it and its three shippers make up imbalances attributable to the above transportation and compression services at the existing interconnections specified in their service agreements or under other transportation and compression agreements between the parties or at more convenient interconnections between their systems, or by offsetting imbalances among them or with imbalances under other transportation and compression agreements between them.

Canyon Creek has included letters dated November 8, 1993, November 29, 1993, and December 7, 1993, from Natural, Questar, and CIG, respectively, requesting that the current services be terminated. It is also indicated that the shippers wish to replace the agreements with firm transportation and compression services to be performed under Canyon Creek's Rate Schedule FCS and Part 284 of the Commission's Regulations.

Canyon Creek proposes retroactive authorization effective December 1, 1993, to allay Natural's, Questar's, and CIG's concerns that they would be liable to pay Canyon Creek additional demand charges after December 1, 1993. Canyon Creek does not propose to abandon any facilities.

Comment date: January 7, 1994, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or to make any protest with reference to said application should on or before the comment date, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and/or permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Docket No. RM87–17–000]

Natural Gas Data Collection System; New and Revised Record Formats and Edit Checks for the FERC Form Nos. 2 and 2–a

December 23, 1993

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of new and revised electronic filing record formats and edit checks for the FERC Form Nos. 2 and 2–A.

SUMMARY: On March 31, 1993, the Commission issued Order No. 552 (58 FR 17982, April 7, 1993) which established accounting requirements for:

Allowances for emission of sulfur dioxide under the Clean Air Act Amendments of 1990; and assets and liabilities created through the ratemaking actions of regulatory agencies. In implementing these new accounting requirements, the final rule also adopted several new and revised schedules for the Form Nos. 2 and 2–A for reporting the information on allowances and regulatory assets and liabilities. Since information on the Form Nos. 2 and 2–A is also collected electronically (Order 493, et al.), new and revised record formats and instructions were developed to include the new reporting requirements of Order No. 552.

DATES: The complete record format and instruction manuals and list of new and revised edit checks for the Form Nos. 2 and 2–A are available on December 23, 1993.

ADDRESSES: Requests for the complete record format and instruction manuals and list of new and revised edit checks should be directed to the: Public Reference and Files Maintenance Branch, Federal Energy Regulatory Commission, 941 North Capitol Street, NE., room 3104, Washington, DC 20426, (202) 208–1371.

FOR FURTHER INFORMATION CONTACT: For general information on the record formats and edit checks, contact: Robert Trimble at (202) 208–0906.

SUPPLEMENTARY INFORMATION: The revised versions of the record formats, and instructions also correct some minor deficiencies that existed in the previous record format manuals. Most specifically, the records for reporting "Gas Account—Natural Gas" for the Form No. 2 (records F7/29, 30, 31) and the Form No. 2–A (Form No. 2 substitute pages provided in records F8/74, 75, 76) now require the 'Name of System' or 'System ID' to be entered on each of these records.

The new and revised edit checks not only provide for the checking of new information required under Order No. 552 but also significantly expand the scope of the validation of previously required data. Formerly, the edit checks were defined primarily as columnar, vertical, mathematical equations for certain items on each page or schedule. The majority of the new edit checks now provide for mathematically checking horizontally, across the page, and will further enhance the validation of the data submitted by the reporting companies. A complete set of updated record formats and list of all new and revised edit checks is available in WordPerfect 5.1 format. Appendix A shows a directory listing of the record format and edit check files for each form (one form per diskette) that is available from the duplication contractor at the Commission.[1] A complete list of all edit checks and related error messages will also be published in the User's Manual for these two forms when revised Form No. 2 and 2–A software is issued early next year. Details of the new and revised electronic record formats and edit checks for the Form No. 2 are listed in Appendices B and D, respectively. Details of the new and revised electronic record formats and edit checks for the Form No. 2–A are listed in Appendices C and E, respectively.

Copies of the complete record formats and new and revised edit checks for each form are available through the Commission's duplication contractor, LaDorn System Corporation (LaDorn). The record formats and edit checks can be purchased on diskette in the following ways:

(1) By written request to the Commission, Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, DC 20426, ATTN: Mr. William McDermott, Chief, Public Reference & Files Branch. Please enclose a check, payable to LaDorn System Corporation for $7.00 per diskette ordered and $3.40 to cover postage and handling. Allow 10–14 days for processing and delivery.

(2) Directly from LaDorn System Corporation at the cashier's window in the Commission's Public Reference Room for $7.00 per diskette plus applicable sales tax, if any. The Public Reference Room is located on the third floor, 941 N. Capitol Street, NE., Washington, DC.

(3) By telephone request to LaDorn Energy Information Services at 1–800–676–FERC. Orders placed by phone will be assessed charges as follows:

(a) A $25.00 processing fee,
(b) $7.00 per diskette ordered, and
(c) Cost of shipping and handling.

(The requestor will have a choice of regular mail, 2–Day Express Mail or Federal Express).

Please contact the Commission's Public Reference & Files Maintenance Branch on (202) 208–1371 or LaDorn (1–800–676–FERC) for information and the cost of purchasing the paper version of the record formats and list of new and revised edit checks for each form.

LaDorn System Corporation employees cannot answer questions regarding the use of the record formats and edit checks. Any questions concerning the application of the information contained in these documents should be directed to the individual listed in the **FOR FURTHER INFORMATION CONTACT:** section of this notice.

This notice, including all of the appendices, is available through the Commission Issuance Posting System (CIPS), an electronic bulletin board service that provides access to formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed on a 24-hour basis using a personal computer with a modem. Your communications software should be set at full duplex, no parity, eight data bits and one stop bit. To access CIPS at 300, 1200 or 2400 baud dial (202) 208–1397. For access at 9600 baud dial (202) 208–1781. FERC is using U.S. Robotics HST Dual Standard modems. If you have any problems, please call (202) 208–2474. The notice will be available on CIPS for 30 days from the date of issuance of the notice.

In addition to publishing the text of this notice in the **Federal Register**, excluding Appendices A through E, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this notice during normal business hours in the Reference and Information Center (room 3308) at the Commission's headquarters, 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[1] The Appendices are not being published in the **Federal Register**, but are available from the Commission's Public Reference Branch.

[Docket No. CP94–140–000]

Arkla Energy Resources Co.; Application

December 22, 1993.

Take notice that on December 20, 1993, Arkla Energy Resources Company (AER), Post Office Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP94–140–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the replacement of certain existing metering facilities to provide transportation service to Arkansas Louisiana Gas Company (ALG) for redelivery to residential and industrial customers located in Kay County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

AER specifically proposes to replace an existing 2-inch U-Shaped residential meter setting with a 3-inch U-Shape commercial meter setting at an existing delivery tap on AER's transmission Line A–3 for additional deliveries to ALG's customers on existing rural extension No. 898 in Kay County, Oklahoma. AER states that the replacement meter would increase AER's metered capability from 200 Mcf per day to 450 Mcf per day. AER states that the existing meter needs to be replaced immediately, because, if required to measure the additional peak day volumes during the upcoming winter, the existing meter could break up under pressure. AER estimates a facility cost of $4,248, which it indicates would be reimbursed by ALG.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 12, 1994, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate for the proposal is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for AER to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 93–31720 Filed 12–28–93; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. PR94–3–000]

KansOk Partnership; Petition for Rate Approval

December 22, 1993.

Take notice that on November 30, 1993, KansOk Partnership (KansOk) filed pursuant to § 284.123(b)(2) of the Commission's regulations, a petition for rate approval requesting that the Commission approve as fair and equitable the following rates for firm and interruptible transportation services performed under section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA):

Firm Reservation Charge
$4.5544 per MMBtu
Firm Usage Charge
$0.0567 per MMBtu
Interruptible Usage Charge
$0.2064 per MMBtu

KansOk states that these rates are derived using the Straight Fixed Variable methodology. Further, for transportation on its East Leg, KansOk proposes to also reserve as compressor fuel 2.38% of the gas received for transportation.

KansOk states that it is an intrastate pipeline within the meaning of section 2(16) of the NGPA and it owns and operates an intrastate pipeline system in the State of Oklahoma. Pipeline proposes an effective date of November 20, 1993.

Pursuant to § 284.123(b)(2)(ii), if the Commission does not act within 150 days of the filing date, the rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transportation service. The Commission may, prior to the expiration of the 150-day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data, and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedures. All motions must be filed with the Secretary of the Commission on or before January 10, 1994. The petition for rate approval is on file with the Commission and is available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 93–31731 Filed 12–28–93; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. RP92–74–012]

South Georgia Natural Gas Co.; Compliance Filing

December 22, 1993.

Take notice that on October 29, 1993, South Georgia Natural Gas Company (South Georgia) in purported compliance with the requirements set forth in the Commission's October 19, 1993 order, submitted for filing a revised allocation schedule indicating the demand components of its Account No. 191 costs with respect to Atlanta Gas Light Company's (Atlanta) Valdosta and Montezuma, Georgia, service areas.

South Georgia states that it has allocated the demand components of its Account No. 191 costs to Valdosta and Montezuma individually and has therefore calculated both the demand and commodity components on a consistent basis. South Georgia notes that the total costs allocated to Atlanta did not change as a result of this revision.

South Georgia states that it has served the filing upon each person designated on the official service list compiled by the Secretary in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before January 3, 1994. All such protests will be considered by the Commission in determining the appropriate proceeding, but will not serve to make protestant a party to the proceedings. Copies of this filing are on file with the Commission and are available for inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. RP91–203–000 and RP92–132–000]

Tennessee Gas Pipeline Co.; Informal Settlement Conference

December 22, 1993.

Take notice that an informal settlement conference will be convened in these proceedings on January 11, 1994, at 10 a.m. at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC 20426, for the purpose of exploring the possible settlement of the issues in this proceeding.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined

by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, contact Donald Williams (202) 208–0743 or Dennis H. Melvin (202) 208–0042.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P–M

[Docket No. TM94–7–29–000]

Transcontinental Gas Pipe Line Corp.; Proposed Changes in FERC Gas Tariff

December 22, 1993.

Take notice that on December 16, 1993 Transcontinental Gas Pipe Line Corporation (TGPL) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, certain revised tariff sheets included in Appendix A attached to the filing.

TGPL states that the purpose of the instant filing is to track rate changes attributable to (1) storage service purchased from CNG Transmission Corporation (CNG) under its Rate Schedule GSS the costs of which are included in the rates and charges payable under TGPL's Rate Schedules LSS and GSS, (2) storage service purchased from Texas Eastern Transmission Corporation (TETCO) under its Rate Schedule X–28 the costs of which are included in the rates and charges payable under TGPL's Rate Schedule S–2 and (3) transportation service purchased from Texas Gas Transmission Corporation (Texas Gas) under its Rate Schedule FT the costs of which are included in the rates and charges payable under TGPL's Rate Schedule FT–NT. The tracking filing is being made pursuant to Section 4 of TGPL's Rate Schedule LSS, Section 3 of TGPL's Rate Schedule GSS, Section 26 of the General Terms and Conditions of Volume No. 1 of TGPL's FERC Gas Tariff and Section 4 of TGPL's Rate Schedule FT–NT.

TGPL states that included in Appendices B through E attached to the filing are the explanations of the rate changes and details regarding the computation of the revised LSS, GSS, S–2 and FT–NT rates, respectively.

TGPL states that copies of the filing are being mailed to each of its LSS, GSS, S–2 and FT–NT customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before January 3, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP91–229–015]

Trunkline Gas Co.; Proposed Changes in FERC Gas Tariff

December 22, 1993.

Take notice that on December 17, 1993, Trunkline Gas Company (Trunkline) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 2, revised tariff sheets as reflected in Appendix A attached to the filing.

Trunkline proposes that these sheets become effective September 1, 1992 and subsequent dates as shown on the tariff sheets.

Trunkline states that these revised tariff sheets are being filed to amend Rate Schedule T–61 for the transportation of natural gas provided jointly by Trunkline and Panhandle Eastern Pipe Line Company (Panhandle) on behalf of United Cities Gas Company (United Cities) to reflect Panhandle's current transportation rates as approved in Panhandle's Docket Nos. RP91–229–012, RP92–166–009, RP91–229–018, et al. by the Commission's Orders dated October 30, 1992, April 29, 1993 and April 16, 1993, respectively.

Trunkline states that a copy of this filing is being served on Panhandle, United Cities and the applicable state regulatory agency.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before January 3, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP94–54–000]

Viking Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

December 22, 1993.

Take notice that on December 17, 1993, Viking Gas Transmission Company (Viking) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets to be effective February 1, 1994:

First Revised Sheet No. 94
First Revised Sheet No. 95
First Revised Sheet No. 96
First Revised Sheet No. 139
First Revised Sheet No. 140

Viking states that the purpose of this filing is to amend the pro forma Gas Transportation Agreement (For Use Under Rate Schedule FT–A or FT–GS) and the Form of Released Transportation Service Agreement in Viking's tariff to include certain representations and warranties required by an indenture agreement as part of Viking's recent refinancing.

Viking states that copies of the filing is being mailed to each of Viking's customers and to interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before January 3, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[FR Doc. 93–31733 Filed 12–28–93; 8:45 am]

BILLING CODE 6717–01–M

Office of Energy Efficiency and Renewable Energy

Energy Conservation Program for Consumer Products; Representative Average Unit Costs of Energy

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice.

SUMMARY: In this notice, the Department of Energy (DOE or Department) is forecasting the representative average unit cost of five residential energy sources for the year 1994. The five sources are electricity, natural gas, No. 2 heating oil, propane, and kerosene. The representative unit cost of these energy sources are used in the Energy Conservation Program for Consumer Products established by the Energy Policy and Conservation Act; Public Law 94–163, 89 Stat. 871, as amended, (EPCA).

EFFECTIVE DATE: The representative average unit costs of energy contained in this notice will become effective January 28, 1994 and will remain in effect until further notice.

FOR FURTHER INFORMATION CONTACT:

Dr. Barry P. Berlin, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Forrestal Building, Mail Station EE–43, 1000 Independence Avenue, SW. Washington, DC 20585 (202) 586–9127

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Forrestal Building, Mail Station GC–41, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 586–9507

SUPPLEMENTARY INFORMATION: Section 323 of the EPCA, (Act)[1] requires that DOE prescribe test procedures for the determination of the estimated annual operating costs and other measures of energy consumption for certain consumer products specified in the Act. These test procedures are found in 10 CFR part 430, subpart B.

Section 323(b) of the Act requires that the estimated annual operating costs of a covered product be computed from measurements of energy use in a representative average-use cycle and from representative average unit costs of energy needed to operate such product during such cycle. The section further requires DOE to provide information regarding the representative average unit costs of energy for use wherever such costs are needed to perform calculations in accordance with the test procedures. Most notably, these costs are used under the Federal Trade Commission appliance labeling program established by section 324 of the Act and in connection with advertisements of appliance energy use and energy costs which are covered by section 323(c) of the Act.

The Department last published representative average unit costs of residential energy for use in the Conservation Program for Consumer Products on January 5, 1993. (58 FR 345). Effective January 28, 1994, the cost figures published on January 5, 1993, will be superseded by the cost figures set forth in this notice.

The Department's Energy Information Administration (EIA) has developed the 1994 representative average unit costs of electricity, natural gas, no. 2 heating oil, propane and kerosene prices found in this notice. These costs were taken from the EIA report, State Energy Projections for the Residential Sector, 1993–1994, SR/EMEU/93–01, which provides national and state-level forecasts of key residential energy prices. The report is prepared for the Administration for Children and Families, U.S. Department of Health and Human Services, which provides State grants to assist eligible households in meeting the costs of home energy use for space heating or cooling under the Low Income Home Energy Assistance Program.

The national average price forecasts found in the above EIA report are based on the mid-price case scenario of the Short-Term Integrated Forecasting System, as published in the third quarter 1993 EIA Short-Term Energy Outlook, DOE/EIA–0202 (93/3Q). Copies of this report are available at the National Energy Information Center, Forrestal Building, room 1F–048, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–8800.

The 1994 representative average unit costs stated in Table 1 are provided pursuant to section 323(b)(4) of the Act and will become effective January 28, 1994 of publication. They will remain in effect until further notice.

Issued in Washington, DC, December 17, 1993.

Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.

TABLE 1—REPRESENTATIVE AVERAGE UNIT COSTS OF ENERGY FOR FIVE RESIDENTIAL ENERGY SOURCES—(1994)

Type of energy	In common terms	As required by test procedure	Dollars per million Btu[1]
Electricity	8.41¢/kWh[2,3]	$.0841¢/kWh	$24.65
Natural gas	60.4¢/therm[4] or	.00000604/Btu	6.04
	$6.22/MCF[5,6]		
No. 2 Heating Oil	1.054/gallon[7]	.00000760/Btu	7.60
Propane	0.983/gallon[8]	.00001076/Btu	10.76
Kerosene	1.133/gallon[9]	.00000839/Btu	8.39

[1] Btu stands for British thermal units.
[2] kWh stands for kilowatt hour.
[3] 1 kWh = 3,412 Btu.
[4] 1 therm = 100,000 Btu. Natural gas prices include taxes.
[5] MCF stands for 1,000 cubic feet.
[6] For the purposes of this table, one cubic foot of natural gas has an energy equivalence of 1,030 Btu.
[7] For the purposes of this table, one gallon of No. 2 heating oil has an energy equivalence of 138,690 Btu.
[8] For the purposes of this table, one gallon of liquid propane has an energy equivalence of 91,333 Btu.
[9] For the purposes of this table, one gallon of kerosene has an energy equivalence of 135,000 Btu.

[1] References to the "Act" refer to the Energy Policy and Conservation Act, as amended by the National Energy Conservation Policy Act, the National Appliance Energy Conservation Act of 1987, the National Appliance Energy Conservation Amendments of 1988, and the Energy Policy Act of 1992. 42 U.S.C. §§ 6291–6309.

Office of Fossil Energy

JMC Fuel Services, Inc.; Blanket Authorization to Import Natural Gas From and Export Natural Gas to Canada

AGENCY: Office of Fossil Energy, DOE.
ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy (DOE) gives notice that it has issued an order granting JMC Fuel Services, Inc. (JMC Fuel) blanket authorization to import from and export to Canada up to a combined total of 62 Bcf of natural gas over a two-year term beginning on the date of first delivery of either imports or exports. The combined import/export authorization replaces two prior separate orders authorizing JMC Fuel to import gas from and export gas to Canada.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on December 20, 1993.

Pawtucket Power Associates Limited Partnership; Long-Term Authorization to Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.
ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting long-term authorization to Pawtucket Power Associates Limited Partnership (Pawtucket) to import from Canada up to 8,230 Mcf of natural gas per day and a total of 57,618,230 Mcf, over a period of 20 years. The gas will be supplied by Home Oil Company Limited. This order also amended a previous order issued to Pawtucket to remove the import authorization for volumes supplied under a recently terminated gas purchase contract between Pawtucket and Anderson Oil and Gas.

The order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 15, 1993.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

Poco Petroleum, Inc.; Order Granting Blanket Authorization to Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.
ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Poco Petroleum, Inc. (Poco) blanket authorization to import up to 200 Bcf of natural gas from Canada over a period of two years beginning on the date of the first delivery after January 20, 1994, the date Poco's existing blanket import authorization expires.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on December 20, 1993.

BILLING CODE 6450-01-P

Office of Hearings and Appeals

Proposed Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.
ACTION: Notice of Proposed Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces the proposed procedures for disbursement of $610,000.00, plus accrued interest, in alleged crude oil overcharges obtained by the DOE under the terms of the Consent Order entered into with J.R. Cone, Case No. LEF-0118. The OHA has tentatively determined that the funds obtained from Cone, plus interest accrued, will be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges.

DATE AND ADDRESS: Comments must be filed in duplicate within 30 days of publication of this notice in the **Federal Register**, and should be addressed to the Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should be marked with the reference number LEF-0118.

FOR FURTHER INFORMATION CONTACT: Thomas L. Wieker, Deputy Director, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2390.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision and Order sets forth the procedures that the DOE has tentatively formulated to distribute to eligible claimants $610,000.00, plus accrued interest, obtained by the DOE under the terms of the Consent Order entered into with J.R. Cone on May 14, 1993. The funds were paid by Cone towards the settlement of alleged violations of the DOE price and allocation regulations involving the sale of crude oil during the period September 1, 1973, through December 31, 1976.

The OHA has proposed to distribute the Cone Consent Order fund in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986)(the MSRP). Under the MSRP, crude oil overcharge monies are divided between the federal government, the states, and injured persons of refined petroleum products. Refunds to the states would be distributed in proportion to each state's consumption of petroleum products during the price control period. Refunds to eligible purchasers would be based on the number of gallons of petroleum products which they purchased and the degree to which they can demonstrate injury.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to provide two copies of their submissions. Comments must be submitted within 30 days of publication of this notice in the **Federal Register** and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1 p.m. and 3 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in room 1E-234, 100 Independence Avenue, SW., Washington, DC 20585.

Dated: December 20, 1993.

George B. Breznay,

Director, Office of Hearings and Appeals.

Name of Firm: J.R. Cone
Date of Filing: November 16, 1993
Case Number: LEF-0118

On November 16, 1993, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA), to distribute funds which J.R. Cone (Cone) remitted to the DOE pursuant to a Consent Order entered into by Cone and the DOE on May 14, 1993. Pursuant to the Consent Order, Cone has remitted $610,000.00 to the DOE. In accordance with the procedural regulations codified at 10 CFR part 205, subpart V (subpart V), the ERA requests in its petition that the OHA establish special procedures to make refunds in order to remedy the effects of alleged regulatory violations which were resolved by the Consent Order. This Proposed Decision and Order sets forth the OHA's plan to distribute these funds.

I. Background

On September 28, 1978, the ERA issued a Notice of Probable Violation (NOPV) to Cone regarding two oil-producing properties, the Eubanks Lease Property and the Cone Jalmat-Yates Pool Unit (Cone Unit). After considering Cone's response to the NOPV, the ERA issued a Proposed Remedial Order (PRO) on May 31, 1979. The PRO tentatively found that Cone had sold crude oil produced from these properties in excess of the lawful ceiling prices. On March 25, 1983, the OHA issued a Remedial Order (RO) adopting the ERA's findings in the PRO. On October 31, 1985, the Federal Energy Regulatory Commission (FERC) affirmed the OHA's determinations concerning the Cone Unit but reversed the RO concerning the Eubanks Lease property

and remanded the RO to the OHA. On March 24, 1986, the OHA issue a Supplementary Order (SO) which reduced the alleged overcharges from the Eubanks Lease Property. Cone appealed the SO, which was vacated by the administrative law judge (ALJ) on May 12, 1986. The FERC vacated the certification on June 17, 1986, and remanded the case to the ALJ. On July 23, 1986, the FERC issued an Order Clarifying Prior Decision and Dismissing Appeal. In this Order, the FERC vacated its June 17, 1986, order and found that it had properly reversed OHA's findings of overcharges from the Eubanks Lease Property in its October 31, 1985, Order. On May 14, 1993, Cone and the DOE entered into a Consent Order, wherein Cone tendered a cashier's check for $610,000.00 in settlement of all claims resulting from the March 25, 1983, RO. These funds are being held in an interest-bearing escrow account maintained at the Department of the Treasury pending a determination regarding their proper distribution.

II. Jurisdiction and Authority

The subpart V regulations set forth general guidelines which may be used by the OHA in formulating and implementing a plan of distribution of funds received as a result of an enforcement proceeding. The DOE policy is to use the subpart V process to distribute such funds. For a more detailed discussion of subpart V and the authority of the OHA to fashion procedures to distribute refunds, see Petroleum Overcharge Distribution and Restitution Act of 1986, 15 U.S.C. 4501–07, *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vicker's*).

We have considered the ERA's petition that we implement a subpart V proceeding with respect to the Cone Consent Order fund and have determined that such a proceeding is appropriate. This Proposed Decision and Order sets forth the OHA's tentative plan to distribute this fund.

III. Proposed Refund Procedures

A. Crude Oil Refund Policy

We propose to distribute the funds obtained with the Cone Consent Order in accordance with the DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases, 51 FR 27899 (August 4, 1986) (The MSRP). The MSRP was issued as a result of a court-approved Settlement Agreement *In re: The Department of Energy Stripper Well Exemption Litigation*, 653 F.Supp. 108 (D. Kan.), 6 Fed. Energy Guidelines ¶ 90,509 (1986) (the Stripper Well Settlement Agreement). The MSRP establishes that 40 percent of the crude oil funds will be remitted to the federal government, another 40 percent to the states, and up to 20 percent may be initially reserved for payment of claims by injured parties. The MSRP also specifies that any monies remaining after all valid claims by injured purchasers are paid be disbursed to the federal government and the states in equal amounts.

The OHA has utilized the MSRP in all subpart V proceedings involving alleged crude oil violations. See Order Implementing the MSRP, 51 FR 29689 (August 20, 1986). This Order provided a period of 30 days for filing of comments or objections to our proposed use of the MSRP as the groundwork for evaluating claims in crude oil refund proceedings. Following this period, the OHA issued a Notice evaluating the numerous comments which it had received pursuant to the Order Implementing the MSRP. This notice was published at 52 FR 11737 (April 10, 1987) (the April 10 Notice).

The April 10 Notice contained guidance to assist potential claimants wishing to file refund applications for crude oil monies under the subpart V regulations. Generally, all claimants would be required to (1) document their purchase volumes of petroleum products during the August 19, 1973 through January 27, 1981 crude oil price control period, and (2) show that they were injured by the alleged crude oil overcharges. We also specified that end-users of petroleum products whose business were unrelated to the petroleum industry will be presumed to have been injured by the alleged crude oil overcharges. End-users, therefore, need only submit documentation of their purchase volumes. *See City of Columbus, Georgia*, 16 DOE ¶ 85,550 (1987). Additionally, we stated that we would calculate crude oil refunds on a per gallon (or volumetric) basis, which we obtained by dividing the crude oil refund pool by the total consumption of petroleum products in the United States during the crude oil price control period. The OHA has adopted the refund procedures outlined in the April 10 Notice in numerous cases. *See, e.g. Shell Oil Co.*, 17 DOE ¶ 85,204 (1988) (*Shell*); *Mountain Fuel Supply Co.*, 14 DOE ¶ 85,475 (1986) (*Mountain Fuel*).

B. Refund Claims

We propose to adopt the DOE's standard crude oil refund procedures to distribute the monies in the Cone Consent Order fund. We have chosen to initially reserve 20 percent of the fund, plus accrued interest, for direct refunds to claimants in order to ensure that sufficient funds will be available for injured parties.

The OHA will evaluate crude oil refund claims in a manner similar to that used in subpart V proceedings to evaluate claims based on alleged overcharges. *See Mountain Fuel* 14 DOE at 88,869. Under these procedures, claimants will be required to document their purchase volumes of petroleum products and prove that they were injured as a result of the alleged overcharges.

We will adopt a presumption that the crude oil overcharges were absorbed, rather than passed on, by applicants which were (1) end-users of petroleum products, (2) unrelated to the petroleum industry, and (3) not subject to the regulations promulgated under the Emergency Petroleum Allocation Act of 1973 (EPAA), 15 U.S.C. 751–760h. Under this presumption, end-user claimants need not submit documentation to show injury, and may become eligible for a refund by simply documenting their purchase volumes. *See Shell*, 17 DOE at 88,406.

Petroleum retailer, refiner, and reseller applicants must submit detailed documentation of injury. They may not rely upon the injury presumptions utilized in some refined products refund cases. *Id.* These applicants may, however, use econometric evidence of the type found in the *OHA Report on Stripper Well Overcharges*, 6 Fed. Energy Guidelines ¶ 90,507 (1985). *See also* Petroleum Overcharge Distribution and Restitution Act section 3003(b)(2) codified at 15 U.S.C. 4502(b)(2). If a claimant has executed and submitted a valid waiver pursuant to one of the escrows established by the Stripper Well Agreement, it has waived its rights to file an application for subpart V crude oil refund monies. *See Mid-America Dairymen* v. *Herrington*, 878 F.2d 1448 (Temp. Emer. Ct. App.), 3 Fed. Energy Guidelines ¶ 26,617 (1989); *In re: Department of Energy Stripper Well Exemption Litigation*, 707 F. Supp. 1267 (D. Kan.), 3 Fed. Energy Guidelines ¶ 26,613 (1987).

As we have stated in prior Decisions, a crude oil refund applicant need only submit one application for its share of all available crude oil overcharge funds. *See e.g. A. Tarricone, Inc.*, 15 DOE ¶ 85,495 (1987). A party that has already submitted a claim in any other crude oil refund need not file another claim. The prior application will be deemed to be held in all crude oil refund proceedings finalized to date. The DOE has established June 30, 1994, as the final deadline for filing an Application for Refund from the crude oil funds. *See* 58 FR 26,318 (May 3, 1993). It is the policy of the DOE to pay all crude oil refund claims at the rate of $.0008 per gallon. While we anticipate that the applicants that filed their claims before June 30, 1988 will receive a supplemental refund payment, we will decide in the future whether claimants that filed later applications should receive additional refunds. *See e.g. Seneca Oil Co.*, 21 DOE ¶ 85,327 (1991). Notice of any additional amounts available in the future will be published in the **Federal Register**.

C. Payments to the Federal Government and the States

Under the terms of the MSRP, we propose that the remaining eighty percent of the alleged crude oil overcharge amounts subject to this Proposed Decision, plus accrued interest, should be disbursed in equal shares to the states and federal government for indirect restitution. Refunds to the states will be in proportion to the consumption of petroleum products in each state during the period of price controls. The share or ratio of the funds which each state will receive is contained in Exhibit H of the Stripper Well Settlement Agreement 6 Fed. Energy Guidelines ¶ 90,509 at 90,687. When disbursed, these funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Stripper Well Settlement Agreement.

It Is Therefore Ordered That: The refund amount remitted to the Department of Energy by J.R. Cone pursuant to the Consent Order entered into on May 14, 1993, will be distributed in accordance with the foregoing Decision.

BILLING CODE 6450–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4819–1]

Control Techniques Guidelines Document: Batch Process

AGENCY: Environmental Protection Agency (EPA).

ACTION: Release of draft control techniques guidelines (CTG) document for public review.

SUMMARY: A draft CTG document for control of volatile organic compound (VOC) emissions from batch processes is available for public review and comment. This information document has been prepared to assist States in analyzing and determining reasonably available control technology (RACT) for stationary sources of VOC emissions located within ozone national ambient air quality standard nonattainment areas. The draft document recommends RACT for seven industries: Plastic Materials and Resins (Standard Industrial Classification [SIC] 2821), Pharmaceutical Preparations (SIC 2834), Medicinal Chemicals and Botanical Products (SIC 2833), Gum and Wood Chemicals (SIC 2861), Cyclic Crudes and Intermediates (SIC 2865), Industrial Organic Chemicals (SIC 2869), and Agricultural Chemicals (SIC 2879). The control techniques described in this CTG are universal and can be used to reduce VOC emissions from batch processing operations in other industries.

DATES: *Comments.* Several aspects of the document regarding applicability calculations and implementation are complex. Comments on these aspects are especially desired. Comments must be received on or before February 28, 1994.

ADDRESSES: Comments should be submitted (in duplicate if possible) to: Randy McDonald, (919) 541–5402, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711.

Copies of the draft CTG may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, N.C. 27711, telephone number (919) 541–2777.

Project File. To make an appointment to view the project file, contact Ms. Marguerite Thweatt, (919) 541–5607, Emission Standards Division (MD–13), U. S. Environmental Protection Agency, Research Triangle Park, NC 27711.

FOR FURTHER INFORMATION CONTACT: Mr. Randy McDonald, (919) 541–5402, Emissions Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711.

SUPPLEMENTARY INFORMATION: Under the Clean Air Act as amended (1990 Amendments), State implementation plans (SIP's) for ozone nonattainment areas must be revised to require RACT for control of VOC emissions from sources for which EPA has already published a CTG or for which it will publish a CTG between the date the 1990 Amendments were enacted and the date an area achieves attainment status. **Federal Register** notice 44 FR 53761 (September 17, 1979) defines RACT as the "the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering the technological and economic feasibility."

The CTG's review current knowledge and data concerning the technology and costs of various emissions control techniques. The CTG's are intended to provide State and local air pollution authorities with an information base for proceeding with their own analyses of RACT to meet statutory requirements.

Each CTG contains a "presumptive norm" for RACT for a specific source category, based on the EPA's evaluation of the capabilities and problems general to that category. Where applicable, EPA recommends that States adopt requirements consistent with the presumptive norm. However, the presumptive norm is only a recommendation. States may choose to develop their own RACT requirements on a case-by-case basis, considering the emission reductions needed to obtain achievement of the national ambient air quality standards and economic and technical circumstances of the individual source.

This CTG recommends a RACT presumptive norm for the control of VOC emissions from batch processes. Each of the industries addressed in this CTG use batch processing steps in manufacturing their products. Many of these steps involve use of organic solvents or other volatile organic liquids, and are a source of VOC emissions. The sources, mechanisms, and control of these VOC emissions are described in the CTG.

Under Executive Order (E.O.) 12291, the EPA must judge whether a rule is "major" and, therefore, subject to the requirement of a regulatory impact analysis. This CTG document is not "rulemaking;" rather it provides information to States to aid them in developing rules. However, this **Federal Register** notice and the draft CTG were submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA and any EPA responses to those comments will be included in the project file. This file is available for public inspection at the EPA's office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, which is listed in the **ADDRESSES** section of this notice.

Dated: December 15, 1993.

Ann E. Goode,

Acting Assistant Administrator for Air and Radiation.

BILLING CODE 6560–50–P

[AO-FRL-4818-9]

Control Techniques Guideline Document: Industrial Wastewater

AGENCY: Environmental Protection Agency (EPA).

ACTION: Release of a draft control techniques guideline (CTG) document for public review.

SUMMARY: The EPA is announcing the availability of a draft CTG document for control of volatile organic compound (VOC) emissions from the collection and treatment of industrial wastewater. This CTG document has been prepared to assist States in analyzing and determining reasonably available control technology (RACT) for stationary sources of VOC emissions located within ozone national ambient air quality standard nonattainment areas. The draft document recommends RACT for VOC wastewater emissions from four industries: The organic chemicals, plastics, and synthetic fibers (OCPSF) industry; the pesticides industry; the pharmaceuticals industry; and the hazardous waste treatment, storage, and disposal facilities (TSDF) industry. The draft CTG contains information on two other industries: pulp and paper industry and petroleum refinery industry, but does not recommend RACT for them due to other regulatory actions that will address them.

The control strategy and national impact analysis in this document is intended to reflect the approach taken in the wastewater portion of the proposed Hazardous Organic NESHAP (HON) even though the HON is addressing hazardous air pollutant (HAP) emissions and the CTG is addressing VOC emissions in nonattainment areas. The HON will set maximum achievable control technology (MACT) standards for HAP emissions from wastewater generated in the synthetic organic chemical manufacturing industry (SOCMI), which is a subset of the OCPSF industry. Because the technical basis and requirements of the wastewater portion of the HON have been subject to ongoing discussions and revisions, and may be modified further based on public comments, there may be some inconsistencies between this document and the HON; however, any revisions to the HON wastewater standards will be incorporated into the final CTG before it is published. The Agency's intent is that the timing and requirements of the final CTG, the HON and other MACT wastewater standards be complementary.

DATES: *Comments.* Comments must be received on or before February 28, 1994.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate, if possible) to: Ms. Elaine Manning, ATTN: Industrial Wastewater Comments, U.S. Environmental Protection Agency, Emission Standards Division (MD–13), Research Triangle Park, North Carolina 27711.

Control Techniques Guideline. Copies of the draft CTG, document EPA–453/D–93–056, may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777.

Project File. To make an appointment to view the project file, contact Ms. Jolynn Collins, (919) 541–5671, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

FOR FURTHER INFORMATION CONTACT: Ms. Elaine Manning, (919) 541–5499, Emission Standards Division (MD–13), U. S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: Under the Clean Air Act (CAA) Amendments of 1990, State implementation plans (SIP's) for ozone nonattainment areas must be revised to require RACT for control of VOC emissions from sources for which EPA has already published a CTG or for which it will publish a CTG between the date the Amendments were enacted and the date an area achieves attainment status. **Federal Register** notice 44 FR 53761 (September 17, 1979) defines RACT as "the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering the technological and economic feasibility."

The CTG's review current knowledge and data concerning the technology and costs of various emissions control techniques. The CTG's are intended to provide State and local air pollution authorities with an information base for proceeding with their own analyses of RACT to meet statutory requirements.

Each CTG contains a "presumptive norm" for RACT for a specific source category, based on the EPA's evaluation of the capabilities and problems general to that category. Where applicable, EPA recommends that States adopt requirements consistent with the presumptive norm. However, the presumptive norm is only a recommendation. States may choose to develop their own RACT requirements on a case-by-case basis, considering the emission reductions needed to obtain achievement of the national ambient air quality standards and economic and technical circumstances of the individual source.

This CTG recommends a RACT presumptive norm for the control of VOC emissions from the collection and treatment of industrial wastewater. Each of the industries addressed in this CTG generates large quantities of wastewater containing organic compounds. Generally, this wastewater is collected and treated to reduce the organic compound loading in the discharged water stream. However, during collection and treatment, the wastewater containing organic compounds generally contacts ambient air, creating a source of VOC emissions. The sources, mechanisms, and control of these VOC emissions are described in the CTG.

The Agency requests public comments on this draft CTG document. Comments are specifically requested on the cost effectiveness considerations in the development of the recommended RACT option. As shown in Table 6–1 of the draft CTG document, the national cost effectiveness of the recommended RACT option for all the industries is 480 dollars per megagram and the incremental cost effectiveness beyond the next less stringent option is 1400 dollars per megagram of VOC's controlled. Comments are requested on specific situations where the cost effectiveness of the recommended RACT option would differ significantly from these estimates and ways the CTG could achieve emissions reductions at lower costs.

Under Executive Order (E.O.) 12291, the EPA must judge whether a rule is "major" and therefore subject to the requirement of a regulatory impact analysis. This CTG document is not "rulemaking," rather it provides information to States to aid them in developing rules. This **Federal Register** notice and the draft CTG were submitted to the Office of Management and Budget (OMB) for review as required by E.O. 12291. Any comments from OMB to EPA and any EPA responses to those comments will be included in the project file. This file is available for public inspection at the EPA's Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, which is listed in the **ADDRESSES** section of this notice.

Dated: December 15, 1993.

Ann E. Goode,

Acting Assistant Administrator, Office of Air and Radiation.

Underground Injection Control Program; Hazardous Waste Disposal Injection Restrictions; Petition for Exemption-Class I Hazardous Waste Injection; Morton International, Inc.

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on petition modification.

SUMMARY: Notice is hereby given that a modification to an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Morton International, Inc. This modification authorizes use of a new injection well at the Moss Point, Mississippi facility. As required at 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows Morton International, Inc. to inject the specific restricted hazardous waste identified in the petition into the Class I hazardous waste well authorized by the modified petition until September 30, 2000. As required at 40 CFR 124.10, a public notice was issued on August 19, 1993. A single response was received before the close of the comment period on October 3, 1993. The concerns addressed in that response did not pertain to the proposed modification, hence a public hearing was not held. This decision constitutes final Agency action and there is no Administrative appeal.

DATED: This action is effective as of November 19, 1993.

ADDRESSES: Copies of the modified petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region IV, Water Management Division, Ground Water Protection Branch, 345 Courtland Street, NE., Atlanta, Georgia 30365.

FOR FURTHER INFORMATION CONTACT: Thomas J. Hansen, Chief, Underground Injection Control Section, EPA Region IV, telephone (404) 347–3379.

Dated: December 13, 1993.

Patrick M. Tobin,

Acting Regional Administrator, Region IV.

BILLING CODE 6560–50–P

[OPP–180909; FRL 4749–3]

Receipt of Application for Emergency Exemption to use Fenoxycarb; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Washington Department of Agriculture (hereafter referred to as the "Applicant") for use of the pesticide fenoxycarb (CAS 72490–01–8) to control pear psylla *Cacopsylla pyricola* on up to 25,000 acres of pears. The Applicant proposes the first food use of an active ingredient; therefore, in accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before January 13, 1994.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP–180909," should be submitted by mail to: Public Docket and Freedom of Information Section, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460. In person, bring comments to: Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1128, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Andrea Beard, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460. Office location and telephone number: 6th Floor, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA, (703) 308–8791.

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of the insecticide, fenoxycarb, manufactured as Fenoxycarb 25 WP, by Cibe-Geigy Corporation, to control pear psylla, on up to 25,000 acres of pears. Information in accordance with 40 CFR part 166 was submitted as part of this request.

The Applicant states that pear psylla is a major, chronic pest of all Washington pear orchards. If the pest is left uncontrolled, it will cause dramatic yield decreases, and eventual tree debilitation. The pear psylla causes injury by the copious amounts of honeydew which are secreted by the feeding nymphs. Honeydew on the fruit causes deformed fruit and russeting, major quality problems which cause downgrading of fruit and increased cullage. In addition, the honeydew causes secondary problems with black sooty mold on the fruit. The pear psylla also causes damage by injecting a toxin into the tree during the feeding process, which, in the long run, is debilitating and reduces vigor and, ultimately, yield. Pear psylla overwinter as adults in the trees. Dormant spraying is necessary to reduce the overwintering adult population before they lay eggs. The only effective winter spray materials for some years were the synthetic pyrethroids, permethrin and fenvalerate. When widespread resistance to these materials became evident in the psylla population by 1987–88, the Applicant states that cyfluthrin was used under section 18 exemptions in 1988–92, and was found to be efficacious.

In 1993 (last season), the Applicant first requested this use of fenoxycarb, claiming that failure of cyfluthrin had been demonstrated, indicating the development of pear psylla populations which are resistant to this previously effective material. However, the toxicology data available at that time for fenoxycarb did not support use of this material, and the request was withdrawn by the Applicant. The Applicant again used cyfluthrin last season under section 18, for this pest, but claims that much of the pear psylla populations in north central Washington are now resistant to cyfluthrin. The Applicant is therefore requesting the use of fenoxycarb, and claims that field trials have

demonstrated that this material provides excellent control of pear psylla in pears.

The Applicant wishes to treat up to 25,000 acres of pear trees using up to 6,250 pounds of active ingredient. Up to two applications would be made per growing season, at a maximum rate of 2 oz. active ingredient (8 oz. product) per acre, diluted in water to make a minimum spray volume of 50-400 gallons per acre. Application of fenoxycarb would not be allowed by air or through chemigation equipment.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing the first food use of an active ingredient. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Washington Department of Agriculture.

Receipt of Applications for Emergency Exemptions To Use Propazine; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received specific exemption requests from the New Mexico and the Texas Departments of Agriculture (hereafter referred to as the "Applicants") to use the pesticide propazine (CAS 139–40–2) to treat up to 50,000 and 1,823,000 acres of sorghum, respectively, to control pigweed. The Applicants propose the use of a new (unregistered) chemical; therefore, in accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before January 13, 1994.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP–180910," should be submitted by mail to: Public Docket and Freedom of Information Section, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1132, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Andrea Beard, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460. Office location and telephone number: Floor 6, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA, (703) 308–8791.

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a state agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicants have requested the Administrator to issue specific exemptions for the use of propazine on sorghum to control pigweed. Information in accordance with 40 CFR part 166 was submitted as part of this request.

Sorghum is grown as a rotational crop with cotton and wheat, in order to comply with the soil conservation requirements. Propazine, which was formerly registered for use on sorghum, was voluntarily canceled by the former Registrant, who did not wish to support its re-registration. The Applicants claim that this has left sorghum growers in most of Texas and New Mexico with no pre-emergent herbicides that will adequately control certain broadleaf weeds, especially pigweed. Until recently, growers have been using up existing stocks of propazine. The Applicants state that other available herbicides have serious limitations on their use, making them unsuitable for control of pigweed in sorghum. Although the original Registrant of propazine has decided not to support this chemical through re-registration, another company has committed to support the data requirements for this use. Propazine was once registered for this use, but has now been voluntarily canceled and is therefore considered to be a new chemical.

The Applicants state that, because growers have been using existing stocks of propazine since the time of its voluntary cancellation, yields have not shown a decrease. However, this is the first season where most growers have depleted their stocks of propazine, and the Applicants claim that significant economic losses will occur without the availability of propazine.

The Applicants propose to apply propazine at a maximum rate of 1.2 lbs of active ingredient (a.i.), (2.4 pts. of product) per acre, by ground or air, with a maximum of one application per crop growing season. Therefore, use under these exemptions could potentially amount to a maximum total of 60,000 lbs. of active ingredient (15,000 gal. of product) in New Mexico, and 2,187,600 lbs. of active ingredient (546,900 gal. of product) in Texas. This is the first time that New Mexico has applied for this use of propazine on sorghum, and the second time for Texas. Texas was issued an exemption for this use for last growing season. This notice does not constitute a decision by EPA on the applications themselves. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide). Such notice provides for opportunity for public comment on the application. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemptions requested by the New Mexico and Texas Departments of Agriculture.

[OPP–180914; FRL 4750–8]

Receipt of Application for Emergency Exemption To Use Pyrithiobac-Sodium; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Mississippi Department of Agriculture and Commerce (hereafter referred to as the "Applicant") for use of the pesticide pyrithiobac-sodium to control common cocklebur on up to 450,000 acres of cotton in Mississippi. In accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before January 13, 1994.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP–180914," should be submitted by mail to: Public Response and Human Resource Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460. In person, bring comments to: Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Susan Stanton, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460. Office location and telephone number: 6th Floor, Crystal Station I, 2800 Jefferson Davis Highway, Arlington, VA 22202, (703) 308—8327.

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for use of the herbicide, pyrithiobac-sodium, available as Staple Herbicide from DuPont Agricultural Products, to control common cocklebur on up to 450,000 acres of cotton in Mississippi. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, dense populations of common cocklebur have the potential to cause substantial yield and economic losses in cotton. The herbicides which have historically been used to control economically damaging infestations of cocklebur are the organic arsenicals, DSMA and MSMA. In 1992, arsenical-resistant cocklebur populations were documented in a number of Mississippi counties. Although there are several other registered herbicides which can be used for cocklebur control in cotton, including both pre-emergent (floumetron, clomazone, diuron and norflurazon) and post-emergent (lactofen) herbicides, the Applicant claims that none of these is as effective at controlling cocklebur as pyrithiobac-sodium.

Under the proposed exemption, a single ground or aerial application of Staple Herbicide would be made at 1.2 ounces of product (1.0 ounce active ingredient (a.i.) per acre. No applications would be made within 45 days of harvest. A maximum of 33,750 pounds of product (28,688 pounds a.i.) would be needed to treat up to 450,000 acres of cotton.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide) [40 CFR 166.24 (a)(1)]. Pyrithiobac-sodium is a new chemical. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Mississippi Department of Agriculture and Commerce.

Consep Membranes, Inc.; Extension of an Exemption From Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has extended the temporary exemption from the requirement of a tolerance for the combined residues of the pheromone codlure, (*E,E*)-8,10-Dodecadien-1-o1, in or on all raw agricultural commodities when applied to the branches of trees via a membrane type dispenser.

DATES: This temporary exemption from the requirement of a tolerance expires December 30, 1994.

FOR FURTHER INFORMATION CONTACT: By mail: Phil Hutton, Product Manager (PM) 18, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Office location and telephone number: Rm. 213, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703–305–7690).

SUPPLEMENTARY INFORMATION: EPA issued a notice that was published in the **Federal Register** of March 10, 1993 (58 FR 13263) that a temporary exemption from the requirement of a tolerance had been extended for the combined residues of the pheromone codlure, (*E,E*)-8,10-Dodecadien-1-o1, in or on all raw agricultural commodities when applied to the branches of trees via membrane type dispenser. This exemption from the requirement of a tolerance was established in response to

a pesticide petition (PP) 1G3964, submitted by Consep Membranes, Inc., c/o Gary Clark, Manager of Regulatory Affairs, 213 SW., Columbia St., Bend, Oregon 97702–1013.

The company has requested a 1-year extension of the temporary tolerance to permit the continued marketing of the above raw agricultural commodities when treated in accordance with the provisions of experimental use permit 56336–EUP–2, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that the exemption from the requirement of a tolerance will protect the public health. Therefore, the temporary exemption from the requirement of a tolerance has been extended on the condition that the pesticides be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredients to be use must not exceed the quantity authorized by the experimental use permit.

2. Consep Membranes, Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary exemption from the requirement of a tolerance expires December 30, 1994. Residues remaining in or on all the raw agricultural commodities after this expiration date will not be considered actionable if the pesticides are legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary exemption from the requirement of a tolerance. This temporary exemption from the requirement of a tolerance may be revoked if the experimental use premit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirement of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 [46 FR 24950].

Authority: 21 U.S.C. 346a(j).

Title: Expanded Interconnection with Local Telephone Company Facilities for Interstate Switched Transport Services

Expiration Date: 11/30/96

Estimated Annual Burden: 1996 total hours; 124.75 hours per response.

Description: In the Second Report and Order and Third Further Notice of Proposed Rulemaking, in the Expanded Interconnection proceeding, CC Docket No. 91–141, the Commission required Tier 1 local exchange carriers (LECs) to provide expanded opportunities for third-party interconnection with their interstate switched transport facilities. The Commission concluded that the LECs should be required to provide certain cost support to justify the rate levels for the tariff charges to be paid by interconnectors for expanded interconnection. The Commission required the price cap LECs to provide cost support for the connection charges using the same methodologies employed to support new services under the price cap rules. The Commission required the LECs to develop and justify consistent methodologies for deriving the direct cost of providing similar types of offerings, including expanded interconnection services covered by the connection charge elements. The Commission also required the LECs to justify any deviations from uniform overhead loadings that they propose for pricing connection charges.

Federal Communications Commission.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; A.P. Moller—Maersk Line, et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–011102–019.

Title: U.S. Atlantic & Gulf/Western Mediterranean Rate Agreement.

Parties:

A.P. Moller-Maersk Line.
Evergreen Marine Corporation (Taiwan) Ltd.
Italia di Navigazione, S.p.A.
Lykes Bros. Steamship Co., Inc
Nedlloyd Lijnen B.V.
P&O Containers Limited.
Sea-Land Service, Inc.
Zim Israel Navigation Company, Ltd.

Synopsis: The proposed amendment will permit the Agreement members to take independent action on rate or service items that are exempted from the tariff filing requirements of section 8 of the Shipping Act on or after June 30, 1994.

Agreement No.: 232–011444.

Title: Frontier Liner Services/Kirk Line Agreement.

Parties:

Frontiner Liner Services.
Kirk Line Ltda.

Synopsis: The proposed Agreement authorizes the parties to charter space to each other and rationalize sailing in the trade between U.S. Florida ports and inland and coastal points served via Florida on the one hand and, on the other hand, ports of Aruba, Bonaire, Curacao and Atlantic Coast ports of Columbia and inland and coastal points in Colombia via Colombian Atlantic Coast ports.

Dated: December 22, 1993.

By order of the Federal Maritime Commission.

Ronald D. Murphy,

Assistant Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

First Bancorporation of Ohio, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 20, 1994.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. First Bancorporation of Ohio, Akron, Ohio; to acquire 100 percent of the voting shares of Peoples Savings Bank, FSB, Ashtabula, Ohio, which will in turn convert into a national bank to be named Peoples Bank, National Association.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Adamsville Bancshares, Inc., Adamsville, Tennessee; to acquire 100 percent of the voting shares of Lewis County Bank, Hohenwald, Tennessee.

2. Boatmen's Bancshares, Inc., St. Louis, Missouri; to acquire 100 percent of the voting shares of Woodland Bancorp, Inc., Tulsa, Oklahoma, and thereby indirectly acquire Woodland Bank, Tulsa, Oklahoma.

3. Boatmen's Oklahoma, Inc., St. Louis, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Boatmen's First National Bank of Oklahoma, Oklahoma City, Oklahoma.

4. First Tennessee National Corporation, Memphis, Tennessee; to acquire at least 90 percent of the voting shares of Cleveland Bank and Trust Company, Cleveland, Tennessee.

C. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Community First Bankshares, Inc., Fargo, North Dakota; to acquire 100 percent of the voting shares of Ada BancShares, Inc., Ada, Minnesota, and thereby indirectly acquire The Ada National Bank, Ada, Minnesota.

2. First Bank System, Inc., Minneapolis, Minnesota; to acquire 100 percent of the voting shares of Boulevard Bancorp, Inc., Chicago, Illinois, and thereby indirectly acquire Boulevard Bank National Association, Chicago, Illinois; National Security Bank of Chicago, Chicago, Illinois; First National Bank of Des Plaines, Des Plaines, Illinois; and Citizens National Bank of Downers Grove, Downers Grove, Illinois. First Bank System, Inc., Minneapolis, Minnesota; has also applied to acquire 19.9 percent of the voting shares of Boulevard Bancorp, Inc., Chicago, Illinois.

D. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Southeast Kansas Bancshares, Inc., Girard, Kansas; to become a bank holding company by acquiring 99 percent of the voting shares of Prescott State Bank Holding Company, Prescott, Kansas, and thereby indirectly acquire Prescott State Bank, Prescott, Kansas, and to acquire 86.59 percent of the voting shares of Exchange State Bank, St. Paul, Minnesota. **Comments on this application must be received by January 13, 1994.**

E. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. First Marshall Corporation, Marshall, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of East Texas National Bank of Marshall, Marshall, Texas.

2. Southern Bancshares, Inc., Houston, Texas; to acquire 100 percent of the voting shares of First State Bank of Brazoria, Brazoria, Texas.

Board of Governors of the Federal Reserve System, December 21, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 93-31722 Filed 12-28-93; 8:45 am]

BILLING CODE 6210-01-F

First Chicago Corporation; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of

fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 17, 1994.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First Chicago Corporation, Chicago, Illinois; to engage *de novo*, through its subsidiary, First Chicago Leasing Corporation, Chicago, Illinois, in arranging and investing in entities for the financing of low-income housing eligible for Federal income tax credits under section 42 of the Internal Revenue Code, and providing advice to customers in connection with the arranging of such entities pursuant to § 225.25(b)(6) of the Regulation Y.
